Index Will Take Pictures Here Friday

PRIZES OFFERED IN CHILD PHOTOGRAPH CONTEST

The time is almost here for the opening of this newspaper's Big Child Photograph Contest and we are urging all of our readers to have their children ready for the big day.

Winston B. Lucas of Irving, Texas will be in O'Donnell on Friday October 23 at the index office from 10 a. m. to 6 p. m. for the purpose of taking pictures in this vicinity.

The photographs will be made absolutely free of charge and there is no charge for their publication in The Index. Proofs will be shown and from these you may select the picture of your child which you would like to appear in this newspaper.

There is no age limit on the contest and every child's photograph in this section is wanted so that they may all appear in the Index. However it is necessary that all pictures must be of uniform size so they must be made by Winston B. Lucas on Friday Oct. 23rd 10 a. m. to 6 p. m.

Do not wait until little Mary gets married or baby brother is elected to some political office to see their pictures in the paper - make plans now to have these photographs made on Friday, Oct. 23rd. Tell your friends and neighbors - the more, the merrier.

S. S. News

"Make sure that your employer reports your cash wages correctly," was the advice given to domestic workers by John G. Hutton, Manager of the Lubbock Social Security District Office. Mr. Hutton pointed out that social security reports on household workers are due in October for the three month calendar quarter which ended September 30th.

Friday the Eagles play at Plains for the second conference game. Plains is rated as the top Class A team in the state and is a odds-on bet to win district. Sundown is nearly as good as Plains with the best team seen here in recent years. Stanton also should be included in one of the better teams this year. A Freshman Team?

Coaches Herrin and Brown are reportedly taking a new look at the Eagle team and next Friday night at Plains there may be several new faces on the "A" team. After a listless first half which saw Sundown run in the B team after a 34 point lead, Coach Herrin played most of his reserve B team in unlimited substituting and fans saw a good game. The first half was marred for O'Donnell by fumbles, bumbles and listless defense on part of some. Playing their usual good game on the line were John Crutcher and Larry James. Crutcher has matured into a good lineman for a sophomore. Our prediction is that the Eagle team will henceforth have a team that is trying and certainly the freshmen and sophomores have fine material. A great natural athlete is a freshman name of Fernando Lopez. He is a rising star - watch him mature.

NEW MARRIAGE LAW
 Effective Thursday, Oct. 15th a new Texas law goes into effect on issuance of marriage licenses to parties under age — that is a female under 18 years of age or a male under 21 years of age, according to County Clerk C. W. Roberts. The new law, H B 48 passed by the recent 56th Legislature, provides that if either party, or both, is under these ages, applications for a marriage license must be made three days before the license can be issued. It provides that a parent or guardian must accompany the under-age applicant for a marriage license and give his or her consent or the under-age applicant for a marriage license may present an acknowledged doctor's certificate

stating that such parent is not able to accompany the couple, together with an acknowledged statement of consent from a parent or guardian. Under certain conditions, the county judge may approve the marriage of underage parties. Others making application for a marriage license may present birth certificates, poll tax receipts, driver's license, etc., and if the clerk is thereby satisfied that the applicant is of age and otherwise qualified, he may then issue a marriage license.

Lana, Auburn and Oregon wool-pod are three fairly new vetch introductions. There is usually an upsurge of home fires during the heating season. Cleaning, inspection and adjustment of all kinds of heating apparatus should be done now. One of the most destructive cotton diseases in Texas is cotton root rot. Conditions this year have been favorable for its development and damage is widespread. A new publication, MP 361 "Root Rot Losses of Cotton Can Be Reduced" are available at offices of local county agents. Unnecessary fire hazards around the farm annually account for a loss of nearly 800 lives and over 156 million dollars in property damage.

Average realized net income farm in Texas amounted to \$1,100 in 1958 compared with \$1,157. Texas farm operators 17th among the states in net income per farm. Beef cattle in shaded lots gained faster and made more omical gains than those in ed lots.

HERE'S WHAT MAKES THE **CORVAIR** REVOLUTIONARY

Short and sweet! Engine's in the rear—where it belongs in a compact car. With more weight on rear wheels, you get extra road gripping traction for cornering and driving on ice, mud or snow. Also, by avoiding nose-heaviness of front-engine compact cars, Corvair handles easier, brakes better, rides smoother. Styling of both 4-door models is clean and uncluttered . . . as fresh and functional as modern architecture.

Unipack Power Team
 Engine, transmission and drive gears are neatly wrapped in one lightweight package. Takes less space, leaves you more.

UNITRUT BODY BY FISHER
 Body and frame are combined into a single rigidly constructed unit that reduces Corvair's weight, enlarges its passenger space.

Practically FLAT FLOOR

 Corvair is America's only compact car with a virtually flat floor that gives you full 6-passenger comfort. For extra space, folding rear seat* converts easily to make room for 17.5 cu. ft. of cargo. *Optional at extra cost.

TRUNK'S UP FRONT
 Lots of luggage space under the hood, where it's convenient for groceries, packages.

NEARLY 3 FEET SHORTER
 Corvair's almost 5 inches lower, 1,300 pounds lighter, too. Its compact size makes it a joy to jockey through traffic, a pleasure to park. No need for power assists.

AIR COOLED

You never have to fuss with antifreeze. Turbo-Air 6 warms up quicker, with less wear on parts. Air-plane-type heater* goes to work almost instantly. *Optional at extra cost.

Revolutionary Rear Engine

works small miracles with mileage. It's the world's first production 6 with the ultra-smooth power of horizontally opposed pistons.

4-Wheel Independent Suspension

Springs at each wheel cushion bumps independently of each other for a ride that rivals much costlier cars.

...and the most practical thing of all is

Using the high energy feed formula now in practical use, it is possible to produce a broiler weighing more than three pounds in eight weeks on less than six pounds of feed. This is possible if no disease outbreaks occur, if the chick is available that is capable of obtaining such standards and if proper management procedures are followed.

Average realized net income per farm in Texas amounted to \$3,430 in 1958 compared with \$1,774 in 1957. Texas farm operators ranked 17th among the states in realized net income per farm.

Beef cattle in shaded feedlots gained faster and made more economic gains than those in unshaded lots.

The drop in hog prices emphasizes the need for swine producers to speed up their shift to meat type hogs. Even with lower prices, producers of more desirable types are getting market premiums for their animals.

Present price trends and conditions point to a slightly more favorable prices and profits for the egg producer during the next six months. Lana, Auburn and Oregon wooly-pod are three fairly new vetch introductions.

Unnecessary fire hazards around the farm annually account for a loss of nearly 800 lives and over 156 million dollars in property damage.

Barley ranks well below wheat and oats in acreage and farm value in Texas but has a dual value to growers as a grain crop and as a winter pasture for livestock. Large acreages are grown exclusively for winter pasture and grazed to maturity and all barley grown for grain in Texas is used for livestock feed.

Botulism, which most poultrymen call limberneck, generally occurs in the spring and summer months following rains. Poultry get the disease by eating decomposing food and animals, decaying vegetation covered by water or moldy

feed which has crusted on the surface. For prevention, you must move or withhold the material which might serve as a possible source. Of all farm animals, the dairy cow in milk production requires the greatest amount of water in proportion to her size. The amount of water she will drink depends on her size, her daily milk yield, the air temperature and humidity and the amount of water in the feed she eats. From 12 to 15 gallons per head is an average daily consumption.

**RAILROAD FEATHERBEDDING:
\$500,000,000 LOSS
TO THE NATION—INCLUDING YOU—EVERY YEAR**

Featherbedding on the railroads — pay for work not done or not needed — is costing the American people the shocking total of more than \$500,000,000 a year.

You pay for it every time you shop, because featherbedding costs are hidden in the price of everything you buy.

Obsolete union work rules, involving the railroad operating employees, are responsible for this gigantic burden. Right now, for instance, these rules require every diesel locomotive to carry a fireman — even though diesels have no fires to stoke, no boilers to tend.

The forthcoming negotiations between the railroads and the unions are urgently important to the whole nation.

In asking the unions to drop these featherbedding rules, all the railroads ask for is a fair day's work for a fair day's pay.

Barley ranks well below wheat and oats in acreage and farm value in Texas but has a dual value to growers as a grain crop and as a winter pasture for livestock. Large acreages are grown exclusively for winter pasture and grazed to maturity and all barley grown for grain in Texas is used for livestock feed.

Botulism, which most poultrymen call limberneck, generally occurs in the spring and summer months following rains. Poultry get the disease by eating decomposing food and animals, decaying vegetation covered by water or moldy feed which has crusted on the surface. For prevention, you must remove or withhold the material which might serve as a possible source.

Of all farm animals, the dairy cow in milk production requires the greatest amount of water in proportion to her size. The amount of water she will drink depends on her size, her daily milk yield, the air temperature and humidity and the amount of water in the feed she eats. From 12 to 15 gallons per head is an average daily consumption.

Using the high energy feed formulas now in practical use, it is possible to produce a broiler weighing more than three pounds in eight weeks on less than six pounds of feed. This is possible if no disease outbreaks occur, if the chick is available that is capable of obtaining such standards and if proper management procedures are followed.

PRIZES OFFERED IN CHILD PHOTOGRAPH CONTEST

The time is almost here for the opening of this newspaper's Big Child Photograph Contest and we are urging all of our readers to have their children ready for the big day.

Winston B. Lucas of Irving, Texas will be in O'Donnell on Friday October 23 at the index office from 10 a. m. to 6 p. m. for the purpose of taking pictures in this vicinity.

In addition to having their pictures printed in this newspaper, the children will be competing for \$20.00 in prizes which are being offered for the three best photographs made during the day.

The photographs will be made absolutely free of charge and there is no charge for their publication in the Index. Proofs will be shown and from these you may select the picture of your child which you would like to appear in this newspaper. If you wish extra photographs they may be purchased but no pur-

chase is necessary in order to have your child's picture printed in this newspaper or in order to compete for the prizes. It is entirely up to you, whether you buy pictures or not.

There is no age limit on the contest and every child's photograph in this section is wanted so that they may all appear in the Index. However it is necessary that all pictures must be of uniform size so they must be made by Winston B. Lucas on Friday Oct. 23rd 10 a. m. to 6 p. m.

Do not wait until little Mary gets married or baby brother is elected to some political office to see their pictures in the paper — make plans now to have these photographs made on Friday, Oct. 23rd. Tell your friends and neighbors — the

more, the merrier.

The Caprock Girl Scout Council Fund Drive will open here October 19th and close November 30th. The goal is \$1200. The area assigned is the O'Donnell School District. Mrs. Noble Rumbo is campaign chairman.

The drop in hog prices emphasizes the need for swine producers to speed up their shift to meat type hogs. Even with lower prices, producers of more desirable types are getting market premiums for their animals.

Present price trends and conditions point to a slightly more favorable prices and profits for the egg producer during the next six months
