No Depression Rejecting the American plan for adjustment" is in store for the United States, the federal reserve international supervision of atomic

Andrei energy. A. Gromyko, Soviet delegate to the United Nations, called for an immediate decision to outlaw the use of atomic weapons. He described

present

States monopoly of the atom as "an illusion" and predicted that this country's dominance in the field might be overcome soon by other nations.

Gromyko presented a four-point outline of Russia's position in the debate over the atom:

-1. Prohibition of atomic and mass destruction weapons is the greatest problem before the United

-2. Russia is willing to submit to international control and inspection only if the atomic bomb is previously discarded.

-3. Inspection must be limited in authority to "the necessity of ensuring the use of atomic energy for peaceful purposes only," and it must not interfere with the internal

-4. Ownership and management of atomic energy production facili- to stabilize about 25 per cent under ties cannot be placed in the hands the 1946 peaks. They also express

POSTAL RATES:

May Go Up

A measure embodying the first general revision of postal rates since 1879 which would add about 110 million dollars a year to post office revenues has been introduced in the house of representatives.

The bill provides for a 30 per cent increase in parcel post rates and would revise the air mail rate from five to six cents an ounce. addition, the new plan would add about 30 per cent a year to present scales for second-class mailing of newspapers and periodicals sent outside the county in which they are published

Another provision would maintain the current three-cent local and nonlocal rate for first class mail beyond were slated to revert to the former two-cent level

The new rates would go into effect 60 days after the bill is passed and signed by the President.

NET PROFITS:

Industries Gain

Top money maker in the United States in 1946 was the textile industry which, according to a Wall Street Journal survey, rode the seller's market harder than any other group to register a 219.9 per cent increase in net profits over 1945.

Fourteen textile corporations were reported to have net profits of \$109,435,562 in 1946, compared with \$34,206,787 the previous year.

Profits 78.9 per cent above 1945 were recorded by food products and packing house industries, those which lie closest to the family coffers.

Gains also were made by distillers, whose net profits soared 144.6 per cent, and iron and steel with a 53.7 per cent increase despite damaging strikes.

Long, Long Trial

Gen. Lucius D. Clay, military governor of the American zone in Germany, has predicted that at the rate German denazification courts are proceeding it will take several years to dispose of the huge number of cases still pending.

He revealed that 3,277,790 of the 11,825,000 Germans in the American zone were chargeable under law. and that the cases of 223,449 have been completed. So far, 450 of the Germans tried were major offenders, subject to a maximum sentence of 10 years in a labor camp.

GIANT'S DEATH:

End of an Era?

The battleship Oklahoma, first of the so-called "super-dreadnaughts. might well be recorded in history an accurate symbol of the era during which it ploughed the seas for the U. S. navy-heroic but futile

In her 31 years of steel-clad exist ence she never fired a shot at an Based at Berehaven, Ireland, dur-

ing World War I, she saw no action; and on December 7, 1941, five Japanese torpedoes sent the sturdy ol ship lunging to the bottom of Pearl Harbor before her crew could man

Raised to the surface and then abandoned as not worth salvaging, the Oklahoma was consigned to the scrap heap and taken in tow for the last long voyage across the Pacific. Suddenly, 540 miles northeast of Pearl Harbor, the tragic battleship listed heavily, as if tired of war and its aftermath, and slipped into the sea, three miles deep at that point, for her final escape from the era of violence that had been her lifespan.

PORK SUPPLY:

Seek More Pigs

Seeking to boost the nation's pork supply during the spring and summer of 1948, the department of agriculture has recommended a general 15 per cent increase in pig production this fall.

The increase, achievement of which would bring an additional five million pigs to market next spring and summer, is being sought because present prospects indicate that supplies of beef and veal will be shorter in 1948.

Farmers will have no difficulty in getting sufficient amounts of feed to fatten a larger fall crop, the de-

partment said. While the national goal calls for an overall increase of 15 per cent, the recommended regional increases would be 18 per cent in western states, 16 per cent in the Midwest corn belt and in the Northeast, 12 per cent in East Central states and 13 per cent in the South.

SURPLUS SUGAR:

Many Protests

Unless surplus sugar stocks are released to needy housewives, a congressional group will demand immediate repeal of sugar control, according to Senator McCarthy (Rep., Wis.) who is at the head of e movement.

Protests against the department of agriculture's sugar control program have been sent to congress. men from all parts of the country, McCarthy revealed.

"The department of agriculture is trying to make people believe there is a scarcity when there is a large surplus," he said, and added, "They are permitting industrial users to stock up, but are denying housewives the same privilege at the beginning of the canning season wher it is needed most."

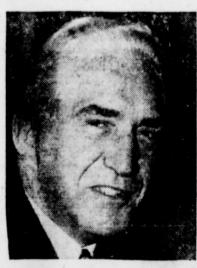

END THE WAR: Students Riot

dence that they can put the Demonstrating violently in open brakes on any further inflation if defiance of Chiang Kai-shek's order congress provides the necessary to quiet down, thousands of university students in several Chinese cit ies fortified their demand that the civil war be ended immediately by calling for a general strike.

Declaring sternly that the student riots were instigated by Communists, Chiang said they would be quelled forcibly if necessary. The students reacted with further parade and violence in Shanghai, Nan

king and Peiping. About 25,000 students were or strike from 16 universities, with their demands including everything from a better system of grading papers to higher government living al lowances and an end to the war

You'll Pay Him

Perhaps you have never seen George J. Schoeneman before, but he'll be hearing from you before next March 15. He has been named commissioner of internal revenue by President Truman, and in that capacity he will receive your income tax payments.

Army Fears Employers

Because more army reserves than ever before will be called to active duty for two-week training programs this year, army officials are a little afraid of what the reaction of employers will be when they find substantial numbers of employees asking for annual leaves. So the war department is preparing a memorandum to large industrial employers, explaining the purpose and operation of the reserve training program in order to win their cooperation.

New Life Table To Alter Costs

Increased Life Expectancy Reflected in Revised Payment Schedule.

NEW YORK. - On January 1, 1948, life insurance companies will abandon a mortality table they have used since 1868. They are replacing it with a new table that bears a more reasonable relationship to the current mortality rate.

Under the old table, children reaching one year of age had a life expectancy of 48.94 years. The new rate increases this to 63.76 years. For people reaching 20, the old

years. The new table gives them 46.54 more years. According to the old table, 98 out of every 1,000 policyholders died at the age of 40. According to the new

table gave them 42.20 additional

listing only 62 die. The new table, known as the 1941 commissioners standard ordinary table of mortality, reflects the actual life and death experience of policyholders of almost all life insurance companies between 1930

and 1940. As a result of amendments to state laws, it will go into effect in about 40 states January 1, replacing the 79-year-old American experience table of mortality on that date.

The new table gives life insurance companies a new basis for calculating values. The Institute of Life Insurance describes it as a new pat-

New Cost Pattern. The new pattern applies only to policies issued on or after January

Those already in force will continue on their present basis.

'This is a more equitable distribution of cost than we've ever had," the institute said. "In the lower age levels, where mortality is low, net cost to policyholders will be a little lower than it is now. In some age levels, where mortality increases, it will be a little higher. But the over-all cost is about the same."

The following figures, obtained from a major New York life insurance company, illustrate the point: A man takes out a \$1,000 partici-

pating life insurance policy at the age of 25. At the end of two years, the net cost at present to him would be \$26.74. Net cost for the same policy under the new system at the end of two years would be \$19.77.

Basis for Figuring. According to insurance men.

adoption of the new mortality table accomplishes three things: It provides a better basis for cal-

culating reserves and non-forfeiture benefits of new policies, and balances more closely the amount paid as premiums with what their beneficiaries will receive as benefits.

It establishes a direct basis for forfeiture benefits to which policyholders are entitled when they turn in their policies. The cash surrender value after 10 years of a participating \$1,000 insurance policy, issued at age 25, is now \$98.98. The same policy, under

the new system, would pay \$143.58. Many companies after January 1 will decrease the rate of interest guaranteed in new life insurance policies. Since 1930, the rate earned on invested funds has dropped from 41/2 per cent to 3 per cent. A decreased interest rate, however, has no affect on premiums. Cost of insurance is regulated by the actual mortality experience of the company issuing the policy.

Puppy Hiding in a Handbag Rides Plane From Germany

NEW YORK .- A dubious distinction-that of being the first aerial stowaway to arrive at the airportattached itself at La Guardia field to one Blanka, a year-old female Pekinese puppy.

Blanka's voyage from Germany, notwithstanding the rigid airlines rule against transportation of dogs, became known after the landing of a Pan American Frankfort-to-New York plane. Mrs. Adolphus J. Tudbury of New Orleans stepped from the plane with other passengers, and then opened her handbag Blanka popped out. The little Peke was able to ride undiscovered and in apparent comfort throughout the

Mrs. Tudbury said she had been living in Munich with her husband, an army officer, and had decided to return - with Blanka - when her husband was transferred to another post at Hannau.

Historic Treaties Are Missing From State Department Files

WASHINGTON .- The mysterious disappearance of historic treaties from state department files was reported by Assistant Secretary of State William Benton.

He told a house expenditures subcommittee that a "very high percentage"-some of them never duplicated for posterity-were missing. He offered no explanation on the cause of the losses.

His disclosure came as the subcommittee opened its long-planned inquiry into the department's operation, concentrating at the outset upon the division of information and cultural relations, which Benton heads.

Half of Doctors in Russia Are Women

Must Be Members of Union of Medical Workers.

MOSCOW, U.S.S.R.-When a person in the Soviet Union calls for medical help, the chances are even that a woman doctor will come around.

It's certain that the doctor, whether man or woman, will be a member of the Trade Union of Medical Workers and will be pulling down between 1,500 and 2,000 rubles a month in government pay, which is between two and three times what ordinary workers make.

There is room at the top for top men, however, and if a doctor succeeds in becoming a professor of medicine he eventually may make 6,000 to 7,000 rubles a month, (The ruble is worth about 18 cents at the official rate, but only 81/2 cents at the diplomats' exchange rate.)

This information was gathered along with other facts about Soviet medical services in a visit to the Moscow Medical institute.

The institute's director, Dr. Andrei Lihachev, and Dr. Ilya Strashoon, a member of the Soviet Medical academy, answered questions freely

The questions brought out that state employed doctors are allowed to practice privately after hours if they want to enlarge their income. Standard medical service is supposed to be available to any person. regardless of position. There are some hospitals, however, such as Moscow's top notch Kremlin, which are open only to big-time officials, diplomats and the like.

Of the 150,000 doctors in the Soviet Union, half are women. Before the revolution, there were only 18,000 doctors in the country, they said. About 70 per cent of the 4,000 students at the institute are women. but the percentage of men has increased since the war.

The medical leaders were asked what happens when someone in Moscow gets an acute appendix attack. They replied that a telephone call would bring an ambulance and a doctor within 10 minutes, and the patient would be rushed to a hospital. There a diagnosis would be made by a commission of doctors. and the patient either would undergo an operation or be taken to a specialized hospital.

The informants said rural sections had the same system of medical districts as big cities, and that some industries, such as railways, had their own hospitals.

When in New York Don't Act in Seattle Style

NEW YORK .- Mrs. Pearl Jensen, thinking to save her husband from being murdered by a pair of alleged thieves on the edge of Chinatown, pulled a fire alarm, just as she had been taught to do ack home in Seattle. W

The thieves were caught, the husband saved. But justice proved swifter for Mrs. Jensen than the thieves. She was fined \$50 for turning in a false alarm. The thieves were being held in \$2,000 bond on felony charges. The fine later was remitted.

Mrs. Jensen, 39, told Magistrate Joseph Levine that she and her husband, William, 42, were strangers in town.

Shannon Airport in Ireland Is Now Free of Customs

LIMERICK, EIRE.-The Shannon airport, stopping point for many transatlantic planes, has become the world's first customs-free landing field.

Goods coming into the 800-acre airport zone were freed of customs duties unless the merchandise is intended for sale in Eire. The new stem, inaugurated at a ceremony Sean Lemass, will permit American and European manufacturers to place their goods in display warehouses at Shannon, making it a

world store window for buyers." Officials said they hoped to interest manufacturers in building factories within the zone for processing raw material, imported duty free by air, into finished goods for cutoms-free aerial export.

Television to Revolutionize Political Campaign Technique

NEW YORK. - Television will revolutionize the technique of political campaigning in 1948 just as the radio did in 1924, is the opinion of Brig. Gen. David Sarnoff, president of Radio Corporation of America.

Sarnoff thinks 1947 can be television's first major year if the flow of materials for the manufacture of television sets is increased.

By 1948 several thousand homes, possibly as many as 50,000, will have television sets, the RCA head

Truck Owner Didn't Know. But Neither Did the Judge

MILWAUKEE.-He didn't know it was illegal to put a "for sale" sign in the window of his truck parked on a city street, Carl Deuster told District Judge Harvey L. Neelen. "Well," answered the judge, "I've been up here eight years and I didn't know it either. Sentence sus-pended."

Beauty of Spring Contrasts With Ugliness of Politics

WASHINGTON has been described as a city within a forest. Certainly to your home town reporter, springtime is the most beautiful time of the year in this most beautiful of all cities. From the first warm days when the cherry blossoms burst into triumphant loveliness, on through the spring, summer and into late autumn, the city is a riot of color from the flowers and blooming trees, and its streets and parks are oases and wide avenues of welcome shade.

This particular day is a lazy, balmy day and out in LaFayette park the power lawnmowers whire over the smooth lawns. Across Pennsylvania avenue, the slowly whirling sprinklers make the closely clipped White House lawns deeper pools of greenness beneath the

towering, age-old elms. As I stand in the shade at the west end of the White House awaiting the call to a Presidential press conference and drink in the loveliness of the White House grounds, gardeners working amid the flower beds, traffic sounds muffled, the heated debate and bombastic oratory on Capitol Hill seem indeed far removed and somehow apart.

But it is there, the pulling and hauling, stresses and pressures . . labor, taxes, appropriations, politics, 1948 an election year with Democratic national headquarters in the Mayflower hotel pulling the strings one way and Republican national headquarters, with its old red brick Georgian mansion at 1337 Connecticut avenue, pulling the other.

Business Lobbyists

Speaking of pressures, the fight on the house and senate labor bills brought into conflict the most powerful group of lobbyists and the greatest nationwide and local campaigns for and against the bills probably in the legislative history of

the country.

Business lobbyists have been campaigning for months, some of them since 1938, for changes in labor legislation, and they likely won out from sheer weight of numbers if for no other reason, for there were 304 business and industrial lobbyists registered and 134 labor lobbyists, a total of 438 registered lobbyists to work on the 531 senators and representatives in congress.

On the business and industrial side, National Association of Manufacturers planned and conducted its campaign on a nationwide basis from Washington and New York. The United States chamber of commerce, with 2,713 member organizations and with representatives in every one of the 435 congressional districts in the country, organized at the grassroots to bring pressure to bear on congress. Chief of the C. of C. campaign was gray-haired, \$15,-000-a-year Clarence Miles, who has been with the organization since 1929. For NAM, Walter Chamblin Jr., \$28,000-a-year vice president, directed the fight to pass the labor bills. He is an ex-newspaper man and has been with NAM since 1938. These two organizations bore the brunt of the fight to pass the labor

A Ph. D. in CIO Camp

For American Federation of Labor, white-haired, 64-year-old William C. Hushing led the fight against the labor bills. He has been working on legislation in Washington for 30 years and is a \$7,280-a-year man. He is a former pattern-maker from Litchfield, Ill.

For the CIO only one lobbyist is credited to the national organization, Nathan Cowan, director of the legislative department at \$4,280 a year. Probably the top-flight man on the CIO side is young, good-look-ing Robert K. Lamb of the United Steelworkers, who draws \$8,000 a year, has three degrees from Harvard, A.B., A.M. and a Ph. D. in Economics, and has served the CIO in Washington for almost four years. He is a member of American Federation of Teachers, Harvard local.

The AFL conducted its campaign on a nationwide basis while the CIO, like the Chamber of Commerce, op-erated on the local level by personal contact and mail from the states to congress. The CIO opened its campaign by bringing state delegations to Washington to work on their individual congressmen and senators the week of April 27.

The labor group didn't really get started nationally until along in April when the Hartley bill passed the house. The cards were some what stacked against them for they had no control of the 20 southern senators or southerners in the house who voted against them, and then they had the opposition of Ed O'Neal, mild-mannered but tough. As president of American Farm Bureau federation, he is one of the most influential men in Washington. Then there was John L. Lewis. record and his threat of a new coal strike were no help to labor.

happy and s young young young

work We That Fran

WAS Easter Sunday in New York. And the sun was shining. Laura Burton and Frank Harding had been to church and now they were part of the sleek crowd on Fifth avenue.

Laura held Frank's arm. To look at her you'd feel sure that she was She was pretty and young and so well turned out. Successful young business girl, you'd probably have guessed. Or maybe even a young bride! And that, indeed, was the catch. Laura WAS a successful young business girl. But she wasn't a young bride! And yet right by her side was Frank Harding. And it was Frank with whom she was in

the theater, occasionally. He took her to the movies once in a while. He took her to dinner. But he was careful not to take Laura too often!

is. He was nice to

her. He took her to

Laura had tried all of her tricks, ong ago. And all of the tricks she'd read about. But none of them

Well, he was here with her now. That was something.

It was fun, being here with Frank, being jostled by the well-dressed crowd. It was fun-but it wasn't enough. It would end too soonand there'd be nothing else. Why Frank might not even telephone to her again for days and days! And there'd be just office routine. And a few dull dates that were only a little better than staying home. And actually staying home and pretending that reading the newest magazines and listening to the radio was enough. Funny, when Frank was with her, reading or listening to the radio was quite enough. If Frank were with her-but that was the whole trouble!

"I didn't have a chance to get you flower," Frank said, as they rolled. "Let's get one, now." strolled. They walked over to Madison avenue, found a flower shop and were going to turn in for a corsage,

"Look!" said Lura.

And there, in with the flowers, on a moss carpet, were a whole flock of very young, very yellow baby

They're darling!" said Laura. 'Rather have one than a flower?'

"Of course I would!"

But baby chicks were so inexpensive that Laura had one and flow-

They took the little chicken to Laura's immaculately modern apartment. It walked on the beige

carpet and scratched a bit. And for no reason they named it "Nellie." They fed it some of the They fed it some of the prepared food they'd bought. And decided that having a little chicken for a pet was great fun.
It was great fun! For Laura, anyhow. She put the chick in her

snowy kitchenette before she went to the office in the morning-and left a note for Carrie, who came in, afternoons, to be careful of Nellie. At ten o'clock Frank telephoned

"How's Nellie?" he asked. "She was fine, when I left this morning. When are you coming in to see her?"

"I thought tonight would be as good a time as any. No use letting her forget her foster father. What about a bit of dinner tonight. At Louise's, maybe?"

It was wonderful! Frank had never telephoned so soon after seeing her-had never made a date so promptly. Nellie? What of it. She'd

Frank got there at half past six. They spent nearly an hour sitting on the floor and playing with Nellie. They went to a movie after dinner Frank, unexpectedly. "I used to

"But I was going to move to the

country—to make a home for—for Nellie," she sobbed. "The country's fine," said Frank. "I can hardly wait to get there myself. I say, you know, I've been thinking about it, and I-well, what do you say if we, well, get married and you make a home for me. That would suit me all right. How would it suit you?'

Laura wiped her eyes. And decided it would suit her just fine.

Butter - Making

Points to be observed in good butter-making include use of only good, clean, rich milk from properly fed and cared for cows. Cleanliness of the cow and the milker is essential. Correct temperature for ripening the milk and for churning is necessary. Cream should be ripened at 65 to 70 degrees F. The churning temperature should be about 60 to 68 degrees so that butter will form in granules about the size of wheat grains in 20 to 25 minutes. When that stage is reached, stop churning, wash the butter with water of the same temperature, in two or three waters, until all milk is removed. Add about a tablespoonful of salt to each pound of butter and work enough to distribute the salt. Mold and wrap in parchment paper.

GEM OF BEAUTY . . . Once a fiery volcano, Crater lake in Oreon now ranks as one of the beauty spots in national parks of the West. The lake, which gives the park its name, is the deepest on the North American continent; its color is a mysterious blue. Sheer sides rise 500 to 2,000 feet to the rim from the lake surface. Llao rock, on the rim of the lake, is shown in this picture, with Mount Thielson in the

NATURE'S HANDIWORK

Pacific Coast Parks Show **Results of Volcanic Action**

WNU Features.

Volcanoes have been a dominant factor in shaping the American landscape, especially in many parts of the West. Three of the major volcanic exhibits of California, Oregon and Washington have been incorporated into the national park system.

It was 40 years ago that Theodore Roosevelt, using the authority granted by congress the preceding year, established Lassen peak and nearby Cinder Cone as national monuments.

ern visitors.

Nine years later these two attractions of nature were incorporated into Lassen Volcanic National park, containing 103,269 acres.

Greatest single distinction of the park is the fact that it contains the only recently

National Parks Fourth In a Series

active volcano in the United States. Starting May 30, 1914, a series of eruptions continued until February, 1921. Most

spectacular in the seven-year-long series were the 1915 eruptions, which were accompanied by extensive flows of hot lava. These created the "devastated area," which still ranks as one of the park's points of principal interest to tourists.

The great cone of Lassen peak rises 10,543 feet above sea level. As in the "devastated area," the Cinder Cone, which was last active about 100 years ago, and its immediate surroundings are almost wholly devoid of vegetation.

Underground fires have been active in this region for a long time and they have exerted their power in a variety of ways. This is sug-gested by Bumpas Hell, a colorful hot springs area; Boiling Springs Red Cinder Cone; Crater butte, and the privately owned sulphur works, which lies within the park.

AT CRATER LAKE National park, in southern Oregon, on the crest of the Cascade range, is presented the spectacle of a lake of deepest blue in the crater of Mount Mazama, an extinct volcano. Many geologists parks. have concluded that the basin occupied by the lake, which has neither inlet or outlet, resulted from collapse of the volcanic cone of the an-

cient peak. The lake is supplied with water by rainfall and snowfall as well as by snow which is blown into it from the rim. Collapse of the mountain's summit did not mean the end of its volcanic activity; Wizard island, a symmetrical cinder cone, was formed later and rises 780 feet above surface of the lake. Covering an area of 20 square miles, Crater lake is 6 miles across; it has a shore line of 20 miles and the multi-colored cliffs of the crater's rim rise 500 to 2,000 feet above it. The park contains 160,290 acres.

HIGHEST OF ALL volcanic peaks of the western United States is Mount Rainier, 14,408 feet in elevation, which is the central and dominant feature of Mount Rainier Na-tional park. Although it has long been dormant, steam still issues from vents on its summit, and several hot springs are found nearby at picturesquely named Ohanapecosh hot springs.

From the lofty central cone radiates the greatest single-peak glacier system in the United States, with 26 active rivers of ice. One of these, the Emmons, which starts from the summit of ice and snow fields, is 51/2 miles in length, the longest glacier in the United States. Most of them extend far below the tim-

John Muir, who perhaps did as much as any one person to further the spread of the national park idea,

seen in all his wanderings throughout the mountains of the West. The most extensive and colorful displays are found in the mountain "parks" which lie between the long rivers of ice and above the dense forests which clothe the lower elevations of the park. The forests themselves, virgin stands of gigantic Douglas fir, western red cedar and western hemlock, are a distinguished feature, particularly attractive to eastern and midwest-

ALL THREE of these parks are almost as popular during the winter as in summer. All of them have very heavy snowfall and all have open slopes that offer the skier every variety of skiing experience, which extends into late spring and even early summer. Roads are kept open in each park to permit winter sports enthusiasts to reach them, although the expense of plowing out the roads after every snowstorm is rather high.

. . . IN LASSEN Volcanic National park there are public accommodations near Manzanita lake, close to the northwest entrance of the park. At Crater lake, similar accommodations are situated within a short distance of the rim. At Mount Rainier they are found at Longmire, about 2,750 feet above sea level; at Paradise valley, 5,557 feet elevation, and at Ohanapecosh hot springs in the southeast corner of the park. Public campgrounds, for which no fee is charged, are to be found at a number of points in each of these

As in most of the other national parks, National Park service provides staffs of ranger-naturalists whose job it is to help the visitor gain a better understanding of the plant and animal life of the parks and of the geological phenomena found in them.

RIVER OF ICE . . . Nisqually glacier flows down the south side of Mount Rainier, focal point in Mount Rainier National park in Washington.

Realistic Acting

OGDEN, UTAH .- La Moine Wall, 15, was rehearing for a school play, the script calling for him to be 'knocked out" in a fight. He didn't get up when the rehearsal ended. He had bumped his head a little too considered the wildflower fields of hard when he fell to the floor. First Mount Rainier the finest he had ever | aid treatment brought him around.

Animals Are 'Ears' for Deaf Woman

GOODING, IDA. - Deafness has proved no great handicap to Mrs. Violet Gooding, for she has Inky, a cat, and Impy, a dog, to serve as

her "ears. The amazing thing about the two animals is that they have been trained in the universal sign language of the deaf. There are no spoken commands in Mrs. Gooding's home. Her hands do the commanding.

No doorbell warns of impending visitors. When someone at the door presses a button, a red light comes on in the living room. If Mrs. Gooding doesn't notice it, Impy or Inky do-and notify their mistress. Impy awakens Mrs. Gooding every morn-

mrs. Gooding, who lives alone, is self-supporting, working for the State School for the Deaf and Blind here. Her husband died in 1937.

Touch Typewriting Can Be Self-Taught

HETHER you plan to make office work your career, or hope to enter some other field eventually, you have to know typing to get a foothold.

Remember, an experienced eye can in-stantly detect the uneven touch of a hunt-and-peck typist, so better master the touch system without delay.

The Weekly Newspaper Service booklet teaches touch typing with charts, exercises and speed drills. Simple to learn. Send 25 cents (coin) for "Touch Typewriting Self-Taught" to Weekly Newspaper Service, 243 W. 17th St., New York 11, N. Y. Print name, address, booklet title and No. 13.

Sealing Leaks in Dam

Several leaks that developed in the cofferdam of the Grand Coulee dam in 1937 were sealed with bentonite, a soft porous volcanic ash that, when moistened, rapidly swells into hard compact clay 15 times its original mass.

A Sound Thinker

As I sat a few days ago in the spacious office of Mr. John Snyder, secretary of the Treasury, and listened to that keen thinking gentleman outline his views on certain monetary policies, I found myself wishing that all public thinking were as clear, and as cognizant of good economic horse-sense.

In the first place the Secretary believes that a thorough study of the necessary costs of government should be made. He believes then that this cost should be reduced to the very minimum consistent with good government. In the second place he believes that a high national income is possible only if a sound economy is maintained. This sound economy must be based upon maximum production at high efficiency, which he feels would make possible a large foreign trade. On Your Feet, Sam!

In the third place he believes we should seriously undertake liberal payments on the national debt. This should be done at once. To me that is just plain, common horsesense. It is just the way a wage earner, farmer, merchant, or manufacturer, heavily in debt, with a large family, but still in good health, would have to plan if he expected ever to get on his feet and leave any heritage to his children.

Uncle Sam is heavily in debt, his children have adopted spendthrift habits, have lost the art of hard work, are quarreling with one another, and are growing more and more inclined to leave the worrying to the old man. The need of the hour is sound counsel from Washington for the entire nation to realize its critical condition, and to act accordingly.

Secretary Snyder's program needs to be understood, for it is one in which the whole nation can participate. His three point program (in my own words) would be about as follows:

1. Stop the fantastic waste in almost every department of government. Pare costs rigorously, forget ting political expediency.

. Let industry reduce prices un-til the profits stand at a very low Let labor aim for maximum production, in order to get a real raise through lower prices. production will permit active for-eign markets, a thing not only necessary for us but for other nations as

3. Let taxes remain on a broad base, with only those cuts being made which are necessary to induce investment in the tools of production, while we all do our part to reduce the very heavy national debt.

In "dehydrofreezing. the fruit or vegetable is carried thru the first step of the dehydrating process. It is reduced in weight & volumn but not as much as a completely dehydrated product. Still it

Cool Off With an Egg Julep!

Cool Refreshment

No summer menu collection is complete without a set of cool drink recipes. These tasty drinks are so handy and convenient to have for both family and com-

pany use, that each summer season should see us well armed with a new set of recipes. After you have decided on the different types of cool refreshments you will serve, see that you have all the ingredients on hand so they can be whipped together at a moment's no-

Cool drinks fall in several cate-You should have several gories. recipes which are really nutritious for the youngsters when they come in from play. Then, too, you should have another set of recipes that are tasty as well as nice to serve guests who may drop in afternoon or eve-

Cool drinks will be more of a success if they are served in frosty looking, decorative glasses. don't forget the appeal of tinted ice cubes. Use harmless food color, if you like, or freeze bits of cherries, other fruit or mint sprigs with them. For iced tea or coffee, freeze the beverage itself into cubes so that the drink will not be too diluted when served.

HERE ARE several nutritious trinks which will make a big hit with the children.

'Egg and I' Julep.

(Serves 10)

3 eggs, beaten 34 cup sugar 1/8 teaspoon salt

2 cups orange juice, strained 1/3 cup lemon juice, strained Crushed ice Club soda

Blend eggs, sugar and salt. Add fruit juices. Shake or beat until the sugar is dissolved. Pour over finely cracked ice and fill glasses 1/2 Add club soda slowly. Serve full. promptly.

Chocolate Banana Milk Shake. (Serves 6 to 8)

4 sieved large, ripe bananas 4 cups milk

1/2 cup chocolate flavored malt drink Ice

Press the bananas through a sieve, then combine them with the milk and chocolate flavored malt drink. Use a shaker or tightly covered jar. Add ice. Shake well and serve at once.

Mint-Chocolate Frest. (Serves 4)

1/2 cup cocoa 14 cup corn syrup cup hot water

1 teaspoon vanilla 1/2 teaspoon mint extract 1 quart milk

14 teaspoon salt 1/2 pint vanilla ice cream

Combine cocoa and syrup. Add hot water, stir well and cool. Add remaining ingredients and beat with egg beater until well blended. Serve in tall glasses. Additional scoops of ice cream may be

0470

used on top to give the effect of a soda.

LYNN SAYS: Hints for Better Cooking

Never wash berries until just be-fore they are used. To keep the juice in strawberries, wash the berries before removing hulls. The best way to wash them is to float them in a pan of water and lift out gently. Repeat the process un-

til the water remains clear. Oranges and lemons will squeeze more easily if they are rolled against the table until they are slightly soft. If they are too hard a pair of tweeze to roll, heat them slightly.

LYNN CHAMBERS' MENUS

Tomato Sauce Parsleyed Potatoes French Green Beans Head Lettuce with French Dressing Oatmeal Bread Citrus Chiffon Pie Beverage

Ckocolate Malted Milk.

1/2 cup chilled milk 2 tablespoons chocolate syrup 2 cup carbonated water Chocolate or vanilla ice cream

Add milk to syrup slowly, stirring constantly. Pour into tall glasses. Add carbonated water and stir well enough to mix. Add ice cream and serve at once.

RECIPES WITH their main ingredient as fruit juice or a combination of them are given here. These come under the guest beverage classification but also may be served the family when you want to give them a special treat.

Cranberry Pineapple Ale. (Makes 6 cups)

1 pint cranberry juice 2½ cups pineapple juice 1¾ cups ginger ale Cracked ice

Combine fruit juices with ginger ale. Add ice and serve, well chilled.

Frosted Ginger Ale. (Makes 61/2 glasses)

1/4 cup light corn syrup 14 cup sugar 1 cup hot water 5 whole cloves 1 stick cinnamon 14 teaspoon allspice 1/4 teaspoon nutmeg

11/2 cups orange juice 1 cup grapefruit juice 31/2 cups ginger ale

Boil together syrup, sugar and water for 5 minutes. Add spices and let stand 11/2 hours. Strain through several

thicknesses of cheesecloth. Add fruit juices and chill. Just before

serving add ginger ale and pour into ice filled glasses.

Orange Lime Fizz. (Serves 4)

2 cups orange juice ½ cup granulated sugar 12 sprigs mint 4 tablespoons lime juice 11/2 cups carbonated water

Heat 1 cup of orange juice to the which

boiling point. Add sugar and mint has been chopped. Cool, Strain and add remaining orange juice and lime juice. Just before serving add carbonated water and ice. Ambrosia.

(Makes 6 quarts) 4 cups apricot nectar 4 cups orange juice 11/2 cups lemon juice 1/2 cup lime juice 1 cup powdered sugar quarts carbonated water

Combine juices and sugar and stir until latter is dissolved. Just before serving add the carbonated water and pour over ice.

FACING NATIONAL PERILS

LESSON TEXT-II Kings 19:5-7, 32-37; 20:12-17.

MEMORY SELECTION—For thus said the Lord God, the Holy One of Israel; in returning and rest shall ye be saved; in quietness and in confidence shall be your strength.—Isaiah 30:15.

Perilous times had come upon the southern part of the divided kingdom known as Judah. There had been a period of outward prosperity under King Uzziah, but the inward decay of the people made it an empty thing.

Judah, like Israel, was on the downward path which was to lead to ultimate captivity and judgment. The occasional reign of good kings seemed to stem the tide a bit; in fact, the great king of whom we study today, Hezekiah, gave Judah a "fresh lease on life and enabled her to outlive her sister kingdom by nearly a century and a half."

Judah experienced a real revival of faith in God under Hezekiah (II Kings 18:4-6; II Chron. 29:31). The temple was cleansed, the priesthood renewed and reconsecrated, and the great feast of the Passover kept once more. This undoubtedly explains the new life which came to Judah in an hour when the nation seemed about to disintegrate.

I. The Enemy's Threat (19:5, 6). For the background here one must read the previous chapter. Hezekiah, having tried to throw off the yoke of Assyria, had seen Sennacherib and his armies sweep over the land. Thinking to stop him and to save Jerusalem, he sent a great gift amounting in value to millions of dollars. The gift was accepted, and then Sennacherib treacherously seiged Jerusalem.

Rabshakeh, Sennacherib's messenger to Hezekiah, not only threatened the nation, but blasphemously denied the power of God. Such was the awful situation Hezekiah faced as he went to the temple, and sent trusted servants to inquire of Isaiah what he ought to do.

The response was prompt and definite. We may learn from this incident that in an hour of confusion and danger it is well to take time to find out what the Lord has to say about things. He knows what to do! II. The Lord's Answer (19:7, 32-37).

God has only to blow on the mighty, blustering monarchs of this world and they come to their end, definitely and conclusively. The "blast" of the Lord (v. 7) is enough to care for that! And remember, he is still ready to act on behalf of his

On the plains of Philistia the mighty host of Assyria met the angel of the Lord, and they never awoke from their sleep. The loss of 185,000 men sent Sennacherib home to Nineveh broken and fearful, and

there he met his own violent death. How much we need the encouragement of such an event as this in our own day when the mighty of this earth seem to speak so boldly and confidently against the name of the Lord. His children must often hear the blasphemous threats of unbelievers and bear the burden of their scorn.

Let us remember that we do serve a God who can with a glance of his eyes throw into confusion all the enemies of his mighty name. Let us be strong to fight the victori-

ous battle in his name! Hezekiah knew the sweetness of victory as he trusted in the Lord. If we could only rest the matter there. But the weakness of the flesh comes

to the fore as we see III. The King's Folly (20:12-17). Babylon, one of the great Gentile enemies of Assyria, wanted to cultivate the friendship of Hezekiah, so an embassy was sent to express joy

at his recovery from a serious ill-It was the Lord who had healed him (see 20:1-11) in a miraculous way, but now Hezekiah did the foolish thing of trying to cultivate the

help of men. To impress these possible allies from Babylon, he showed them all his wealth. He evidently wanted them to return to their ruler with a story of the might and glory of

Judah. Poer Hezekiah! He only made a fool of himself, prepared the way for the ultimate taking of his possessions and his people by the Babylonians.

The lesson to be learned here is not only that boasting is folly (although that is always true), also that it is the height of folly to put one's trust in the arm of flesh. No matter how mighty the forces of this world may be, or how wonderful it might seem to have their favor toward the cause of the church, let us be clear that it is in God that we have our-strength-and in him alone.

The church (and individual Christians too) has lost its testimony and its power in the community whenever and wherever it has turned to the world for help or support. Remember the folly of Hezekiah.

Find 16th Century Figures In Rare Medieval Armor

Since the 16th century, the Church of the Madonna delle Grazie, near Mantua, Italy, has had the upper part of its interior walls lined with life-sized human figures that custodians believed were made of papier-mache. But in 1937, an authority on antiques examined the 17 military figures and discovered they were dressed in excellent suits of rare medieval armor.

A Sound Thinker

Scarcy. Arkansas

As I sat a few days ago in the spacious office of Mr. John Snyder, secretary of the Treasury, and listened to that keen thinking gentleman outline his views on certain monetary policies, I found myself wishing that all public thinking were as clear, and as cognizant of good economic horse-sense.

In the first place the Secretary believes that a thorough study of the necessary costs of government should be made. He believes then that this cost should be reduced to the very minimum consistent with good government. In the second place he believes that a high national income is possible only if a sound economy is maintained. This sound economy must be based upon maximum production at high ef-ficiency, which he feels would make possible a large foreign trade. On Your Feet, Sam!

In the third place he believes we should seriously undertake liberal payments on the national debt. This should be done at once. To me that is just plain, common horsesense. It is just the way a wage earner, farmer, merchant, or manufacturer, heavily in debt, with a large family, but still in good health, would have to plan if he expected ever to get on his feet and leave any heritage to his children.

Uncle Sam is heavily in debt, his children have adopted spendthrift habits, have lost the art of hard work, are quarreling with one another, and are growing more and more inclined to leave the worrying to the old man. The need of the hour is sound counsel from Washington for the entire nation to realize its critical condition, and to act accordingly.

A Sound Program

Secretary Snyder's program needs to be understood, for it is one in which the whole nation can participate. His three point program (in my own words) would be about as follows:

1. Stop the fantastic waste in almost every department of government. Pare costs rigorously, forgetting political expediency.

Let industry reduce prices until the profits stand at a very low level. Let labor aim for maximum production, in order to get a real raise through lower prices. Such production will permit active foreign markets, a thing not only necessary for us but for other nations as well

3. Let taxes remain on a broad base, with only those cuts being made which are necessary to induce investment in the tools of production, while we all do our part to reduce the very heavy national debt.

In "dehydrofreezing." the fruit the first step of the dehydrating process. It is reduced in weight & volumn but not as much as a pletely dehydrated product. Still it

Faster Gains and Feed Savings Prove Results

By W. J. DRYDEN

Faster gains and the saving of feed are the aims of every hog raiser. Among the most essential farm improvements that may bring these results are concrete feeding floors. Such floors help produce more pork and save feed from being lost in the mud.

Each hog should have 10 square feet of floor space. To build 100 square feet of floor, 4 inches thick, it

will take 71/2 sacks of portland cement, % cubic yard of sand and 1 cubic yard of gravel or crushed rock.

If the area to be paved is poorly drained, it is best to place the concret slab on a well-tamped fill of about six inches. If the concrete is to be driven over, it should be six inches thick.

New concrete should be properly cured by covering with earth or straw as soon as it has hardened enough not to be marred, and then kept moist for at least five days by frequent sprinkling.

KNOW YOUR BREED Morocco Spotted Horse By W. J. DRYDEN

The Morocco horse originated is the crossbreeding of the Morocco Barb and the English Hackney and the French coach horse.

The conformation of the Moroco Barb is somewhat similar to the Arabian horse.

In size the Morocco varies from 1,050 to 1,400 pounds. It is a general purpose horse, bred for work

Ideal type of Morocco spotts

well as pleasure. The working team is fast and steady, and has considerable stamina. They have the power to reproduce themselves true to type and color even when used with other er colors and breeds.

To be registered they must stand 14:2 hands high. Type must be clean and neat with ample legs to be suitable for either saddle or harness.

are not damaged by the first de hydration process, the dehydroffed en product keeps it's fresh quality. Some of the products even keep their original shape after going thru the new process. And the are very easy to return to serving form, as not much water is remoted as by the full method.

doesn't take up as much space and weighs much less than when it comes from the field. Then it is frozen. Since the vitamins and flavor

Cool Off With an Egg Julep!

Cool Refreshment

No summer menu collection is complete without a set of cool drink recipes. These tasty drinks are so handy and convenient to have for both family and company use, that each summer

season should see us well armed with a new set of recipes. After you have decided on the different types of cool refreshments you will serve, see that you have all the ingredients on hand so they can be whipped together at a moment's no-

Cool drinks fall in several categories. You should have several recipes which are really nutritious for the youngsters when they come in from play. Then, too, you should have another set of recipes that are tasty as well as nice to serve guests who may drop in afternoon or evening.

Cool drinks will be more of a success if they are served in frosty looking, decorative glasses. And don't forget the appeal of tinted ice cubes. Use harmless food color, if you like, or freeze bits of cherries, other fruit or mint sprigs with them. For iced tea or coffee, freeze the beverage itself into cubes so that the drink will not be too diluted when served.

HERE ARE several nutritious drinks which will make a big hit

with the children. 'Egg and I' Julep.

(Serves 10) 3 eggs, beaten

4 cup sugar 1/s teaspoon salt 2 cups orange juice, strained 1/2 eup lemon juice, strained Crushed ice Club soda

Blend eggs, sugar and salt. Add fruit juices. Shake or beat until the sugar is dissolved. Pour over finely cracked ice and fill glasses 1/2 full. Add club soda slowly. Serve promptly.

Chocolate Banana Milk Shake.

(Serves 6 to 8) 4 sieved large, ripe bananas 4 cups milk

1/2 cup chocolate flavored malt drink Ice

Press the bananas through a sieve, then combine them with the milk and chocolate flavored malt drink. Use a shaker or tightly covered jar. Add ice. Shake well and serve at once

> Mint-Chocolate Frest. (Serves 4)

1/2 cup cocoa 14 cup corn syrup 1 cup hot water

1 teaspoon vanilla 1/2 teaspoon mint extract 1 quart milk 1/4 teaspoon salt

1/2 pint vanilla ice cream Combine cocoa and syrup. Add hot water, stir well and cool. Add remaining ingre-

dients and beat 24 with egg beater until well blended. Serve in tall glasses. Additional scoops of ice cream may be used on top to give the effect of a soda.

LYNN SAYS:

Hints for Better Cooking Never wash berries until just before they are used. To keep the juice in strawberries, wash the berries before removing hulls. The best way to wash them is to float

them in a pan of water and lift out gently. Repeat the process un-til the water remains clear. Oranges and lemons will squeeze more easily if they are rolled against the table until they are slightly soft. If they are too hard to roll, heat them slightly.

LYNN CHAMBERS' MENUS

Veal Cutlet Tomato Sauce Parsleyed Potatoes French Green Beans Head Lettuce with French Dressing Oatmeal Bread Citrus Chiffon Pie Beverage

Ckocolate Malted Milk. (Serves 1)

1/2 cup chilled milk 2 tablespoons chocolate syrup 1/2 cup carbonated water Chocolate or vanilla ice cream

Add milk to syrup slowly, stirring constantly. Pour into tall glasses. Add carbonated water and stir well enough to mix. Add ice cream and serve at once.

RECIPES WITH their main ingredient as fruit juice or a combination of them are given here. These come under the guest beverage classification but also may be served the family when you want to give them a special treat.

> Cranberry Pineapple Ale. (Makes 6 cups) pint eranberry juice 214 cups pineapple juice 1¾ cups ginger ale Cracked ice

Combine fruit juices with ginger ale. Add ice and serve, well chilled.

(Makes 61/2 glasses) 4 cup light corn syrup cup sugar cup hot water whole cloves 1 stick cinnamon 4 teaspoon allspice teaspoon nutmeg 11/2 cups orange juice 1 cup grapefruit juice 31/2 cups ginger ale

Boil together syrup, sugar and water for 5 minutes. Add spices and let stand 11/2

hours. Strain through several thicknesses of cheesecloth. Add fruit juices and chill. Just before serving add ginger ale and pour into ice filled

Orange Lime Fizz.

(Serves 4) 2 cups orange juice 1/2 cup granulated sugar

12 sprigs mint 4 tablespoons lime juice 11/2 cups carbonated water

Heat 1 cup of orange juice to the boiling point. Add sugar and mint which has been chopped. Cool, cover. Strain and add remaining orange juice and lime juice. Just before serving add carbonated wa-

ter and ice. Ambrosia. (Makes 6 quarts) 4 cups apricot nectar 4 cups orange juice 11/2 cups lemon juice 1/2 cup lime juice 1 cup powdered sugar 4 quarts carbonated water

Combine juices and sugar and stir until latter is dissolved. Just before serving add the carbonated water and pour over ice. Released by Western Newspaper Union.

To cut hard-cooked eggs readily, use a fine wire or a sharp knife dipped in cold water to prevent the yolk from sticking.

To cut meats for salad, use a pair of kitchen shears in place of a knife. You will be able to work much more quickly.

Bacon should be placed in the skillet before the unit is heated. Cook slowly, pouring off the fat as it accumulates.

To remove pinfeathers from fowl, a pair of tweezers is very satisfac-

IMPROVED UNIFORM INTERNATIONAL CUNDAY JCHOOL Lesson

FACING NATIONAL PERILS

LESSON TEXT-II Kings 19:5-7, 32-37; MEMORY SELECTION-For thus said the Lord God, the Holy One of Israel; in returning and rest shall ye be saved; in quietness and in confidence shall be your strength.—Isaiah 30:15.

Perilous times had come upon the southern part of the divided kingdom known as Judah. There had been a period of outward prosperity under King Uzziah, but the inward decay of the people made it an empty thing.

Judah, like Israel, was on the downward path which was to lead to ultimate captivity and judgment. The occasional reign of good kings seemed to stem the tide a bit; in fact, the great king of whom we study today, Hezekiah, gave Judah a "fresh lease on life and enabled her to outlive her sister kingdom by nearly a century and a half."

Judah experienced a real reviva! of faith in God under Hezekiah (II Kings 18:4-6; II Chron. 29:31). The temple was cleansed, the priesthood renewed and reconsecrated, and the great feast of the Passover kept once more. This undoubtedly explains the new life which came to Judah in an hour when the nation seemed about to disintegrate.

I. The Enemy's Threat (19:5, 6) For the background here one must read the previous chapter. Hezekiah, having tried to throw off the yoke of Assyria, had seen Sennacherib and his armies sweep over the land. Thinking to stop him and to save Jerusalem, he sent a great gift amounting in value to millions of dollars. The gift was accepted, and then Sennacherib treacherously seiged Jerusalem.

Rabshakeh, Sennacherib's messenger to Hezekiah, not only threatened the nation, but blasphemously denied the power of God. Such was the awful situation Hezekiah faced as he went to the temple, and sent trusted servants to inquire of Isaiah what he ought to do.

The response was prompt and definite. We may learn from this incident that in an hour of confusion and danger it is well to take time to find out what the Lord has to say about things. He knows what to do! II. The Lord's Answer (19:7, 32-

God has only to blow on the mighty, blustering monarchs of this world and they come to their end, definitely and conclusively. The "blast" of the Lord (v. 7) is enough for that! And o care is still ready to act on behalf of his

people! On the plains of Philistia the mighty host of Assyria met the angel of the Lord, and they never awoke from their sleep. The loss of 185,000 men sent Sennacherib home to Nineveh broken and fearful, and

there he met his own violent death. How much we need the encouragement of such an event as this in our own day when the mighty of this earth seem to speak so boldly and confidently against the name of the Lord. His children must often hear the blasphemous threats of unbelievers and bear the burden of their scorn.

Let us remember that we do serve a God who can with a glance of his eyes throw into confusion all the enemies of his mighty name. Let us be strong to fight the victorious battle in his name!

Hezekiah knew the sweetness of victory as he trusted in the Lord. If we could only rest the matter there. But the weakness of the flesh comes to the fore as we see

III. The King's Folly (20:12-17). Babylon, one of the great Gentile enemies of Assyria, wanted to cultivate the friendship of Hezekiah, so an embassy was sent to express joy at his recovery from a serious ill-

It was the Lord who had healed him (see 20:1-11) in a miraculous way, but now Hezekiah did the foolish thing of trying to cultivate the

help of men. To impress these possible allies from Babylon, he showed them all his wealth. He evidently wanted them to return to their ruler with a story of the might and glory of

Poer Hezekiah! He only made a fool of himself, prepared the way for the ultimate taking of his possessions and his people by the Baby-The lesson to be learned here is

not only that boasting is folly (although that is always true), but also that it is the height of folly to put one's trust in the arm of flesh. No matter how mighty the forces of this world may be, or how wonderful it might seem to have their favor toward the cause of the church, let us be clear that it is in God that we have our-strength-and

in him alone. The church (and individual Christians too) has lost its testimony and its power in the community whenever and wherever it has turned to the world for help or support, Remember the folly of Hezekiah.

Wash blankets on a warm spring day when there is a light breeze. ---

A little olive oil or glycerine poured on a soft cloth and rubbed on bathroom fixtures keeps them in excellent condition and makes them easier to polish.

Cause of paint cracking usually the undercoat. This often results when one paints over a surface that is not dry.

Save the lids from baking powder or lye cans. Paint them a bright enamel color. Use assorted colors to give a Mexican air. These "play dishes" will be a grand gift for a small house-

---A damp sponge rubbed lightly over upholstered furniture will remove surface dust, dog or cat

Paint thinned with turpentine spreads readily and dries quickly without leaving a high sheen.

Hard woods, and especially oak, are not good for framing jobs since they split easily and do not stay

Find 16th Century Figures In Rare Medieval Armor

Since the 16th century, the

Church of the Madonna delle Grazie, near Mantua, Italy, has had the upper part of its interior walls lined with life-sized human figures that custodians believed were made of papier-mache. But in 1937, an authority on antiques examined the 17 military figures and discovered they were dressed in excellent suits of rare medieval armor.

Summer Two-Piecer

KEEP O'DONNELL CLEAN !!

Watch Beauty Care

During Housecleaning ON'T forget beauty care during housecleaning, Jean Gray advises homemakers in an article in nationally - circulated Capper's Farmer.

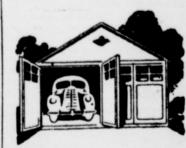

"Too often good natures as well as rooms are upset by taking out rugs and moving furniture," she writes. "The family will be happier in the cleaning confusion if you remain unruffled and well groomed. And feeling neat will keep your spirits high as you attack the grime!

cleaning dress can be clean, neat and mended. Wear an apron or smock that can be whisked off to re-

veal a clean dress. Protect your skin from dirt by applying a powder base before starting to work. After dusty duties, wash vigorously with a turkish washcloth or complexion brushthis in addition to usual morning

and evening washing. Benefit from the exercise of cleaning. When dusting and making beds, stretch your middle, keep it tense. This keeps muscles firm. When sweeping or running the vac-uum, keep shoulders back and don't bend in the middle. Carrying your body straight and tall is slenderizing since much waist thickness is slump. If you get tired, lie down for 15 minutes with your feet on a couple of pillows."

- MORE THAN EVER EVEN IF YOUR car isn't one those new ones you need the best in surance protection you can buy

Clear the Decks

Scarcy. Arkansas

During a recent trip to the nation's capitol, I found the air filled with talk of reducing the budget. Many legislators are now becoming economy conscious. However, one item of the budget-national defense-has been given a respectable detour by many Congressmen. Although its proposed \$12.7 billions represents almost one-third of the 1948 budget, most legislators seem content to economize only on the other two-

thirds. National defense has been given a "halo" of untouchability. Current thought trends believe that any reduction of defense appropriations would cripple our military and naval potential. John Q. Public will gladly pay through the nose to avoid the unpreparedness experienced in the early stages of World War II. Estimates of defense cost by the military forces are accepted with-

Waste Hangover

However, there is every indica; tion that wartime waste and extravagances still exist in peacetime operation of the armed forces. During the war the over-all annual cost for each fighting man was \$6960. This included everything consumed in combat—ships, guns, planes and ammunition. The proposed budget calls for an annual average of \$6790 per man in uniform. Only \$170 less for the peacetime soldier than when he was maintained in a round-the-

world conflict. In January, 1947—the third year of peace—the Army and Navy had 1.006,577 civilian, employees. civilians for every three soldiers. During World War II there were two civilian employees for every fifteen soldiers - this during the most wasteful war in all history. The civilian employees represent a yearly outlay of \$3 billion. There should be no room. in an efficient fighting force for a costly "bureaucracy."

Excess Baggage No sane admiral or general would take his force into battle without making it as efficient as possible under existing conditions. Confusion and inefficiency within his own ranks are more deadly than any enemy. He must clear his decks of anything which will get in the way and keep the guns from firing smoothly. We must now use the same technique in peacetime to fight financial sui-

Albuquerque Venture ls Successful

Vet Cooperative Provides Homes at Reasonable Cost

By BAUKHAGE

Washington, D. C. (This is the fifth of a series describing bow American ingenuity is helping to solve one of America's higgest problems— the G.l.'s No. 1 headache—the housing

WASHINGTON .- As congress prepares for the home stretch, some veterans' organizations are promising that lifting the rent and construction controls will start such a rash of construction that everybody's housing problem will be solved. Others say that would be the knell to any kind of a veterans' housing pro-

Rep. Jesse Wolcott of Michigan, who wrote the bill modifying restrictions passed by

ELEC

C

the house, told me he believed that the veterans wanted not priorities, but houses. His bill, he thinks, will make the latter Oppo possible. nents claim the opposite - that two and a half billion dollars worth of building applications for higher priced

been built up as a backlog. With restrictions off, opponents say chances for cheap house-building will go with the wind. At this writing, the senate has not yet said its say.

Meanwhile, some veterans are getting houses on their own.

Drawing for Homes Climaxes Project

For example, a few weeks ago in Albuquerque, N. M., a man put his hand into a hat and pulled out a house. It happened on a bright sunny Sunday, when the New Mexico Housing Cooperative association held a drawing for the first house completed under its new building

There were 58 members of the housing association who had a chance to move into that first house -the 58 people who were paid-up They gathered on the sandy lot where the house stands. There were more than 200 persons, counting sweethearts, wives, kids

and friends, attending the drawing. The lot is on Arvada avenue in northeast Albuquerque. You can see the desert from there and the purple mountains rising in the The house is a singlestory bungalow of Spanish style with a low-pitched roof like so many of the homes you see in the Southwest. It is made of concrete block, covered with white stucco.

The drawing was a gala affair: The people, dressed in their Sunday best, perched on the piles of lumber or sat on the hoods of automobiles to watch the association's president, M. E. Holly, place the 58 slips of paper in his hat. Assistant City Manager Arthur Staton drew the first name - Duward E. Lee.

There were whistles and shouts of congratulation. By coincidence, it happened that Lee had been the first man to put up his money to buy stock when the association was organized. Real poetic justice that he should get the first house.

The drawing continued. All 57 remaining numbers were drawn. The name drawn second was to get the second house completed, to the third name drawn went the third house, and so on.

Soon each association member would have a house similar to the Lee's-a comfortable five-room bungalow with hardwood floors, steel casement windows and an attached garage. Lee said he couldn't possible have bought the place if it hadn't been for the co-op. It cost him \$6,350, complete with lot.

The New Mexico Housing Cooperative association developed from the idea of Veteran Paul Robinson, a tall rawboned engineering graduate of

Remember York?

L. L. Coryell of Lincoln, Neb., couldn't believe a two-bedroom bungalow could be provided for veterans for only \$5,250. To him goes a copy of the third story in this series-how they did it in York, Pa.

the Colorado School of Mines. When Robinson returned from a severalyear tour of duty with the navy, he couldn't find a home in Albuquer-

Finally he bought a lot, designed and personally supervised construction of a two-bedroom house. When he had finished, he found he had spent \$4,300 (making allowance for a salary for himself) for a house that compared favorably with what was costing other Albuqerque veterans about \$7,000 in the open mar-

Robinson thought a veterans' co-operative through which men could ket prices," was advanced to an

WNU Service, 1616 Eye Street, N. W., | build houses for themselves might solve the problem for other veterans. He took this idea to Max Kaslo, who operates the local veterans' referral center. Robinson also talked to Virgil Judy, local housing expediter.

The idea clicked. Interested veterans got together; drew up a con-stitution and by-laws; filed papers of incorporation.

Community Aids Vet Enterprise

As word got around, the Albuquerque community pitched in to help. A local architect donated his services on the first house and pledged to provide blueprints, floor plans, et cetera at special rates for subsequent houses.

A concrete block manufacturer furnished the blocks for one dwelling; a landscaping firm offered to do the landscaping without charge; an awning company contributed the

Other business firms wished the association well; promised to sell it materials at reduced prices. But the contributions and reduced prices don't apply to any single house. They are to be prorated among all houses, so that each association member will benefit from the savings.

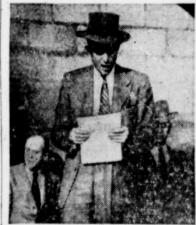

So far the association has the second and third houses almost completed; the fourth about half-fin-

Membership has swelled to 75, and because the association feels that a new house in Albuquerque means a vacant house for rent or sale eventually, the membership isn't limited to just veterans.

Association operations are flexible. A person may become a member by buying one share of stock for \$100. This is credited toward his house.) He may buy more than one share of stock if he wishes, although he is not permitted more than one vote.

Each member buys his own lot and has the privilege of selecting the design of his own house. However, the house cannot be any bigger than 1,200 square feet (around average size), and construction must meet FHA standards and building code requirements. Members can have the co-op build for them, or they may merely purchase the materials through the organization.

All labor is paid for, but members can reduce the cost of their houses by working on their own or other houses under construction. If a plumber who is working full time on other jobs spends Saturdays doing plumbing work on one of the cooper ative houses, he will be given credit at the standard plumbers' pay for the hours he works. Quite a few members have done this, but most of them are men with office jobs, anxious to pitch in and get the houses built. When they work on the project, they are assigned as laborers and receive credit at laborers' pay. There are a few unaccustomed blisters and callouses, but they enjoy the novelty, and houses are going up fast.

M. E. Holly, president of the Albuquerque, N. M., Housing Cooperative association, reads the name of the lucky veteran who will occupy the first house constructed by the organization.

NEWS REVIEW

Farm Land Prices Soar; Portal Claims Outlawed

PORTALS CLOSED:

Back Claims Denied

Almost six billion dollars in back claims for portal-to-portal pay was erased from the books when President Truman put his signature on congressional legislation designed to relieve employers, as well as the government, from such claims-now and in the future.

Although he opposed the wishes of organized labor and overrode an appeal for a veto by Secretary of Labor Schwellenbach, the President emphasized that he was certain that it was not the intent of congress to nullify past gains made by labor.

Explaining his reasons for signing the bill, he said, "Businessmen will be able to plan with assurance for full production and price reduc-This will be of real value to labor and management in a continued high level of employment. At the same time he repeated his

plea to business for lower prices and requested congress to take immediate steps to increase the statutory minimum wage from 40 to at least 65 cents an hour.

TOO MUCH SMOKE:

Can't See Stars

The nation's capital city is getting just too smoky, dusty and crowded for the U. S. naval observatory, which is getting ready to move to a ore sylvan neighborhood.

Because big cities radiate heat, which is bad for delicate astronomical instruments, the new location for the world-famous observatory must be no nearer than 25 miles to any metropolitan area. Officials estimate that it will take about eight years to find a site, put up the necessary buildings and install equipment.

In addition to providing the nation with the world's most accurate time checks, the observatory warns the radio industry of sun spot activity, puts out almanacs, supplies data on tides, phases of the moon and sunsets and sunrises, and figures out calendars.

FLU STOPPER:

New Mold Tested

A possible cure for influenza may be forthcoming from a newly discovered green and black soil mold, according to an announcement by the Society of American Bacteriolo-

So far, although there are preventive vaccines for flu, no specific cure has been developed. Not yet tested on humans, the mold is said to have shown a curative effect on chicken embryos and mice with influenza.

There is one hitch, however. The mold-bearing earth, according to the two scientists who made the discovery, was one of numerous samples which came to them from all over the world. Just where that from 1,735,882 last April to 1,326,589 particular bit of dirt came from this year, lowest since 1939, the dethey do not know

Chances are his feet hurt. And his back aches. And his legs are weary. That, at least, is the contention of Northwestern university school of dentistry, which is starting to teach its stu-dent dentists to work sitting downon a specially constructed stool.

A standing dentist is of no more advantage to the patient than a sitting dentist, the school asserts. If dentists can be brought to a sitting position, the university believes, their profes-sional lives will be extended by five

FARM LAND:

Prices Go Up

Continuing the steady trend upward begun early in the war, farm real estate prices are nearing a levdouble the average for the 1935period, a survey by the U. S. bureau of agricultural economics

During the year ending March 1, farm real estate prices rose 12 per cent for the country as a whole. That figure is compared with a 13 per cent rise for the corresponding period in 1946, 11 per cent in 1945 and 15 per cent in 1944. Fifty-six per cent of the recorded sales in the past year were for all cash, it was revealed in the survey.

OUTMODED DEFENSE: Rockets Far Ahead

Ever-improving rocket weapons already have rendered obsolete the best anti-aircraft guns of the army and navy, Paul W. Martin, an ordnance expert, has asserted.

The big strides made in development of rapid - firing automatic, radar-directed guns have been far outstripped by atomic energy and guided missiles, he said.

Three important features of a good defense were cited: A longrange detection system; a defensive rocket to intercept the enemy missile, and destruction of the enemy missile at a safe distance.

Record Slaughter

A new record for slaughtering of cattle and calves was set during April in all federally - inspected plants in the country. Hog killings were lower, however, reports the department of agriculture.

high during April of 1,203,137 head. compared with 714,860 for the same month a year ago. Calves slaughtered numbered 678,440, compared with 445,049 in April, 1946.

972 to 3,615,746, and sheep declined partment reports.

Cattle killed reached the all-time

Hogs killed dropped from 3.857.

SMART AS A FOX

Farm Youth Snares 135 Foxes To Win Championship Laurels

ITHACA, N. Y .- Old-timers among the ranks of trappers may well take a cue from Huck Spaulding, 18, of South Westerlo, Albany County. Despite his age, Spaulding has snared 135 foxes during the past winter to rank as champion fox trapper of New York for 1946.

Second place was taken by Robert H. Hark, 18, of Dalton. with 51 foxes, and third by George Rathbun, also of Dalton with 28. Both are 4-H club members. Hark also received first prize for the best prepared pelt.

Winners receive cash awards and medals in the contest for farm youth sponsored by the State Farm bureau federation and the American Agriculturist, farm magazine.

Purpose of the contest is not just to kill wild game but to teach farm boys and girls how to control surplus wildlife in areas where damage is being done to poultry and livestock. Another aim is to encourage practices among rural youth that recognize wildlife as a farm crop which may add income to the farm business.

D. B. Fales, assistant state 4-H club leader, reports that an estimated 2,300 foxes were taken in the state by the youthful trappers during the contest year.

Second and third places for the best-prepared pelt were won by Edward Bartlett of rural Lockport and Francis Simpson of rural Port

This, the second year of the contest, far surpassed last year's when

CHAMPION TRAPPER Outfoxes Foxes

estimated 1,500 foxes caught, Fales reports. All three state winners also trapped more than the previous high winner, who accounted for 21 animals.

Spaulding, Hark and Rathbun will be guests at special activities on the

School Constructs Houses To Assure **Getting Teachers**

CRAWFORDSVILLE, ARK .-Plagued by a shortage of school teachers resulting from a lack of housing accommodations, Crawfordsville's school board finally solved the problem-by building a sevenfamily apartment.

The board received several "no housing-no job" responses to its offers of employment; other teachers resigned because they couldn't find a place to live. If housing was the trouble, board members decided, then they would build houses.

Now, the seven-family apartment, conveniently located across the street from the school, has been opened for inspection of teachers. The apartments are new and modern and, best of all, rentals are as low as \$25 a month.

The new apartment is a school board job from start to finish. When contractors refused to handle the project except on a cost-plus basis. the board hired its own building supervisor, carpenters, bricklayers, masons and other laborers. The board bought all materials through the school. The finished building cost about \$50,000, which board members figure is a saving of about \$8,000 to \$10,000 over a contractor's

The school board rejected barracks and boarding-house type buildings "because congeniality does not seem to exist where a large group of adults is forced to live together."

Money for the project came partly from the revolving loan fund of the Arkansas department of education, partly from the school board Even with low rentals, the board figures the building will pay for itself in 20 to 25 years.

Application on Towel Indicates 'Clean Job'

CLINTON, IOWA .- To assure officials that he intends to do "a clean job" if appointed, Ralph M. Primmer, Clinton contractor, filed his application for appointment as county supervisor on a paper towel. Primmer is an applicant for a vacancy in the supervisorial post which will occur in June. His application, filed with the county auditor was written in pencil.

AIRPORT CHATTER

When the temperature dropped to 26 degrees, J. J. McDonald, Cashmere, Wash., apple grower, called in a pilot and his dusting plane to 'blow the frost away" from the orchard. The pilot flew just over the treetops for several hours until the sun rose. The propeller, stirring the air, sent the temperature up to 30 to 31 degrees. . . . Dedication of the new Iowa Falls, Iowa, municipal airport and an air show are sched uled for May 30. A flight breakfast at 7 a. m. will open the day's ac. tivities, which are expected to attract pilots from all parts of the state. J. J. Schecter, rancher near Alamosa, Colo., utilized a plane to

Crested wheat grass, clover and brome grass were sown from a plane flown by Norman With recent acquisition of a \$16,000 war surplus link trainer, Augustana college at Sioux Falls, S. D., is planning to offer a two-semester course in civil aero-nautics. . . . Five Holstein heifers, all "expectant mothers" and valued at \$11,000, have been shipped to Uruguay breeders. They were sent from Seattle to Milwaukee by train and from there by plane. Breeders in Uruguay bought the cows with the stipulation that they arrive before giving birth to their calves.

Dodge City, Kas., fabled cattle town of the early days and site of Boot Hill cemetery, stressed modernity at its recent 75th anniversary celebration. An air show, featuring everything from stunt flying to dummy bombing, provided a modern touch to the colorful old - time celebration. Pilots from Colerado, Oklahoma and Kansas gathered for the

STANDARD RISKS

Of 100 life insurance companies surveyed by Institute of Life Insurance for current practices in connection with aviation risk, two-thirds accept as standard risks without limitations applicants who contemplate air travel on U. S. scheduled transports in the western hemi-

M. Harding James of Bing-hamton, N. Y., likes to fly-but he also believes in keeping a promise to his wife. When he flew from Binghamton to Toronto, he kept one foot on the earth all the way. The earth was in a small box.

BETTER TRAVELERS

Babies are better air travelers than grown-ups, according to Pan American World Airways steward-

Babies, they claim, seldom get airsick or restless. They sleep peace-fully or play near their seats. Stocks of baby foods and a baby kit with comic books, rattles and games keep them busy. Some toddlers even have crossed the Atlantic unaccompanied.

Difficulties do arise occasionally, the stewardesses admit. On a recent trip "emergencies" exceeded the emergency supply of diapers. One small traveler debarked wearing the plane's fanciest dish towel.

MASS PRODUCTION . . matic new aviation assembly line methods, patterned after the Detroit type which once before changed the nation's form of transportation, have resulted in peak production at the Stinson division of Consolidated Vultee Aircraft corporation in Wayne, Mich. A new production record of 316 multi-purpose personal air. planes, like the craft shown above, was set during April.

SMAILL AIRPORT GAINS

Progress in design and manufacture may be relied upon to reduce production costs, improve performance and decrease noise of small aircraft, it was brought out at the national personal aircraft meeting of the Society of Automotive Engineers in Wichita, Kas. To reduce costs, Beech Aircraft representatives recommended that costs be considered during the design stage and that manufacture of planes be coordinated by engineering and production departments.

EVIDENCE OF LETUP

Income and Output Hit Peak

WASHINGTON. - Although both | annual rate of \$209,000,000,000. the national income and the national turn-out of services and finished goods rose to record peaks during the first three months of the year, there is evidence the boom is slackening, it is pointed out in a commerce department report.

Since the income and production are measured in terms of money, higher prices and higher wages were in part responsible for the showing.

The "gross national product," de-

fined as "total output of final goods

This, said the department, approximated the peak recorded in the second quarter of 1945 when huge quantities of war material were being produced.

Also, it topped the fourth quarter of 1946 by \$4,300,000,000, principally because of increased consumer an annual rate. spending, but nevertheless repre-sented "the smallest quarterly gain since the bottom of the reconversion decline was reached in the first quar-

ter of 1946.' National income reached a record

fourth quarter of 1946, the department said.

Income payments to individuals rose by \$3,500,000,000 to an annual rate of \$177,000,000,000. Wages and salaries accounted for the largest part of the gain, \$2,600,000,000 at

Relief and social security payments and veterans' allotments also were up by \$600,000,000, reversing their downtrend through 1946. Dividends, interest and net rents of landlords were down \$500,000,000. Net total in the first quarter of this year at the annual rate of \$180,500,000,000, was up \$200,000,000.

MAKING REFORMS SUCCEED

LESSON TEXT-II Kings 22:10, 11; 23:1-5. MEMORY SELECTION-Give me understanding, and I shall keep thy law.—Psalm

God can bring blessing out of the most unpromising of circumstances. Yes, and men can make chaos out of God's greatest gifts.

The good Josiah became king at eight years of age, and was surrounded by godly counselors who helped him become an outstanding ruler for God. When he was sixteen he had a real religious experience (II Chron. 34:3), and at twenty he began to purge Judah and Jerusalem of idols and wickedness.

I. A Book Found and Read (22:10, 11; 23:1, 2).

The Word of God had been neglected for about sixty years. How sad! Yes and how sad that in our homes the Bible is so often neglected-on a book shelf, or in a trunk, or gathering dust on a living room table. A lost Bible, and a people living in sin! How much we need to push aside the rubbish in our lives and bring out our "lost"

Observe that they not only found the book, but they read it. That was true of the ones who found it as well as of those to whom they passed it on. What a good thought we have there: read the Bible, yes, but be sure to get someone else reading it too.

In Josiah's day it was thus first

received

1. By the King. The ruler or rulers of the people need to return to God's Word in our day. It is all too often neglected in the council chambers of the nations.

Josiah was moved by what he read to real repentance. He realized that the judgment of God must come. Inquiry at Jerusalem brought word from Huldah the prophetess that it would come, but not in Josiah's day.

The king was not content to keep this word to himself, and insisted that it be read

2. By the religious leaders. The priests and the prophets who were doubly guilty in neglecting it were now brought face to face with God's revelation.

Who will say that the great need in America is not just this, that its preachers and denominational leaders get back to the reading and teaching of God's Word. Book reviews, lectures in economics and politics, discussions of one worldalmost anything but the Bible. Such is the fare of many of our preachers. No wonder that they and their people are spiritually starved.

Josiah knew what was needed and the Word was now read

3. By the people. Applying that to our day, it is true that the Bible is our best seller, that it is available to every home, and that most decent households have not one but many Bibles. But are they being read? The answer is obviously no. Let's correct that dreadful situation. Read your Bible!

II. A Book Believed and Practiced (23:3-5, 21).

Josiah saw that it was not enough to read and rejoice over the Word of God. Something must be done about it, and he did it.

1. The king made a covenant with God.

Standing in a prominent place before his people, he humbly and solemnly renewed his consecration the Lord, and promised to abide by his Word with all his heart and soul (v. 3). Such a leader could not but inspire his people to do the same.

What a blessing it is to us when we hear of some man prominent in the affairs of the nation or state who loves the Lord, and keeps his commandments. He is not only an inspiring example, but a real witness for God.

2. The priests cast out the idols

(vv. 4, 5). The king required this of them, and they proceeded thus to cleanse the places of worship and prepare the way for a true devotion to God. Here again we say that when religious leaders get back to their first

devotion to God and put away the empty philosophies of this world, we shall see a revival. What did the people do? Josiah saw that they needed some positive expression of their faith. It was not

enough to tear down the idols; they must re-establish the true worship of God. So we find that 3. The people kept the Passover. This was the great feast of the Jews which spoke of redemption from bondage. It pointed forward to

Christ the Redeemer from sin. He is our Passover (I Cor. 5:7). In these dark and bewildering days people are looking to Christian leaders to prepare a feast of remembrance of the death of Christ and of his glorious redemption. Let the people gather round him and, cleansed by his precious blood, keep the feast with joy and purity of heart (I Cor. 5:8).

Summer Weddings Will Be Incentive For Many Parties

For a simple bridal shower refreshment, a punch bowl with floating orange slices and slivered strawberries makes a pretty picture. Serve this with cake or

Bridal days are once more with us, and there's hardly any circle of friends where at least one wedding does not take place. A good friend of the bride usually gives the honored girl a shower, and it is with such pleasant doings that we are concerned.

Whether it's a lingerie, kitchen or personal shower, the theme of the party refreshments should be daintiness. If you can carry out the

theme with a centerpiece of bride and bridegroom, well and good, but it isn't necessary. Use your daintiest linen and fresh, fragile flowers, and your table is bound to

Pastel color combinations in table settings and refreshments are highfavored as they carry out the theme of the occasion. Food, however, need not be elaborate, because the girls probably will be too excited to eat much. Do, however, make everything delectable, and you will be well rewarded for your efforts.

A SIMPLE afternoon or evening party might consist of a light delectable cake and punch as follows:

1 cup whipping cream 3 egg whites 1/2 cup water 1 teaspoon vanilla

2 cups flour 11/2 cups sugar 3 teaspoons baking powder 1/2 teaspoon sait

Whip cream until stiff; beat whites until stiff and combine carefully. Add water, vanilla and dry ingredients, which have been rifted together at least three times. Bake in layers at 350 degrees about 30 minutes or until done. Use the following filling:

Lemon Filling De Luxe.

14 cup shortening 1 cup sugar 3 eggs, beaten slightly Grated rind of 1 lemon 6 tablespoons lemon juice

water to soften. Add remaining ingredients. Cook over simmering water, stirring constantly, until well thickened and of good piling quantity. Cool before using.

Strawberry Punch. (Makes 4 quarts)

1 quart water 1/2 cup granulated sugar 1/2 cup corn syrup 2 quarts strawberries 3 cups chilled orange juice 1 cup chilled lemon juice 4 cups ginger ale

2 thinly sliced oranges or limes Combine first three ingredients. Bring to a boil and add the washed, hulled strawberries, and boil, covered, for 3 minutes. Remove and strain through a sieve, without pressing, and chill. Just before serving, combine with remaining ingredients, using orange slices for

LYNN SAYS:

Make Baking Easy Give your biscuits a rich, brown crust by brushing them with milk or cream before baking. This will prevent your baking them to the drying point by making them brown

more readily. To prevent boiled frostings from becoming sugary, add 1 teaspoon of vinegar or 1/4 teaspoon of cream of tartar to the syrup while cooking.

Custard pies should be cooled on

steaming and becoming soggy.

wire rack to prevent them from

LYNN CHAMBERS' MENUS

Sliced Cold Roast Chicken Potato Salad Vegetable Salad *Whole Wheat Muffins Beverage Berry Pie a la Mode Recipe given.

garnish, and additional slivered strawberries, if desired.

ANOTHER EASY but satisfying answer to the refreshment problem is a salkti served with homemade hot-from-he-oven muffins that take just a few minutes to bake. But first, confider the salad, made with easy-to-ure canned shrimp:

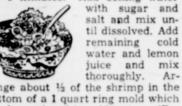

Shrimp and Avocado Salad Ring.

(Serves 6) 2 tablespoons plain gelatin 11/2 cups cold water 11/2 cups boiling water 1/2 cup sugar 1 teaspoon salt 1/2 cup lemon juice 2 ripe avocados

Mayonnaise Soften gelatin in 1/2 cup cold water for 5 minutes. Add boiling water with sugar and

1/2 cup chopped celery

1 No. 1 can shrimp

range about 1/3 of the shrimp in the bottom of a 1 quart ring mold which has been rinsed in cold water. (Reserve remaining shrimp for filling.) Cover shrimp with 1/2 cup of the clear gelatin mixture and chill until firm. Chill remaining gelatin until thickened. Peel and mash 1 avocado and fold into slightly thickened gelatin mixture. Peel and dice other avocado and add to mixture with celery. Pour over jellied shrimp and chill until firm. crisp greens and place Shrimp Filling in center. Serve with mayon-

> Shrimp Filling. Remaining 3/3 can of shrimp 1 cup diced cucumber 1/2 cup diced celery Salt and pepper

Combine ingredients and season to taste. Place in center of shrimpavocado ring.

Combine shrimp and avocado for a pretty salad. Make your salad in the morning and save last minute flutter when the guests appear. Bread and butter sandwiches made finger style, or whole wheat muffins are a good accompaniment.

YOU'LL FIND these whole wheat muffins nourishing as well as a delightful change from other types because they're less well known

Whole Wheat Muffins. 34 cup all-purpose flour

1 cup unsifted whole wheat flour 4 teaspoons baking powder 1/2 teaspoon salt 4 tablespoons granulated sugar l egg, well beaten cup milk

4 tablespoons melted shortening or salad oil

1/2 cup raisins Mix together dry ingredients. Combine remaining ingredients. Add

all at once to the flour mixture, stirring, not beating, quickly and vigorously, until just mixed and of a lumpy appearance, but no longer. Over-stirring will make your

muffins coarse. Fill greased or oiled muffin pans 3/3 full and bake in a moderately hot (375-degree) oven for

35 minutes. Released by Western Newspaper Union.

To save sugar used in icings, sprinkle a small amount of sugar on the cake before baking. This, in turn, may be sprinkled with finely shredded nuts or coconut shreds. Fruit pies as well as berry pies

will have better flavor if the juice of half a lemon is sprinkled over the filling before baking. Bread and rolls will be much

more quickly made if the yeast in them is doubled. Four teaspoons of vinegar also will help speed the process and keep bread better during the summer months.

SEWING CIRCLE PATTERNS

Cool, Comfortable House Dress Date Dress Is Youthful, Smart

Brief-Sleeved Dress DELIGHTFULLY cool house Adress for warm summer days. Brief sleeves are so comfortable, a nipped-in waist insures a neat fit. Two handy pockets are shaped like tulips and finished with colorful binding to match the neckline.

Pattern 1607 comes in sizes 34, 36, 38, 42, 44, 46 and 48. Size 36, 4 yards of or 39-inch; 2½ yards trimming.

An old toothbrush handle is an excellent means for opening up or running a cord through a starched hem.

Have several round pot holders on hand as well as square ones. These are very handy for removing pies and puddings from the oven as there are no corners to drop into the food and make the holder sticky.

gowns, dip them in very light starch to which a few drops of tional normal digits, ranging from cologne have been added. This will make slips stay clean longer, avoid clinging, and keep them looking new.

It's all right to leave opened canned goods in the original tin cans in the refrigerator for a short period. But cover the can to prevent absorption of other flavors and odors.

Corned beef, tongue, and fish dishes are given an unusual zest with horseradish salad dressing. Combine one-half cup cooked salad dressing or mayonnaise with two tablespoons grated horseradish to achieve a new dressing.

Lunch-box vegetables (such as carrot strips and celery) stay fresh longer if they're sliced small enough to fit into a waxed paper An ice cube in their midst will keep them ice-box fresh. This will make a hit with lunch-box

In buying fish, select the ones with bright bulging eyes, if you want tasty ones.

Your iron won't stick if it's run over salt that is sprinkled on a paper towel.

In doing a small plaster repair job it is well to remember to wet the inside as well as the outside surface of the crack. The reason for this is that old plaster is like a sponge, in a way. It will suck the moisture out of the new plaster and make it virtually worth-

EXPERTLY designed with youthful air is this smart frock for all your summer activities. Bold ric rac accents the cap sleeves and upper skirt, and note how cleverly the large buttons trim the bodice.
