The good news this week is the fine planting rain over the week end. Since Thursday of last week a total of 1.52 inches of rain has fallen with the total to date for April at 1.7 and the total for this year near 6 inches. As we go to press Tuesday at noon the sky is dark with rain clouds.

Along with the generous winter rains of February and March, the moisture content over trade area is ideal for planting any time the farmer desires. This week farmers are busy putting planters to their tractors and there is a general air of happiness and anticipation work to be done. To date the South Plains has escaped any damaging flash floods as the rains have been slow and gentle.

Two New Water Wells

During April the City tied in two new water wells in the south part of town making about 12 wells available for pumping. Also weeds have been cut at the sewer plant and oil poured on the excess sewer water to control insects. Prospects are good for some paving this summer and persons interested are ask ed to work up their blocks. City also hopes to retop all present paving to protect this big invest-
