### Crop Prospects Excellent

Crops have never looked better, for late June. Cotton and grain are growing rapidly and prospects are nearly too good to be true. To date the crop has been relatively cheap as most farmers have planted only once. To date weed control is being handled by cultivation.

Up to 10 inches of rain has been recorded here since mid-May and the cotton showers is the frosting on the cake. The only area having weather trouble is a strip four or five miles wide beginning about 4 miles southwest of town running to Welch and also north thru parts of New Moore. This strip had a killing hail and later flooding.

Mr. and Mrs. Billy Joe Edens and girls of Lubbock visited in the home of Mr. and Mrs. Harold Traylor Sunday.

Mr. and Mrs. M. B. Allen of Lovington, Mr. and Mrs. Kenneth Schooler and Barbara spent week end with Mr. and Mrs. M. B. Allen.

**ACCENT ON HEALTH**

There are no plants, shrubs or trees on the moon, as far as we know today.

On planet Earth, however, vegetation helps sustain life. But some plants, trees or shrubs are potential killers of man.

Some part of the ornamental plants or flowers in your yard may contain deadly poison. Many poisonous plants are so common and seemingly innocuous you don't suspect their toxic qualities.

Who would suspect that the beautiful oleander bush, grown indoors and outdoors all over the country, contains a deadly heart stimulant similar to the drug digitalis? So powerful is this poison that a single leaf of an oleander can kill a child. Many people have died merely from eating steaks speared on oleander twigs and roasted over a fire.

The pretty mountain laurel plant was used by the Delaware Indians to make a suicide potion. The popular Christmas flower — the poinsettia — is full of an acrid, burning juice, so lethal that a child who consumes one leaf of the plant might die. The berries of mistletoe proved deadly to adults who brewed what they thought was a "medicinal tea."

It's easy to be deceived by plants. One part may be edible while another is poisonous. For example, twigs of cherry trees release cyanide when eaten. Peach tree leaves contain hydrocyanic acid, one of the most dangerous poisons known.

Even two of our most popular vegetables, the potato and tomato, come from plants related to the deadly nightshade. Although fresh tomato fruits and potato tubers are harmless, the foliage of both plants contain alkaloid poisons capable of causing digestive upset and nervous disorder.

Most dangerous in your vegetable garden is rhubarb. Its stalk, commonly used in baking and cooking, is not toxic. The leaf blade, however, contains oxalic acid which crystallizes in the kidneys, causing severe damage.

Also beware of laurels, azaleas, water hemlocks and buttercups because of their poison content. Both foliage and acorns from oak trees

**TO ALL LAW ENFORCEMENT OFFICIALS**

A NATIONAL POLICE FORCE: is a tool of tyranny. I abhor the implications of the term, and I refuse to let the FBI be forced into practices which smack of police state actions, regardless of the circumstances.

Our country today is caught up in a great and too-long neglected cause of human rights. Some individuals, in their efforts to secure fundamental guarantees of the Constitution for all citizens, have criticized this Bureau for not exercising its authority and for not assuming responsibilities belonging to local and State police.

The FBI fully appreciates the grave responsibility inherent in

the investigation of alleged violations of federal civil rights status. As I have stated many times, we are meeting these obligations without apology. Our role, however, is that of an investigator — not an accuser, prosecutor, jury, or judge. The FBI is a fact-gathering and reporting agency, not a national police force. It is not empowered to furnish protection nor to police streets of our communities.

Citizens should not be misled by the self-styled "medicine men" in our midst who with their patented tonics for all social ills profess to hold the magic key to Utopia. Under close examination, their redentials often prove to be as false as their charges that the FBI is dragging its feet" and is not determined to enforce civil rights laws. The ludicrousness of these charges is exceeded only by their inaccuracy. What these drummers of discord are actually advocating is that the FBI dispense with the democratic principles of law enforcement and apply police state methods.

In a democracy, the end does not always justify the means. We must not lose sight of the fact that the path of justice is a two-way street. To my mind, the freedoms and rights of our Nation can be implemented, as well as preserved, without resorting to totalitarian tactics.

**PARKING LOT CAR THEFT**

Mort Measwell owned a parking lot. It was enclosed by an eight foot fence and had one entrance and one exit. Mort kept at least one attendant on duty at all times to park and watch after his customers' cars. Patrons were requested to leave their keys in the car to enable the attendants to park the cars as well as move them when necessary.

Hotrod Harry parked his car in Mort's lot and was given a claim check. He promptly put it into his pocket without paying any attention to it. Upon the back of the claim check was written "The person accepting this ticket assumes all risk of accident, and expressly agrees that the management shall not be liable, under any circumstances, for any injury to person, loss or damage."

A couple of hours later Harry returned. His car had been stolen. Mort said he was sorry, but pointed to the statement on the back of the claim check. Mort refused to pay for the stolen car. Harry sued him.

Must Mort pay for the stolen car? Mort probably would have to pay. Most courts have held that a statement on the back of a parking claim check is only effective if called to the car owner's attention. Mort had not done this. Also, Harry had a right to believe from the fact that

More than 41,000 Texans work in Texas' forests and mills to produce an annual payroll of \$138 million and products worth \$500 million per year.

IT'S THE LAW IN TEXAS LOCAL RULE . . .

Under our dual system of government, to sets of law . . . state and federal . . . may govern what we do.

State laws have traditionally governed certain fields: for example the law of wills, estates, and transfers of property upon death. Each state has its own rules on death transfers, how to make wills, and what happens when a person dies without a will.

But the federal government has some power in this field, especially when federal money went to the decedent or when it involved a national policy.

In a dispute between the United States and a State over a decedent's estate, the U.S. Supreme Court set forth some of the federal powers: A war veteran died in a veterans' hospital without a will or heirs. He had some personal property. Under the state law property escheated to the state. Under federal law his property goes to the U.S.

The U.S. Supreme Court handed the estate to the U.S. under its war powers. When patients die without wills all their property goes to keep up veterans' hospitals and recreation programs.

Other veterans' laws have cut into the states property laws. Federal laws govern G.I. insurance. They cut off community property rights, even though premiums came from community funds.

As a rule people who live in federal enclaves within a state must obey state laws. Thus Texas law governs civilians on military and scientific areas, or workers on a federal reservation as to wills, property, marriage and divorce. In the case of crimes, there may sometimes be concurrent jurisdiction.

But the federal government may pass laws to avoid conflict between state laws and a national policy.

ACCENT ON HEALTH . . .

Ten killers are at large in Texas. These killers aren't bandits or criminals - they are the ten leading causes of Texans' deaths. The ten killers account for a giant share of 82,692 Texans who died in 1955.

The latest statistics released by the State Health Department categorize, profile and dissect the leading killers. This is how they stack up on paper.

Heart disease took the lion's share - one out of every three deaths in the State. National statistics also show the same leading cause of death. Apoplexy - or stroke, is classified as the third most deadly, with 11 percent of the death total.

Accidents, as the fourth leading killer, claimed 6,999 lives, or seven percent of the total. Death due to accidental cause takes the largest percentage of lives for the age groups between one and 45.

Disease of early infancy, fifth in sequence, takes its toll . . . of course below the one year marker. Pneumonia ranks sixth in the line-up of killers claiming five percent of the deaths.

General arteriosclerosis, diabetes mellitus and congenital malformations are the seventh, eighth and ninth cause of death, respectively.

Suicide is the tenth leading cause of death. It first ranked tenth in 1955. Deaths from suicide increase given to owner of the car. But with few exceptions the courts have not upheld such limitations where the loss or injury was due to negligence of the operator of the lot and where the stipulations were not specifically called to the attention of the car owner.

CELEBRATE JULY 4th AT LONGHORN CAVERN

Holiday visitors to the Highland Lakes area may shake off the Fourth of July heat amidst the chill 64 degree weather of Texas Longhorn Cavern, and one of the big drawing cards for this occasion is the Liberty Bell, a strange dome-like depression formed by nature.

Other depressions have pitted the ceiling of the cavern Dome Room, but none is as deep or well-shaped as the Liberty Bell formation.

The cavern is unique among the great caves of the world because of the variety of its formations; the result of thousands of years of water movement through the diverse Texas rock structure in which it was cut. The vast chambers are all different, although each has some distinguishing features.

The postoffice department requires that no one park between the two fire hoses located in the back alley behind the postoffice. The reason for this is so the Star Route carrier won't have to wait for someone to clear out so he can get up to the back door and unload the mail. It has been known to happen to a city north of here where the Star Route carrier couldn't get up to the back door of their postoffice so he just drove on into Lubbock with this mail. With your cooperation on this matter we won't have to explain why our mail isn't in and up.

"walks" right over bumps and trouble

Independent front suspension takes the "truck" out of truck ride. It smooths rough roads, protects truck, driver and cargo from excessive jelling. And on Chevrolet pickups it's a proved system with millions of miles of user experience behind it. Try it out on one of Chevrolet's great Fleetside or Stepside pickups. It's one of the big reasons that Chevrolet is first choice with pickup users from coast to coast.

### Country Editor --

It seems that this corner is always writing about Jack Brewer. To me, a relative new comer on the Baldies, Jack is a typical Westerner. Also his late Dad was always a joy to me.

This concerns Jack's mixbreed dog "Cowboy". I came to know Cowboy some months ago but we both are far from being buddies. A giant of a white dog Jack sheered him like a sheep.

For many years he reports at night to the nitewatchman at dusk and lies in front of the patrol car to early light of morn and goes home. He was a companion to Pete McMillian and now Jess Putman. When he wishes he rides on the nite rounds but more often runs in front of the car. Cowboy is a good policeman—serving without pay. Any dog-lover can appreciate the unusual intelligence

of this dog.

Like many of you, I am a fan of Little League, Minor League and Pony League ball games. Last Thursday nite I saw a thrilling play when a youth hit a ball to the fence and was "tagged out" at home plate. The story behind the story is the work of the coaches and managers. They play the boys like a game of chess using their talent for the final score. The kids worship these adults and respect them greatly. Such is aim of youth baseball—to teach team work.

How many of you have seen the nearly completed Junior High building and the gym addition. It will be very beautiful and we owe Supt. White and our school board with coming back with a building program that we all like. Mr. White said he would have far less resignations of teachers this year than in the past but the ideal sit-

Brown completed the game giving up 13 runs on 8 hits.

Billy Wood led the hitting for the Cubs with a home run, a triple and a single, Joe Valdez slammed out a triple and two singles, David Carter had a double, Richard Disson hit a pair of singles and Ray Gomez had a single.

uation would be not to have any. Are we as a community willing to bring our teachers into our "community circle" or should? No man can remain a stranger. Think of this.

Back to youth baseball—the Burtson family give all their time to the project. C. R. announces, his wife keeps the records and his elder son is head ump. Hats off and as well as to the ladies who work in the refreshment stand and Mr. Webb who is one of the "daddies". The folks behind the stage make the show.

### L. L. Results

Wes Mitchell with Burnell Jackson getting a pair of singles.

The Braves used three pitchers, Mike Mensch worked 1 1/2 innings, gave up 6 runs off 6 hits. Burnell Jackson took the mound in the second inning and gave up four runs on three hits and was relieved in the fifth by Johnny Avila who allowed two runs on three hits. For the Yankees Benito Lopez had a home run and a single, Rex Childress had a double and a single, Cato Vargas and Joe Martinez each had singles, Danny Amaro a pair of singles and the pitcher Jerry Webb led the hitting with a triple and two singles.

In the second game the Cubs defeated the Giants by a score of 15 to 14.

Billy Wood worked on the mound for the Cubs and gave up 11 hits; a triple and a single to Walter Brown, two singles to Robert Santos, Brad Vaughn and Barry Clayton, a double and a single for Ken Don Jones, and one single to Odell Hunter.

Joe Hoskins started on the mound for the Giants and was relieved in the fourth after giving up two runs on two hits. Walter
