FAMILY HEALTH RECORD IS USEFUL

Sooner or later everyone needs a family health record. Dr. J. E. Peavy, state health commissioner, suggests you start yours now if you are not already keeping one. Kept accurate and current, it can be of permanent value for the children's school records for insurance data and for your family doctor's use. The health official says, "A school note pad makes a good record book, but don't use it for anything else. And remember it has to be carefully kept, if it is to be of full value."

You can start by jotting down the basic information you already have at hand concerning the injury and illness history of each member of your family.

Start it off with a brief listing of family history. Enter the date and place of birth of each person and the place and date and cause of death of any deceased. Also enter pertinent information and the medical facts about each family member such as the presence of chronic illness or physical handicap.

Next start a section for dates of immunizations, being sure to provide space for each member of the family. Allow room for entering dates of immunizations against whooping cough, polio, smallpox, diphtheria, tetanus, and typhoid fever. Don't forget to include the dates of booster shots.

In a section of general information list such things as the type of blood each member of the family has, and the drug sensitivities or special allergies of each. If the RH blood factor is known to be present in anyone, be sure to record it.

EARLY FILING OF TAX URGED

Requirements for filing federal income tax returns for 1961 were announced today by Ellis Campbell, Jr., District Director of Internal Revenue Service, Dallas.

Briefly - "most people with \$600 or more of gross income for 1961 must file a return with Uncle Sam," the Director said. Every citizen or resident of the U. S. A. — whether adult or minor — who had \$600 or more gross income in 1961 must file: if 65 or over \$1200 or more.

However if you are self-employed, you file a return if your self-employment income was \$400 or more even if your gross income was less than \$600. A person with income of less than these amounts should file a 1961 return to get a refund if tax was withheld.

Area taxpayers are urged to file their returns for 1961 with their IRS District Director as soon after Jan. 1, 1962 as possible. Although the filing deadline is April 16, those who wait until the last minute find it more difficult to get technical help the nearer the final day approaches. Also last minute income tax filers make more costly errors in their returns. Taxpayers with technical problems may have them solved by phoning IRS at 1600 19th st. in Lubbock.

The annual sweetheart banquet has been at Baptist Church for Monday night, Feb. 19th in Fellowship Hall of the Church.

HERE'S HOW YOU CAN BE SURE OF ABUNDANT HOT WATER WORRY FREE!

INSTALL A MODERN FLAMELESS ELECTRIC WATER HEATER

Important advantages:

1 SAFE - NO FLAME
Perfectly safe in any location, an electric water heater has no flame to blow out, no fuel to leak, no pilot light or flue to worry about. And the outside of an electric water heater is always cool.

2 HIGH EFFICIENCY
Electric heating elements are in the water, inside the tank. The tank is completely insulated, even on the bottom, to prevent heat loss. And no heat is wasted up a flue. Water heats faster and stays hot longer.

3 LONG LIFE
With an electric water heater, the tank bottom is not subjected to the corrosive action of flames. There are no valves to stick, no moving parts to get out of order. You are assured many years of trouble-free service.

4 INSTALL ANYWHERE
Because an electric water heater requires no flue, it can be installed anywhere in the house, close to the point of greatest use. This saves long pipe runs and consequent waste of heat due to water cooling in the pipes.

5 SUNSHINE CLEAN
With an electric water heater, there are no by-products of combustion to soil walls or ceilings. No unpleasant fumes. No flue to accumulate soot. An electric water heater is the cleanest method known for heating water.

6 MODERN - COMPACT
Choose from round or table top models at your plumber's or appliance dealer's. Compact round models require only four square feet of floor space. Table top models provide additional counter space.

With this adequate display of confidence which they have placed in me already, I have filed my name in the Democratic Primary.

This office is one of great importance to the people of this district and one whose duties I feel I am well qualified to assume. My service in the Legislature during the last four years has done much to give me the experience necessary to serve the people of this district as they want and deserve to be served in Austin.

I believe in a sound fiscal policy for state government. I believe in clean, honest government where the people have a strong, active voice. I believe in this West Texas area, in both its human and natural resources and in their progress, conservation and development.

HERE'S HOW YOU CAN BE SURE OF ABUNDANT HOT WATER WORRY FREE!

INSTALL A MODERN FLAMELESS ELECTRIC WATER HEATER

Important advantages:

1 SAFE — NO FLAME
 Perfectly safe in any location, an electric water heater has no flame to blow out, no fuel to leak, no pilot light or flue to worry about. And the outside of an electric water heater is always cool.

2 HIGH EFFICIENCY
 Electric heating elements are in the water, inside the tank. The tank is completely insulated, even on the bottom, to prevent heat loss. And no heat is wasted up a flue. Water heats faster and stays hot longer.

3 LONG LIFE
 With an electric water heater, the tank bottom is not subjected to the corrosive action of flames. There are no valves to stick, no moving parts to get out of order. You are assured many years of trouble-free service.

4 INSTALL ANYWHERE
 Because an electric water heater requires no flue, it can be installed anywhere in the house, close to the point of greatest use. This saves long pipe runs and consequent waste of heat due to water cooling in the pipes.

5 SUNSHINE CLEAN
 With an electric water heater, there are no by-products of combustion to soil walls or ceilings. No unpleasant fumes. No flue to accumulate soot. An electric water heater is the cleanest method known for heating water.

6 MODERN — COMPACT
 Choose from round or table top models at your plumber's or appliance dealer's. Compact round models require only four square feet of floor space. Table top models provide additional counter space.

Conservative Democrat
Running as a "conservative democrat", Grimes said he was of the "Jeffersonian school of thought in that the government which governs least, governs best." He said he would like to see the inequities of the present 2 percent sales tax smoothed out to a better working

sales tax." Grimes said that in his belief, he puts "the man above the party" for issues that come before the state or nation. "I want to show the conservatives of Texas," he said, "that the Democratic Party is still their party."
Regarding the agricultural issues, Grimes said, "He would like to see the Federal Government work its way out of the farm program." "I want the general public to know and understand what is going on," Grimes said. He added that he was for a "local awakening of the conservative ideas in this area." "If elected to this office, I will give it the time, dignity and conscientious effort that the office deserves," Grimes said.
