THE SALES TAX

The sales tax as proposed in the first bill presented to the legislature which is said to be the Administration Bill, has the appearance of being a hybrid or combination of a gross sales tax, an occupation tax and a privilege tax. It is obvious and it will become a law, people of this state will regret it.

It is a noticeable fact that it does not take the place of any other tax but is an added burden. Wouldn't it be much more sensible and in line with the times if the state government would undertake to do what the average citizen has had to do, viz. cut expenditure by twenty-five, fifty or seventy five per cent and then get along on what is left?

In a few years we will have emerged from the present unsatisfactory condition and can resume then, if we want to, all the multiple operations of the state government that are desirable, perhaps, but for the present we need to concentrate attention to meet a condition that is a condition and not a theory. Tinkering with the needless limited incomes now is not in line with our needs.

Texas people do not want more state taxes. They want less. They want government to leave them alone.

We note in last week's issue of the Terry County Herald that Mrs. Strickland, wife of the editor of that publication, celebrated her birthday by undergoing a major operation at the Lubbock sanitarium.

The index joins with other members of the South Plains press in extending best wishes for a speedy and complete recovery with happy birthdays and many of them, in the future.

Would You Do This With Milk?

When the milk man brings the morning's milk, do you at once stop at the sink and pour out a portion of it? Certainly not!

THEN WHY WASTE NATURAL GAS?

The various gas cocks, fittings and piping on your premises may not be gas tight and can frequently waste a large amount of gas in a year through leakage.

With the Bunsen type of blue flame burner, a showing of red or yellow in the flame is an indication of imperfect combustion and therefore waste.

Rooms are more healthful if kept at about 70 degrees F. with proper humidity, yet much gas is wasted by keeping room temperatures higher.

Heat radiated into furnace rooms from the furnace, the furnace piping, and hot water and steam piping does not enter the room that is to be heated and therefore is wasted. Proper insulating of furnace piping will greatly curtail this loss. In any gas heating device the temperature of the combustion products where they go into the chimney has an important bearing on cost loss.

Improper adjustment of appliances resulting in imperfect combustion is a waste.

Water that precipitate scale or sediment will frequently build up a thick coating on the inside of the water heater over point of flame contact and greatly increase the amount of gas necessary to heat the water.

Turning on gas to a point where the flame goes over the top in open top space heaters wastes gas.

While we can not control the amount of gas that you use, we do urge you to insure that your consumption does not exceed your actual need. This constitutes our best service to you. They are worth more money than revenue derived from gas which is wasted.

METHODIST CHURCH NEWS
W. R. Burnett, Pastor

There was an excellent crowd at the Methodist church last Sunday morning at the 11 o'clock hour. We were very happy to see a number of visitors in the congregation. The pastor brought a message on "Godliness." Next Sunday morning the pastor plans to bring a message on "Brotherliness." Do we believe in real brotherhood? Do our different churches in our practice and in our relationships with each other show a real spirit of brotherhood? Is there a tendency to place creed above brotherhood? There is much food for thought here. Come and hear this subject discussed next Sunday morning.

Sunday school meets at 10 o'clock. Our Sunday School attendance was also larger last Sunday than it has been for some time. We have a place for you in Sunday School. Come and meet with us next Sunday.

The Epworth League will meet at 7 o'clock next Sunday evening. The evening worship service at 7:45 will be dismissed in favor of the revival meeting now in progress at the Baptist church.

The Womens Missionary Society will meet Monday afternoon at 3:00 at the church.

The pastor of the local church had the privilege of preaching to the congregation of the Methodist Church at Draw last Sunday evening. This church has a loyal, sacrificing congregation and a fine consecrated pastor.

Everyone will find a hearty welcome at all the services of the Methodist Church. Come and worship with us.
