28th year: No. 42

O'DONNELL, LYNN COUNTY, TEXAS, Thursday June 21, 1951

\$1.50 PER YEAR

Legion Team Is Entered In Area Contests

Following are members of the 1951 American Legion team of O'Donnell:

Won	Lost	pt
6	1	.858
5	3	.625
5	3	.625
2	5	.283
1	7	.125

Woodrow Ables of here and Blizard Owens of Lamesa fished the Concho near San Angelo last week and thereby hangs a tale. The two men had stake out seven nice channel cats during the night and the next morning when they went after their catch, there remained nothing but 7 fish HEADS. A coon had enjoyed a tasty midnight snack.

Mr and Mrs J J Hodnett's Sunday visitors were Mr and Mrs Elmore Hodnett and grandson of Cisco and Mr and Mrs Don Duke and two children of Big Spring. Mrs W H Harris and Mr and Mrs Truett Hodnett.

Mr and Mrs J J Hodnett visited at Sweetwater last week while the grand daughter had her tonsils out. Miss Florence Carpenter accompanied them.

Pvt. Tom Schooler of Ft Hood spent week end at home.

Mr and Mrs W E Simmons recently returned home from an extended visit with relatives at Memphis. W. E. said it was too hot to fish.

Mr and Mrs Reese Hamlin and children of Odessa visited their parents. Mr and Mrs C L Tomlinson over week end and the group spent Sunday with Mr and Mrs C L Tomlinson, jr at Lubbock for an ice cream supper.

Uncle Pink Brewer remains ill but is not suffering as much with his arm, his wife reports.

Mr and Mrs L W Barton and Gerald and Mr and Mrs Amos Barton and Mr and Mrs E W Stephens returned Sunday after spending several days in Knox City and in Rochester.

Mrs Glenn Gibson and children and sister Mr and Mrs Roy Elmo Everett of Tahoka spent Fathers day with their parents Mr and Mrs Sublett at Roaring Springs.

Mr and Mrs E W Stephens of Raymondville are visiting their daughter Mr and Mrs L W Barton and family.

RHEUMATIC HEART DISEASE IS A SERIOUS CHILD DISEASE

The disabling and often fatal disease of children, rheumatic heart disease, is one of the leading causes of death among children and young adults in the age group of 10 to 25 years.

Unfortunately, there has been developed for this disease no vaccine such as we have for smallpox, diphtheria and whooping cough, but by recognizing the early symptoms and obtaining a competent physician's diagnosis and treatment some of the damaging results of rheumatic heart disease can be prevented or moderated.

Dr. Geo. W Cox, the State Health officer, says that "In general the early symptoms of rheumatic fever are pain and swelling in the joints of the knees, ankles, elbows or wrists. The pain is felt usually in one of these joints and spreads frequently to the others. Often a doctor's examination of a child who becomes irritable and cross without apparent cause, cries easily and develops nervous habits, will disclose the presence of rheumatic heart disease."

Predisposing causes to this serious illness include frequent chilling, living in damp, steamy quarters, poor diet, frequent colds and sometimes scarlet fever or other infections caused by certain streptococcus germs. All such conditions should be avoided if at all possible.

Protection for children against rheumatic heart disease should include a thorough physical examination by a physician at least once a year; a well balanced and nourishing diet; sufficient rest and sleep and dressing at all times in accordance with the temperature of the room or playground. Consult a physician at once if any symptom suggests that this disease may be present or in the process of developing.

Lynn Co. Reunion Saturday

Program for the Lynn County Pioneer Association reunion to be held in Tahoka all day Saturday June 23, has been completed.

The entertainment promises to be among the best that has ever been offered at the event. The meeting will open with registration beginning at 9 a m at the Legion hall. The morning program will open at 10:30 a m with the popular and humorous speaker, Judge Homer Winston of Brownfield bringing the address. Barbecue lunch will be served at noon in the City park.

The afternoon program is expected to be the high light of entertainment, details of which Red Brown is keeping secret. However, it may be said there will be music, songs, dances and a lot of comedy.

Following this program awards will be made to the oldest man, the oldest woman, the ugliest man and the ugliest woman, and to the person who has traveled the greatest distance to the reunion. Election of officers will end the official program. Happy Smith is president this year, Fred McGinty is vice president and Mrs Eloise Griffin is secretary.

Jean Jones of Gall visited over the week end with Nancy Gayle Everett.

Mr and Mrs Q Morris and J L Taylor of Lubbock, E W Summers and family, Lorene Engle and child, J C Taylor and girls and Gladys Nelson spent Father's Day with their father G W Taylor.

Louis Hochman is ill with a virus infection; a large number of residents are ill with this intestinal disorder.

Mr and Mrs Harley Jolly and daughter visited his parents at Tahoka Sunday.

Mr and Mrs D J Bolch, Mr and Mrs G G Vaughn, and Miss Effie Monroe Vaughn and wife, Willis Vaughn and family of Belin, N. M., Andy Jordan and family, Don H Bolch and family, Faye Parke and children of Crane, Vigil Bhipps and family of Grandview were Sunday guests in the Dallas Vaughn home.

Mrs Dallas Vaughn and Mrs Don H Bolch left Tuesday for Ruidoso.

Mr and Mrs Charlie Pyron and family spent the week end in Anson with her father E C Gray. Bobbie Pyron returned home with them after a 3 week visit there.

Paul Poggan of Lamesa visited here Sunday.

Claude Pyron and family spent the week end in Hamlin with Mr Jim Meeks.

On Band Trip

Bill King and about 50 members of the O'Donnell Hi Band left Monday in a school bus for camp at Lake Brownwood. They will return Friday afternoon. An incomplete list of those accompanying them or the trip include Mr and Mrs Price Seely, Mr and Mrs Levi Gray and Mr and Mrs J W Gardnache.

Mr and Mrs Milfred MacMurtry of Abilene visited her parents Mr and Mrs W E Vermillion over the week end. Roger Vaughn of Pie Town, N M is visiting with his grand parents, the Vermillions this week.

Mr and Mrs W E Vermillion will leave this week end to vacation in Wyoming.

Mr and Mrs G Shipment of Carlsbad, N M and Jim Brewer of San Angelo visited in the home of Mr and Mrs Joe Eaker over the week end.

Helen Jean Hoffman is at Lake Brownwood with the school band this week.

Mr and Mrs B L Davis visited Mr and Mrs Roland Keener in Terry County Sunday.

Mr and Mrs Harold Franklin attended a family reunion at Brownwood over the week end.

Roy Preston of Ontario, Calif., a former resident here, is here on an extended visit.

Shotty and Tate Lamb, Leroy Smith, Bernest Cagle, Cecil Kirkland, John Stephens and son fished at Possum Kingdom last week.

THURSDAY BRIDGE CLUB

Mrs Paul Mansell was hostess to the Thursday Bridge Club in her home last week. Mrs Doree Reese won high score, Mrs Sam Singleton won second high. Mrs James Reed won bingo. Mrs John Stephens won traveling. Mrs O C McBride will be hostess at the next meeting.

Mr and Mrs Oscar Young left Monday night for Trenton on business.

Mr and Mrs H L Maxwell of Ft Worth visited their parents Mr and Mrs W L Maxwell last week.

Paving Program Goes Into High Gear This Week

2 Weeks Set For Sign Up

Only one block of proposed paving was removed from the paving list at a meeting of the City Council last Thursday night. Fourth street from Baldrige to Small streets was dropped upon the request of property owners of that area. The remaining 49 blocks will probably be paved.

All of the city dads were present at the meeting including Mayor J. L. Hash, members John Ellis, Chas. Cathey, Harvey Line, John Earles and J. T. Middleton, sr. The secretary, Tom Brewer, reported that by far most of the property owners appearing were present in support of the proposal.

From now until July 1, Secretary Brewer will have forms at the City tax office for property owners to sign approving the work. Grading and paving by Kerr and Middleton of Lubbock will begin shortly after July 1st. Mayor Hash stressed the point that there was still time to add more blocks to the paving program. ALL owners of the block in question were in agreement. There is some talk of curb and gutter along a part of East 9th street although it is not known if this will materialize; 9th street is already paved.

Town Has Been Sprayed

Recently the spraying unit of the City of Lamesa sprayed the town and there will be more spraying in the near future which will be added to the water bill after the job is completed.

If interest is the fact that the City residents used 4 million gallons of water from May 11 to June 10th and 5 million gallons from April 10th to May 10th. The city buys the water from C J Beach at \$59 a million gallons, Mr Brewer said, and furnishes the pumping. The water field is about 3 miles east of town. For the first time in the town's history, the community has an unlimited supply of water.

Mr and Mrs Homer Hardberger moved into their new home in the east part of town Friday.

Mr and Mrs Olan Yandell of Ft Worth spent last Friday here with his parents Mr and Mrs Tom Yandell.

Mr and Mrs Tom Yandell plan to attend the Old Settlers reunion and rodeo at Seymour this week.

Mr and Mrs W S Moore, Mrs C C Lawler and children, Mrs H C Walters and daughter of Sonora visited Mr and Mrs E L Cooley and family Sunday. Mrs Walters will remain for an extended visit.

Martha Pearl Cooley is at the Church of the Nazarene Young People Camp at Leuders this week.

Mr and Mrs Burley Brewer were visitors in Lubbock Sunday.

The Methodist Quarterly Conference was held here Sunday night. The district Superintendent Rev. J E Shewbert of Lubbock was the speaker.

Mr and Mrs Mack Haymes visited Mr and Mrs Cecil Royce at Seagraves Sunday.

Mr and Mrs T C Abbott and children of Dallas are visiting her parents Mr and Mrs J H McCauley.

Mr and Mrs C D Pickens returned from a 3 week visit in East Texas Sunday night.

R E Hardberger of Beaver, Okla is visiting his grandmother Mrs Willie Smylie.

Van Olin Ritter of San Angelo is visiting his daughter and family Mr and Mrs Dee Reese and family.

Mr and Mrs William Lee Harris and family of Plainview visited relatives here Sunday.

Mr and Mrs W O Wartes visited with Mr and Mrs Gene Winder at Morton Sunday.

Riley Hogue of Dallas visited his parents Mr and Mrs Oscar Young last week.

Mr and Mrs H P Baggett of Levelland visited her sister Mr and Mrs Norman Shaw Sunday.

Miss LaMoyné Line of Seminole spent the week end here with her parents, the Harvey Lines.

Mrs H Ollie of Levelland is visiting in the C C Cabool home this week.

Mrs Ruennell Hale of Lubbock is visiting her grandparents the C R Burleson, sr family.

Mrs Ollie Greene of Jal, N M spent the week end with her parents Mr and Mrs O W McClendon.

Mr and Mrs J W Bearden and son of Big Lake visited in the home of Mr and Mrs Roscoe Snell Sunday and Monday.

Albert DeBusk and family of Hobbs and Roy Lee DeBusk and family spent father's day with Mr and Mrs Bill DeBusk Sunday.

New potatoes 2 no. 2 cans 25c at LAMBERT GRO. and MKT.

School Tax roll Is Listed

School tax collector Tom Yandell has completed his tax roll valuations for 1951 for the O'Donnell Independent School District. Following is a breakdown:

Real Estate	\$4,280,144.00
Personal	\$982,006.50
Total Value	\$5,262,150.50

The approximate increase over 1950 valuation is \$1,309,897.00; of this amount leaseholds operative and nonoperative leaseholds represents a value of \$231,762.50 and of this amount operated leaseholds represents \$121,000.00. According to Mr Yandell the increase in valuation over last year is \$135,528.63.

Ben Morrison's Wheat Croy Hits 12 Bu. Acre

Ben Morrison said Monday that he was averaging 12 bu. per acre from his 50 acre wheat patch 2 miles west of town. The wheat field has been noticed by many of this area during the past months. Ben said he wished now that he had all his land in wheat this year. Usually cotton is a better money crop on the South Plains year in and year out than wheat, Ben said.

Mr and Mrs Pete Bearden of Abilene visited in the Roscoe Snell and O O Hobbs homes last week. Joann Snell returned to Abilene with them for a visit.

Mr and Mrs H M Shade and Mrs C L Hay of Midland were Sunday guests in the Hal Singleton home Sunday.

Mr and Mrs Ira Merle Booth and daughter of Stanton visited with Mr and Mrs Hal Singleton 3rd Sunday.

Mrs Jim Neeley and children of Lamesa spent the week end in the R Burleson Jr home.

FIREMEN AT CONVENTION

Jesse Lane, J V Burdett and Dave Thompson are attending the Firemen's convention at Dallas.

Mr and Mrs Boyce Allen and children of Odessa spent Father's day here Sunday with her parents.

Candidates For Rodeo Queen To Sell Tickets

This year the 1951 Rodeo queen will be chosen from a field of seven candidates sponsored by the different clubs and groups here. The girl or her sponsoring group who sells the most advance sale rodeo tickets will be the Queen, according to Mrs F M Jones and Mrs Moody Everett, two of the ladies on the Queen committee. Tickets will go on sale Friday morning at \$1.25 each.

Candidates and their sponsors are:

Pat Etter of Fire Dept.
Carol Lambert of Future Home Makers
Dorothy Locke of American Legion
Ann Singleton of Rotary Club
Shirley Gass of Future Farmers
Fern Bairdington of Boy Scouts
Virginia Sanders of Lions club

Mr and Mrs John R Towles and daughter of Palisades, Colo. are visiting her parents, Mr and Mrs Jake Gates.

Swans Down cake flour 43c at LAMBERT GRO. and MKT.

Duster Causes Car Mishap

Mr and Mrs Bill Autry and daughter escaped serious injury Friday night when their car collided with a parked car resting at the road junction of the Draw and T Bar farm to market road and highway 37 some four miles north of town.

Mrs Autry received a cut directly below the knee cap requiring 17 stitches to close and was treated at the Lehman clinic here. She also suffered a very mild concussion. Mr. Autry received bruises and their 4 year old daughter escaped uninjured when Bill foresaw the approaching collision and protected the child with his body.

The Autry family were returning home to O'Donnell in the midst of a severe black dust storm after visiting relatives at Grassland. Approaching the intersection the car parked on the highway was invisible until an instant before the impact. Mr. Autry said. The car on the highway was a 49 Ford driven by a Lubbock Lat n accompanied by a woman and two children. The Autry car, a 51 Hudson, dusting a slow speed due to the duster, was moderately damaged around the grill while the Lubbock man's car was severely damaged. It was thought the Latin had pulled to the side of the road to wait out the storm not knowing he was parked in the lane of another highway. A passing motorist brought the Autry family to town. Deputy Dee Reese investigated.

Last Rites Read For Dave Cook At Draw

David Alfred Cook, 66, well known farmer of Draw, died at 11:15 o'clock Saturday night of last week in the Tahoka hospital following a stroke suffered at about 3:30 that afternoon at his home. He had been ill for about 2 weeks preceding the stroke.

Funeral services were conducted at 2 o'clock Monday afternoon of last week in the Draw Methodist Church of which he was a member. Officiating were the Rev. pastor, Rev. Silas Dixon and a former resident of Draw, Rev. Gerald McCollum, now Superintendent of the Northwest Texas Conference.

Burial followed in the Draw cemetery under the direction of the Stanley Funeral home of Tahoka. Survivors include his wife, Mrs Della Cook, one son, Thedo Cook, and two grand daughters, Bertha Marie, 15 and Druella, 13, all of Draw, one brother, J H Cook of Lubbock, and one sister, Mrs Mattie Murray of Athens.

Mrs Murray and her husband and their son, Roy Murray and his wife and baby, all of Athens, came out for the funeral.

Mr Cook was born Nov. 1, 1884 in Erath county. He moved with his parents to Anderson county when he was a small boy. His parents Mr and Mrs Daniel Cook, both died in Anderson county and he came to Hill county as a youth of 18. He was married at Huron in Hill Co. on June 25, 1911 to Miss Della Basham, one son, Thedo Cook, was born of this marriage. The family moved to Lynn county in October 1923 and they have continued to reside in this county at Draw since.

He was highly respected by his friends and acquaintances, a great number of whom attended the funeral services last Monday.

Negro Killed In Fight Here

Ice Pick Is Equalizer

The juke box was grinding out blaring music and the laughter of late negro diners Sunday morning at 3 a m was loud, when Jeddie Miller, a negro resident, age 23, climaxed a discussion over a bottle of gin with a negro man, C J Joiner, age 32, of Tyler. The fight occurred in the Paradise Inn in the infamous O'Donnell flats. Wounds to the shoulder and head made either by an ice pick or can opener proved so serious that Joiner died at a Lamesa hospital Sunday evening at 3 p m. Jeddie was charged with murder at Tahoka Monday and held on \$2,000 bond.

Dr. Joe Lehman was called at the end of the fight and he sent the injured man to a Lamesa hospital. Joe said death was probably due to the stab wound in the temple of the forehead. Local Deputy Dee Reese and Sheriff Slick investigated and took statements.

This fight brings to mind what a negro teacher once told the Index. She said that at least 95 per cent of the O'Donnell negroes are good citizens and law abiding but live in a deadly fear of the few "outlaw" negroes and latins who rule with a reign of terror. This woman said part of the trouble was the fact that whites tend to leave the neg-

roes to themselves without caring what happens and when a case of crime does come to court the white jury tends to be indifferent. We pass the above along to you as a thoughtful negro's opinion. The Index is a friend of the colored race realizing they are our brothers and may need our help.

Young Cotton Dies Over Area; Short Crop Is Seen

Farmers over much of this area report that their young cotton is dying or is dead due to the past 15 days of dry weather and hot dusty winds. Much of the area got cotton up to a stand but the past week told the tale. Farmers are now planning on grain if a general rain changes the complexion of things. Only in the New Moore, Wells and Grandview area are the crops good.

SOLDIERS ARE HOME

Tom Schooler of Ft Hood, Jack Walker, Ken Cooley, Herbert Pennington, Billy Carlisle of Ft Sill, Bill Lane, Billy Griffin of Camp Carson, Colo, Benny Middleton and a friend, Cpl. Lewis of Virginia spent the week end here.

Plenty OF ICE CUBES... FAST!

WHEN YOUR REFRIGERATOR IS ELECTRIC!

Ice!... Ice!... lots of ice!
The hotter the weather, the more ice cubes you need. And you'll always have plenty of large, clear ice cubes if your refrigerator is ELECTRIC. Your ELECTRIC refrigerator provides plenty of reserve power to freeze tremendous quantities of ice cubes and take care of all your refrigeration needs, even in the hottest Texas weather.

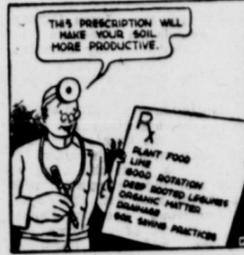

See your favorite electric refrigerator dealer... choose the ELECTRIC refrigerator to suit your family's needs and your budget. Enjoy life this summer.

Organic Matter Vital To Soil Building Plan Legumes and Grasses Are Recommended for Plan

Feed the soil so it can feed the growing crops, if you want to get high yields per acre, advises Dr. J. B. Peterson, Purdue University agronomist.

Dr. Peterson says the best way to tell what your soil needs is to study the land, its management history, its past cropping program and then have the soil tested. The soil tests will tell what fertilizer is

needed and how much is required to keep the soil well stocked with a well-balanced nutrient supply.

But Dr. Peterson points out that till and soil structure must be good if the plant food is to do its crop nourishing job. Crops can starve in the midst of plenty and fertilizer can be wasted if the soil's structure is poor.

Poor soil structure shuts off drainage and ventilation. It keeps air and water out. Crop roots can't penetrate the tightly-compacted soil to reach needed nutrients.

Dr. Peterson says the best way to correct soil compaction and repair damaged structure is to add organic matter. This can be done by including well-fertilized legumes and grasses regularly in the rotation and by returning manure and crop residues to the soil. Legumes and grasses do a two-way soil building job. The deep-probing taproots of alfalfa and sweet clover do their soil-mellowing work in the heavy subsoils. Fibrous-rooted grasses such as bromes or timothy open up tough surface soils and make them granular and porous.

116,713 Texas farm boys and girls were enrolled last year in 4-H demonstration work in agriculture and home economics.

Rodeo Time Approaching

Rodeo time for O'Donnell is approaching. The annual Rodeo will be held here July 26, 27, and 28th. Pictured above is Slaton D. Harris "coming off" a bull at a rodeo year before last.

Parade Scene Here

Above is a street scene of a mounted parade held here last spring. The rodeo this year will feature parades of the afternoon of each day of the rodeo.

Last Year's Rodeo Queen

Above is a scene of the 1950 Rodeo Queen, Miss Helen Jones and her court. This year's queen will be selected in the next few weeks. All pix are by W. D. Parker

Intestinal Disease Hits Numerous Swine Herds

Thousands of pigs in major swine-producing states have been stricken with an intestinal disease regarded as the most serious of its kind ever seen in the U.S.

The American veterinary medical association reported that transmissible gastroenteritis has wiped out the entire pig crop on some farms. No swine-raising farm can consider itself completely safe from the disease, the AVMA warned.

Symptoms are severe scouring, vomiting, and dehydration. There is rapid loss of flesh in spite of the fact that affected pigs continue to nurse until they die.

At present, no drug can be recommended as a standard treatment for this infection. Only possible means of control is to keep healthy breeding stock and healthy litters completely out of contact with sick animals and away from houses and grounds where outbreaks have occurred.

Home freezers are designed primarily for storing foods. However, small quantities of fruits and vegetables can be frozen by placing the packages against the bottom or sides of the freezing chamber. Space should be left around the packages to allow for air circulation.

Soil Testing

An accurate and inexpensive soil testing kit, which may be obtained from local garden supply or hardware stores is now on the market. The kit contains all the solutions needed to make tests for nitrogen, phosphorus and potash. The kits come with complete easy-to-understand instructions and may prove of great value to home gardeners.

Renovating established stands of KR bluestem grass and fertilizing with a combination of nitrogen and phosphate will greatly improve the yield and quality of the forage produced on low fertility soils.

Proper Techniques Yield Results in Hand, Nail Care

By Ertia Haley

BUSY hands, whether they work at home, office, garden or club, need care to keep them looking lovely, feeling comfortable and able to do their various jobs efficiently.

Hand or nail beauty, just as facial figure beauty, doesn't just happen. Because hands are busy, they need just as much, if not more, care than hair, figure or clothing. They are almost constantly in use during your waking hours.

If your hands and nails happen to look as though you're pretty chances are that you're pretty because of the care you've given them. Correct techniques in caring for them without much thought. If they don't look as lovely as you want them to, then it's a relatively simple matter to get them into proper shape as most hands yield quickly to some attention.

Certain jobs and conditions peculiar to the hot weather demand that you give extra attention to the hands to keep them at the peak of condition. If you're gardening, for example, hands can easily become coarse and rough, with nails broken and uneven.

Then, too, if you're active in sports, you may develop certain

Keep Cool!

You can keep cool and look lovely at the same time with this dressy bright blue-green silk organza plaided with a thin line of black. This New York dress is designed over an underslip of green crepe, fastened in jet in double-breasted effect and belted in black patent.

Gloving the hands is another good way of protecting them, not only for the rough tasks which they must perform, but also when going out. For gardening, use canvas gloves after a generous massage and application of cream or lotion. For dish washing, laundry and other such tasks about the house a pair of rubber or plastic gloves will give nice protection.

Eliminate Stains On Hands, Fingers

It's poor practice to let hands become stained when gloves can be worn to protect them, but there are some tasks that cannot be done with gloves, such as many types of

office work. Harsh stain removers and bleaches will clean the hands, but they may also roughen them. First step toward keeping the hands and fingers from becoming too stained is to apply a cream or lotion which is non-greasy, but which will coat the hands lightly. Then, as soon as you're finished working, wash the hands thoroughly in lather and water. Difficult stains left after wash-

ing can usually be removed by rubbing the hands lightly with oily polish remover on cotton balls or pads, kept conveniently near the wash stand. Polish remover is an excellent solvent for most types of stains, and it's not harsh.

If you've been picking berries or doing some dyeing and the hands are stained badly, try lemon juice and water, or a mild bleach made of hydrogen peroxide and water. Follow either treatment by thoroughly washing and rinsing the hands, then an application of lotion or cream.

Certain kitchen tasks leave the hands with odors on them, such as cutting onion or garlic. In this case, rub the finger tips with salt, and the hands with a slice of lemon. Lather the hands under cold running water. A deodorant soap is also good for eliminating odors from the hands.

If rings leave stains on the fingers, as often happens with costume jewelry, it's a good idea to treat the ring rather than the fingers. Wash the ring thoroughly, then coat it with colorless nail polish. This keeps the acids of the fingers from acting on the metal of the ring which causes the stains.

Nail Care Requires Proper Technique

Nail troubles are common when the hands are required to take abuse, but many of them can be avoided. Take hang nails, for example, which can be avoided with sufficient care to the cuticle.

The cuticle should be kept soft by massage with hand cream or lotion. After the cuticle has been properly softened, push it back

very gently with an orange stick. When soft, the cuticle does not break, so it should be pushed only after an oiling or creaming.

Hangnails can also be prevented by shaping the corners of the nails no closer than 1/16 of an inch from the skin.

Nails that split and break easily should be treated internally as well as externally. The diet should contain plenty of calcium, vitamin C and D. This means sufficient orange juice and milk daily. The hands should be oiled (with cuticle oils) especially at the cuticle to prevent dryness.

Avoid shaping the nails too sharply or too closely at the corners. If they are shaped short, and to a neat oval, they will fare better. Several coats of nail polish, either colorless or colored can prevent any of the splits from catching as you work with the hands.

Those who do much work with their hands can increase the life of their manicures by keeping the nails a short oval shape. Picking up things with the balls of the fingers rather than the nails helps avoid snagging them.

Special Hand Problems Need Attention

Those who have jobs which require the use of a pencil for most of their working hours frequently find they develop a bump on their finger. These are not only painful but unsightly. If a finger guard doesn't help, it's a smart idea to get in the habit of massaging the affected finger deeply. If more strenuous measures are required, gentle rubbing with a pumice stone will help keep the bump down.

KATHLEEN NORRIS

Service, Sacrifice Bring Joy

ELIZA HARRIS, of Plainfield, N.J., sends me the following letter, which I consider remarkable.

"Does my name sound firm and New Englandy and business-like?" she begins. "If it does, it fits me. I'm 38, good-looking, tall, married to a nice fellow for 10 years, mother of four children. Girls of 8 and 4. Boys of 9 and 6. Income, about \$5,000. Health, at the moment, good all 'round. Home, 10 rooms and two porches. One car, four radios, one video. No domestic help.

"My story is one of responsibility, responsibility and more responsibility. I've always loved my life, but it never has been easy. At 14, with a delicate mother, three brothers, and not enough money, I was cooking, making beds, marketing, trimming Christmas trees, stretching money, sewing, mending, planning. And I'm doing just that now, 24 years later.

Prolific Family
"Two younger brothers were still at home when I married, and Mother still frail, so my dinner on my wedding night was cooked for five persons, by me. A year later John was born, and my sister joined us to have her baby at home, 'where Liz could take care of her.' When my child was three months old and hers three weeks, our home burned down. We moved into the barn, Mother going to an aunt's house for awhile. Both brothers married girls who had no home connections near-

worth while. I think of the agonies of fear I've gone through over the children's accidents, or this one's possible polio or that one's threatened eye trouble, and the trays carried upstairs and the toys mended—and oh, well!" Eliza finishes her letter, "that's enough of this, and tear up my letter and don't answer my commonplace, everyday problems!"

But I do answer, Eliza, and I repeat that I think your letter, and you, remarkable. And I hope, for the sake of this mighty nation, that what you are doing is really everyday and commonplace.

Yours is a magnificent story of service, sacrifice, and—I know, joy. I know there are hours of deep satisfaction and pride along the road of such a life as yours, pride and satisfaction such as no trips and furs and ease and dignity ever could give you. Yours is life as I truly believe God meant women to live it, undoing the wrongs and injustices to which we all are heir, binding up wounds, putting happiness and health into children's lives, holding not one but several families together.

You see only the roughness and the loose ends and the failures and the fatigues now. But when you are old, you'll see differently.

Untouchable
The penicillin molecule resembles a watch-spring which suddenly uncoils when tampered with.

Sturgeon Catch Dwindling Away

Caviar Disappearing From Gourmet's Table

THE STURGEON, old aristocrat of the earth's salt and fresh waterways, is swimming toward extinction.

A lone sturgeon recently boated off England's southeast coast was the first caught there in 50 years. The catch only serves to emphasize the fact that the giant fish has become so rare today as to be a novelty in a large part of the world. Only in Russia—along that nation's cold northern rivers and in the Black, Caspian, and Azov seas—are sturgeon fisheries still of great value.

In North America the few remaining sturgeon are caught largely for sport. Their eggs, from which the finest caviar is made, are seldom found on the commercial market. Waste brought on the scarcity, for the continent abounded with sturgeon—the Atlantic, lake, and white or Columbia River varieties—prior to the 20th century.

The Chesapeake Bay sturgeon catch of 1890, for example, was estimated at 900,000 pounds; by 1920 it had dropped to 22,000 pounds. In New England, where the first sturgeon fishery was established in 1623, the catch dropped from 20,000 pounds in 1919 to a mere 5,000 pounds in 1935. Today the status of the fish is closely watched by conservation authorities.

Most species of the big fish—which range to 12 feet and even longer—live in salt water much of the year, leaving it only to voyage up fresh rivers to spawn in spring or early summer. Some of the 20-odd known species, however, can live entirely in fresh water, like those of the Great Lakes.

"... moved into the barn..."

by, and my sister, Rose and I gave them their weddings. We are a prolific lot; there are now 12 children in the three families.

"We bought two houses, next door to each other, and the deadly serious years began. Mother came home accompanied by a crippled brother; he was with us 10 years. Rose's husband died. We adopted a half-grown girl who helped with the children until she married.

"Oh, there was plenty of fun. Win and I have had a trip or two; the families have some cabins up in the mountains where we all go for summers. We're great picnickers, we love games, we all pitch in and help when a bride is to be fitted out or a baby is coming.

"But what about the measles, the money scares, the poor marks in grammar school, the shabbiness of chairs and curtains, the winters when everyone has colds, the lost car keys, the rising prices of everything, the rising prices of everything, the endless line of muddy shoes, lost rubbers, noise all over the house, tearful little girls, rebellious little boys, plans that don't mature; and what of all the trips and fur coats and beautiful rooms and ease and dignity of living that I know I'll never have? I'm 38.

Tired and Doubtful
"This morning I'm somehow tired and doubtful. Everything I've ever done seems half-finished and not

THE WEEK In Religion

INSPIRATION Conscience

SCRIPTURE speaks of conscience as "a still, small voice." Religious writers have described it variously as "the oracle of God," "the chamber of justice," and "the only infallible judge." Another apt description refers to conscience as "God's viceregent in the soul."

Conscience may be defined more precisely as the testimony and secret judgment of the soul which approves actions it considers to be good, and reproaches itself with those it believes to be evil. Morally speaking, his conscience is the highest law in an individual's life.

The above editorial and other material appearing in this column were prepared by Religious News Service.

NAMED EVANGELIST . . . The Rev. Charles B. Templeton, one-time Canadian sports cartoonist, has been named first full-time evangelist by the National Council of Churches.

Religion Question Box

Q: Who were the Philistines?
A: An ancient people who gave to Palestine its name and are often mentioned in the Old Testament.

Chief Urges Chaplains Avoid Politics of War

SAN FRANCISCO—A warning to chaplains against aligning themselves with the "politics of war" was voiced here by Brig. Gen. A. F. Gearhardt, air force deputy chief of chaplains. He addressed the 20th annual convention of the military chaplains association of the United States.

"You don't make Christians, for instance, by killing Communists," Brig. Gen. Gearhardt declared. "Recalling his service in two world wars, he said, 'We fight wars for freedom and Christianity, and yet when the war is over, both are in worse shape than they were before!'"

For a chaplain, he said, a war "is a chance to practice Christianity" and no more. Maj. Gen. Roy H. Parker and Rear Adm. S. W. Salisbury, Army and Navy chiefs of chaplains respectively, also addressed the delegates.

"In recent months we have had our attention focussed on the deplorable lack of morality, decency and honesty in our country," Gen. Parker said. "This has a direct bearing on our work because we are working with . . . the young men and women who are a product of this age."

Sterilization Measure Stirrs Legislative Fuss

MONTGOMERY, Ala.—A bill to permit compulsory sterilization of patients in Alabama mental hospitals was unanimously passed by a five-member senate committee following one of the warmest debates in state legislative history.

Clergymen, doctors and civic leaders came from all parts of the state for public hearings on the measure. The bill is similar to one which touched off a raging battle in the 1945 legislature.

Doctors and clergymen testified both for and against the bill. One of the chief proponents was Dr. Alvin Branscomb, pastor of Woodlawn Methodist church, Birmingham, who said studies show that if one parent is feeble-minded, the likelihood is that one child out of three will be feeble-minded. If both are mentally deficient, he added, all the children will likely be feeble-minded.

One of the prime responsibilities of Christians, Dr. Branscomb said, is to provide a more abundant life, and there can be no abundant life in feeble-minded families.

Anti-Red Emphasis Hit by Federal Judge

NEW YORK—Editors of Roman Catholic publications were cautioned here by Federal Judge John F. X. McGohey of Brooklyn against "overworking the anti-Communist angle."

Instead of overworking anti-Communism, he said, religious publications would do a better job if they promoted "the church's very comprehensive positive program for political and social reconstruction."

Play-Yard Furniture Is One Pattern Designed

HERE are four patterns in one. The clown, slide, teeter-totter and sand box. Pattern gives actual size cutting diagrams for the clown, with color guide and directions for painting and assembling. Everything is complete on pattern 317. Price 25c.

DO YOU HATE CHANGE OF LIFE? and HOT FLUSHES?

Do you suffer from hot flushes, nervous tension, upset emotions due to functional 'change of life' (38-52 years)—that period when fertility ebbs away, when embarrassing symptoms of this nature may betray your age? Then start taking Lydia E. Pinkham's Vegetable Compound to relieve such symptoms. No other medicine of this type for women has such a long record of success. Taken regularly, Pinkham's Compound helps build up resistance against this annoying middle-age distress. Truly the woman's friend!

Note: Or you may prefer Lydia E. Pinkham's TABLETS with added iron. Any drugstore.

LYDIA E. PINKHAM'S VEGETABLE COMPOUND

ONCE OVER Great Grief Over Beef Ceiling

By H. I. Phillips

THE latest OPS beef ceilings should be interlocked with National Laugh Week, Toothless Tuesday and All-American Confusion Month. Under the DiSalle-Johnston regulations tender cuts go up and the ones so tough they fight back when cornered go down a little. Or vice versa. Even the butchers are confused. And the shoppers are too groggy to talk authentically. All anybody can be sure of is that the vegetarians are the only Americans getting a break.

The butcher now asks, "Do you want this meat for eating or for wrestling?" If the housewife answers correctly she wins five sets of OPS directives and has a chance to go for the big jackpot question: "Should Mother Hubbard now sue the dog to recover possession of the bone?"

There is something new on the American dinner table: The Mike Disalle Platter or Rip and Tear Blue Plate Special. (Try one and be convinced that the rumors of a rubber short-ages are false.) Washington prepares and issues the new meat rules, but refuses to commit itself on what the public should use for knives and whether each one should have a double handle so two people can work on the same cut at once.

The OPS has labored and brought forth a tougher hamburger. In fact there is a new hamburger on the market. Instead of putting a thin hamburger between two pieces of meat they now acknowledge the lim-

itations of the American jawbone and put one slice of toast between the two thin slices of hamburger. This gives the aspect of a treasure hunt to the routine act of appeasing hunger. Meat is so high, since Mike DiSalle and Eric Johnston began protecting the public, that there should be time payments and a trade-in allowance on a used chuck roast. Before the OPS started controlling meat prices it took luck to acquire a tenderloin steak. Now it takes violence.

Porterhouse and sirloin are up 12 to 15 cents a pound, avoirdupois, ad valorem and catch-as-catch-can. If you want chuck, rump, or worse you save a few cents. But this is offset by the fact no ceiling prices have been put on the larger-size hatchets and hammers. Or are we still balled up? Markets are now required to exhibit the cuts in trays with ceiling prices attached or nearly so. The effect of this is to frighten the housewife sooner than usual and steel her against future rulings. The butcher-market song of the hour is "When You Come To The End of a Perfect Tray and the Prices Begin To Lower."

The more we look into the matter the more we are satisfied that the OPA gave us the cold cut, the OPS gives us the deep freeze. But maybe nobody should kick. The ceilings help the war effort. If you can bite into any meat you get for less than a dollar a pound you automatically become physically eligible for the draft, regardless of age or dependents.

Originally the dollar was subdivided into halves, dimes and cents; there were no quarters.

Virginia colonists bought wives on the wharf at Jamestown in 1620.

It took Washington and the members of the Constitutional Convention 96 days to frame the Constitution.

The name, United States of America, originated when it was written into the Declaration of Independence.

On Dec. 27, 1776, Geo. Washington was made dictator of the United States; the only one we have ever had.

The song "Maryland, My Maryland" was written as an appeal to that state to secede from the Union.

Homemade Freezer Serves Farm Needs Farmers Turn to 'Build Your Own' Once More

With labor costs up and appliance growing scarce, many farmers are beginning to "build their own" once more. One example of what can be done with cinder blocks and insulation—plus a few spare hours of labor—is the homemade food freezer shown below.

The freezer is tucked away in a convenient corner of a farm home basement. It holds a side of beef

and all the surplus cherries, strawberries and lima beans grown on the farm. Besides farm produce, this homemade appliance makes an ideal storage place for left-overs, ice cream and large quantities of special cuts of meat processed at a neighboring locker plant.

Like other freezers, however, it must be remembered that freezing does not improve the quality of the food stored in them. You get out of a freezer only what you put in. Also, farm wives are cautioned about correctly packaging freezer food. Included among acceptable packaging materials are moisture-proof vegetable parchment paper, moisture-proof cellophane (which can be heat-sealed), aluminum foil, cellophane-lined containers, freezer bags and approved cartons. The use of such materials are necessary regardless of whether freezers are purchased or are homemade.

Unless properly packed frozen foods may deteriorate. The freezer, illustrated, is operated with a 1/4 horsepower compressor. Rafters above the appliance are used for the storage of canned fruits.

Gardener Knee Rest

 This knee rest will take the strain out of gardening when weeding or performing some similar operation where it's necessary to work on your knees. The base is large enough so that it won't sink into soft ground. The edges of the three vertical pieces should be rounded. Sufficient slack is left in the canvas cover to provide comfortable rests for the knees.

Side-Dressing Corn Crop With Nitrogen Pays Off!
 Prof. C. J. Chapman, University of Wisconsin extension agronomist, reports that side-dressing corn with nitrogen fertilizer in late June, paid off in an extra 4 1/2 tons of corn all-age per acre on one Dane county farm last year.
 He says the amount of nitrogen to apply depends on the soil's fertility level. He recommends at least 40 pounds per acre. Under some conditions this could be increased.

Methodist Hour Sunday On Air

Dr. Eugene M. Frank, pastor of First Methodist Church of Topeka, Kansas, speaking on the subject "From Disaster to Victory" will be presented by the Methodist Hour on a 149 station radio network Sunday morning June 24th. In his radio sermon Dr. Frank grapples with the personal problem of tragedy and disaster and inter-pretations ways and means of letting God guide in these experiences of failure. "Everyone of us is confronted with the dilemma of either mastering life or being mastered by it," he says.
 Dr. Frank, one of the younger leaders of Methodism in the mid-

west, first took a degree in chemical engineering and later was a student in Northwestern University and the Garrett Biblical Institute. Baker University of Baldwin, Kan. conferred the degree of Doctor of Divinity upon him in 1947. Dr. Frank is a member of the Ecumenical Council of the Methodist Church which will hold its 1951 meeting in Oxford, England and spoke before the meeting of the Methodist Ecumenical Conference in Springfield, Mass. in 1947.

Favorite hymns of the church, such as "How Firm a Foundation", "Walk in the Light", "There is a Place of Calm Repose" and "Jesus Saviour, Pilot Me" will be sung by the Methodist Hour Choir on this popular network radio program.
 The Methodist Hour may be heard over station KGNC of Amarillo Sunday at 10:15 a m and at WOAI San Antonio 7:30 a m

Here's 180 Horsepower... on regular grade gas—Now!

NEW YORKER NEWPORT

It's always interesting to hear about future-looking experiments with new super engines to run on new super-octane fuels... someday. But it's even more interesting to hear today's real life, on-the-highway talk about Chrysler's new super-performing FirePower engine. FirePower takes any regular grade gas you care to buy . . . and adds its own new mechanical octanes to the power-giving octanes of the gasoline itself. The result is 180 horsepower performance such as no other passenger car built in the U.S. today can equal.
 If you haven't driven Chrysler FirePower yet, your Chrysler dealer invites you to do so now. It's the most revolutionary engine in 27 years. It offers highway satisfaction and safety such as you've never known. And it's a sounder engine other ways than any other on the road. Its new design keeps it almost completely carbon-free. It is smooth and quiet . . . but also rugged and strong and free from need for great attention and repair.
 Now remember that this same new Chrysler offers you the new Hydrguide power steering* . . . plus the amazing new rough-road stability of Oriflow shock absorbers . . . plus Water-Proof Ignition, and Vacuum-Ease Chrysler Cyclebonded super-brakes . . . then come see what we mean when we say the car of your tomorrow is right here for you to drive . . . today, and for years to come!
 *Hydrguide regular on Crown Imperials, optional at extra cost on other Imperial and New Yorker models.

180 HORSEPOWER Here's the new Hemispherical Combustion Chamber that's the heart of Chrysler FirePower. Its new, designed-in "mechanical octanes" make regular grade gas do what best premium grades can't do in any other engine you can drive today!

"Aw! Kids don't play with hoops anymore—unless they're motor driven."

"What does she know about TRUE love? ... She's only been engaged twice!"

By long established custom, the Korean bridegroom stays with his bride three days in his father-in-law's house before returning with her to his own parents' house. Official manhood begins for the Korean only after marriage. Even if he is 70, a bachelor's opinion has little influence.

The Koreans' traditional habit of wearing many and varied hats is said to have had its origin as a measure against plotting. An ancient ruler, the legend goes, once concluded that men could not conspire if they could not put their heads together. Hence he required his subjects to wear such huge hats that whispered conversations could not be carried on.

SPRAY TO KILL APHIDS
One ounce makes 6 gallons of spray. Kills aphids and similar sucking insects by contact and fumes. Sprays friendly insects. Leaves no harmful residue. Can be mixed with other standard sprays. Proved dependable by 39 years of use on fruits, vegetables and flowers.

Housework Easy Without Nagging Backache

When kidney function slows down, many folks complain of nagging backache, loss of pep and energy, headaches and dizziness. Don't suffer longer with these discomforts if reduced kidney function is getting you down—due to such common causes as stress and strain, over-exertion or exposure to cold. Minor bladder irritations due to cold, dampness or wrong diet may cause getting up nights or frequent passages. Don't neglect your kidneys if these conditions bother you. Try Doan's Pills—a mild diuretic. Used successfully by millions for over 50 years. While often otherwise caused, it's amazing how many times Doan's give happy relief from these discomforts—help the 15 miles of kidney tubes and filters flush out waste. Get Doan's Pills today!

It's Wonderful the Way Chewing-Gum Laxative Acts Chiefly to REMOVE WASTE -NOT GOOD FOOD
Here's the secret millions of folks have discovered about FEEN-A-MINT, the modern chewing-gum laxative. You here to why FEEN-A-MINT's action is so wonderfully different! Doctors say that many other laxatives start their "flushing" action too soon, right in the stomach where food is being digested. Large doses of such laxatives upset digestion, flush away nourishing food you need for health and energy. You feel weak, worn out. But gentle FEEN-A-MINT, taken as recommended, works chiefly in the lower bowel where it removes only waste, not good food! You avoid that typical weak, tired, worn-out feeling. Use FEEN-A-MINT and feel your "peppy," energetic self! One FEEN-A-MINT! No increase in price—still 5¢, 50¢ or 10¢.

Mulching Cuts Garden Labor by 75 Per Cent

Ideal Way to Conserve Moisture in Dry Soils

These hurried times farmers and gardeners are forever looking for quicker and easier methods of doing their work. For those looking for a way to cut down work in the family garden, mulching has many advantages. It can cut cultivation and weeding as much as 75 to 90 per cent.

A mulch of straw is a good investment for home gardeners in parts of the country where summers are hot and dry. It helps keep the soil cool, holds moisture and discourages weed growth. The youth above demonstrates how mulch should be applied.

And weeds that do push through the mulch come out with the grass, that scourge of many gardeners, doesn't have a chance. There are other advantages in mulching. They conserve soil moisture, prevent packing and crusts on the soil surface, and such residues as are dug into the soil add to its humus content. There are numerous materials that make a good mulch, including sawdust, pine needles and even sawdust, if very coarse. Mulch is usually applied four or five inches in depth.

161 Million Bushels of Corn in Farm Storage

The U.S. department of agriculture in a general crop report in May reported stocks of nearly 161 million bushels of corn retained on farms at the beginning of the year, and these were bolstered by relatively large stocks of other feed grains.

While these farm supplies of feed grains were larger than in all but a few years on record, they were considerably smaller than on January 1 of the past two years, in total and particularly per animal unit to be fed, the report stated. Hay stocks appeared ample in most areas. Farm stocks of wheat, however, were smaller than average but slightly larger than a year ago. Soybean stocks were much larger than on any other January because of the record crop. Stocks for the wheat prospect, a relatively large acreage of winter wheat, a sixth more than average, and a sown in the fall of 1950 under conditions mostly favorable to ideal germination and early growth, the report said.

Good Pasture Cuts Milk Production Costs

Since the time when man first cultivated the earth, grass for pasture and hay has been one of his major projects. In recent years, however, farmers have learned the importance of pasture as a way of cutting milk production costs. It is being one of the farmers' main money crops.

According to department of agriculture reports, about two-thirds of the nation's land is now in grass. Some farm experts believe a 25 per cent increase in the acreage is needed for a more efficient type of agriculture even though greater production has been demanded by the nation's farms.

With the nation demanding a greater production of beef, the farmer who has a good grass program can make more profit per acre in the coming year than was anticipated in 1950.

New Dusting Methods Tested in Michigan

Charging Fungicides May Revolutionize Spraying

Fighting insects and plant diseases which damage farm crops may be revolutionized by charging dust particles in fungicides and insecticides with electricity, Michigan researchers reported recently.

Laboratory tests by Michigan State College researchers show charging of dust particles of normal dusting compounds gets five to ten times better coverage than through usual dusting processes.

A. W. Ferrall, head of the MSC

Henry D. Bowen, assistant in agricultural engineering at MSC, is shown experimenting with apples in the electrostatic dusting process.

agricultural engineering department, says field tests will be made this summer to try the new process commercially.

Fine dust particles of the fungicides and insecticides are charged with from 12,000 to 20,000 volts as they emerge from the nozzle of a regular commercial dusting machine. This high charge is held for several seconds. With dusts blown at a velocity of a mile a minute, it permits them to travel a great distance before losing the electric charge.

Engineers estimate the cost of necessary electrical attachments for the ordinary four-row duster would run around \$300.

Few Hours Spent Cleaning Farm Pays Big Dividends

Spring is clean-up time—time to clean out the hazards around the farm which can cause personal injury, loss of time, or loss by fire. And although many rural communities have already conducted clean-up campaigns, a few hours now and then spent in putting things ship-shape may save many days of time during the busy season later on. It is a well-known fact that orderly farms and homes have fewer accidents.

It will pay every farmer to take a few hours and remove accumulated papers, rags and rubbish from the home and farm buildings. Be sure that medicines, poisons and insecticides are out of the reach of children.

At this time of year many barns are still cluttered with an accumulation of things used during the winter. Clear them out of alleyways or working areas so they can not cause accidents. A neat place is a safe place for either work or play.

Clean Paint Job

For the housewife who wants to paint her flower pots before resetting plants, here is an easy, clean way to get the job done. Invert the pot over a milk bottle and as you work, turn the bottle and you won't have to touch the painted pot at all. Leave it until it's thoroughly dry.

4-H Clubs in Minnesota To Stress Food Projects

Some 49,200 4-H club members in Minnesota will be emphasizing three major food-producing projects this year—field crops, garden and poultry. They are among nearly two million youths throughout the nation who will be doing their part in the mobilization program by participating in 4-H club activities. In these projects 4-H boys and girls learn new agricultural techniques and farming practices.

Last year's income from hunting and fishing leases in Texas exceeded \$2 million and the sale of furs added several millions more to the wildlife income of the state.

Ingenuity Is Needed In Poultry Business

Poultrymen Devise Easy Ways of Doing Old Chores

It takes more than hard work to make money in the poultry business. It takes ingenuity too—lots of it. This is the intangible quality which enables farmers to devise new, faster and easier methods of doing old chores.

For example, one poultryman solved the problem of removing

The picture above is the litter shaft invented by the poultryman. The elongated box-like structure to the right of the main structure houses the electric ventilating fan—one being located on each floor.

litter from each floor of his three-story chicken house in a simple, inexpensive way. His plan was to extend a two-foot square flue from top to bottom of his poultry structure. The end of the flue opened into a feed lot.

Openings, which can be closed by hinged doors, were constructed in the flue at each floor level.

Litter is scraped into the opening with a converted electric lawnmower—the cutting knives being replaced by a small bulldozer blade. Litter drops down the chute and into a manure loader, parked at the feed lot end of the flue.

Seed of Texas 30, a new corn hybrid developed by the Texas Agricultural Experiment Station, will be available for use by farmers in 1952.

SPECIAL CARE NEEDED FOR BABIES IN SUMMER

"Being a baby is a real hazard in either winter or summer but much can be done to avoid or at least lessen some of these hazards that are associated with hot summer days," declared Dr. Geo W Cox, State Health Officer. Summer is the season in which death from intestinal disorders has in the past exacted its greatest toll.

"To guard the infant against such danger, care must be taken that his food, especially milk is pure and kept safe. If there is any uncertainty concerning the water supply, the baby should drink only water which has been boiled and cooled and kept covered. The baby and all his food must be protected against flies.

"Baby himself and all the things which he comes in contact should be kept as clean as possible. Plenty of fresh air and sunshine are essential for the best health of the infant. The baby's body should be gradually exposed to the direct rays of the sun; begin with exposure of only part of the skin surface for 3 to 5 minutes and slowly increase the area of skin and time once or twice daily.

"Care must be taken to keep the baby free from prickly heat by keeping the skin clean and not too warmly dressed or covered. If the baby is comfortable, he will get his usual amount of sleep and will eat and develop normally. In case the child shows symptoms of any abnormal conditions, the family physician should be consulted at once."

Livestock that is forced to fight off flies during the summer months cannot be expected to make the greatest possible gains and monetary returns to their owners. These insect pests can be successfully controlled and doing so will mean money to the producer.

The first step in bringing soils to their maximum production should be a soil test or analysis

WMOORE NEWS

We received 2 tenths of inch of moisture Sunday afternoon. It helped the cotton some. The cotton is doing good in spite of the hot dry winds and dry weather.

Mr and Mrs Huert Webb spent the week end in Snyder visiting relatives.

Garland Loyale of Mesquite visited here Friday.

Mrs Hubert King of Big Springs spent the week with Grandma Rogers.

The Moses family returned from Corpus Christi Wednesday with their furature.

The Jude Taylors visited Sunday with the Dave Ingrams in Big Spring.

Joan Rogers spent the week end at home from Lubbock where she is attending school.

Minute Rice 2 for 15c at LAMBERT GRO. and MKT.

Orb Hanes and his new bride returned Sunday from their wedding trip to Cloudcroft and other points in New Mexico; we wish them much happiness.

Negro Is Fined

Justice of Peace Horace Brunette reported one negro arrested for being drunk and disturbing the peace by displaying a razor which he indicated he might use. He was fined \$39. As we go to press Juneteenth should bring in more business, Judge Brunette said.

Last week Lynn Co. officers made a big liquor and beer haul northeast of Tahoka at a tenani dwelling near the Central Church.

Unusual is the word for the swarms of cotton or dusty moths which are pestering this area and ranging as far as Midland.

We wonder how many of you have seen cotton farmers burning coal oil reflecting lamps in the cotton fields in 1929's to catch cotton insects. That was before the day of cotton dusts and sprays. Rour ed was a boy of 9 or 10 living at Jewett; the fields looked like an army camp of a million camp fires at nite.

Morton's Salad dressing pint 33c at LAMBERT GRO. and MKT.

Heat Wave Grips Area

Monday was the warmest day of the summer with an official reading here of 103. Readings in town ranged from 103 to 108 depending on the site of the reading. Jake Gates thermometer hit 118 and he can prove it by Sam Nelms. Jake's heat meter was only prepared to register to 120 so Mr Gates grabbed some ice and saved his weather instrument; and that's a fact!

Spring Is Time to Check

All First-Aid Supplies

"Be ready with gauze and first-aid remedies. Mother, lest you're caught napping in an emergency," is the advice of Miss Marguerite Briggs, family life specialist, at the University of Illinois.

Miss Briggs suggests that now is the time to check first-aid supplies, replace antiseptics and salves that have lost their strength and replenish tape and bandages to take care of the summer accidents.

Austin, Texas - "Environmental sanitation is the public health term for clean, safe housekeeping whether it applies to a private home and its surroundings or to towns and cities. Among other things, it insures safe drinking water, proper garbage and sewage disposal, the safe service of whole some food including milk, fat and insect control, and general cleanliness of the premises. However, for environmental sanitation to be effective, it is essential that not only public health officials but the citizens living in their respective homes or operating establishments serving the public cooperate wholeheartedly," declared Dr. Geo. W. Cox, State Health Officer.

"Consider, for example, the seasonal housefly hazard. It has been determined that 120 eggs are laid by a single female at one time and that a generation is produced every ten days at summer temperature. Thus, the possibility of reproduction during the warm months of a single fly runs into many millions. While the housefly does not bite, it is dangerous because it breeds and feeds upon both filth and food.

"Again, rats are the source of several diseases of man including plague, typhus fever, infectious jaundice and trichinosis, to mention some of the more important ones. Homes can be made comparatively ratproof by removing rubbish and garbage accumulations and by closing avenues of access. Approved poisons and traps should be employed when a real problem presents itself.
