

Interscholastic League Meet Here Today and Sat.

Mrs. J. S. Burnam, Pioneer Dies At Putnam, March 13.

Mrs. J. S. Burnam, resident of Callahan county for more than 50 years, died at her home in Putnam, Wednesday night, March 13th following an illness of only two days, of a heart involvement.

Funeral services were held Thursday afternoon at 4 o'clock at the Methodist Church, with the pastor of the church officiating. Burial was made in the Putnam cemetery.

Mrs. Burnam, 79 years of age, left 104 direct descendants—10 children, 55 grandchildren, 38 great-grandchildren and one great-great-grandchild. She is survived also by her husband, 86 years of age. The couple had been married for more than 62 years.

Mrs. Burnam was born in Alabama in August, 1855. She came to Texas in childhood with her parents, who settled in Hunt county. There she was married in 1872. With her husband she came to Callahan county in 1883 and the couple established a farm home near Putnam. Ten years ago, upon their retirement from farming, they moved to Putnam, where they have resided since.

Mrs. Burnam's children are Mrs. W. A. Kyle, Putnam; John Burnam, Stanton; J. E. Burnam, Cisco; Rev. H. L. Burnam, Silvertown; Mrs. Nelson Bailey Moran; Jesse Burnam Idalou; Redge Burnam, Putnam; Mrs. Lennis Wood, Plainview; Mrs. Robert Kelley, Putnam. All were at the bedside when death occurred, except Mrs. Wood, who arrived Thursday morning.

PEOPLE OF BAIRD, NOTICE!

The Abilene District of the Methodist Episcopal Church, South, will hold its District Conference in our city on Tuesday and Wednesday, April 23 and 24th, or a week later. There will be approximately one hundred and sixty delegates and preachers in attendance at this meeting.

We will greatly appreciate it if our friends of the other Churches will open their homes to these guests, providing them with a bed and breakfast for one night and morning. If there are those who can provide a bed but not breakfast we will also appreciate your offer to do this much. Any who will do this will please get in touch with me or Mrs. W. A. Fetterly by phone or otherwise.

And the Baird Methodist Church extend a most cordial invitation to the entire community to attend these services. There will be preaching at eleven o'clock in the morning and in the evening.

P. E. YARBOROUGH

Griggs Hospital News

Miss Claudean Wilkerson, daughter of Claude Wilkerson Oplin, underwent major surgery Saturday night. Mrs. C. J. Ault, Clyde, had surgery and radium treatment Thursday night of last week.

Mrs. Homer Barton, Oplin, entered hospital Sunday for medical treatment. Bill Cargal, 16 year old son of Mrs. A. A. Cargal, was brought to the hospital Tuesday suffering from severe injuries received when thrown from his horse while rounding up cattle on the ranch west of Baird. He had a fractured scapula, clavical, his right ear lacerated and five ribs broken. He was unconscious when tourist who saw the accident reached him. Holly Bennett who was working with Bill reached him a few minutes later and brought him to the hospital.

Mattie Warren who has been a patient for some weeks suffering from bronchitis and has been in a serious condition for some days, was reported resting some better yesterday.

John Roberson who has been a medical patient for the past month is convalescing and was able to return to his home at Oplin Monday.

Mrs. Mary Permond who had major surgery ten days ago, was able to return to her home at Oplin Monday. Born to Mr and Mrs L. A. Odum, of Cross Plains Tuesday, March 19, 1935 a girl.

W. L. Ashton Succumbs To Long Illness

W. L. Ashton, 57, died at 4 o'clock Saturday morning, following an illness of several months.

Funeral services were held at the Baptist Church Saturday afternoon at 4 o'clock, conducted by Rev. Joe R. Mayes. Following the services at the church Baird Camp Woodmen of the World took charge of the remains which were conveyed to Ross cemetery where burial was made under the auspices of this order of which the deceased had been a member for many years.

W. L. Ashton was born in Milan county March 8, 1878. He was married to Miss Mary Emma Brown, Dec. 17, 1901.

Three children were born to this union. The eldest, an only daughter, Lena Gertrude, died some years ago at the age of ten years. Two sons, Oliver and M. W. Ashton with their mother survive the deceased. He is also survived by one grandchild, the little daughter of Mr and Mrs. Oliver Ashton.

Mr and Mrs Ashton and family have been residents of Baird since 1906. Mr Ashton served the city as marshal, water superintendent and tax collector for 14 years.

Mr Ashton has been in ill health for several years, suffering from rheumatism and complications and has been confined to his room for some months. The bereaved family have the sympathy of all in their sorrow.

Church Program At Putnam, Sunday

The following program will be rendered next Sunday afternoon at Putnam. You are invited to attend.

Program for the Adult Department of the Church School Zone Meeting at Putnam, Texas, March 24, 1934:

PROGRAM

General Theme: The Adult Department and Evangelism.

Song, "Onward Christian Soldiers" Prayer, Rev. Luther Kirk.

The Adult Department promoting a continuous campaign of Evangelism in the local church. By Albany A. Palm by which the Adult Department of the local church school may promote a systematic evangelistic visiting campaign throughout the community. By Meran.

What Adult Classes of the Church School can do in preparation for and the Promotion of a Revival, By Clyde.

What the Adult Department Classes and Individuals can do During the Revival, By Clyde Circuit.

The Adult Department and Adult Classes of the Church School as a Training Ground in Church Loyalty, By Putnam.

The Place of the Bible in a Program of Evangelism, By

Mr. T. E. Powell, Baird Solo, Rev. R. G. Hardy, Clyde. Consecration Message, Rev. J. H. Crawford.

Benediction. P. E. YARBOROUGH, District Director Adult Work of the Sunday School.

Potato Growers Meet Here Wednesday

A good representation of sweet potato growers were present at Baird Wednesday afternoon to hear Mr. J. L. Summers discuss the industry.

They have requested County Agent Ross B. Jenkins to call another meeting of the same nature at Clyde for Saturday afternoon, March 30. They assured them of a good representation.

Messrs. Summers and Jenkins will be at Cross Plains Saturday afternoon of this week, March 23 for a like meeting. This meeting will be held at the school house.

Mr. Summers discusses the industry from seed selection through cultivation and marketing. The slogan is: "Make Callahan The Greatest Sweet Potato County in Texas."

WATCH FOR "Gilded Lily"

Reporters School Held Here Saturday

Miss Kate Adele Hill, District Home Demonstration Agent, conducted a school for the reporters of the different demonstration clubs of Callahan County at Baird at the court house Saturday beginning at 9:30 and dismissing at 1:30. Editors of the weekly newspapers were invited as special guests.

Miss Hill gave in detail a schedule of rules for the writing of the different club meetings. Attendants took notes on the lecture after which Miss Moore, county agent, gave a demonstration of tile making. Reporters wrote an account of the demonstration and the articles were read in school fashion. A round table discussion of good and bad qualities followed.

Miss Eliza Gilliland, editor of the Baird Star, spoke upon the writing of news articles, followed by a short talk by Miss Mildred Yeager, editor of the Putnam News. The discussion continued through the lunch hour with the group enjoying sandwiches and drinks at the building.

A reporters committee was formed consisting of all reporters of the county demonstration clubs. Miss Yeager was appointed chairman and it was agreed that the committee should meet each third Saturday afternoon at 2:30 of every month at the court house at Baird. Those attending the school were Marie De Spain, Lola De Spain of Clyde, Route 1; Bessie Smith of Baird, Route 1; Gladys Hayes of Clyde; Mrs. Jim Barr of Cross Plains; Mrs. Norman Finley of Deep Creek; Mrs. Doyle Neab of Dressy; Mrs. P. G. Freeland of Cottonwood; Eliza Gilliland of Baird, Mildred Yeager of Putnam.

Callahan Co. Corn-Hog Asso. Elects Officers

At a meeting held in the office of County Agent Ross B. Jenkins, Saturday afternoon and presided over by V. F. Jones, the retiring president of the Callahan Corn-Hog Association all officers for the coming year were elected.

H. N. Ebert of Baird was elected president and E. J. Kendrick of Denton was elected vice-president. Mrs. R. C. Corn of Baird was elected Sec-Treas, Mrs. Corn is secretary to the county agent.

Greer Holmes holds the position of Corresponding Secretary for the Association and all communications in reference to the Corn-Hog program should be addressed to him in care of the County Agents office.

The community committee chairmen were elected as follows: J. E. Faircloth, Clyde; E. J. Kendrick, Denton; Roy Armor, Oplin; G. H. Clifton, Cross Plains.

The allotment committee was selected from this group and is: H. N. Ebert, chairman, E. J. Kendrick, G. H. Clifton, and Roy Armor, other members.

The responsibility of the association rests upon the allotment committee. There are some less corn-hog contracts in Callahan for the year 1935 than in 1934. The drought and high cost of feed is responsible for this falling off in hog growers.

The new allotment committee will meet Tuesday, March 19th, and make such corrections and adjustments as are needed to put the program over for the current year.

Ross B. Jenkins County Agent

Ray Motor Co. Receive Car Load Of Master Chevrolets

Ray Motor Company received a car load of the 1935 Master Chevrolet Cars this week.

The first of the cars, a Master Coach was delivered to Sheriff Edwards. Herschel Bryant bought a sedan; Jess Willbanks, a coupe and Raleigh Ray, a coach. They expect another shipment within a few days.

J. T. Bledsoe, Clyde Resident, Dies

J. T. Bledsoe, 72, a resident of Clyde for the past ten years, died at his home in that city at 10:40 P. M. Monday, March 18, 1935.

The body was carried to Goldwaith former home of the deceased for burial, the funeral costage leaving Clyde Wednesday morning and funeral services were held at 2:30 P. M. Rev. V. W. Tatum, pastor of the Baptist Church at Clyde, conducted the rites. The remains were interred in the family burying ground six miles south of Goldwaith.

Mr. Bledsoe has been in failing health for the past three years but had only been confined to his bed about a month.

Mr. Bledsoe was born at Ashville, N. C. Coming here from Goldwaith, where he had lived for 20 years, he purchased a small farm and engaged in fruit growing and gardening. Previously he had engaged actively in farming. During his residence in Mills county he served as a county commissioner for two terms. He had been a member of the Baptist Church for many years.

Surviving are his wife, four sons and three daughters. His children are G. T. Bledsoe of Breckenridge, R. L. Bledsoe of Gainville, S. C. Bledsoe and John T. Bledsoe of Charlotte, N. C., Mrs. Rupert Gillett of Charlotte, N. C., Mrs. S. A. Ezzell of Graham, and Mrs. Dalton Williams of Breckenridge. All were there when their father died.

L. F. Patterson, undertaker Clyde was in charge of funeral arrangements.

WITH BAIRD BAPTIST

We go along slowly enough, but surely our nex S S Staff seems to be going to function splendidly and when they get use to the work it will still be better. We are out to build up our Sunday School and we want every one concerned to help us.

Let every one be in their place next Sunday at 10 o'clock for Sunday School and stay with us through the preaching and then come to the BTU at 6:30 and stay through the evening service.

Sunday afternoon is our regular day for Dudley. We will be there, the Lord willing and hoping to meet a large crowd.

JOE R. MAYES.

PRESBYTERIAN CHURCH

Rev. R. A. Walker, pastor will preach at the Presbyterian church at both the morning and evening hours Sunday, March 24. All members and the public cordially invited to attend the services.

Billy Dan Havens Celebrates Birthday

Mrs. E. W. Havens entertained Saturday afternoon, March 16 from 2 to 4 honoring her little son, Billy Dan on his 7th birthday.

Games, contests, etc were played for a time after which the guests were invited to the dining room where refreshments of sandwiches, cake and ice cream was served.

St. Patrick Day colors of green and white were used in the decorations in the dining room. A beautiful archway of the colors being made in between the living room and dining room. Green and white streamers were also used in the table decorations. Place cards of Irish hats and Shamrocks leaves marked the places at the table. The St. Patrick colors were also carried out in the refreshments. Green suckers were given as favors.

Little friends present to enjoy this happy occasion with Billy Dan were: Nettie Elvira Gilliland, Willie D. McKee, John A. McKee, Bettye Gay Lidia, Bobbie Jane Price, Dorothy Estes, Betty Ann Bounds, Brookie Wanda Brame, Buddy Brame, John Faye Hayes, Eleanor Jones, Needa Roe Lee Ray Nell Miller, Bettye Jean Hickman Weldon Walker, Sallye Gay Corn, Thelma Joyce McIntosh, Lurline Dickey Bettye Dean Moore, Betty Ray, T. A. White.

Boys 4-H Club Attend Fat Stock Show

Probably the first attempt ever made from Callahan to get boys to enter the business of growing of better livestock was started last spring in getting two boys, Bobby Williams of Putnam and Ralph Barton of Clyde to feed Baby Beeves. County Agent Ross B. Jenkins helped these boys to select and feed these calves. They took them to the Fat Stock Show but due to the fact that the T. E. tesing was not completed in time they were not able to be shown on the floor but were sold at a good price.

Ralph Barton's calf weighed 910 pounds and sold at 12 cents per pound which brought him \$109.20. The entire cost of labor, feed and incidentals in feeding the calf, cost \$60.00 and Ralph missed no time from his school work, because of feeding the calf.

Bobby Williams' calf weighed 895 pounds at Fort Worth and sold at \$11 1-2 which brought him \$102.93. The total cost in raising this calf was last reported at \$50.00 so Bobby made a nice profit and more than that learned many things about feeding of Baby Beeves. The men in charge at the Show stated the two calves sent from Callahan were the best 1st year calves they ever handled. It was meant by that statement that boys feeding for their first year do not usually get their calf in good condition. Both calves weighed about the same which showed what can be done.

The County Agent thinks that these two boys have now broken the ice and shown other boys that a profit can be made feeding so next year should see 20 or more on feed and 4-H Club show should be staged at Baird.

Many other boys in Callahan Co., are becoming interested in calf feeding and the agents expects to have a car load of 4-H Club Calves exhibited at the Fat Stock Show next spring.

Four other boys went with their agent to the 4-H Club day at the Fat Stock Show Monday which was 4-H Club day for the entire state. Those attending were Durwood Varner from Cottonwood, Doyle P. Gunn, Jr., from Union, Forrest Franke and Eldred Bell of Baird. The boys reported one of the finest times they ever had and saw the sights of Fort Worth and Dallas in addition to the events at the Stock Show which included the Rodeo.

4-H Club activities will soon be started and enrollment will need to be completed before the schools end. Any boy between the ages of 10 and 20 is eligible to enter. It usually takes a boy 3 years to learn to feed well enough to carry off any of the prizes but show work is but the smallest gain from club work. It prepares a boy to do for himself when he gets out of school and provides him some spending money in addition. Club members also go to Texas A&M College each summer to the Short Course for a week's pleasure and profitable study.

Boys and girls clubs are now National scope and are carried on by the Extension Service in every state of the union. They are coached and trained by the county and home demonstration agents.

Ross B. Jenkins County Agent Baird, Texas

Ira Putnam, New Mgr. At Blue Arrow

Ira Putnam is now proprietor of the Blue Arrow Service Station, having bought out O. D. Brown, who has been operating the station for some time.

Mr. Putnam took charge Wednesday. He will be assisted by R. L. Elliott. Humble products and Firestone tires are handled at the Blue Arrow service station.

THE FIRST THREE LADIES that cuts this out and takes it to W. D. Boydston, will receive a 98c Dress for 79 cents.

WATCH FOR "Gilded Lily"

The County Interscholastic League meets in Baird today and tomorrow. The program will open at 9 o'clock this morning with general assembly at the High School Auditorium.

Program for the forenoon will be writing contests, story telling, music, memory contests, arithmetic contests three R contests, picture memory contests.

Program for the afternoon consists of: tennis games, volley ball and playground ball.

Program for 7:30 p. m. tonight: Debate Finals, boys and girls High School Declamations. Grammar School Declamations. Extemporaneous Speaking Program beginning 9 a. m. Sat: All Spelling Contests All Track and Field Events Program for Saturday evening 7:30 o'clock:

Declamations Rural Schools. Hundreds of school children, teachers and school patrons of the county will attend this meet and The Star in behalf of the citizenship of Baird, extends a cordial welcome to you all,

Sunshine Club Met With Mrs. Lambert

The Sunshine Club of the Woodmen Circle held an old fashioned quilting bee in the home of Mrs. Lambert and Miss Jeffie on March 13. The day was spent in quilting a quilt for the orphan's home.

At the noon hour a delicious luncheon was served, each member having brought a dish of food.

Mrs. Mary Warren and Mrs. Mary Kehr were welcomed as new members. Mrs. J. B. Cutbirth and Mrs. Ed Lambert were visitors. The following members were present: Mesdames: O. E. Eastham, Arthur Johnson, W. G. Bowls, L. L. Ford, John Asbury, A. T. Vestal, Alex. McWhorter, Frances Myers, Misses Mary Walker, Edith Bowls and Susie Walker.

AT THE METHODIST CHURCH

For the comfort and pleasure of our people and their guests we are this week redecorating the auditorium and Sunday School rooms of our church. We invite the public generally to worship with us at your pleasure.

We urge all members of the Adult Department of our Sunday School next Sunday morning, and go immediately after church to Putnam where we will lunch with the people from Albany, Moran, Clyde and Putnam at the Methodist church. After lunch we will have a program on Adult work in the Sunday School by representatives from these various churches.

Next Sunday morning the Pastor will preach on "Peter, leader and builder of the Early Church." We believe you will enjoy this study of the great Apostle Peter.

Our Sunday School fell off last Sunday in attendance. We can not understand why. Were you partly responsible because of your absence? Come to Sunday School and Church next Sunday.

P. E. YARBOROUGH

B. T. U. NOTES

The B. T. U. met in regular session last Sunday evening and rendered an interesting program on "The Christian and Liquor." All young people are urged to attend these meetings each Sunday evening at 6:30 o'clock.

Missionary Society Met With Mrs. Hensley

The Ladies Missionary Society of the Presbyterian church, met Monday afternoon in the home of Mrs. W. T. Hensley Mrs. J. M. F. Gill, president, and Mrs. Geo. Hall, of Abilene, were guests.

Mrs. Gill installed new officers of the club. Mrs. Herman Vestal was elected to fill the office of Mrs. Clarence West. Mrs. Frances Myers led the devotional.

After the business meeting delicious refreshments were served.

President's Proposal to Eliminate Utility Holding Companies Brings Storm of Criticism—Treasury Seeks to Simplify Nation's Currency Structure.

By EDWARD W. PICKARD
© Western Newspaper Union.

THE President's special message calling for abolition of utility holding companies stirred up a storm that probably surprised even such an astute politician as Mr. Roosevelt. The President urged legislation to abolish those holding companies which were unable to show they were operated in the public interest. Representative Bertrand H. Snell, Republican leader, immediately attacked the message, claiming the President had denounced propaganda against the proposed legislation, and was himself propagandizing for it. Utility companies also swung into the battle, and thousands of investors in utility stocks are reported to have sent in protests to congress. In the senate, Norris, Nebraska Republican, offered a resolution calling upon the federal trade commission to investigate propaganda regarding the legislation. The senate approved without debate. Charges were made by utility companies that because of the administration's campaign against public utilities "the value of utility securities has declined by three and one-half billion dollars since 1933." Enactment of legislation to halt holding companies will cause enormous loss to the American family, one power official testified before the house interstate commerce committee.

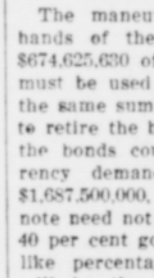

Senator Norris

ly. The AAA was declared invalid as regards intrastate business by Federal Judge Ira Lloyd Letts at Providence, R. I., who issued an injunction restraining Secretary of Agriculture Wallace from enforcing the act against three Rhode Island retail milk dealers, on the grounds that their business was conducted entirely within the state, and the national government had no right to interfere. At Newark, N. J., Federal Judge Guy L. Fake ruled the national recovery act unconstitutional as applied to intrastate commerce "because it attempts an unlawful delegation of legislative authority." The latter decision agrees with that handed down by Federal Judge Nields in the controversial Weirton steel dispute.

CHANCELLOR ADOLPH HITLER'S "diplomatic" cold is over, and he will welcome Sir John Simon, British foreign secretary, to a conference beginning March 24. Accompanying Sir John will be Capt. Anthony Eden, lord privy seal, and disarmament authority. After the Berlin visit Eden will go to Moscow to talk with Soviet leaders. The Berlin conferences will discuss legalization of Germany's rearmament in exchange for an air Locarno pact with Great Britain, France, Italy, and Belgium, and an eastern security pact with Poland and Russia. Limitation of armament by all nations will also be taken up. The visit is complicated by a recent announcement that Germany possesses military aviation in violation of the Versailles treaty. Because of this, France may invoke the Rome accord with Italy and Franco-British declaration at London in support of its move to keep the reich from giving the air force official sanction.

SECRETARY OF THE TREASURY MORGENTHAU revealed plans to dip into profits from gold seizure to retire \$674,625,630 of the national debt through the use of gold certificates. Potentially inflationary, it will deprive national banks of the power to issue currency, and save the government an annual interest charge of \$13,500,000. Questions on inflationary implications were avoided by treasury officials, but they admitted the plan would "put gold back to work which can be expanded."

Secretary Morgenthau

The maneuver will place in the hands of the federal reserve banks \$674,625,630 of gold certificates, which must be used as backing for issue of the same sum in federal reserve notes to retire the bonds. Note issue against the bonds could be expanded if currency demands warranted, to about \$1,687,500,000, since a federal reserve note need not be backed by more than 40 per cent gold or gold certificates in like percentage. What will happen will be the immediate simplification of our currency system. The treasury and federal reserve banks will have all the authority to issue money. The plan involves retirement on August 1 of \$674,625,630 of 2 per cent federal securities and substitution of federal reserve notes for \$657,937,080 of outstanding national bank currency. These bonds will be retired with surplus funds created by devaluing the Roosevelt dollar from 100 cents to 70.06 cents gold. The total profit was \$2,812,000,000.

National bank notes issued by national banks against federal securities represent more than one-tenth of the nation's circulating currency. The administration's program likely means the permanent abandonment of the national bank note which has been used since the Civil war. The circulation privileges expire on all bonds deposited by banks and held in trust by the treasury on July 22, 1935, except on two issues. By calling for redemption, the treasury will retire all securities bearing "circulation privilege" and national banks will no longer have suitable security for issuance of their own notes.

COMPLETE collapse of the administration's long battle to regulate prices in the steel industry is seen in an NRA offer to give up, and in charges by the federal trade commission of a fiasco of collusion. The trade commission insists that price-fixing be scrapped, and no prosecution of steel companies under the anti-trust laws. The trade commission charges that under the code the steel companies have fixed and raised prices on government contracts, in defiance of competitive bidding requirements. Bids were identical, and then steel executives slapped fines of \$10 a ton on members who let the government have steel cheaper, the commission says.

DEMONSTRATORS numbering approximately 2,000 marched into the Minnesota state capitol at St. Paul and harangued legislators with demands in behalf of the idle ranks. Threats were made to picket the capitol unless demands were met.

BRISBANE THIS WEEK

Pleasant News
Air Fleet Controls
Nordic Max, Jewish Max
Gen. Dawes Sees Joy

It is pleasant to read a Washington dispatch saying that the government will establish a great airport in Hawaii near Fort Kamehameha, named for the last king of Hawaii.

Arthur Brisbane

The idea is to keep enough bombing planes there to take care of unwelcome flyers or surface ships arriving from Asia. It will be more pleasant to read, as you may do later, that the government plans to establish a powerful air base on the island of Guam, which we are free to fortify, now that the Washington conference agreements have been repudiated and our silly pledge not to fortify Guam is wiped out.

Thanks to airplanes, the Greek rebellion is crushed. The old Greek patriot, Venizelos, leading the revolt at the age of seventy-two, fled from his home on the island of Crete across the Aegean sea to an Italian island for refuge.

Weeping, the old man vowed that he would never again set foot on Greek soil. A rebel cruiser took Venizelos to the protection of the Italian flag. Then, last of the fleet that had rebelled, the cruiser Averoff surrendered to the government.

Max Schmeling, German heavyweight prize fighter, beat Mr. Hamas with ease and says, "Now we get Baer." Baer, you know, is the world's heavyweight champion. The fact that he is a Jew, and not a blue-eyed Nordic, with the back of his head as straight up and down as a board fence, is said to annoy Mr. Hitler.

It will interest Hitler and others. A hard-hitting "Nordic" meets Max Baer, a tall young Jew, who laughs while he fights. Racial supremacy does not depend on the fist. But in New York City it ought to draw a crowd, gigantic, and a "gate" of about one million dollars.

General Dawes, once Vice President, always busy, now visiting General Pershing at Tucson, Ariz., says:

"America is on the verge of real economic recovery. Its natural force, and human nature, are definitely working for recovery, and in May of this year, positively not later than July, the nation will know the depression is over." Well, it is a pleasure to have somebody at least say so, even though they may have to say it over and over year after year.

The California assembly votes 58 to 17 in favor of the Townsend plan. The state senate, however, revolted and defeated the resolution calling on congress to enact the old age pension bill. It is not possible for the United States to pay twenty-four thousand million dollars every year, the total cost of giving \$200 per month to every man past sixty.

It does not cost the assemblyman anything to vote for the impossible, and it makes him feel politically safe.

H. G. Wells is in America to write about the New Deal. He will find some good applicable descriptive copy in his book, written long ago, "Doctor Moreau's Island."

Doctor Moreau performs some strange and horribly cruel operations in the effort to make animals speak and otherwise act like human beings.

Mr. Wells will find the new era performing strange operations on business men, to make them speak the new business language.

New Yorkers are told that all workers pay in taxes in various ways the earnings of one day every week. The man who has \$5,000 a year pays \$1,000 toward the support of government. Some men with bigger incomes, busy just now borrowing money with which to pay taxes, could tell a more interesting story.

When watches were first made a Frenchman said it was strange that man, with genius and intelligence enough to make a watch, should be superstitious enough to believe in ghosts. It's more strange that the human race with sufficient intellect and will to fly, travel underneath the ocean, and talk around the world, without wires, should be feeble and foolish enough to believe in a permanent depression. The belief in ghosts is slowly disappearing. Let's hope and believe the depression will disappear more rapidly.

The national ladies' hairdressers' convention, gathered in Toronto, is informed that platinum blonds are on the wane and red-haired women, politely called "titian," are rising in favor. The platinum blond is a modern invention, a passing thing, whereas the woman with red hair antedates all the governments and civilizations that we know, and may outlast them.

National Topics Interpreted
by William Bruckart
National Press Building Washington, D. C.

Long and Coughlin

Washington.—Most observers and thinking citizens have been inclined to take little stock in the talks of Huey Long and Father Coughlin, the radio priest, concerning plans for redistribution of wealth. The consensus has been that their plans sooner or later would fall of their own weight. But it can be denied no longer that Long and Coughlin have developed a gigantic following of people who lack information as to the fallacies of the arguments, however logical they sound, that have been spread by these politically smart showmen.

One reason that serious attention to their proposals is now necessary is that some of their arguments are being advanced from high places in the federal government. I refer specifically to the testimony before the house committee on banking and currency by Marriner S. Eccles, governor of the Federal Reserve board and as such the titular head of the nation's banking system. Mr. Eccles did not quite take a leaf out of Huey Long's book. He approached the position of the Louisiana senator, however, when he proposed a redistribution of income, whereas Senator Long has urged a redistribution of wealth.

Mr. Eccles suggested in his testimony in effect that it would be all right for a man with say ten million dollars in capital to keep that sum, provided his income was redistributed. Mr. Eccles went back to the days immediately following the World War to illustrate his argument and showed that at the top of the post-war boom "one tenth of one per cent of the families at the top of the income received as much as 42 per cent of the families at the bottom of the list." Furthermore, he said that the single average family in the big income class got as much as four hundred families at the bottom of the income list.

"This one-tenth of 1 per cent was unable to use all the income in consumption," he continued. "They therefore had to find an outlet in the investment field. As a result, the capacity to produce increased out of all proportion to the capacity to consume."

So Mr. Eccles took the position that a solution of the depression was a redistribution of this income with the idea that it would increase purchasing power in the lower brackets. The governor offered no explanation of how those in the lower income class were going to obtain possession of the redistributed income of the rich because his argument stopped at the point where the government would take this money by taxation.

That is the recognized weakness of the programs advanced by Senator Long and Father Coughlin, and Governor Eccles showed no ability to solve the problem.

Proposes Central Bank

On top of the outbursts by Long and Coughlin and the serious testimony by Governor Eccles comes Senator Nye of the North Dakota progressive, with a bill in the senate to create a central bank. Senator Nye's action has caused many humorous expressions. Here we have a senator who has fostered, even boasted about, progressive ideas and has called himself a liberal. It is necessary only to recall that the father of the central bank idea was the ultra-conservative Alexander Hamilton, the first secretary of the treasury.

Senator Nye advances a bill with the thought that the central bank would avoid hamstringing of credit. I think financial experts all agree that this is true. The thing which Senator Nye overlooked, however, is that Mr. Hamilton's central bank collapsed and brought ruin and grief to thousands. The reason it collapsed was because in removing control of the banking facilities from experienced bankers, the whole thing had been turned over to the control of politicians who, generally speaking, are experienced only in politics. It seems paradoxical that the North Dakota senator should advance as a liberal scheme the creation of a central bank which one hundred and fifty years ago represented the height of conservatism.

The Nye legislation was offered in the same week that Governor Eccles had proposed in his testimony on the banking bill in the house that the Federal Reserve board should have complete control of the credit expansion and contraction in this country. I believe most persons will have difficulty in considering the two schemes as separate and distinct.

It is to be noted that there are at least ninety-nine radical members of the house of representatives who are convinced that the federal reserve system has failed of its purposes. Most of them have been repeating without rhyme or reason the accusation that bankers are "refusing" to make loans. They think, therefore, that if there is a central bank or if credit control is placed in the reserve board and taken away from the federal reserve banks where it now reposes there will be additional loans forced out of the commercial banks. History indicates, however, that this is fallacious. No business is going to borrow money when it doesn't need it and neither is any person in his right mind going to make a

loan unless he has at least reasonable assurances of repayment.

It will be recalled that President Roosevelt at one time spoke disparagingly of the "refusal" of the bankers to make loans. The President subsequently learned that attempts to pump money out of banks must fail for lack of borrowers. I think everyone acquainted with conditions must agree that the Eccles idea and the Nye legislation mean absolutely nothing in the way of recovery aids, for it has always been true, you can lead a horse to water but you cannot make him drink.

Stop and Consider

The fallacies being put forward by Senator Long and Father Coughlin, and now being nibbled at by Governor Eccles and Senator Nye obviously have been accepted by thousands of people. Senator Long claims that at least six million persons are supporting his scheme. It would seem to be the time, therefore, for citizens to begin to analyze the trend of events, if they are influenced by such leadership.

In connection with this trend, it is interesting to observe how much trouble Senator Long and Father Coughlin already have caused for the administration. It must be said frankly, Mr. Roosevelt and his advisers thus far have not found a way to deal with it. They have tried fighting back and each time they have succeeded only in furnishing fresh ammunition for the Long-Coughlin team. Senator Robinson of Arkansas, Democratic leader in the senate, made one of his greatest speeches of criticism of Senator Long's schemes, but the result was only a fresh outburst by the Louisiana senator who took Senator Robinson's own words and converted them to his use.

I reported to you previously that the administration had prepared at one time to take action against Senator Long on income tax questions. But apparently the powers that be have decided that such a course, instead of putting Long back in his place, would make a martyr of him. Among the observers here the belief prevails that the only way Long's attacks can be stopped and his tactics broken up is by ridicule. No politician, however thick-skinned, can stand being made the butt of jokes.

New Plans for NRA

The administration has told congress that it wants to keep the NRA. Through Donald R. Riechberg, sometimes called the assistant president, the administration's position was laid before the senate committee on finance the other day with the suggestion that the proposed new NRA should be confined to matters of interstate commerce. That is, the administration proposes that in extending the NRA for two years from the coming June 16 expiration date, it would apply only to industry engaged in lines of commerce and endeavor that carries across state lines. By the same token, the proposal would eliminate the codes of fair practices from application to the so-called service industry and could not, therefore, apply even to hours and wages in those local plants now under codes.

Mr. Riechberg's statement immediately provoked discussion which certainly can be expected to increase in volume because it is in the nature of protests from those who claim to speak for labor. Sidney Hillman, of the NRA high command, immediately protested as did William Green, president of the American Federation of Labor. Each of these individuals contended that the NRA would be a worse failure than it is now if it were confined to the narrow definition of interstate commerce and applied only to those industries. Mr. Hillman, who is labor's representative on the National Industrial Recovery board, when he learned of Mr. Riechberg's statement promptly struck back with an emphatic observation that the country would not permit such action.

"It is unthinkable," he said, "that congress will withdraw the only protection that the three million or four million underpaid, overworked and helpless workers in the service trades now have. Some of them as a result of the NRA are for the first time in their lives getting one day of rest a week and something a little better than the coolie wages they have been paid in the past."

"I am not interpreting the Constitution. I leave that to the Supreme Court of the United States. But I have been impressed by opinions given by outstanding members of the bar that a condition of keeping millions of workers at starvation wage levels does affect interstate commerce."

Thus is presented the conflict of views between administration appointees, and reconciliation of their views is not made easier by the activity of the labor leaders. It is to be recalled that Mr. Green and some of his stalwart labor associates are not enthusiastic about Mr. Roosevelt and his labor policies any longer. They are not going to be satisfied as easily as they were 18 months ago when they accepted various and sundry promises believing that those promises were to solve labor's economic problems. The administration, therefore, is confronted with genuine danger through the complexity of this political situation.

Says WILL ROGERS

BEVERLY HILLS.—Well all I know is just what I read in the papers, or what I run into. We are living in a

great time. For millions of folks it is a very hard time. There is nothing that they personally can do to help their position. Their living has always been made by working, by holding an honorable job, but there is no job to hold. We used to think that if a man was out of a job for a few months that that was almost a record, but now it goes by the years. What can be done to relieve it? Its our only problem. All the rest that our Government get all excited about mean nothing. The Bonus, the Townsend Plan, the C. C. C. the A.A.A. the N.R.A., Inflation, Deflation on the gold, off the gold. All the whole mess are just little side issues compared to re-employment of those out of work. In fact, most of these other ill are just side lines of the unemployment issue. If everybody was working, there wouldn't be all these others. If every soldier had a job he wouldn't think of wanting a bonus. If the old folks children were all working, and lots of the older ones were themselves holding jobs, there would be no Townsend Plan, gold, silver, debts, all those wouldn't mean a thing, if folks were working. Yet with all the honest effort, and all planning, and all the money that's been spent along various schemes, unemployment has held its own if not increased.

The N.R.A. at the time of launching looked like it would do the work, but it fell from its own complicated structure. I wrote a little gag at the time and said that the whole N.R.A. plan should be written on a post card. Nobody can work a man over a certain number of hours (without extra pay) and nobody can pay anyone under certain sum (no matter what line of business it was), nobody can hire children. There was the whole N.R.A. in those few words. No codes, no lobbying, no running to Washington. You didn't say a man had to hire more men, you said he couldn't work the ones he had over a certain number of hours, and that number applied to all industries.

Then if he said well I have to have my place open longer than that, well he automatically hired more men, not by Government compulsion but by necessity, let all the prices, and all that take care of itself, the same as it had all our lives. If a man undersold another man it was done by good management, and not through low wages or long hours. It was because he just was a better business man.

There was enough money spent by everybody running to Washington on codes to pay off the depression, and then all business got sore. All was looking for the best of it in their codes, and they went home and closed up their shop. This other way, everybody would have been on one footing. You don't get kicks when you know that everybody is treated like you are being treated.

The minute a thing is long and complicated it confuses. Whoever wrote the Ten Commandments made em short. They may not always be kept, but they can be understood. They are the same for all men. Some industry cant come in and say, "Ours is a special and unique business. You can't judge it by the others." Well no committee come pullman-carrying-it into Jerusalem looking for Moses and saying "Ours is a special business." Moses just went up on the mountain with a letter of credit and some instructions from the Lord, and He just wrote em out, and they applied to the steel men, the oilmen, the bankers, the farmers, and even the United States Chamber of Commerce. And he said, "Here they are Brothers, you take em and live by em, or else."

Well that's where Moses had as good intentions, but Hugh Moses Johnson went up on Capitol Hill and come down with 24 truck loads full of codes. He just couldn't come out plain and say, "Thou shalt pay so much. And thou shalt work thy men only so much, and if thou canst not getteth these some more, but payeth them—like-wise." Hugh should have been born B. C. (before codes.)

Course that is not all our troubles. It would have solved everything any more than the Commandments have solved human weaknesses, but they did stop all arguments as to whether they were good and fair to all was concerned, and they left no argument as to whether they would work if you kept them. I expect there is a lot of lessons in the Bible that we could learn and profit by and help us out, but we are just so busy doing nothing we haven't got time to study em out. But in Moses time the rich didn't gang up on you and say, "You change that Commandment or we won't play."

When Worlds Collide

By EDWIN BALMER and PHILIP WYLIE

Copyright by Edwin Balmer & Philip Wylie WNU Service

CHAPTER X—Continued

Tony looked at the breach of the tube and nodded. "Journeying through space we will be a rocket that can be fired from both ends and from all around the sides of both ends?"

"Excuse me, although the side firing is of less intensity. We have twenty stern vents and twenty forward, you see, and twelve around the circumference at each end," Hendron smiled. "It is very beautiful, our ship; and according to the laws of physics, by the release of more power, it will navigate space as surely as it hopped from the ground, when we required it to. We'll leave this world, Tony; and, I believe, we'll land upon Bronson Beta."

Tony stared at him: "And we'll live afterward?"

"Why not?" Hendron returned again. "We can count upon vegetation on Bronson Beta, almost surely. No, surely, I should say. Higher forms of life must have been annihilated by the cold; but the spores of vegetation could survive."

"We know too little about the lower temperatures; but what we have discovered indicates that the germinating power of micro-organisms and spores should be preserved at lower temperatures for much longer periods than at our ordinary temperatures."

"At least!" Tony caught up his words. "You will not deny, then, that there may be a possibility of higher life surviving or capable of being revived—too?"

Hendron shook his head. "I have seen too many incredible things occur, Tony," he replied, "to deny any possibility—particularly under conditions of which no one on this world has had any experience. But I do not expect it. I do expect vegetation, especially vegetation that grows from spores."

"In the early days on this world, the great majority of plants did not reproduce by seeds, but by the far more resistant spores, which have survived as the method of reproduction of many varieties. So we will count upon a native flora which, undoubtedly, will appear very strange to us. Of course, as you know, we are taking across with us our own seeds and our own spores."

"I know," said Tony, "and even our own insects, too."

"Exactly. You've been talking with Keppler, I see. I put that problem entirely up to Keppler."

"Our first and most necessary unit for self-preservation proved to be the common honey bee, to secure pollination of flowering plants, trees and so on. Keppler says that of some twenty thousand nectar insects, this one species pollinates more than all the rest put together. The honey bee would take care of practically all of this work, as his range is tremendous. There are a few plants—Keppler tells me—such as red clover, which he cannot work on; but his cousin the bumblebee, with his longer proboscis, could attend to them. So, first and foremost among living things, we bring bees."

"We also take ants," Hendron went on, "especially the common little brown variety, to ventilate, drain and work the soil; and, as you have observed, Tony, angleworms also."

"Since we are going to take with us fish eggs to hatch into fish over there, we have to take mayflies. Their larvae, in addition to providing food for the fish, are necessary to keep the inland waters from becoming choked with algae and the lower water plants."

"In the whole of the Lepidoptera there is not, Keppler says, one necessary or even useful species; but for sheer beauty's sake—and because they take small space—we will take six butterflies and at least the Luna moth."

"And we must take one of the reputed scourges of the earth."

"What?" said Tony.

"The grasshopper—the locust. Such an insect will be vitally necessary to keep the greenery from choking our new earth; and the one best suited for this job is, paradoxically enough, one of mankind's oldest scourges, the grasshopper. He is an omnivorous feeder and would keep the greenery in check—after he got his start. Our first problem may be that he will not multiply fast enough; and then that he will multiply too fast. So to keep him in check, and also the butterfly and the moth, we will take parasite flies. We will have to have these—two or three of the dozen common Tachinidae have been chosen."

"We are bringing along vials of mushroom and other fungi spores. Otherwise vegetation would fall down, never disintegrate, and pile up till everything was choked. A vial the size of your thumb holds several billion spores of assorted fungi—in case the spores of the fungi of Bronson Beta have not survived. They are absolutely essential."

"Also, we are taking bottles of stagnant pond water and another of seawater containing our micro-organisms such as diatoms, plankton, unicellular plants and animals which form the basis of our own biotic economy and would supplement, or replace, such life on the other globe."

"About animals—" Hendron halted. "Yes, about animals," Tony urged. "There is, naturally, still discussion. Our space is so limited, and there is most tremendous competition. Birds offer a somewhat simpler problem."

"The matter of dogs and cats is the most difficult," Hendron said, closing the subject. Air pumps murmured somewhere within the ship, which

seemed half-alive. Electric generators hummed, and from somewhere came the high note of one of the electronic engines. Tony left Hendron and went from the ship.

That night the emigrants from the earth gathered again in the dining hall. Hendron addressed them, outlining the general final preparations, which were augmented by specific, printed instructions to meet such contingencies as could be foreseen.

After the meeting, the crowd moved outdoors and stood awhile, looking at the Bronson Bodies. As in their former approach their size had increased in diametric proportion during the last few days and nights, and they now dominated the heavens, Alpha eclipsed by Beta, which rushed toward the earth ahead of it, in the same position as that held by a planet in transit across the face of the sun. The spectacle was one of world beauty, and one calculated to strike terror in the bravest. Bronson Alpha looked like the rising moon, except that it was much larger than any moon had ever seemed to be.

Already the desolate and wounded surface of man's world was stirring to their approach. Slight earthquake shocks were felt from time to time, and the very winds seemed to be moving in a consciousness of the awful cataclysm that was drawing near. All over the world, the tides—unnaturally absent since the shattering of the moon—rose again and licked up the sides of the fresh, raw shores; the people who huddled on mountains and prairie plateaus that night knew instinctively that this was indeed the end.

Tony sought out Eve. "Come walk with me," he said.

"I'd like to. It's so strange to wait, with everything done that matters. For it's all done, Tony; everything that we're to take with us has been prepared and put in place."

Tony was excited and on edge, with nerves which he tried to quiet and could not.

"Do you suppose," he said, "there'll be other ships starting from this side of the world tomorrow night and

knitted a barrier. And there, holding her, he heard and she heard a child crying.

There were no children in the encampment. There never had been. No one with little children had been chosen. But here was a child.

Eve called to the child, and it ceased crying; so Eve had to call again for a response that would guide her to it in the dark.

There were two children, together and alone. They were three and four years old, it appeared. They knew their names—Dan and Dorothy. They called for "Papa." Papa, it appeared, had brought them there in the dark and gone away. Papa had told them to stay there, and somebody would come.

Eve had her arms between the wires, and the children clung to her hands while they talked. Now Tony lifted them over the wires; and Eve took them in her arms. The little girl asked if she was "Mamma." Mamma, it appeared, had gone away a long time ago.

"Months ago only," Eve interpreted for Tony, "or they wouldn't remember her."

"Yes. Probably in the destruction of the First Passage," Tony said; and they both understood that the mother must be dead.

"He brought them here to us," Eve said; and Tony understood that, too. It was plain enough: Some father, who had heard of the camp and the Space Ships, had brought his children here and left them—going away, asking nothing for himself.

Clear and loud in the night a bugle blew; and Tony and Eve both started. "Gabriel's horn," muttered Tony. "The last trump!"

"Father advanced the time," returned Eve. "He decided to give a few minutes more of warning; or else he fooled me, too."

"You are carrying that child?" asked Tony. Eve had the little girl. "Yes," said Eve. "You are carrying the boy?"

"Yes," said Tony. "Rules or no rules; necessities or no necessities, if we can take sheep and goats I guess we can take these two."

"I guess so," said Eve; and she strode strongly beside him into the

he let her. In silence he kissed her again; then her lips, close to his, said: "Farewell to this last sure night!"

"No; we leave tonight, Tony."

"Tonight? I thought it was tomorrow."

"No; Father feared the last night—if any one knew it in advance. So he said tomorrow; but all his calculations make it tonight."

"How soon, Eve?"

"In an hour, dear. You'll hear the bugles. He deceived even you."

"And Dave?" asked Tony jealously. Dave Ransdell now was his great friend. Dave was to be in command, except as to scientific matters, of the party in the second ship; Tony was himself second only to Hendron on the first ship; and Tony had no jealousy of Dave for that. Moreover, Eve was to travel in the ship with her father and Tony; if he was saved, so would she be! And Dave might, without them, be lost. Tony had told himself that he had conquered his jealousy of Dave; but here it still held him.

"No," said Eve. "Father told Dave tomorrow, too. But we leave the earth tonight."

"So tomorrow," said Tony, "tomorrow we may be ourselves, with yesterday's seven thousand years." He held her again as he thought of his hour—the last hour of which he could be sure.

"Come away," he said. "Come farther away from—"

"From what, Tony?"

"From everybody else." And he drew her on. He led her, indeed, toward the edge of the encampment, where the wires that protected it

edge of illumination as the great floodlights blazed out.

The buildings were all alight; and everybody was bustling. The loading of the two Arks long ago had been completed. The passengers ran back and forth, calling, crying, shaking hands, embracing one another.

They were all to go; every one in sight was billeted on the Space Ships; but some would be on one ship, some on the other. Would they meet again—on Bronson Beta? Would either ship get there?

Tony, hurrying to his station, appreciated how wisely Hendron had acted in deceiving them all—even himself—as to the night. Here he was, second in command of the first Space Ship, carrying a strange child in contravention of all orders. The chief commander's daughter also carried a child.

No one stopped them. Not Hendron himself. It was the last hour on earth, and men's minds were rocking.

The bugles blew again; and Tony, depositing the boy with Eve, set about his business of checking the personnel of his ship. Three hundred yards away Dave Ransdell checked the personnel of his larger party.

A third time the bugles blew. Tony completed his check of crew and passengers. Thrice he blew his whistle.

From off to the right, where the second ship lay, Dave Ransdell's shrill signal answered.

"Close valves and locks!"

There was no one on the ground. No one! All checked and tallied, thrice over. Yet as Tony left the last lock open to gaze out again and listen, he heard a faint cry. The father of the children!

Could he take him, too? One man more? Of course they could make it. Tony withheld the final signal.

The voice was faint and far away, and in its thin notes could be detected the vibrations of tense anxiety. It came from where the airplane field lay. Presently he made out syllables, but not their meaning.

"Hello," he yelled mightily. "Who is it?"

Back came the thin shouted reply: "C'est moi, Duquesne! Attendez!"

Tony's mind translated: "It's I, Duquesne! Wait."

On the opposite side of the flying field a lone human figure struggled into the rays of the floor lights. It was the figure of a short fat man running clumsily, waving his arms and pausing at intervals to shout. Duquesne! The name had a familiar sound. Then Tony remembered. Duquesne was the French scientist in charge of building the French Space Ship that had been reported to him by James long ago.

He turned to the attendants at the airlock.

"Get Hendron," he said. "Tell him Duquesne is here alone." He operated the winch which moved the stairway back to the hull of the ship.

The short fat man trotted across the field, stopping frequently to gesticulate and shout: "Attendez! C'est moi, Duquesne!"

At last he scrambled up the steps of the concrete foundations to the ship. He rushed across the platform and arrived at the airlock. He wore the remnants of a khaki uniform which did not fit him. Protruding from the breast pocket of the tunic was the butt of a revolver. He was black-haired, black-eyed and big-nosed. When he began to speak brokenly, he first swore in French and then said in English: "I am Duquesne! The great Duquesne! The celebrated Duquesne! The famous Duquesne. The French physicist, me, Duquesne. This I take for the ship of Cole 'Endron—yes? Then, so I am here. Tell him I have come from France in three months, running a steamboat by myself almost, flying across this foul country with my plane, which it is broken down near what was Milwaukee, and to here I have walked by myself alone these many days. You are going now, yes? Tell him to go. Tell him Duquesne is here. Tell him I leave those pigs, those dogs, those cows, those onions, who would build such a foolish ship as they will break their necks in. I knew this 'Endron ship would fly, so I have come to it. Bah! They are stupid, my French colleagues. More suitable for the motormen of trams than for flyers in the outer space."

At that instant Hendron arrived at the top of the spiral staircase. He rushed forward with his eyes alight. "Duquesne! By G—d, Duquesne! I'm delighted. You're in the nick of time. In forty minutes we would have been away from here."

Duquesne gripped Hendron's hand, and skipped around him as if he were playing a child's game. With his free fist he smote upon his breast; he shouted so that the entire chamber reverberated: "Am I a fool that you should have to tell me what hour was set for your departure? Have I no brains? Do I know nothing about astronomy? Have I never studied physics? Idiots, charming friends, glorious Americans, fools! Have I no brain? Can I not anticipate? Here I am."

Suddenly he let go of Hendron's hand and stopped dancing. He bowed very gravely, first to Hendron, then to Tony, then to the crew. "Gentlemen," he said, "let's be going. Let's be on our way."

Hendron turned to Tony, who in reaction burst into a paroxysm of laughter. For an instant the French scientist looked deeply wounded; then suddenly he began to laugh. "I am ridiculous, am I not?" he shouted. He roared with laughter. He rocked with it.

"What about the ships that were being built in other countries in Europe?" Hendron asked him.

TO BE CONTINUED.

The Passengers Ran Back and Forth, Calling, Crying, Shaking Hands; They Were All to Go. Every One in Sight Was Billeted on the Space Ships, but Some Would Be on One Ship and Some on the Other.

MORE LIGHT ON PRIMITIVE MAN

Evidence That Use of Fire Goes Far Back.

A Peking man, who lived at least a million years ago, knew how to make fire and used stone implements. These discoveries have been reported to the Chinese Geological society after a four years' search.

The Peking man is the oldest member of the human race of which anything is known, yet these discoveries prove that even he must have had a definitely human ancestor. Prof. G. Elliot Smith, the British anthropologist, who went to China at the invitation of the Chinese Geological survey to make an independent report on the Peking skull, has now received in London full reports of these new discoveries.

"Most thrilling news of absolutely first rate importance" was how he described them to a Press association reporter. "In spite of most careful search in the cave of Chou Kou Tien, where the remains of the Peking man were found, no trace whatever of implements of any sort had been found hitherto. Now, however, the careful work of Mr. W. C. Pei, the Chinese geologist in charge of the excavation of Chou Kou Tien, has been rewarded by the discovery of a large selection of stone implements, which have been chipped with great skill, thus emphasizing the fact that the human qualities of appreciation of form and skill in manipulation found expression in the making of excellent tools by this archaic man."

"What is, perhaps, even more interesting is the discovery by Mr. Pei of the evidence that these very ancient and primitive people had used fire, an inference which has been confirmed on the spot by the observations of the Abbe Breuil, the French paleontologist."

"Hitherto there has been no evidence of the use of fire by human beings earlier than the Acheulean period in Europe, and even that is questionable. Hence the discovery of definite evidence that the Peking man used fire puts back the history of firemaking to a period more than twice as remote as that which hitherto had been assumed."

"These two facts are of the utmost interest and importance, not merely because they show that the most primitive member of the human family so far discovered was already putting his distinctively human power to his service, but also because it settles once and for all the contentions that the Peking man was definitely human, and actually lived in the cave at Chou Kou Tien."

"Although the Peking man is the most primitive member of the human family so far discovered, no serious anthropologists had ever assumed that he did not have much more primitive forerunners who were definitely human."

"The fact that the two other types, which were roughly contemporaneous with the Peking man—the ape man of Java and the Pittdown man of England—already differed so profoundly from the Peking man, indicated that a very long period of time must have elapsed to allow for the development of the different characters of these three types in the process of their divergent evolution from some common ancestor."

Breezy Vehicle

When automobiles were first introduced to Cape Cod, some thirty years ago, an old sea captain was given a ride in one of the first cars, a high-sided contraption steered by the

tilter that preceded the steering wheel.

"Well, captain, what do you think of her?" asked the proud owner and driver.

"Well," answered the captain, his face showing a puzzled look, "she's the first craft I ever seen that has a head end no matter which way you pointed her."—Boston Daily Globe.

Dr. Pierce's Pellets are best for liver, bowels and stomach. One little Pellet for a laxative—three for a cathartic.—Adv.

Ought to Be a Law

"How did you like Switzerland? The scenery there is lovely, I hear."

"Not so bad, but you can't see much of it because the mountains get in the way."

WHEN YOU TAKE A LAXATIVE

... use a spoon

It isn't what brand of laxative you take that's so important—it's the form. A liquid laxative can be taken in any required amount. If only a little is needed, you need never take a bit too much.

Doctors favor the easily measured liquid laxatives. Instead of any form that does not encourage variation from the fixed dose. A fixed dose may be an overdose for you—or your child.

Always remember this one thing about constipation: the secret of any real relief is reduced dosage.

Give the bowels only as much help as may be needed, and less help as the need grows less. You will find Dr. Caldwell's Syrup Pepsin an excellent aid in regulating the bowels. It contains senna and cascara (natural laxatives) and it will clear-up any bilious, sluggish condition without upset. Delightful taste, and pleasant action. Your druggist has it.

Dr. Caldwell's SYRUP PEPSIN

Speed Made Easy

It is always easy to thumb a ride on the road to ruin.

Whitens, Clears The Skin Quickest Way

No matter how dull and dark your complexion; no matter how freckled and coarsened by sun and wind, Nadinola Bleaching Cream will whiten, clear and smooth your skin to new beauty, quickest, easiest way. Just apply at bedtime; Nadinola, tested and trusted for over a generation, begins its beautifying work while you sleep. Then you see day-by-day improvement until your complexion is all you long for; creamy white, satin-smooth, lovely. No disappointments, no long waiting for results. Money-back guarantee. Get a large box of Nadinola Bleaching Cream at your favorite toilet counter, or by mail, postpaid, only 50c. NADINOLA, Box 15, Paris, Tenn.

PARKER'S HAIR BALSAM

Removes Dandruff—Stops Hair Falling—Imparts Color and Beauty to Gray and Faded Hair—Sole and Mfg. at Fragona, N.Y.

FLORESTON SHAMPOO—Ideal for use in connection with Parker's Hair Balsam. Makes the hair soft and fluffy. 50 cents by mail or at drugstore. Hiscoc Chemical Works, Patchogue, N.Y.

WNU—L 12—35

How Calotabs Help Nature To Throw Off a Bad Cold

Millions have found in Calotabs a most valuable aid in the treatment of colds. They take one or two tablets the first night and repeat the third or fifth night if needed.

How do Calotabs help Nature throw off a cold? First, Calotabs are one of the most thorough and dependable of all intestinal eliminants, thus cleansing the intestinal tract of the germ-laden mucus and toxins.

Second, Calotabs are diuretic to the kidneys, promoting the elimination of cold poisons from the blood. Thus Calotabs serve the double purpose of a purgative and diuretic, both of which are needed in the treatment of colds.

Calotabs are quite economical; only twenty-five cents for the family package, ten cents for the trial package. (Adv.)

CACTUS PLANTS: 20 Plants \$1.00, Club Order 150 Plants \$5.00. Surprise collection. E. T. FENTON, PEARSALL, TEXAS.

HORSE-SHOE VI-TANS

3 times more solids than fresh meat!

3 times as far in feeding! Economical!

Horse-Shoe VI-TANS is one of the most complete and economical dog foods to feed. Less than 5c a day, depending on size and breed of dog. The only dog food in America carrying the Iodine Approved Label. Send 10c for trial package, 3 for 25c.

MANUFACTURED BY horse-shoe DOG FOOD CO. PINE BLUFF, ARK.

KILL DOCK ROACHES USE STEARNS PASTE

ALSO PATS MICE. New. KILLS. STEARNS PASTE.

WATCH YOUR KIDNEYS!

Be Sure They Properly Cleanse the Blood

YOUR kidneys are constantly filtering impurities from the blood stream. But kidneys get functionally disturbed—lag in their work—fail to remove the poisonous body wastes.

Then you may suffer nagging backache, attacks of dizziness, burning, scanty or too frequent urination, getting up at night, swollen feet and ankles, rheumatic pains; feel "all worn out."

Don't delay! For the quicker you get rid of these poisons, the better your chances of good health. Use Doan's Pills. Doan's are for the kidneys only. They tend to promote normal functioning of the kidneys; should help them pass off the irritating poisons. Doan's are recommended by users the country over. Get them from any druggist.

DRESSY CLUB

A mixture of four parts sand and gravel to 1 of cement with an adequate amount of water in the making of a cement tile to be used in sub irrigation, was shown in a demonstration given by Miss Vida Moore, before members of the Dressy Community H D Club at the home of Mrs C D BaIRD Thursday, March 14

This tiling can be made at approximately 1 cent per ft. and one irrigation each week or ten days being equal to that of 2 inches of rain.

The demonstration on bread making which was delayed at Miss Moores previous meeting was also given at this time. Different eatables such as cinnamon rings, parker house rolls, etc being made from yeast bread.

Next meeting is with Mrs. Frank Spencer at the home of Mrs. W. O. Spencer, March 28.

Refreshments of chicken salad on lettuce, hot rolls, cookies and coffee

was passed to seventeen members and Mrs C M Garret, Mrs Lester Barr, Mrs. George Baum, Miss Vida Moore and Mrs W S Fisher of Burkett.

DEEP CREEK CLUB

Planning for an all day sewing meet where club members may learn by experience how to use the foundation patterns they have made was the chief interest of the Four Way Development Club's meeting with Mrs L L Blackburn as hostess at Mrs Norman Finley's home March 15.

Constitution and by-laws as submitted by the committee, Mrs. Norman Finley, Mrs. John Hughes and Mrs Homer Boatwright, were adopted by the club.

The all-day meeting will be at Mrs L L Blackburn's home March 29

Three guests, Mrs J A Jackson, of BaIRD; Mrs. W B Dodds, of Graham, and Mrs E L Finley, of Abilene were welcomed by the club members: Mesdames John Asbury, Bob Beck, Homer Boatwright, Houston Stewart, D. S. McGee, Roland Nichols, J E Free, N M George, L L Blackburn, Norman

Finley and Miss Annie Catherine McGee.

ROWDEN CLUB

Mrs. O F Henderson was hostess to the "Merry Workers" Club Mar. 11 After club prayer and songs the President gave a report on last council meeting. Membership of Miss Ada Sikes was received. The club will answer roll call at next meeting with Bible quotations. Food budgets and garden plans are being made by club members.

Miss Vida Moore will demonstrate tile making at the home of Mrs J N Baggett, March 13.

The following members were present. Mmds, H J Gibbs, L T Mauldin, J A Sikes, N B Holloway, Misses Ada Sikes, Anna Mae Tabor, Juanita Holloway, Opal King and the hostess.

On March 25 the club will meet with Miss Opal King.

Visitors are always invited and welcome.

Editors Note—We regret that the above article was unavoidably left out last week.

JOLLY WORKERS CLUB

Jolly Workers Club met at Mrs. Preston Ford Monday, March 16 The club worked on four foundation patterns. Plans were made to meet at Mrs. D Scotts April 1 with an all-day meeting to further the work on foundation patterns.

There were 3 new members, Mrs B M Baum, Mrs F A Ford and Mrs W E Connel. Other members present were, Mmds, D Scott, Virgle Cole, E J Kendrick, Auther McIntosh, Preston Ford, Ben Allen H W Caldwell, Luther Caldwell, T N Minix, Troy Allen, Vernon Walker, Milton Caldwell Miss Vola Alen and Miss Katherine Allen.

The club wishes every member to be present at the all-day meeting. New members and visitors are welcome.

HEGARI AND FETERETA ON RENTED ACRES

Since West Texas never has enough bundle feed to supply her normal needs I wrote to the Cotton Section relative to growing Hegari on the rented acres The two letters are hereby released.

Dear Mr. Adams:
We have had many inquiries relative to planting Hegari on the rented acres. Please advise if our interpretation is correct when we stated that if it were cut for forage this crop would be permitted on rented acres if not for sale directly nor indirectly and needed in addition to the regular acres planted to feed.

Yours very truly,
Ross B. Jenkins
County Agent

The reply:
Dear Mr. Jenkins:
We have your letter of March 11 relative to planting Hegari on the rented acres. Your interpretation is correct.

Yours very truly,
G. E. Adams
Assistant State Agent.

Feterata is the same type of crop and I am informed it is to be planted if desired where there is a need beyond the acres set aside for feed
I am trying to get maize so designated also.

MORE CHECKS ARRIVE

During the week there have been some \$2000 in checks received that were divided rather equally between cotton, wheat and hogs. This brings the total amount to about \$15,000 that has been distributed so far this year.

FEED LOANS

A letter on my desk tonight states that Emergency Feed Loans will be advanced through the Relief Administration until the funds so appropriated by congress becomes available. No loan of over \$50 can be made through this source. There is a little delay here just now because of the mortgage forms not yet being available. It is thought these will be in BaIRD soon, however.

ATTENTION METHODIST FOLKS!

The General Conference of the Methodist Episcopal Church, South, changed the method of electing delegates to the District Conference last May. Henceforth, instead of being elected by the Quarterly Conference, which is composed of all the members of the church. On the present basis of representation we are entitled to six delegates. I am, therefore, calling a meeting of the Church Conference next Sunday evening at seven thirty o'clock for the purpose of electing these delegates. Let every Methodist be in attendance, please.
P. E. YARBOROUGH, Pastor

STATE DEPARTMENT OF EDUCATION RURAL AID DIVISION March 18, 1935

To The County Superintendents:
Practically all of the applications for aid have been received in this office and it is apparent that the maximum amount which can be paid is seventy-five percent of the grants approved. I promised several of the county superintendents over the state that I would notify them at the first possible moment as to the amount we would be able to pay in order that school terms could be adjusted accordingly.

Federal authorities have notified us that Federal Aid depended largely upon the action of the Texas Legislature on the present Equalization Bill, or the Rural Aid Bill. In other words, it seems that the Federal Government wants to know what the Legislature is going to do toward taking care of the situation next year before granting Federal Aid to extend terms this year. If each of you will ask your Senator and Representative to pass the Rural Aid Bill out as early as possible it will give us a chance to get Federal aid before it is too late to do any good. I know that many schools are out now, if Federal Aid is not granted it is my honest opinion that Federal Aid will be granted to extend the school terms in Texas this year, as soon as the Legislature passes the Rural Aid Bill for the next biennium. Please urge your Legislators to lose no time in enacting whatever Rural

Aid Bill they intend to enact.
I am sorry that we are unable to pay more than seventy-five percent care of a Four Million Dollar Appropriation this year, but it is impossible to take that amount. You will remember that the Bill passed without reductions as to the amount of aid to be granted, but the apportionment was reduced to Three Million Dollars. We were able to pay ninety percent last year due to the fact that a great deal of the One Million Six Hundred Thousand Dollar Emergency Appropriation made by the Forty-third Legislature was left as balances in school districts where schools had close before the appropriation was made.

Sincerely yours

(Signed)

Announcing An Improved Frigidaire '35

The Frigidaire '35 line of Household refrigerators is by far the finest and most complete line of Frigidaires ever built. From the smallest model to the largest, all of the Frigidaires provide abundant refrigeration to keep foods safely and freeze ice quickly, even in the hottest weather. They also provide many outstanding features of convenience and utility—amazing economy of operation—and genuine Frigidaire quality in every detail.

Regardless of your particular requirements or price you have in mind—you will find, among the many models of the Frigidaire '35, the right size to fit your kitchen and the right price to fit your pocket-book.

Plan now, before the hot Spring and Summer months arrive, to enjoy dependable refrigeration. You will profit by the food savings it makes possible and by its convenience and economy. You can purchase a Frigidaire on our convenient payment plan, assuring you health protection for years to come.

Do you know that your increased use of Electric Service is billed on a surprisingly low rate schedule... and adds only a small amount to your total bill?

Sam E. Friend, Pioneer Ranchman Buried At Old Home

Sam E. Freind, 81, pioneer rancher of this section died Friday March 1st at the home of his son Tom Friend in Las Cruces, New Mexico.

The remains were brought back to his old home on Jim Ned Creek for burial. Funeral services were held at the Methodist church at Rogers at 3 o'clock Sunday afternoon, March 3, the rites being conducted by Dr. B. W. Dodson, Bible teacher in McMurry college, Abilene. Elmon Kirby directed the music. Burial was made in the family burying ground at Rogers, by the side of his wife, who died in 1928. Following the death of his wife Mr. Friend went to live with his only son Tom Friend, in Las Cruces. He has been in ill health for the past two years.

Sam Friend was a native Texan, born in Smith county, of a pioneer family. At the age of 19 he was married to Alice Matilda Burleson in Grayson county, in August, 1873.

The year before his marriage he joined the Methodist Church and shortly thereafter was made a steward for 63 years, and for 35 consecutive years he attended quarterly church conferences a total of 140 sessions.

Heeding the call of the West, Sam Friend and his brother, Joe, and their families, settled on the Jim Ned creek in the southwest part of Taylor county in 1877. As partners, the brothers engaged in stock raising. Later, Joe, now dead, moved to Ozona, where acquired extensive ranching interests.

In 1878, Sam Friend, moved by a desire to help his sparsely settled community, started a campaign to build a school. Soon a log house, the first school in Taylor county, was constructed. John Rumph, the first teacher, boarded in the Sam Friend home.

A year later, Friend launched a movement to build a church near the school. His friends told of how, as he was riding on horseback, looking for stock, and thinking of the community needs for a church, he suddenly stopped dismounted, and kneeling in prayer, asked guidance for the cause. The church was built and Sam Friend became the first circuit rider for the Methodist church in this section of the county.

Soon after the organization of Tay-

lor county, Sam Friend was elected a commissioner and had a part in the building of the first courthouse and jail at Buffalo Gap, then the county seat. He was one of the moving spirits in the Old Settlers Association of Taylor county, for which he acted as chaplain.

T. A. Bledsoe, president of the organization, in a graveside tribute to Mr. Friend, said:

"Sam Friend, by nature, training and education belonged to the old school of Texas. Reared on the range spending much time in the saddle, he was honest, sincere and temperate; charitable and a friend to all, a foe to none; fearless in his convictions, active in matters concerning his community, county and state, he was respected and beloved by all who knew him. Through difficulties and hardships he consistently followed the spirit and desire to live close to his God, his country and his fellowmen.

"Sam Freind, a Christian, a good citizen, a devoted husband, a kind father and a loyal friend, has passed this way the last time. He will be remembered and missed by all who knew him."

ODD FELLOWS MEETING

Baird Odd Fellows Lodge will meet next Tuesday night in a get-together meeting and to hear the report of delegates who attended the grand lodge. All members are urged to be present.

CARD OF THANKS

We wish to thank all our friends for the many acts of kindness shown to our husband and father during his long illness and to us, also the kindness and sympathy shown us in his death. We especially thank the Woodmen of the World for their thoughtful kindness to us at this time.

Sincerely,

Mrs. W. L. Ashton

Rep. Cecil Lotief Gives His Position on Measures Now Before Texas Legislature

The following legislative letter was written by Rep. Cecil Lotief to the people of his district which embraces Eastland and Callahan counties:

I have been intending to write to the newspapers of my district for the past three or four weeks, but on account of heavy calendar and important business before the house, I have failed to do so. Besides this, I am serving on five important committees in the house, and, of course this takes up most of my time, both day and night.

I want to say to my friends and constituents that I have failed to reply to some of their letters, and for this I am asking forgiveness, but my reason is that, in the first place, I am too busy, and in the second, it would take too much stationery, stamps, and scribes' time. Since I was elected on an economic platform, I do not feel justified in spending the taxpayer's money except when absolutely necessary. For this reason, when any of my friends fail to receive an answer, please do not consider it a reflection, but a part of an economic policy for the state.

Against Gas Tax

Last week Governor Allred spoke before the legislature and advocated legislation regarding our tax system. He advised the legislature how to raise sufficient amount of money to defray the government's expenses. Among other measures that he advocated was corporation franchise tax, an extra tax on sulphur and oil, and a heavy tax on natural gas. I fully agree with the governor regarding the corporation franchise tax and the tax on sulphur, but I did not agree with him that oil and natural gas should be taxed. This extra burden would have to be borne by the people of both of my counties, and knowing their present conditions, I realize that such a tax would destroy these two industries in our communities.

He also advocated an income tax. I have already signed a bill with Mr. Bradbury, of Abilene, dealing with this subject. This bill, H. B. No. 703, is, I think, one of the fairest tax bills that could be introduced for the reason that this tax will not hurt any small man. A corporation or an individual making a big profit ought to be willing to pay a tax for the upkeep of this government. On the other hand, if they make nothing, they pay nothing. The chambers of commerce of this state are fighting this income tax bill for selfish reasons, and because, in my opinion, they are the tools of public utilities and other big corporations. I have made it my policy, since

I have been in your service, to find out how the chambers of commerce stand on any question, and whatever they are for, I am against, and what they are against, I am for. Last night a representative of the chamber of commerce and utility lawyers appeared before the committee and constitutional amendments and requested the committee to submit the question of a sales tax. The committee, in its wisdom, has turned down their requests by a vote of 13 to 2. I want to say "amen" to the committee for its courage.

Among those appearing before the committee was Mr. Swenson, manager of the Swenson ranch, a corporation owning 250,000 acres of land besides cattle, sheep, goats. His reason for advocating a sales tax is because he wants to take the load off his back and place it on the poor man, the man who wears overalls and blue shirts and makes his living by the sweat of his brow.

Picture Long as Threat to U. S. Stability

Leaders Decide to Get Huey's Hide; Tribute to O. W. Holmes

By EARL GODWIN

WASHINGTON.—A large share of the administration's supporters now realize that something definite must be done about Huey Long, fantastic Louisiana senator, who has thrown more monkey wrenches into the New Deal and its Americanizing processes than any one man, with possibly the exception of his ally of the air, the radio priest, Rev. Charles E. Coughlin. For a long time it was the fashion here to ignore Long; but suddenly it became the open topic of the day in Washington. The situation was broken wide open by the merciless attack on the Long-Coughlin propaganda by the virile and vitriolic Gen. Hugh Johnson, former NRA chief, who took to the air to lash the pair with bitter truth and bring the whole political mess into the open. General Johnson administered to Senator Long a licking which left Huey whining.

Huey Long, dictator of Louisiana, wielding a bludgeon over that state from his chair in the senate, is the closest thing we have to Herr Hitler of Germany. There's no use in mincing words any longer. Senator Joseph Robinson of Arkansas, when he referred to Long as a "madman," voiced the thought of thousands who know the truth. Long has the madness which has led scores of ruthless egotists to bloody thrones of tyranny. He is following the path of Peter the Hermit, of Napoleon, the Mad Mullah, Sitting Bull, Lenin, Trotsky. He goes about Washington with an armed guard of three men.

Those who have the good of the republic at heart, and who are at posts of grave responsibility here, recognize in Huey Long a serious threat to the stability of the republic. He exercises a demagogue appeal to those forces of discontent which, like the mobs of Moscow, would like to overturn this government. They would bring about a reign of terror. In his efforts to undermine the Roosevelt administration he is going much further than a mere political attack; he is arousing blind, passionate and murderous forces which could under certain circumstances seize the country, wreck its freedom, divide it up like so many pirate chief-tains and then see the whole nation sink beneath the waves of ruin.

Nothing much has been said about it, but there's one little item in the Long bag of tricks which is positive proof of the man's innate anti-Americanism. That is his sneering attack on the most gloriously American thing that Roosevelt has done; namely, the great concentration of American youth under the American flag in the C. C. C. camps. To take hopeless youth from hopeless streets in the dark days of this depression, to put them at joyous work at uplifting projects; to give them money, hope and faith (as Roosevelt did) is one of the high points in our history. It makes Americans, Communists hate it; and so does Huey Long.

TO GET AFTER HUEY.

Long is now sending out an army of organizers for his Share-Our-Wealth society, extending his baleful influence wherever there is economic distress. He promises immediate wealth for everybody. His program includes \$5,000 for every family; work for all, vacations, old age pensions; and a limit on all large fortunes. Actually his economic theory is blatant bunk; but his persuasiveness attracts millions of people who cannot wait for the processes of nature; and who believe that a forceful distribution of property is the real thing. Actually his Share-Our-Wealth program would ruin the country, and distribute misery. Up to this time national leaders have refused to debate with Huey, because sincere men hate an argument with a demagogue; but the situation has changed and the best men in the country are now about to join in an effort to nail Huey's hide to the barn door. They will have trouble in so doing; because Huey is prepared for them all. It will be another "battle of the century."

Long is a smart politician. He has gained complete mastery over Louisiana politics by combining all the forces of a lower order of intelligence, whose members blindly and falsely believe that Huey is doing something big for the people. He has dictated laws to the state legislature which that befuddled body has passed like so many shingles out of a mill. He has accomplished this partly by force of arms, as he calls out the state militia to stand guard to see that no one disobeys his autocratic will.

His laws have removed ordinary justice from Louisiana. It is quite easy for an opponent of the Long regime to be railroaded to jail without a chance. There isn't anything quite like it on this side of the water; and the only parallel I can think of is the medieval cruelties of the Borgias and the current methods of Herr Hitler. When it comes to sharing the wealth of Louisiana, it is obvious that the wealth is being handed over to the Long machine, as under his handling the state budget

rose from \$25,000,000 a year to double that amount while the state indebtedness is now \$145,000,000, the third highest burden in the country—and Louisiana is not a large state.

TRIES SENATE'S PATIENCE.

Long has stopped business in the senate for days while he sneered and defied this administration with charges yet to be proved. The patience of the senate is one of its remarkable qualities; but it gave out finally and Long heard what they thought of him, which would stop an ordinary man. And then Long showed himself in the yellow light which will be his undoing. After Senator Robinson of Arkansas had called him a madman (and a lot of other names), suggesting it was time the manhood of the senate aroused itself, Long made a whining answer in which he appeared to think he was a much abused hero.

He claimed that he never hit a man when he was down.

Politically there is considerable maneuvering to be done on account of Huey Long. The New Deal realizes that he is a threat, particularly in the South where the Long machine is now spreading out over the states of Mississippi and Arkansas and other communities. Long says he can bring about the defeat of Senator Robinson of Arkansas. He will also spread his poison in Mississippi against Senator Harrison. He may fill several seats in the house with his sort. Long will be nominated for the senate again in January, the month of the primaries in his state; and he will be re-elected. I think that he has an eye on the White House for 1941.

Long now typifies the most dangerous and numerous radical element that can be mustered at the polls. If the reactionaries of the Old Guard are strong enough to give Roosevelt a tussle next year and the radicals under Long are strong enough to attract a large number of votes from the Roosevelt ticket, there will be a dangerously close race. It would seem to be the American thing to do for all hands to combine in a United States party behind Roosevelt and against Long.

GREAT MAN GONE.

The world lost one of its greatest men when Mr. Justice Oliver Wendell Holmes died the other day in Washington, within five days of his ninety-fourth birthday. He was, indeed, "the grand old man of American jurisprudence," and while he was known largely as a "dissenter" from the views of a majority of the Supreme court which he graced with his presence, he was a tremendous force in expanding the common view of the law, and making the law fit social conditions. He took the chains from legality.

When he died all Washington mourned; and I think that the thing the President said about this great jurist, should be repeated here:

"... he had a powerful and beneficent influence upon the nation. Imbued with a high sense of justice and right, he believed in the peaceful evolution of the new from the old. He had a fine perspective of history as a continuous living thing, and with courage and logic believed in the shaping of government to changing conditions."

Now and then a man with this fine type of liberal expanding mind is placed where he can give the product of his thought to a nation. Judge Holmes reminds me of the lawgivers of old; wise, kindly souls who could see far beyond the letter of the law into the future and guide whole nations in the right way.

He had been a Civil war soldier in the Union army and was wounded three times in serious engagements. The war lived vividly in his mind; and once he said:

"When the ghosts of dead fighters play in my mind, the laws are silent."

He was a great hand at making aphorisms and many of his legal decisions are classics of English, for he used as little legal verbiage as he could. For instance in one of the weightiest decisions he used this phrase:

"A dog will fight for his bone."

Here's another:

"There is in all men a demand for the superlative, so much so that the poor devil who has no other way of reaching it attains it by getting drunk."

TELEPHONE PROBE.

The New Deal is about to investigate the telephone business of the entire country, from the gigantic Bell Telephone system all the way down to the farmers' line. This is going to cost the taxpayers at least three quarters of a million dollars, which has been appropriated by congress, and the newly organized federal communications commission has been entrusted with the investigation which will probably last for many months.

For a long time the Bell system has been fighting off the inevitable day when Uncle Sam is going to step into the telephone offices and find out all about the business; find out a whole lot more than state utility commissions have been able to learn, and to arrange for a tighter federal control of the business of interstate communications.

Congress wants to know particularly "the reasons generally for the failure to reduce rates and charges during the years of declining prices."

I know many of the Bell Telephone officials; they are among the smartest and finest business men in America; smart enough to be called down here whenever the President needs certain business advice. They are honest gentlemen; and they are extra smart. No congressional investigators are going to be able to rush them off their feet. Let's watch this investigation with interest.

Lesson for March 24

PETER DESCRIBES THE CHRISTIAN LIFE

LESSON TEXT—1 Peter 2:8-18.
GOLDEN TEXT—But sanctify the Lord God in your hearts; and be ready always to give an answer to every man that asketh you a reason of the hope that is in you with meekness and fear. 1 Peter 3:15.
PRIMARY TOPIC—Pleasing Jesus Every Day.
JUNIOR TOPIC—Jesus' Way of Living.
INTERMEDIATE AND SENIOR TOPIC—Living Like a Christian.
YOUNG PEOPLE AND ADULT TOPIC—Practicing Our Christian Profession.

Having given instructions to citizens (2:13, 14), servants (2:18), wives (3:1-6), and husbands (3:7), Peter now sets forth the attitudes and motives which are required for the perfection of all the relations of human life.

I. Characteristics of the Christian Life (vv. 8-11).

These find expression in personal attitudes and manner of living.

1. Toward fellow believers (v. 8).

a. "All of one mind." This means unity of thought and feeling. Christians being united to the one Lord Jesus Christ, animated by the one Holy Spirit and governed by the one Book, the Holy Scriptures, will inevitably come into possession of like-mindedness.

b. "Having compassion one of another." This means more than sympathy in times of sorrow. It means the sharing of joys as well as sorrows.

c. "Love as brethren." Being of the one family, a common affection should dominate its members.

d. "Be pitiful." This means tenderheartedness, expressing itself in sympathy toward the helpless and needy.

e. "Be courteous." This means friendliness, Christian politeness.

2. Toward the world (vv. 9-11).

a. "Not rendering evil for evil." Positively expressed, this means doing good for evil. The natural man renders evil for evil. The believer has been called thus to manifest the spirit of Christ.

b. "Eschew evil and do good" (v. 11). This means to shun or turn away from evil. It means the bending away from one's course at the approach of evil and the positive doing of good.

c. "Seek peace, and ensue it." It is not enough for a believer to refrain from conflict. He must bend every energy in the direction of peace.

II. Incentives to Christian Living (vv. 12-14).

1. "The eyes of the Lord are over the righteous, and his ears are open unto their prayers" (v. 12). God not only takes account of their efforts to live righteously, but his ears are open to hear their cries for help.

2. "The face of the Lord is against them that do evil" (v. 12). God will surely visit in judgment those who depart from the way of right living.

3. God will protect and keep those who will bend their energies to the doing of good (v. 13).

4. Happiness in suffering (v. 14). This means the suffering which results from the pursuing of the ways of righteousness.

III. How the Christian Life Can Be Lived (vv. 15, 16).

It cannot be lived in the power of human strength. A divine dynamic is provided.

1. "Sanctify the Lord God in your hearts" (v. 15). The Revised Version says, "Sanctify Christ as Lord," enthroning Jesus Christ as the Lord of life.

2. Be ready to give a reason for your hope (v. 15). A Christian should have an understanding of his faith, such as to give a reason to the inquirer. The Christian's faith rests upon the highest reason.

3. Live a conscientious life (v. 16). One's life should be so lived that the consciousness that actions are consistent before God and man is possible. Such a life will put to shame evil men who falsely accuse and spitefully use the believer.

IV. The Issue of the Christian Life (vv. 17, 18).

Christ said to the disciples that they would receive the same treatment that the world accorded him. Paul says, "All that will live godly in Christ Jesus shall suffer persecution" (II Tim. 3:12). If God wills that we suffer for well doing, let us rejoice, looking to Christ as our supreme example.

Greatness and Humility

I believe that the first test of a truly great man is his humility. I do not mean by humility doubt of his own power, hesitation of speaking his opinions, but a right understanding of the relation of what he can do and say to the rest of the world's doings and sayings.—Charles Spurgeon.

Helps to Better Faith

Every noble act of devotion to truth, every pure life unstained with evil, every word of pity, every instance of forgiving goodness, helps us to a better faith in that divine and eternal goodness which has no variableness or shadow of turning.—Dr. J. F. Clarke.

Try It Yourself

Whatever may be said of the philosophy of Coleridge, his proof of the truth of Christianity was most simple and conclusive. It consisted in the words, "Try it for yourself."

Extreme Chic in This Frock

PATTERN 9986

9986

If you've been following the latest trend in style news, you know that the classic shirtwaist frock is still one of Fashion's pets. And here's a delightful version of it. The sleeves and shoulders are cut in to give a nice smooth line, and make them easy as a, b, c to fit. The bodice with a trim slot-pleat at the back to match the chic of its buttoned front closing is smartly gathered to the yoke—the long skirt seams end in jaunty inverted pleats—and the patch pockets follow the latest mode by being rounded instead of square. Make it of a rough crepe and put an impudent little contrasting bow at the throat for added chic!

Pattern 9986 may be ordered only in sizes 14, 16, 18, 20, 22, 24, 26, 28 and 30. Size 16 requires 3 3/4 yards 39 inch fabric.

Complete, diagrammed sew chart included.

Send FIFTEEN CENTS in coins or stamps (coins preferred) for pattern. Be sure to write plainly your NAME, ADDRESS, the STYLE NUMBER and SIZE of each pattern.

Send your order to Sewing Circle Pattern department, 232 West Eighteenth street, New York.

SOMETHING NEW

Tired Business Man—Take dancing lessons? Well, I guess not! There are too many other ways by which I can make a fool of myself. His Loving Wife—Yes, darling, but you've tried all of those.

Ought to Be Good

Blinks—I'd like to listen in on the little confab those two dames are having.
Jinks—Why?
Blinks—They are Jones' first wife and his present one exchanging views on life with him.

Budget Chat

"Won't it be wonderful when we get out of debt?"
"Yes, dear. Then I can credit again."

Noisy Enough

"Is your friend a musician, too?"
"Well, he blows his own trumpet."
—Tit-Bits Magazine.

HARD FOR LIP READERS

Deaf students of a Madison avenue school of lip reading are told at the start to watch not only the lips but the tongue, throat muscles and the expression of the entire face. There are many problems. Thirteen words look, on the lips, like "bad" ("man," "mad," "hand," etc.); twelve look exactly like "fade" ("vein," "feigned," etc.); "juice," "chews," and "shoes" look alike, and so do "honor" and "otter" (although you can be fairly sure that it's "honor").

We were interested to learn that the word "king" is the hardest word to lip-read in the English language: the "k" and the "ng" are deep in the throat, and the short "i" hardly moves the lips at all. Men's lips are harder to read than women's, because men's lips are less flexible.—The New Yorker.

Coin Squeezers

Too many of us so live as the poor farmer who, as the story goes, dying on a hospital bed, refused to open his right hand for the oil of extreme unction for the hand clutching a few dirty coins and the dying man was unable to realize that very soon neither his hand nor he himself would be his own any more.—Exchange.

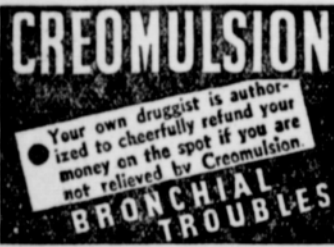

FERRY'S SEED
you grow ONLY what you plant

ALL the sunshine, good soil, fertilizer and cultivation in the world won't help poor seeds produce big, tender, flavorful vegetables. The quality must be in the seed. And that quality must be inherited from generations of parent plants and seeds of the same quality. Ferry's Vegetable Seeds are purebred. They reproduce what their parents and great great grandparents so lavishly bequeathed them.

YOUR NEIGHBORHOOD STORE SELLS THEM IN FRESH DATED PACKETS. FOR ONLY **5¢**

Spend Wisely

Says Cardui Soon Helped
"My mother was such a believer in Cardui that she gave it to me," writes Mrs. Sam Ferrara, of Hammond, La. "I was suffering with my back and side. I would get so dizzy I could hardly stand and then have a weak feeling in my back. This made me very nervous and I did not rest well at night. I felt better after my first bottle of Cardui. I took two bottles and felt a great deal better. It certainly is a fine medicine."
Successfully used over fifty years. Thousands of women testify Cardui benefited them. If it does not benefit YOU, consult a physician.

Look at your Skin
Is it Pimply, Blotchy, Red and Rough?

A Body Builder

Mrs. O. W. Semora of 1101 Geyer St., Little Rock, Ark., said: "My husband (picture left) was in a rundown condition; he lost weight, never cared to eat and complained of indigestion and constipation. He used Dr. Piro's Golden Medical Discovery and regained his normal weight, his appetite improved and he did not complain of his stomach any more."
New size, tablets 50 cts., liquid \$1.00.

Chic Leather Fashions for Spring

By **CHERIE NICHOLAS**

A LONG comes leather to add to the new spring mode. And such leathers—most beautiful and rich, exquisitely colored, dainty and supple suedes, kidskins and calfskins designed with arresting dressmaker details that bring them smartly into the current high-style parade.

Only seeing is believing as to the perfectly marvelous things being accomplished via leather artistry in the realm of costume design this spring. Which reminds us to say to those who have hitherto held to the idea that garments fashioned of leather belong solely to the sports wardrobe, the time has come to change your way of thinking.

Out Hollywood way where the newest, smartest fashions go on parade in advance of the rest of the world, leather for dress occasions has been accepted with genuine enthusiasm. A movie star of distinction wears a lovely evening gown of shell pink suede. At a smart gathering, an evening dress jacket was noted styled of white suede with a white galyak collar.

A leading designer in the French capital has created a charming evening coat, three-quarter length, of soft, supple brown leather embellished with intricate cutwork design, posed over brown lacquered satin. From Paris also comes the message that the haute couture is creating fetching little daytime dresses suitable for town activities. These attach chamois jumpers in smart new colors to wool skirts. Wide leather belts with bizarre metal fastenings complete the costume.

By the way, if you want your costume to carry a sure-fire style message wear chamois accessories. Swank gilets,

boleros, lapels on spring coats and suits are made of chamois. Other jaunty items include handstitched chamois scarfs, belts, berets, slip-on gloves and roomy bags with contrast stitching.

You can see from the illustration that the new leather jackets are—well, they are just too good looking for words, that's what they are. For early spring these costumes which top a checked wool skirt with a gay colored suede jacket are not only ideal to wear but they have that out-of-the-ordinary look and being "different" they offer a welcome diversion from the regulation cloth tailleur. What's more, they are as outstandingly modish for town and travel as they are practical for country and sports wear.

The gay colors of the new suede jackets delight the eye. The simple model on the standing figure is in a mosaic rust shade. Its sash-belt and turn over collar are chic features.

The modish sportswoman seated in the foreground is wearing one of the very new jackets that are styled with knit sleeves and collar. You can have it in any smart colors such as Robin-hood red, rust, green or in the much-talked-of amber. Of course the checked woolen skirt must carry corresponding colors. A Tyrolean suede hat, pig-skin gloves and calf oxfords complete this smart outfit.

The wonderfully attractive jacket on the figure seated to the right is most happily tuned to a colorful spring. It goes in for zigzag red, white and blue stitching, which is a chic move on its part, since the emphasis this season is so decidedly on fancy and lavish stitching.

© Western Newspaper Union.

IRISH LINEN

By **CHERIE NICHOLAS**

Here's how Irish linen goes cruising—smartly fashioned into a two-piece with pockets and pearl buttons and a belt of good plain rope which gives it a novel and nautical touch. This model is becoming to almost every one, with its round Peter Pan collar, four buttoned down pockets and a slim slenderizing skirt. A two-piece dress in white Irish linen such as this will fill many a gap in cruise wardrobes now and later on it will prove an ideal summer costume.

Brown With Beige

Brown and beige are a favorite color combination of the Princesse Amedee de Broglie. She wears a wool ensemble woven in a novelty weave combining those two colors, collared and cuffed in brown astrakhan. It is finished with a belt of brown leather.

SEPARATE SKIRTS FOR SPRING WEAR

Since separate skirts are so necessary a part of the spring wardrobe and since tweed ones are highly approved, it would seem an economy measure to start with a tweed suit. Jackets are no longer wedded to one skirt, and skirts may step out with any number of jackets, blouses and sweaters, so there is no end to the possibilities.

Outside of the practical feature of skirt and jacket going its own way, there is the practical detail of the cape being detachable, and therefore ready for a career of its own. The objection to a caped jacket on the score that one might tire of the cape is also overcome.

Slipper of Glass Steps From Cinderella's Land

Cinderella's glass slipper has stepped from fairy tale lore into the modern everyday world.

This is the way it's made: Bits of shimmering glass cut to reflect the light are strung along transparent mica straps across the top of the foot while the tip of the toes and the instep are left bare. More strips of glittering glass gird the heel attached to a pale pink kid ankle strap and a tall pink kid heel spike. So, except for the heel and ankle strap, it gives the effect of a foot held by a few twinkling glass bands.

Gray Is Very Smart Color for In-Between Seasons

Gray is just about the smartest in-between season color, fresh and flattering. Shirring and tucking, quilting and smocking are smart manipulations for the gray crepe frock. Peritan collars of immaculate white pique trim charmingly childish frocks of gray metallasse.

Often grayed blue or cherry red provides a piquant accent for these new silvery grays. A high style collar for midseason shoes of kidskin, gray appears in a rather dark cast.

Year's Discoveries Add Laurels to Explorers

A hitherto unknown, inactive volcanic crater, partly eroded, but with an original circumference estimated at 30 miles, was discovered in July, 1934, by Father Bernard R. Hubbard, near the tip of the Alaska peninsula. Father Hubbard's party, which carried on its work in co-operation with the National Geographic society, also scaled for the first time the Aghileen pinnacles, lofty peaks near the crater.

Dr. Sven Hedin, Swedish explorer, found, in a desert region of Chinese Turkestan, traces of the lost city of Edsina.

A fresh-water lake, two miles long by one mile wide, heretofore known only to Indians, was discovered in Costa Rica in September. It was first located from an airplane. The lake is near the Nicaraguan border.

The Greenland ice cap was crossed by dog sledge, from Disco bay on the west coast to Scoresby sound, by a British expedition led by Martin Lindsay, after which the party pushed southward parallel with the coast for nearly 400 miles, traversing previously unexplored territory, between Scoresby sound and Angmagssalik.

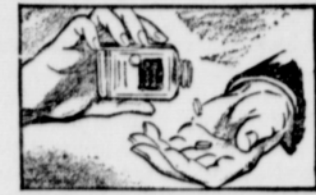

Big Figures for Relief

"What comes after a billion?" asked the girl who was copying statistics.

"Everybody," answered Senator Sorghum.

Scientists Find Fast Way to Relieve a Cold

Ache and Discomfort Eased Almost Instantly Now

1. Take 2 BAYER Aspirin Tablets. Make sure you get the BAYER Tablets you ask for.

2. Drink a full glass of water. Repeat treatment in 2 hours.

3. If throat is sore, crush and stir 3 BAYER Aspirin Tablets in a third of a glass of water. Gargle twice. This eases throat soreness almost instantly.

NOTE "DIRECTIONS PICTURES"

The simple method pictured here is the way many doctors now treat colds and the aches and pains colds bring with them!

It is recognized as a safe, sure, QUICK way. For it will relieve an ordinary cold almost as fast as you caught it.

Ask your doctor about this. And when you buy, be sure that you get the real BAYER Aspirin Tablets. They dissolve (disintegrate) almost instantly. And thus work almost instantly when you take them. And for a gargle, Genuine Bayer Aspirin Tablets disintegrate with speed and completeness, leaving no irritating particles or grittiness.

BAYER Aspirin prices have been decisively reduced on all sizes, so there's no point now in accepting other than the real Bayer article you want.

NOW 15¢

PRICES on Genuine Bayer Aspirin Radically Reduced on All Sizes

Repeal Submission
There is now pending House Joint Resolution No. 1 which calls for the repeal of the Dean Law to be submitted to the people of the state. The question is now before the members of the house as to whether the state of Texas should have a complete monopoly on the liquor business or license dealers to sell it. I doubt if any man in the house knows what is best, but I do think this must be submitted to the people, as the democratic platform asks that this question be submitted to popular vote.

Another subject of importance, in my mind, is in regard to the public utilities. I have already introduced and passed through the house, what is known as the Lotief House Bill, No. 46, a strictly anti-monopoly bill dealing with the utilities question, which is now before the senate. Everyone interested in the welfare of our state should write to their senator and urge the passage of this bill. It will solve the utility question, and open up direct and free competition.

Gas Rates
The public utilities of this state have been making money by the millions while the average citizen has been facing starvation and the government has been compelled to feed thousands. Everything has come down in price except the public utilities, and in some instances, the price of this commodity has risen so that the poor consumers have been unable to pay their gas bills and have been forced to do without gas. The towns of Hamlin, Anson, Stamford, Haskell, Rule, and all that section of the state, are now paying as high as \$1.50 per 1000 cubic feet for gas, when, as a matter of fact, the gas companies are buying their gas all over Texas as low as 1 cent per thousand cubic feet and rarely ever for more than 5 cents. With such conditions, I think the government must get in between the consumer and the utility companies, and put a stop to such highway robbery. This utility crowd is placing the value of their property for rate-making purposes at such a high figure in order to yield them 10 percent as a profit, but when rendering it for taxation, they place it at a low figure. The only way to remedy this situation is to place them under intangible assets. I have already joined with Mr. Tennyson of Wichita Falls in signing a bill placing them under such a law. This is in line with Governor Allred's recommendation. If the state had been able to collect fair and just taxes from the big corporations and utilities, it certainly would

**FEEL TIRED, ACHY,
"ALL WORN OUT?"**
Get Rid of Poisons That
Make You Ill

IS a constant backache keeping you miserable? Do you suffer burning, scanty or too frequent urination; attacks of dizziness, rheumatic pains, swollen feet and ankles? Do you feel tired, nervous—all unstrung?

Then give some thought to your kidneys. Be sure they function properly, for functional kidney disorder permits poisons to stay in the blood and upset the whole system.

Use Doan's Pills. Doan's are for the kidneys only. They help the kidneys cleanse the blood of health-destroying poisonous waste. Doan's Pills are used and recommended the world over. Get them from any druggist.

DOAN'S PILLS

STRAYED—Bay mare branded figure "2" on left shoulder. Notify Harvey Kendrick.

**"I HAVEN'T HAD
A COLD IN
FIVE YEARS"**

"In the old days I used to dread the coming of Winter. I was always fighting colds—feeling about half alive—trying to work with my body aching and every nerve on edge.
"Then a friend told me about McCoy's Cod Liver Oil Tablets with their marvelous vitamins A and D. I started to take them five years ago and I haven't had a cold since that time.
"McCoy's tablets put new life in folks; build up resistance so anyone can laugh at cold germs. They make weak, skinny people strong, steady-nerved and vigorous. They're wonderful!"
Get the genuine McCoy's Cod Liver Oil Tablets from your druggist today. Don't waste money on imitations. Ask for McCoy's.

PEACHES

Peach Salads

GINGER PEACH SALAD:
Drain the peach halves from half a No. 2 1/2 can and lay in lettuce leaves on salad plates. Mash one cream cheese, add two tablespoons mayonnaise, and cream together. Crumble three gingersnaps and mix in carefully. Pile this mixture on top of the peaches, and chill. Garnish with the rest of three-fourths cup mayonnaise. Serves four.

Peach and Cottage Cheese Salad: Have everything very cold. Drain four peach halves (half a No. 2 can), and place, cut side up, in lettuce leaves. Pile one-half cup cottage cheese on top, put a dab of English Chutney (you will need two tablespoons of it) on top of each, and garnish with four tablespoons mayonnaise. Serves four.

These Are Decorative
Jack-O-Lantern Salad: Chill twelve small-sized canned peach halves, drain and slightly scoop out cavities to make holes larger. Mix one-half cup halved, seeded white grapes and one-half cup chopped salted almonds with enough mayonnaise to moisten. Stuff cavities with this and then press the two halves together. Place each stuffed peach in a wreath of shredded lettuce. Make a Jack-o-lantern face on each with bits and strips of date. Make six salads.

Five Fruit Salad: Drain a No. 2 can peach halves, a No. 2 can grapefruit and a 10-ounce can figs, and chill. Remove all the skin and fibre from two oranges, and cut in thin circles or in sections. Cut two bananas in fingers. Place a peach half in the center of a bed of lettuce and fill the cavity with cream mayonnaise to which has been added bits of preserved ginger and chopped salted almonds. Arrange the other fruits in groups around the peach. Serves eight.

have been in good financial condition, now.

Governor Allred, in his message, assured the legislature that the pipe line companies of this state have made a clear profit of 78 million dollars. Just think of this tremendous amount of money made in the lean year of 1934! When the governor spoke of this profit by the pipe line companies, I hollered "Lord help us."

Centennial
There is a large delegation from Dallas and other cities, headed by former lieutenant-governor, Edgar Witt, of Waco, and Bill Kitrell, formerly of Cisco, who are lobbying for a 3-million dollar appropriation for the Texas Centennial. They claim that the people of Texas will make more than that from the tourists of other states who will attend the Centennial. I do not know if I will feel justified in voting for a 3 million dollar appropriation when we have hungry people to feed. If the people of Dallas want to have a big picnic, let them pay for it, instead of the taxpayers of the state. This will be their party, not ours.

In conclusion, I want to urge the people at home to please write me their views on any pending legislation, and if I am too busy to answer, it will mean that I am trying to serve

**HER BOY HAD ALWAYS
BEEN WEAK AND PUNY**

"My four year old boy had been weak and puny since birth, and had constipation and indigestion. Nothing did him any good until we tried Milk's Emulsion. Since using it, he can't get enough to eat and has outgrown his childhood trouble. He plays out with the children now, and he was never able to do that before."
—Wm. Heart, 424 Bundy Ave., New Castle, Ind.

Weak, ailing children usually start eating and getting stronger from the very first bottle of Milk's Emulsion.

Milk's Emulsion restores healthy, natural bowel action. Milk's Emulsion is strongly recommended to those whom sickness has weakened.

This is the only solid emulsion made, and so palatable that it is eaten with a spoon like ice cream.

You are urged to try Milk's Emulsion. Take six bottles hope with you, use it according to directions and if not satisfied with the results, your money will be promptly refunded. Price 80c and \$1.20 per bottle. The Milk's Emulsion Co., Terre Haute, Ind. Sold by druggists everywhere.

**Why I bought a
MODERN GAS RANGE**

Ray Motor Co.
Chevrolet Sales and Service
BAIRD, TEXAS—PHONE 33

1. "I must have attractive things in my kitchen and I found a surprising beauty of design and color in the modern 1935 Gas Ranges."

2. "We've learned our lesson on economy . . . and so . . . to us . . . it is important that I cook with natural gas for about one-third of a cent, per person, per meal."

3. "So many times I am obliged to get a hot meal . . . breakfast, for instance . . . in a hurry. I can cook faster on the new 1935 gas ranges."

4. "The insulation on the new gas ranges appeals to me a lot. It keeps the heat in the oven and out of the kitchen . . . saves gas, too."

5. "And then, there are so many automatic features in the new 1935 gas ranges such as automatic oven heat control and self-lighting which save me time."

6. "The easy terms helped me to buy one . . . I was given a liberal trade-in allowance on my old range and am paying for my new one a little bit each month . . . so little I hardly miss it."
