Lady, you'll just love flameless electric cooking ...it costs so little a meal

When you cook the modern electric way you cook for pennies. It costs an average of only about 3c a meal. Surface units on an electric range use heat thriftily, cooking by direct contact with utensil bottoms. The electric oven, insulated all around including the bottom. keeps heat inside where it

belongs. And once the oven eaches the baking temperature you select, it uses electricity only about one-fourth of the cooking time. The low cost of cooking delicious, wholesome meals for your family is another of the many isons why you'll just love flameless electric cooking.
