An expanded program supporting community effort for development and growth

Although electric service is our business, one of Texas Electric Service Company's basic commitments is to support in every way possible the community development projects spearheaded by the leadership of the cities and towns we serve.

PEP - Program for Economic Progress - is a new program of our company, planned to broaden and strengthen our support to the communities we serve by providing to local groups such additional tools and assistance as community development clinics, industrial team training and accelerated economic research to identify potential development opportunities.

Texas Electric Service Company has engaged in area development activities for many years. We have industrial development specialists who work full time at the task. These men prepare community surveys, assist in resource studies and visit with

industry leaders throughout the country, providing site selection information about the communities we serve. We will continue to work closely with local development groups so that all efforts are unified and are as effective as possible.

We are aware of the fact that Texas Electric Service Company will grow and progress as the communities we serve grow and progress. Our intention is to be a full partner in continuing efforts to promote the development of this area, and to help make the communities we serve better places in which to live and work.

In our Program for Economic Progress, as in providing electric service, we are committed to serving the needs of people.

Long Distance Users Will Dial Direct From Coast to Coast

One of the most important achievements of modern telephone science will be brought to Iowa Park in late 1968, when Direct Distance Dialing ("DDD") will

become available to telephone users here. DDD will enable you to dial your Long Distance calls direct, without calling the operator, as easily as you dial local calls.

Fast, Convenient, Easy

Direct Distance Dialing is the fast, convenient, and easy way to call Long Distance.

Just a few quick spins of the telephone dial and you can reach virtually any telephone you want throughout the United States and Canada.

You need not call the Long Distance Operator because you dial out-of-town numbers yourself, direct from your own telephone.

You will be able to lift your receiver and dial telephone numbers in Fort Worth, Dallas, Houston, San Antonio, Abilene, Amarillo, El Paso, and most other cities throughout Texas.

Dial Across the Nation

Nationwide, you will be able to dial direct to Oklahoma City, Kansas City, Denver, St. Louis, Washington, New York, Chicago, Los Angeles and thousands of other cities from coast to coast.

Bringing DDD to Iowa Park is a big, complex job, requiring many months of work and planning. We will keep you informed as the work progresses.

WE ARE GLAD to bring DDD to Iowa Park. It is an important step in our continuing program to provide you with the finest, most efficient and up-to-date telephone service to be found anywhere.
