Its new look is just one nice thing about the '67 Chevy pickup

THERE ARE LOTS OF OTHERS.

For instance, new durability: New sheet metal construction discourages rust. Eliminates exposed joints on cargo box and tailgate. Provides self-washing wheelhousings with special splash shields. Inner cab is specially treated against rust.

Also, added comfort, safety and convenience: Improved visibility all around. Dual master cylinder brake system. Telescoping lower steering shaft. Energy-absorbing instrument panel. Interior color-keyed to go with exterior paint. One-hand tailgate latch.

And extra strength: Full-depth double-wall side panels (Fleetside models). Double-wall steel in cab roof and other important areas.

Plus famous Chevrolet truck features: Independent Front Suspension that gives a smooth ride-like a car. The most popular truck 6's and V8's. (And there are lots more, as your Chevrolet dealer will show you.)

Mr. Bell liked to make things better...

After Alexander Graham Bell invented the telephone in 1876, he did not rest on his laurels. He helped form the National Geographic Society, developed the basic method of making phonograph records on wax discs and pioneered a method of locating icebergs by detecting echoes from them. He made suggestions and contributions that helped give us air conditioning and the iron lung. For 46 years after inventing the telephone, he lived a vigorous and creative life.

Southwestern Bell likes to make things better, too . . . Six short years ago, we did not offer the Princess telephone, Home Interphone, Wide Area Telephone Service, Centrex service, Data-Phone data communications service or Panel Phone. There was no electronic artificial larynx, no automatic dialer and no Speakerphone. Today, these new items help us provide the best telephone service in the world. But we want to make it better. That's our legacy from Mr. Bell.
