Electric Gooking is GLEAN

An electric range cooks with concentrated, sealed-in-metal heat-the same spotless heat you use to iron clothes. This means that your cooking utensils will stay bright and shiny. Cleanup time is reduced to a minimum.

When you use an electric oven there is no need for a draft of air into and out of the oven. A minimum of cooking vapors is carried into the kitchen. So you can expect your kitchen curtains and walls to stay fresh and new-looking with a minimum of cleaning and care.

Electric cooking is also cool, fast, accurate and economical. Select your new electric range now and enjoy all these benefits . at an average cost of only about 3c a meal for electricity.
