"That is the situation in my state. The farmers and stock men, large and small, are unusually prosperous. This season's wheat crop for the state is conservatively estimated at \$5,000,000 bushels and corn is equally abundant. In no district in the state is there dissatisfaction save among the chronic kickers, known in a business way as 'agitators' who will stir up strife forever. County elections have shown wonderful Republican gains and we are confident that Kansas will return to the Republican ranks in this fall's presidential vote. It is magnificent to see the young girl face the future so fearlessly, but it is not life. No young woman is ready for married life unless her physical condition is up to the standard of the ard of marriage, in the health of all the delicate womanly organs, and rarely is that the case.

Young women entering upon the state of marriage will find no friend so helpful as Dr. Pierce's Favorite Prescription. THE RESULT IN OREGON.

O REGON has spoken in no uncertain voice upon the

The second state of the Pacific coast in point of numbers and of influence has ranged herself on the side of Prosperity and Expansion and can no longer be considered as a doubtful state in the coming election.

The four votes of Oregon may be counted on as sure for the party that is in favor of running American home affairs in such a way as to keep the American producer at work at profitable wages, and our foreign affairs in a way to provide for our increasing influence and prestige abroad and an increasing market for our mines, our farms and

A PRE-EMINENT RESORT.

E ACH day of the passing season emphasizes the preeminence of Colorado Springs as a summer tourist

drawn hither by reasons of business as well as of pleasure events. and yet there is in the throngs now upon the streets a noticeable number of the class who used to make up our crowds almost entirely, the people who have put aside for intent upon enjoyment to the full of clear, pure air and bright sunshine and the wondrous panorama of the

In a certain way the mountains never lose their charm and their capacity for entertainment and delight are never exhausted, but we never see them again exactly as they appeared to us when for the first time their circle lay before us like an unopened book filled to overflowing with unrealized pleasures. And so it is that with feelings almost of envy the older residents watch the pleasure seekers who throng the street corners and crowd the cars that are on their way towards the canons or Manitou.

In spite of all its business enterprises and engagements Colorado Springs easily maintains its position as the foremost western resort. It does so by the pre-eminence of its natural attractions and by the care that has been taken in the past to make it a city sought after by pleasureseekers and widely known in tourist circles.

How much more might be done by proper effort in this line it is difficult to estimate. Certainly it is a great deal.

People are slow to realize even after years of experience that we have in our climate, our surroundings, and in our opportunities as a summer resort one of our greatest and most valuable assets. The money used in improving our accommodations, in providing entertainment for visitors, in developing our business along this line would be most profitably expended, and would bring returns far greater than those which result from many enterprises that are supposed to be on a good paying

In the increase of mining and other lines of business somewhat similar, Colorado Springs ought not to forget the opportunities she has in directions which if less sensational are none the less sure and may even be more permanent and of greater final value than those which are based on the golden veins of Cripple Creek.

EASTERN DEMOCRATS EXPECT TO LOSE.

EVER SINCE the western wing of the Democracy announced its intention of pushing the policy of Bryan and the Chicago platform to the bitter end the eastern end of the party, convinced of the uselessness of resistance, has settled down to an acceptance of defeat with as much | had them. resignation as is possible under the circumstances.

The eastern Democrats are perfectly well satisfied, of course, but they are not particularly cheerful.

Mr. Bryan will be nominated.

The Chicago platform will be endorsed.

All right. Silver will be again brought to the front.

Trusts must be denounced. All right.

Imperialism condemned.

All right. Mr. Bryan would like to have the delegates from the

eastern states instructed for him. All right.

And then the eastern Democrat, greatly relieved that no further orders are being forwarded from the west, turns again to the engrossing pursuit of money-making under the opportunities which have come to him by virtue of Republican prosperity.

"We don't want a change from present conditions"—that is what the eastern business Democrat is saying to himself—"though it would never do to say so in public, and if the nomination of Mr. Bryan will advance the Republican chances of success, we are Bryan Democrats from now unfil election time." dublican chances of success, we are Bryan Democrats from now until election time."

If Mr. Bryan ever made the remark attributed to him in the newspapers recently that he would like to have the Boers come over to the United States to take the place of some of the Republicans, it shows him to be a close student of present conditions. A few thousand new listeners who had never heard the Bryan speeches and could tot vote the Republican ticket this year would be a very welcome addition to the list of American residents, for for much semi-Republican support which they are getting.

REASONS FOR A CHANGE.

N a recent interview in Washington, Senator Shoup of Idaho set forth in a clear and conclusive manner the reasons which have influenced the people of the western nountain states to return to their allegiance to the Republican party.

It is, he says, largely because the people have never known such prosperity as they have experienced during the present administration, and they attribute it largely to Republican legislation.

"Take lead, for example," said Senator Shoup. "During the Harrison administration the price held pretty steadily between \$4.20 and \$4.30. When Cleveland was elected on a free-trade platform it dropped to \$3.80. 1894 it was \$3.20, and in 1895 it touched as low as \$2.30.

"Now take the other side," continued the senator, "and you will understand what I am driving at. When McKinley was inaugurated lead stood at \$3.12½ in Idaho and has been steadily going up since, until it now sells at \$4.70, the best price for years, and the lead miners credit tne advance to the Republican party.

"Now take sheep for another illustration. Under the Harrison administration, when our wool was protected by the McKinley tariff, Idaho sheep were worth from \$2.25 to \$2.50 per head. When Cleveland was inaugurated they commenced to go down and down, until when the Wilson tariff bill was passed they were worth \$1.27 per head.

advanced 45 cents. In 1899 they had advanced to \$2.38, and this year, according to the estimates of the agricultural department, the average value of every sheep in Idaho on January 1 last was \$2.80, as compared with \$1.27 at the time McKinley was inaugurated.

at the time McKinley was inaugurated.

"In order that you may appreciate the force of this argument, there are over 2,600,000 sheep in the state that have gained more than 200 per c\$nt in value since McKinley was elected, because of Republican tariff legislation. Can you blame the sheep farmers, who mostly voted the Democratic ticket in 1896 because they believed that the free coinage of silver would restore the value of their sheep, for wanting to keep the Republican party in power? Are they going to take any chances? Take the price of wool, for example, which sold at 13 cents a pound under the McKinley tariff law during the Harrison administration.

"While Cleveland was president it dropped to 6 cents a pound, and now there the brings, taken a pound. Cattle have advanced an average of \$10 a head since McKinley was elected, and average of \$10 a head since McKinley was elected, and which wrought ruin to thousands of which wrought ruin to thousands of horses are worth from \$5 to \$10 per head more than a year ago. Our people are not fools. They know what is good for them, and with these facts bulging out of every man's pocket do you suppose he is going to vote for the restoration of Democratic supremacy and free trade

which wrought ruin to thousands those who tried to be its friends.

It is to criticise the Republican party for the way in which they were acquired, and because they have been acquired, and for the way in which the suppression of the revolt of Aguinaldo has been carried on and for numerous other matters of detail.

But, as General Otis says, "We've got them now. What are we to do about it?"

And the Democratic party has no answer ready.

The successful trial trip of the new Russian cruiser, Variag, will again draw attention to the ability and skill of American shipbuilders. The cruiser is one of five similar ones now being built, one at Stettin, one at St. Petersburg and two at Nicholaieff. The conditions under which the Variag were built were especially strict and in accomplishing such good results the American builders feel that they have done exceptionally well and that the Variag can hardly fall to bring them additional orders from foreign powers who desire warships built of the best material and by the best workmen in the world.

If the Boers really wish to immigrate they had better ome to Colorado, of course. There is no other state that can give them half the show for a living that they can find right here, and they can try farming, cattle-raising or mining, whichever suits them best.

The Thomas Democrats do not seem to be wholly without a press in Denver. Two Denver papers are championing their cause quite as vigorously as though they were dyed-in-the-wool Democratic organs.

It is rumored that the Thomas Democrats are in favor of fusion with the Teller Silver Republicans and are willing to concede them the governor. This may account

TRIFLES

Our cars are no better—in themselves—than the cars of other lines. It is what is INSIDE them that makes them more comfortable.

For instance: The seats in our reclining-chair cars are provided with linen head pieces—clean and cool. Our dining-cars have electric fans, and are gorgeously decorated with flowers. In every car is a thermometer, which the porter constantly consults in order to keep the temperature of his car as nearly uniform as possible.

By themselves, these things are trifles, but the sum total of them goes a long way toward making a trip over the Burlington a mighty enjoyable experience.

Burlington trains leave Denver 4:00 and 10:00 p. m. for Omaha, Kansas City, St. Louis and Chicago.

A proposition has been made to the governing committee of the Colorado Springs Mining Stock association by the promoters of the new Colorado Springs Trust company that the ex-change subscribe to a large block of the capital stock of the trust company. The advantage of the exchange being a large stockholder in a trust company to which it would be able to give a great deel of business is manifest. It would mean that instead of paying out would mean that instead of paying out money to capitalists controlling other trust companies, a great deal of the funds which it has to expend in this way it would receive back again as its share of the profits of the trust company. The proposition will be acted upon at the next meeting of the governing committee, and the matter will probably stand next in importance to probably stand next in importance to the time trading in the subjects which have recently come before the commit-The exchange has a cash surplu of \$65,000 on hand and it is argued be the promoters of this proposition that most beneficial to both institutions.

dull days of warm weather.

The trading presented no especial features, outside of the stocks which have

en attracting attention for several days. The trading in Independence T. and is very lively and the stock manifested a good deal of strength on the second I as well as on the first, fluctuating in the fractions above 61 and refusing to

any lower. The stock is too good a speculation at present prices for the spec ators to refuse to take all that is offered around 60 cents, as it is very likely

would go to \$1. However, there is no telling where it would go if the suit were not settled in its favor. Another feature of the trading was the further decline in Ingham, which went to 20½ under heavy trading. National fell off to 10¼, and New Haven declined another fraction to 8½. Lexington, however, strengthened to 18, and Little Nell showed great strength in advancing to 9 cents from 8½. The work being done on that prospect is very comprehensive, and the chances for developing a mine are very favorable. The stock has advanced steadily ever since it was listed on 'change a few months ago. Fauntleroy was traded in for the first time in some weeks, and sold at 7½, and Grace strengthened to 5½. Isabella declined further to \$1.24%.

The sales for the day came to 600,700 shares exchanged, and the cash value of the day's trading was \$141,960.25.

A TIME FOR BUYING

Nearly all of the really meritorious stocks are selling below their intrinsic worth and almost the entire market is a "buy." We do not anticipate any serious decline during the summer, and believe that the investor who will purchase now and hold on to his stock will come out with splendid profits. There are a number of stocks that offer specially good investments, and upon request we will gladly give our well-considered opinion as to what stocks offer the most attractive investments at the present time.

There are several dividend-payers which we believe offer not only steady interest on the money invested, but also that offer the opportunity for splendid profits. Write us and we will give you the details concerning the dividend-payers that are most attractive.

PROSPECTIVE

There are several stocks which will, we believe, enter the dividend paying ranks before a great while. These stocks are now selling comparatively low, and we advise the immediate purchase of them both for an investment and for quick profits. We will give particulars upon request.

So many cases of consumption taking my treatment have returned to their homes, where they have been cured, or are getting well, that others are asking what my treatment is.

What It Is

It is a cure for all cases of Consumption in the first tage.

It is a cure for a larger per cent, of advanced cases Colorado Springs, June 5.—The market today on the Colorado Springs Min-Stock exchange was much lighter than it was yesterday, with prices some-at uncertain. The trading fell off in all the departments, excepting among than any other treatment yet discovered.

It is a radical cure. No one cured by it within the past 12 years has re-taken the disease.

It is a sensible treatment. Beginning its work in the Realthy portions of the lung it gradually encroaches upon not realize that there couldn't possibly be a better time to buy than during dull days of warm weather.

It is a cure for tuburcular throats when applied early. It is taken in your own home and in any climate. Consultation and examination free.

What It Is Not

It is not a cure for all cases of Consumption.
It is not a cure for cases in the advanced stages, except they be of a catarrhal type.

It is not a cure for all cases of tuburcular throats.
It is not in any way injurious. The most serious and lelicate cases are improved, and if not cured are made comfortable and their lives prolonged.

It is not an expensive treatment, but comes within the each of all.

You can't have good health and weak

You can't have good health and weak nerves at the same time. Your general health is good or bad, according to the condition of your nerves. No theory in this; it is simply founded upon the old law of cause and effect.

Nerve force gives buoyancy, vim and power to both body and brain.

Be convinced of the above facts by trying a box of Palmo Tablets. The greatest nerve remedy of the age. They cure debility.
