#### THE NEWS OF THE DAY.

INDICATIONS FOR TO-DAY .- For the West Gulf States: Local rains, followed by fair, slightly colder weather; winds becoming variable, and autionary signals continue at Indianola, Galveston, New Orleans, Mobile and Pensacola,

and are ordered for Cedar Keys. DOMESTIC.—Three men were killed by the caving in of a dugout at Stringtown, Indian Territory—Domestic jealousy caused a fatal affray between two negroes in New Orleans— An English sailor died of yellow fever at New Orleans-The question of the succession to the Vice Presidency discussed; and opinions of New York and other papers on Hendricks' death—Preparations for the funeral—The cattle convention—Matters in Washington. FOREIGN.—Riots in Londonderry.—King Theebaw reported to have fled into China... Cacerist success in Peru.—English elections ----Eight Indians, followers of Riel in the late rebellion in the Northwest Territory, were hanged at Battleford yesterday.

THE STATE .- The Longview postoffice was burglarized on Thursday night—A stranger made a criminal assault on a lady near Henderson, but she succeeded in driving him away by the vigorous use of a hammer-James Scott who killed J. T. McDonough ("Big Mack") in Dallas, was yesterday captured at El Pasodead man, believed to be a missing Fort Worth barber, was found at Galveston—The Land Board held a lively Fort

the members come prepared to execute the will of the people. So then the Sixteenth Legislature yielded to the Old Alcalde. Gov. Ireland vetoed the land bill of the Nineteenth Legislature. The land question' is under general discussion. The country is furnished a vast amount of additional light upon it. There is conclusive evidence that the State is suffering immense losses. It is fair to conclude that the members of the Legislature would come instructed upon the land question, and eager to adopt measures to protect the public interests. Granting that the executive is powerless, the State police powerless, the local authorities powerless, the Attorney General and Land Board powerless, then the only hope is in legislation. Granting that the special session would cost the people \$25,000 or \$30,000, and granting that the State treasury is short of funds, yet there is such a demand and such an opportunity for saving a vast sum that must otherwise be lost, that it may fairly be assumed that the Legislature would promptly respond to the wishes of the people. A special session or a regular session is not ordinarily desirable, but when the interest of the people in a property valued at \$50,000,000 is at stake, with no hope of protection extended by the execu-

tive and judicial branches of the government, it does appear that the country could afford the cost of legislation. It is the law as it stands that the Governor contends is ineffectual against the free graziers and cormorants. Then let him renew his recommendations to the Legislature, which were judicious, and add what late developments seem to demand is proper to be done with the lands. If the Legislature did refuse to which, on the m in the light of recent exposures, must be conceded to have been sound, it is no reason why the members fresh from the people and fully instructed should not now be prepared to come into his views. The people of Texas must certainly be willing to risk \$25,000 to save \$500,000 or \$1,000,000. It is unfortunate the Governor has so fully committed himself against the course advised by Col. Swain, Commissioner Walsh, Gen. McCulloch and Mr. Stephens, but, as in the case of fence cutting, he believes one hundred thousand men would fail to give protection, and, of course, to send out out a company or two of rangers would be farcical. The Legislature was appealed to when the Governor had been overawed by the magnitude of the fence cutting lawlessness, and yet when he had been provided with \$50,000 and authorized to use force, the employment of a few detectives and a couple of ranger companies put an end to the van dalism. It was then thought 100,000 men would be necessary to stop the fence cutters, and now 100,000 men would be required o bring fence owners and line riders to their senses. It is unfortunate that the de cision of the Governor remits the problem to future legislation, but it would be lamentable to surrender the prospect of recover ing \$1,000,000 by refusing to call an extra session at once. If there are personal griev ances between the Nineteenth Legislature and the Governor, they may be removed There might be arranged a meeting or ban uet, at which mutual explanations and apologies could be interchanged. The Governor and readers of THE NEWS are referred to the report in another column, which gives a very full synopsis of Gen. McCulloch's opinions and incidentally the views of Col. Swain, Capt. Walsh, Attorney General Templeton and Treasurer Lubbock. It is evident that the board is prepared, as a board, to assume full responsibility, though. as might not be unexpected, the venerable Treasurer favors the statu quo. This might not be unexpected when it is apparent the Freasurer discards as unofficial the testimony of Gen. McCulloch and his associates until corroborated by the unimpeachable evidence of the local Sheriff's officer. This course, generally pursued by government, would eventually leave the Treasurer with neither school money nor revenue to guard. But the rangers are not to be used. Even the Treasurer favors a special session.

upon all public bodies and private citizens throughout the State to show appropriate and sorrowful recognition of the nation's loss up to and including the day of the funeral.

#### MOURNING DECORATIONS.

WASHINGTON, Nov. 27 .- Decorators are still at work draping public buildings. The Executive Mansion will, as upon the occasion of the death of Gen. Grant, be conspicuous for tasteful draping and a large force of artists are engaged on the work. The general style of draping will be similar to that of last summer and columns on pub lic buildings that can be utilized will be bound half way up with black material An exception to this rule is made at the Executive Mansion, however, where the massive columns of the north front are be-ing entirely covered from ground to roof. The drapery at the Capitol is very exten-sive and reaches to the balcony on the dome dome.

#### WILL LEAVE MONDAY.

It has been practically decided that the President and members of his Cabinet will leave Washington some time on Monday Arrangements are not yet entirely com pleted, but are expected to be definitely con cluded to-day. In fact, Mr. Robt. A. Park Southeast passenger agent of the Pennsyl via Railroad, and Robt. Barry, general superintendent of Pullman Palace Car Com pany, are now at the White House for that purpose. The time for the departure of the congressional committees will also be de finitely determined upon during to-day. Besides congressional and presidential specials, through the courtesy of President Garrett, of the Baltimore and Ohio Rail-road Company, a special train for the benefit of Washington newspaper corre-spondents, in charge of Assistant General Passenger Agent Pangbourn, will leave Workiter and a statement of the decord Passenger Agent Pangbourn, will leave Washington for Indianapolis on Monday next. The Baltimore and Ohio Company has also prepared a special schedule for direct trains to and from Indianapolis for the benefit of Washingtonians and those in the vicinity of the capital, many of whom are desirious of attanding the funeral whom are desirious of attending the funeral

himself to regain his usual good health by the time Congress meets. The committees will attend the funeral in the capacity of mourners only. En route they will be in charge of Sergeants-at-arms Canady and Leedom, of the Senate and House, respectively, but these officials will have nothing to do with the funeral ar-rangements at Indianapolis. Rooms for the members of the Congressional commit-tees have been engaged at the Denison House. Both the Baltimore and Ohio and Pennsylvania Roads are making arrange-ments for special through trains to leave here for Indianapolis Sunday and Monday to accommodate the President and Cabinet, the Congressional committees, members of Congress, government officials and repre-sentatives of the press. THE SENATE'S PRESIDENT PRO TEM.

THE SENATE'S PRESIDENT PRO TEM. There is much speculation here about the probable choice of the Republican members in the Senate for President pro tem. of the Senate. The impression that Senator Edmunds does not desire the honor of the position is becoming more general.

Senator Allison, the Critic 'say this evening, is authority for the statement that the ing, is authority for the statement that the question of the presidency of the Senate is not likely to be finally considered till next Thursday or Friday evening, when a caucus of the Republican Senators will be held. One of the most prominent and conservative Republican Senator re-marked to-day that he had no doubt that the presidency of the Senate would go to the West by caucus nomina-tion: "Senator Edmunds can undoubtedly have the presidency of the Senate if he seeks it, but I am almost certain that he does not. Republican Senators. My judgement would be that Senator Logan will be chosen presi-dent pro tem if he desires to be." It was currently rumored that Senator Logan had opened an active canvass for the presidency of the Senate, but this was equally positively denied. One prominent Senator said: "Senators Edmunds, Logan or Sherman would not make anything like a canvass in his own favor. The Senate is a peculiar, conservative body, and its leaders are dignified and conservative men, particu-larly in matters pertaining to the Senate itself. Senator Logan will not tell his col-leagues that he desires to be elected, if such is the case, unless they ask him. Senator Sherman's friends are confident that he will be selected if he permits it to be understood

#### PRESIDENTIAL APPOINTMENTS.

The President to-night made the following appointments: Jacob Schoenhoff, of New York, to be United States Consultat Tun-stall: Frank J. act for the sale and lease of educational land have been and are now being openly and notoriously violated. There is a scope of country in the western part of the State, embracing 100,000 square miles, nearly one-half of which is educational land, that is held by a population, outside of a few small towns, of not exceeding five thousand souls; that a large majority of these occupants are there in violation of law; that a majority of the owners of the stock are not residents of the State; that the timber from these lands is being cut and sold by these usurpers in an open and law defying manner; that in this unorganized and sparsely settled country an appeal to the local civil authorities, under existing laws, is a useless waste of time and money; that the attempt to enter and settle upon these lands so illegally occupied is discouraged, both covertly and openly, to such an extent that settlement is retarded and the develop-ment of that portion of our State is checked. For these and many other reasons the board has reached the conclusion that <u>ONE OF THEREE ALTERNATIVES</u>

#### THE GOVERNOR'S REPLY.

"Gentlemen: I am to-day in receipt of a resolution passed by the board. From general information it has been apparent for some time that the act passed by the extra session in 1884, has and is being violatea, and while the act in question was not passed as an amendment to the act of 1883, under which the board is act-ing, but as a peace measure between the fence cutters and the pasture men, still it should be enforced, if it can be done. I am not prepared to assent to, or deny the asser-tion in the resolution, that a large majority of the people included within the area named outprepared to assent to, or deny the asser-tion in the resolution, that a large majority of the people included within the area named outprepared to assent to, or deny the asser-tion in the resolution, that a large majority of the people included within the area named to ation of law. I hope it will be found to be write. Nor am I prepared to assert to either the first or the last of the proposi-tions presented by the board as its conclusions. This act of the Leg-sto enforce it, either in person or by proxyl and although the agents who have been em-question and examine into the situa-tion, have done so and reported, not a ingle civil suit has been brought or prose-tation set on foct, or the other legal steps taken, except in Presidio County, by Gen, GeCulloch, of his own motion and without assistance from the Capitel. Under this condition of things I could not say to the legislature, if in session, that additional was are necessary, whatever my belief may be, because I have no evidence of a dubits would be the answer and a conchi-sive one on the part of those who have opposed other legislation than that invoked, and it is shown by results that the officers and the people in that part of the State under discussion disregard becautive can then truthfully tell the Legi-slature that additional laws are needed, and the ac present the results of the trials as of the State under discussion disregard of the State under discussion disregard of the State under discussion disregard of the ac present the results of the trials as the can present the results of the trials as was not passed as an amendment to the act of 1883, under which the board is act

THE COMPLAINT IN THE PAST was that no one in that section could or would go forward and make affidavit, and now, after having sent men to the grounds to examine and inform the Board of the facts, and after these agents, as the Board says, have re-ported what the resulution asserts, still no affidavits are made or prosecutions set on foot, because the board, as it says, does not believe that the people will enforce the law. It is not asserted in the resolution, though the implication is conveyed, that the constabulary force is to be used to cut down the fences in the first instance without any judgment of a court dictating them. I know of no authority in any case to order the Constables to do this, and if the Constables in that county or any other part of the State are asked to do it the presumption is very strong that they will refuse, and I would go forward and make affidavit, or any other part of the State are asked to do it the presumption is very strong that they will refuse, and I think they should. It is not supposed that either the Sheriffs or the Con-stables will refuse or decline to serve any lawful writ placed in their hands; but should they do so, the military force at the disposal of the Governor will be ordered to execute all writs given them. The troops in service are author ordered to execute all writs given them. The troops in service are author-ized to serve writs, make arrests, and they are instructed to render all necessary and lawful aid to enforce the law; but if there is any doubt even of the constabulary force ex-ecuting writs I will cheerfully place a company at the service of any one who wishes, or whose duty it is, to enforce the writs in the first place, and to aid in carrying into execution all judgments and decrees of the court. And of the present force is not sufficient for that purpose, the execu-tive will call into service as many able bodied men as may be necessary. I am, very respectfully, your obedient servant, JOHN IRELAND.

### Which Was Specially Vigorous and Exciting. A Hide and Leather Man Severely Sat Down On.

ST. LOUIS, Nov. 27 .- The turkey-fed cattlemen dropped into the Exposition Hall more slowly than usual this morning, and it was nearly 1 o'clock before Acting Chairman Carroll, of Texas, rapped for order. Rev. Mr. Hatch, of Utah, offered the opening prayer. The secretary read an invitation from the manager of the New Orleans World's Exposition to the delegates to visit the Exposition.

Mr. W. G. Beall, of Texas, made a brief speech, explaining the best way of going to New Orleans and extended an invitation to hold the next annual convention at Dallas. The invitations were acknowledged with a vote of thanks.

Mr. Mercer, of Wyoming, who was on the programme for an address on the "range interests," said the wind had already been taken out of his sails and he would not deliver his speech. He made a brief talk, part of which was taken up with an appeal to the members to pay the assessment levied on them by the finance committee.

### MR. LAPHAM'S REMARKS,

Mr. O. K. Lapham, representing the Tan-ners and Hide and Leather Dealers' Association, whose address was interrupted yesterday, took the platform and continued his address. He spoke of the importance of leather, and said the ruining of the leather, and said the ruining of the hides by branding was a direct loss on the cattlemen and not to the leather dealers, but proper steps should be taken to prevent the destruction of hides, as every one lost by the scarcity of good leather. He criticized the report of the committees submitted yesterday, and said nothing was said in that report in reference to branding on one side only. He thought that the committee had reached no practical conclusion, and it was of the utmost im-portance that some practical method of branding should be devised before the con-vention adjourned, and it would save enough money to pay for stamping out of all the contagious diseases. He advocated the use of

The price of Texas cattle, the hides of which are best for leather, would be increased from 5 to 10 per cent by lack of brands. The careless branders reduce the price of herds at least oper cent. He said the appeals of the tan-ners and leather dealers had been disre-garded enturely up to the present time. The interest of these men and the cattlemen are one, and the two classes should be harmonious. He said the eattlemen should listen to such appeals, and spoke of the fact that they occupied public lands, and the eves of the people were on them and would hold them accountable. He then spoke of the sentiment in favor of humanity, and said that it was possible that the public sentiment would be aroused and the im-mense herds of cattle in the West would be swept out of existence. It behooved them to conduct themselves properly and to show that they were not uncivilized and had re-gard for the feelings of humanity. They should not destroy millions of dollars worth of property. #### SEVERELY SAT DOWN ON.

At the conclusion of Mr. Lapham's paper upon branding in the Cattlemen's Convention to-day, there was a scene worthy of an artists eye. A doxen stalwart plainsmen prang to their feet and in stentorian tones claimed the floor. Finally a motion to ac cept the paper was gotten before the Con-vention; then the "cowboys" opened up on Mr. Lapham and his little paper with a flow of eloquence which astonished the representation of the "effete and Bostonian hide sentation of the "effete and Bostonian hide and leather dealers," and by the vigorous unanimity with which "Lapham's lecture to the cowboys" was tabled, the subject of branding won't come before the "boys" soon again. It thrilled the audience to hear the cowboys' manliness and courage ex-tolled; a feeling of pride in the sturdy sons of the country who had gone out on the praries to battle with nature and the ele-ments and win so grandly as the cowboy has, pervaded the hearts of the audience, and round after round of applause shook the vast hall. the vast hall.

SHERMAN, Nov. 27 .- A most shocking spectacle was brought to light this afternoon at Bells, a station on the Transcontinental Railroad fifteen miles east of Sherman. Mr. Falan, a farmer who lives about two miles from Bells, was on his way to that place, when, to his horror, his horse came very near stepping on the

He went to town and notified the local authorities, who, with a posse, went out to the scene of the horribile find, and there uncovered the body of a man apparently of medium size, which was in such a high state of decomposition that it could not be ascertained whether he was white or black. The body was turned over to Constable Wright, of Sherman, who at once telegraphed to the Justice of his ward to come at once prepared to hold an inquest. FORT WORTH, NOV. 27.-J. George Hoeltzel, manager of the White Elephant barber shop, left the city Wednesday morning un der circumstances which were a little suspicious. At the barber shop last evening nothing could be learned as to the cause of his departure or where he had gone, though it was vaguely hinted that he had gone to New Orleans. While THE NEWS correspondent was talking to a barber in the shop, the owner of the shop approached and gave the barber positive instructions to say noth-ing further about the matter. And Water Supply of Galveston-Proposition to Extend Waterworks or Provide Cisterns-Flags at Half-Mast.

Special to The News.

GALVESTON, Nov. 27.-A special meeting of the City Council was called at 11 o'clock yesterday morning for the purpose, as expressed in the call, of taking into consideration and adopting a better means of protection for the city from fire.

that the city's contract was with Mr. Skin-ner. Mr. Goldthwaite, at some length, pointed out the possibility of the legal complica-tion that might grow out of recognizing Mr. Hall's ownership. In the absence of more information, a motion to refer the matter to the City At-torney and finance committee prevailed. Under instructions from the Council to inquire into the condition of the waterworks at the time of the fire of Nov. 13, 1885, Chief Oldenburg reported that there was no pressure of any consequence upon the hydrants until about 9 a. m. At the com-mencement of the fire he coupled three hydrants in succession, but no pressure could be obtained. He telephoned the waterworks for more pressure, but with-out success. He thought the water-works boilers had not enough steaming capacity to run both pumps, as steam is kept only in one boiler, and it takes too long to raise steam in the other in case of a big fire. He advised the addition of a stand-pipe to the present system or to put in one with a capacity to run both pumps. He ip to the present system or to put in one rith a capacity to run both pumps. He recommended that water mains be extended at least to Broadway or around a south recommended that water mains be extended at least to Broadway or avenue L south, Eleventh street and Fourteenth street west, or at least, as our present system is not sufficient to supply the hydrants if extended further, to put cisterns on street or alley corners every two or three blocks, con-nected with pipes, and use steam fire en-gines instead of direct pressure, as it is more reliable.

Mr. Hadley, of New Mexico, replied in the same vein. He said it had been suggested that the cattlemen would be driven from the public grazing lands. The cattlemen are not tending to return to the habits of aborigines. They were as good as any other men in any trade and profession. They were honest, hard working men, many of them young men from the East, struggling to make livings for themselves and their families. The cattle were mostly owned in small herds. He flung back the charge, with surprise that it should be made by a respectable body of men. Mr. Wallace, of Colorado, said he was opposed to receiving the paper, as it was a libel on every cowboy in the West. He has lived in Pueblo, Trinidad and Denver for many years. #### THE PUBLIC DOMAIN.

Judge S. S. Wallace, of Colorado, pre sented a paper on the subject of leasing the public domain. He said that leasing the domain, while it would give the government a revenue, would increase the cost of beef, and hence would increase the cost of living to the poor. He said the government could not afford to disturb the occupancy of these lands, because it would entail great loss on the cattlemen. His argument was that rent would increase the expenses of cattlemen, and hence would be a hard-ship on the beef consumers, and that the cat-tlemen, being already in possession of the land, should be allowed to keep it, as it would be costly to move. More than that, the cost of fencing would be a large item. He thought that this movement was in the interest of monopolies and wealthy men. The cheap money of Europe would close the public domain to men of moderate capital. The government should not become a land-lord. Men with small herds should be al-lowed to go to the plains, take up enough living to the poor. He said the government lowed to go to the plains, take up enough land to support their herds, dig wells and prepare the land for agriculture. The plains should be kept free for all. On motion, Judge Wallace's paper was received with thanks.

With this evidence the inquest was adjourned till to-morrow morning at 10 o'clock for the purpose of making a thorough investigation into the case. While the theory of suicide is the most plausible one advanced the absence of any evidence in to the contrary, yet this theory seems to be disproved from the fact that the to be disproved from the fact that the wound was not in the least powder-burned nor ragged, necessary to indicate a close proximity of the muzzle of the weapon. Had he jabbed the muzzle of the pistol into his eye and fired, as suggested in the evi-dence, the explosion would have made a very different kind of wound from the one in the head of the deceased. It is said by experts, however, that it is only the powder in the cartridge that does not burn which leaves powder marks, by the burn which leaves powder marks, by the grain penetrating the skin. When all the powder is consumed in the explosion, as is frequently the case, no signs are left when the pistol is discharged close to the body, save the smoke marks, which are easily re moved by water.

THEEBAW IN CHINA.

LONDON, Nov. 27 .-- It is reported in Rangoon that King Theebaw hastily abandoned the capital Monday and sought refuge on the Chinese shore rather than await the arrival of the victorious British and In dian army of invasion. The Chinese government army of invasion. The Chinese government recently informed Great British opera-tions in Burmah, even if they resulted in the annexation of the country to India. It is not believed, therefore, that Theebaw will be al-lowed to remain long in Chinese territory, where he might be a menace to the per-mancy of whatever government the con-querors may set up in Burmah. It is said that he will be handed over to Earl Dufferin and be sent into exile in some remote and be sent into exile in some remote British possession. The British troops are now before Mandalay. As the guns on the steamers are hardly powerful enough to bombard the city from the river, three miles distant, the troops will probably be landed for the final attack upon the city.

#### EIGHT INDIANS EXECUTED.

They Die Game for the Frog Lake Massacre of Riel's Rebellion.

Special to The News.

BATTLEFORD, N. W. T., Nov. 27 .- The eight Indians concerned in the Frog Lake massacre, during the Riel rebellion, were hanged here at 8:15 a. m. The execution was conducted without a hitch. The hangings were conducted publicly and were witnessed by a large number of whites and a few Indians. No trouble occurred. All confessed their crimes and appeared to be indifferent as to their fate. A few Indians from each reservation were called to see the execution of their countrymen, so that by seeing it they might be convinced that the condemned were actually hanged. The eight prisoners were placed on the trap and chanted the death song of their tribes. There was no bungling and no unsightly scenes. The Indians present made no demonstrations and appeared to be impressed by the fate of their companions.

arrived to-day, and will make good citizens for Wise County. Many farmers are busy planting out or-chards, and should all the trees live that are being planted in Wise County, ere many years this will be one of the largest fruit growing counties in the State. Baltimore (Md.) Times. In the United States of America there is probably no disease which is of such uni-versal interest as consumption. The reason for this special interest is the fact that the numberless causes which lead to its de-velopment tend to leave few households where there has not been at least one death from it. The public, as well as the medical profession, have long ago decided that medicinal agents having the character of a food are the only things that have any value in the treatment of this disease. For many years it was supposed that beef tea was valuable as a food; it is now entirely discarded by physicians, having no value. Cod-liver oil, from its indigestible quality, has also been abandoned, the only result from it being an occasional case where an unhealthy increase of fat was obtained from it. The difficulty with all consump-ties comes largely from the fact that the sum of the consumptive is very weak. To overcome this difficulty there is noth an article to-day that enters so largely into medical practice for the treatment of the sid and debilitated as alcohol in the form of whiskey, and there is not an intelligent physician in the country but who prescribes it or a hospital but what requires it on hand constantly. In its pure state it is acknowledged to be the best stimulant and the only cure for such diseases as consump-tion, hemorrhages, malaria and dyspepsia, and it will no doubt cause astonishment Exemplified in Liberal Contributions to Galves-GALVESTON, Nov. 27 .- The following additional subscriptions were added to-day to the fund for the relief of the sufferers by CONNERSVILLE, Ind., Nov. 21.-B. In its pure state it is acknowledged to be the best stimulant and the only cure for such diseases as consumption, hemorrhages, malaria and dyspepsia, and it will no doubt cause astonishment when we inform you, backed up by statistics, that nearly one-sixth of all whiskeys sold in this country to-day is dispensed through the mediums of druggists and grocers. So important is the use of alcohol in the treatment of diseases that Prof. Anstin Flint, of the Bellevue Hospital Medical College, New York (professor of the principles and practice of medicine), in his article and the diseases that Prof. Anstin Flint, of the Bellevue Hospital Medical College, New York (professor of the principles and practice of medicine), in his article use of alcoholi c stimulants is one of the striking characteristics of progress in the practice of medicine during the last half century." Two ounces of alcoholi contain more nutriment than ten quices of meat. It is the only thing that enters the blood direct without effort on the part of the stomach. It is, therefore, peculiarly fitted for the weak and debilitated. Of the importance of purity in all articles used in the reatment of diseases, too much can not be said. The presence of fusic ii and its irritating qualities in the past have been the objectionable elements in whiskey. Now, however, the public and the medical profession have in Duffy's Pure Malt Whiskey on article which already has received so much commendation that its character and value are fully established. Hundreds of similar letters might be presented, repeating the same facts. The testimony of those who have received benefit is more striking and interesting. Commencing with infantile consumption, we give a few sample cases and their results. Many identical ones might be added:
Ma. J. A. RINGROSE, 174 Battery avenue, Baltimore, Md., writes: "My twin babies of five months suffered with pains since their birth, at times having their limbs to draw up and become stiff, expecting them to go into convulsions. These pains were caused, no doubt, by irregularity of the bowels, the children becoming emaciated. After trying treatment of local remedies, as well as medical treatment, without avail, and with the loss of rest to save the little ones, and as a last resort, seeing your notice in the paper, we resolved to try one bottle of your Malt Whiskey, and we are glad we did; the result was wonder ful. It relieved the babies at once, producing a natural, quiet sleep, relieving them of wind and pain, restoring their bowels to a normal condition, thriving wonderfully. While generally opposed to intoxicating liquors as a medical preparation, J don't think your Malt Whiskey can be beat."
Mas. H. E. FARALL (professional nurse), 494 F street Southwest, Washington, D. C., writes: "I first practically tested its merits in the case of two debilitated and sickly children, twins, who (as is usually the case with twins) were weak and pany at birth. In less than three months they were as big, fat and healthy as any children I have ever seen. Another instance, and one wherein the most remarkable results were accomplished, was the case of a child so hopelessly ill as to be given up to die by the attending physicians. I used Dufiy's Pure Malt Whiskey, combined with milk, and in one month the child was entirely cured."

Vast changes for the better have taken place within the last two years, and the Glen can be said to be resting on a solid and substantial foundation. A dozen or more neat stone business buildings have superseded the old rickety structures of past times. Several large and handsome residences have been erected, and the old ones have been remodeled, while the gradual and healthful growth of the snug little community can ba noted at every turn. The people are openhearted and hospitable, and never fail to greet a visiting stranger with a welcome smile and a cordial shake of the hand.

#### Statement Concerning the Missing Verdict in the Adams Case.

Special to The News.

TYLER, Nov. 27 .- THE NEWS correspondent at Eagle Pass, in commenting upon the fact that the verdict in the Adams case could not be found, not only unjustly reflects upon the Court of Appeals, but also upon the attorneys in the case. The facts of the case are these: "The motion in arrest of judgment sets up the illegality of the verdict as copied in the record. The verdict is good and sufficiently in order. To show the illegality of the verdict it is necessary for the defendant to bring the original verdict before the Court of Appeals. Now, if the original verdict cannot be had, the defendant is prejudiced, because the Court of Apand is prejudiced, because the Court of Ap-peals cannot determine the question. Thus it will be easily seen the injustice of the in-ferences deducible from the Eagle Pass correspondent's telegram. The previous telegrams, emanating from the same source in regard to the same case, are equally un-just. The NEWS correspondent would have had defendant hung long ago, but the case is not finally disposed of yet.

This is incontestibly shown by a comparison of tax receipts. Let all the taxpayers look to the proof and promote the statesmen who have kept their faith with the people. They do not want commonplace men in Congress, but men of parts; statesmen and orators who will electrify and sway the national Legislature, forcing down the tariff to a purely revenue basis, and the revenue down to an honest basis, as they have in the State.

THE PROPOSED ORDEAL OF PRIVA-TION.

Senator Allison is reported as one of hose in favor of a suspension of silver coinage for the purpose of putting pressure upon England and Germany to remonetize silver. This is a questionable scheme in several aspects. It is presented as a measure to control or force the action of foreign governments. No satisfactory evidence is offered that it would have the promised effect. Gold men want it tried, and they would be satisfied if nothing resulted from it but the elimination of silver as standard money. Thus they recommend the scheme, the failure of which to effect the alleged purpose would suit their ends better than its success. After suspension they could well say it does not become the United States to try to coerce European governments into adopting a coinage system. The New York Times has had the candor to say that the idea of such coercion is visionary, But most of the gold men's organs support it, or anything to get rid of silver. Their exclamation is: "We can stand the hard | if he don't he yells at us to bring in another times resulting from a battle for gold as long as Europe can." Millionaires may play at tossing \$20 gold pieces into the water to see which of them tires first, but the working people of America do not want to play at seeing who can endure the most frequent strikes, the lowest wages and the longest experience of hard times. The labor of Europe has a terrible competitive power to endure privation. It would be better not to invite that kind of contest. And what right has Congress to bring on such a combat, the suffering of which must fall upon the laboring masses and all persons not living upon fixed incomes? England does not like protective tariffs, but her statesmen are not so insane as to inflict one upon her to coerce other nations into free trade or to show that she thinks she can stand privation as long as they. If the United States is to adopt the gold standard to show Europe how this country can stand it, why not adopt the rest of the cumbrous and expensive institutions of monarchies to show Europe that America can stand them, too? The protectionists say that free trade is ruinous. Why not try free trade to show England this country can stand being ruined perhaps longer than England can? The theory of duels of privation between nations could be extended to private life. A citizen who believes in temperance, but sees his neighbor drinking whisky, can begin to drink also, and persist until he sees whether the other is converted to temperance. A storekeeper who sees his rival closing early and opening late can shut up All administrations promise to lower the his own stores and keep customers barred out till he thinks his rival has had time to fail. There is one further point. What would be done if suspension were adopted and did not produce any change in the action of European powers? Some would say make it permanent, others would say return to the present plan. It really does seem that there ought to be some agreement which view is to be acted upon. This is needed to insure making an impression upon Europe, as well as to ing many years and deals moderately in avoid the greatest uncertainty in this comment. Figures show the European country. in manufactured articles in the markets of the West Indies, South and Central America, and Mexico, whether it might not be for our advantage not to neglect the cultivation of trade with wealthy and powerful nations in whose markets we have already gained a strong foothold." LIEUT. SCHULTZ, of the United States navy, was sent by the government to carry

presents awarded by Congress to certain natives of the Lena country who befriended the survivors of the Jeannette. He has arrived at his destination and made a report, in which he says the roads are rough. The whole result of American North Pole expeditions is to find out that the roads in North Siberia are very sloppy in summer and very rough in winter.

In a recent Sunday sermon Henry Ward Beecher expressed himself with unusual freedom. He is reported to have said: "The old theology says that Christ came into the world to save a lost race. There was, there is, no lost race. It says that He came to make good Adam's stumble; but Adam never existed, and consequently never stumbled. It is time that this mechanical, ladderlike, machine sort of salvation were done away with. This merit and demerit, deserving and non-deserving, is all artificial, all pagan." After this what is the difference between Beecher and Ingersoll?

Омана, Nov. 24.-About 2 o'clock yesterday morning Miss Ellen Lauer, who is visiting her brother, John W. Lauer, was awakened by a pistol shot so loud and clear that she imagined for a time it was in her own room. In fear and trembling she arose and descended to the apartment of her brother and wife. A dim light was reflected through the transom and sobs and moans could be heard. Upon entering the room, her brother was discovered bending over the form of his wife, who lay in her nightclothes on the floor at the foot of the bed. He was vainly endeavoring to stanch the blood which was flowing from a fatal bullet wound near the left nostril. "Oh, Ellen!" he exclaimed, "I've shot

"On, Ellen!" he exclamed, "I've shot Sallie. I took her for a burglar!" The neighborhood was aroused, and a doctor was speedily summoned in the hope that Mrs. Lauer's life might be saved. But the shot had proved instantly fatal. The prominence of the Lauer family and the gossip of their supposed unhappy relations make the tragedy the greatest sensation that Omaha has had for years. night passion—to excuse the crime by tem-porary insanity—he shot her without mean-ing perhaps to commit murder. Very few credit his story of the affair. Lauer made the following statement: "I was awakened from a sound sleep by what I thought was the noise made by somebody bumping his foot against the bed. It might have been the shock; as I imagined, of some-body falling against the bed. At all events I awoke in a fright. Then it seemed that the intruder was pawing the bed clothing near my feet. I always kept my pistol under my pillow. I reached for it instinctively, and so quickly that when, upon opening my eves wide enough to see the dim outline of a form standing at the foot of the bed, I had the weapon leveled at the object. Without a second thought I pulled the trigger, pre-suming that the figure was that of a burglar. The form fell to the floor without uttering so much as a groan. By this time I was wide awake and very naturally turned to reassure my wife, in the full expectation of finding her at my side awake and fright-ened. She was not there. You can imag-ine for yourself the horror that then dawned upon me. I could scarcely gather sufficient courage to get out of bed, and when I had upon me. #### TAXATION AND OFFICIAL PROM-ISES.

One little advantage of a direct tax as that assessed against the owners of property over the indirect tax or the excise is that the taxpayer is sure to drop on the pleasing fact that he is a taxpayer. If the tax upon his homestead is increased he is sure to increase his stock of knowledge of the fiscal affairs of the government. The value of the information may not be worth the capital invested in it, but no one can gainsay his title to it. On the other hand, when the tax on property is reduced the money saved is a very tangible evidence of the fact that a benign, honest and economical administration has kept its promise. taxes to the utmost limit. When the tax is in the nature of an excise the great mass of taxpayers are utterly ignorant of the fact that it falls upon their shoulders. They must acquire financial wisdom by indirect evidence and not by the "object lesson" process by which the ad valorem State tax is so indelibly stamped upon the mind. Unfortunately, comparatively few persons are able to appreciate the extent of the tax burden when they pay without knowing they are paying or are being cheated, or when in paying the tax they are not troubled with the tax collector and at the same time obtain the property taxed.

#### MILAN went into the war with a rush. He came out of it the same way.

THE New York Herald has cabled part of the remarks of the London Economist on what the Herald calls "the danger of the interest on federal bonds being possibly paid in silver." The Economist concludes: "This view may or may not prove the extreme one, and gold may or may not disappear as described, but bonds sold on a gold basis and paid in silver dollars-worth four-fifths of the gold dollar-are certainly not a desirable investment for us." The word "us" here means London financiers. It happens that the United States government is not in need of selling any bonds at present. The ones it has out are all above par. It is no part of the government's duty to make them more acceptable abroad than at home. Holders may be selling them for gold exclusively, but they were not thus issued. The Economist comments on an alleged plan of President Cleveland for coining a new silver dollar as a metallic equivalent to the gold one, and adds: "The present condition of silver coinage in the States is bad enough in all conscience, but President Cleveland's plan, instead of improving it, would only make it worse than ever." Hear the Herald say "the" new silver dollar, as if a new issue had been agreed upon. The alleged plan is a mere speculative rumor, and appears to conflict with the President's expressed wish to stop coining silver. When the President learns that the great light of London finance thinks a heavier dollar would be worse, he may guess that British finance wants plenty of silver free on the market, and not to see it swallowed up in any sort of coinage. even to make an alleged honest dollar. This is the comic part of the affair.

Cooper and Clerk Slavin stood manfully at their posts, and it was by their cool-headedness and bravery that a fearful loss of life was prevented. Several of the deck hands and deck passen gers were swept overboard in the swift run-ning water. Two firemen and Second Mate gers were swept overhoard in the swift run-ning water. Two firemen and Second Mate Pendleton caught a stageplank and clung to it until Fireman Milo Cooper climbed up on one end, when it turned over, throwing its four occupants again into the river. #### Creating Money.

To The News. WILLS POINT, Nov. 26 .- The happy hereafter dimly foreshadowed in your editorial of the 17th inst., wherein the man with money will send out his drummers to try to induce men with property to sell or exchange with him, can be realized more readily than you seem to imagine, and reachly than you seem to imigine, and without resorting to the use of property certificates. How? Repeal all federal tax laws, and set the government printing presses to work striking off unlimited amounts of legal tender treasury notes with which to pay public expenses, and the happy land will soon be reached. To repair it he will immediately call for a special grand jury to satisfy the public demand that the mystery be sifted to the bottom. CLEVELAND, Nov. 22.—John W. Lauer is a native of this city. The Tom Green Enterprise says Parson Potter has been returned by conference to duty on that circuit. Sinners may as well come to terms. When the sword of the spirit fails the parson wields an arm of flesh that knocks sheol out of the most refractory.

The Enterprise points a warning to emigrants for New Mexico from one who has just returned from that Territory. He says:

He says: I met fifty-seven families on my return, all going to New Mexico, and I have seen many families here on their way to that Territory, and wish space in your columns to do all in my power to induce immigrants to keep away from there. It is good for nothing except a few head of stock, and that for only a short time. I shall give all fair warning to never go farther west than the Concho River. There are people living in New Mexico in extraordinary destitute circumstances, and there is nothing what in New Mexico in extraordinary destitute circumstances, and there is nothing what-ever for them to engage in to justify them to remain. The water is all, or I will say nearly all, taken, and a poor man has no more chance "than a brindle pup has with a lion." There are about four or five good towns in New Mexico, but what good is that to a poor man, when he can't raise even a respectable garden?

## **RAILROAD RUMBLER'S REVIEW**

THE FRESH TRAIL OF THE IRON HORSE.

### Facts, Figures and Fancies Gleaned, Originated and Wired Specially for this Department of the News

The Santa Fe special which arrived in Fort Worth night before last, as wired to THE NEWS, came over the Texas and Pacific from that city yesterday, reaching Dallas at 1:30 p. m. It had on board W. H. Masters, general freight and passenger agent of the Gulf, Colorado and Santa Fe; J. M. Phillips, master of transportation; J. H. Miller, South Texas passenger agent; W. Morrison, and besides Col. J. M. Britton, of Sherman, and Mr. W. T. Lake, of Fort Worth, who

were guests of Mr. Phillips. The Rumbler met Messrs. Phillips and Miller on the northern outside of the Windsor, and was told by the former gentleman that the trip mentioned to Fort Worth and eastward to Dallas had been pleasant and without startling incidents of any kind.

Startling as this information may appear to the general reader, the extraction of it was almost as difficult as pulling a molar tooth with a pair of fire tongs. There is no telling what an abundance of the same class of facts might have been purloined from the knot of railroaders, recklessly exposed as they were to the wintry atmosphere, if the too excessive funniness had not intervened to prevent the making of history, and caused the Rumbler to remove himself from the cyclone of hilarity, which almost blew his hat off, and go around the almost blew his nat off, and go around the corner to see if even the wooden "Injun" in front of the tobacco shop wasn't trying to perpetrate some hoary-headed chestnut. Later on, at the Santa Fe Depot, Col. J. M. Britton introduced THE NEWS represen-tative to Mr. W. H. Masters. Mr. Masters will be as popular as Mr. Murray was. He is a heavy set man, with a round, pleasant face, lighted with a merry pair of eyes and fringed with a jet black moustache of the Turkish style of archi-tecture. He awears clothes that fit him.

pair of eyes and fringed with a jet black moustache of the Turkish style of archi-tecture. He wears clothes that fit him, walks with a quick, springy step, and talks in the frank, hearty fashion of a sailor. As the horse reporter would describe him if he had a chance: "He r'ars back on his past-ern j'ints and keeps his top eye skinned on the winning post, and don't shy at a pile of shavings worth a cent." "How is if I never met you before?" asked Mr. Masters, pleasantly. "Guess I was 'busy giving my bosom friend, Jay, advice, or helping the section boss tamp the track when you happened around," explained the Rumbler apologeti-cally. "What did you do with O. G.?" "Mr. Murray left us at Fort Worth-went west with Mr. Newman and the rest of the railroad party who were here last Tuesday. His health is not the best in the world. "Yes, I took hold on the 9th, as you saw by my circular. I am just making this trip for the purposes of inspection and getting acquainted. "Couldn't tell you a word about the exten-

for the purposes of inspection and getting acquainted. "Coldm't tell you a word about the exten-sion of the main line northward from Fort Worth. That class of information doesn't belong to my department. "Well, to tell you the truth about the Texas pool, I think it has been beneficial all around, both to the railroads and to the public. Some of the roads which before got a large amount of business at ruinously low rates are now getting reasonable rates and less business. They carry less now than formerly, but they get more money for it." When it came to the topic of the failure of the Texas pool to carry out the order pro-hibiting ticket agents in Texas from taking commissions from foreign roads, Mr. Mas-ters preserved a very dense silence and let the other man do all the talking. His eyes twinkled very actively as the Rumbler gave him three or four two-for-a-quarter anec-dotes illustrating the absurdity of the thing, and it was very evident to a man on the other side of the street that he would have actually laughed, only he was afraid of committing himself in favor of the paying originations. A Woman Suicides-Matters About the Courts. Local Notes and Personals.

Special to The News.

FORT WORTH, Nov. 27.- A woman named Allie Carman died about 3 o'clock this morning in a room over Gav's saloon, corner Houston and Tenth streets, from the effects of a dose of laudanum administered by herself. She was a hard character and had been drinking freely for some time and was very much intoxicated last night. A man named New accompanied her to the room, where she told him she would take something to put her to sleep, and taking a phial from the washstand, swallowed most of its contents before New could prevent her. The bottle was labeled laudanum and ordinarily the amount drunk would not have been sufficient to produce death, but her late dissipation had so weakened her that her amount with the deat with the deat that her system could not withstand it. The jury of inquest, after hearing New's evidence and that of the physician who was called in, rendered a verdict in accordance with the facts as stated.

THE FREE GRASS QUESTION.

HOW THE COW KINGS APPROPRIATE.

The Testimony of the Grass Commissioners. Gen. McCullough's Advice-A Deplorable State of Affairs Delineated.

Special Correspondence of The News. Ausrin, Nov. 24.—Some portion of the con-erence between the State Land Board and the

grass commissioners, to-day, is deemed of sufficient importance to report more in detail than has been given THE NEWS by wire. At this conference all the members of the board were present except the Governor, who does not at-tend the sessions except when important matters are under consideration, or in case of a division requiring his vote to decide a question. I observe in the telegraphic report of yesterday's little colloquy between the Gov mor and Comptroller, the wires or the types report the following: "Comptroller Swaln-I think Gen. McCulloch could enforce the law with the rangers—Gov. Ireland said he should not vote for a law to do it." This is an error of the wires, the types or the reporter. What the Governor said was in substance that Gen. Mc-Culloch should not violate the law in an effort

to enforce the law. Gen. Henry E. McCulloch was the first of the agents interrogated. He is widely known and respected for sterling worth of character. His statements will be accepted throughout

Texas with perfect confidence. Mr. Swain-Gen. McCulloch, do you think any good to the State or school fund will result

any good to the State or school fund will result from your investigations out here? Mr. McCulloch—In what I have already done? Mr. Swain-Yes, sur. Mr. McCulloch—I really don't know that I can answer the question in a way to be of service to the board, but I will say that In examining into the condition of affairs out there I have ascertained a great many facts and circum stances prejudicial to the public interests that the board should know. Mr. McCulloch-No, sir; no force used to re-sist us, but there might be doubts even then about enforcing the laws fully. Their plan might not be resist me, but to evade the law. Mr. Walsh-Do you think if they found the State in earnest, and that it had stopped jok-ing, they would comply with the law? Mr. McCulloch-Yes, sir; I do. Mr. Swain-Have you thought of any reme-dies?

Mr. Swain-Have you thought of any reme-dles? Mr. McCullough-Not yet, except the su-preme power of the State as an experiment, and applying to the Legislature. The Legisla-ture might furnish some remedy for the evil, though some persons would evade any law. I suggest the military power might be used, but only as an experiment. How to use this power is very difficult for one to determine. At the same time I would be willing to make the ef-fort, believing it is an experiment worth try-ing under a prudent commander. Any rash policy would be bad, for it would bring about conflict with the civil authorities. Mr. Templeton-How? Mr. McCullough-For instance, should you force a man's enclosure he might apply to the local civil authorities for protection. Mr. Templeton-Suppose the fence that is re-moved is run across a section of school land, and you only remove that portion of it on the school land, as you have a right to do? Mr. McCulloch-I admit, the party whose fence was removed would not resist the mili-tary by force, but he would bring the military into court. Mr. Templeton-When he had no claim on

roads and get out timber, as other people could not afford to do. Some years ago I learned that the United States government forces were using our timber and made com-plaint through the proper authority to the government. I was referred to the com-mander of the department, and he referred it to the commander of the post, and he to the quartermaster. This official responded that the government had leased the lands and con-fined its timber cutting to the leased lands. They really only leased some 900 acres, but they cut the timber from about fifteen miles square.

[Mr. McCulloch mentioned these and other operations by government officials, and said the officers there now are strangers to all these things, and offered him every facility for in-

vestigation.] Mr. Templeton—Who are the present con-tractors for supplying them with wood? Mr. McCulloch—This year the contracts are divided between two parties. In one case this is the first time any contractor has paid for any lands, and he bought fifteen sections of ralroad land at Sheriff's sale. He is trying, I believe, to keep in the lines. He had trouble to find them and had to employ the surveyor to mark off the land. The other one has no land at all, and is cutting wherever he finds any timber.

perator in lands of anybody I know of in the country. Mr. Walsh-Is there any chance to try and zonvict that officer for violating the law? Mr. McCulloch-There might be in that par-ticular case. He is not popular, and he has created prejudice against himself. If you could select a jury you might have a fair trial, but he is smart and has influential backers. Mr. Templeton-If there are any bona-fide actual settlers out there, are they properly aided in getting lands by this surveyor? Mr. McCulloch-I, was in the surveyor's office and observed their conduct, and I can say that I don't think from my own knowledge they

Mr. Lubbock-Did'they apply in their own names, or get employes to apply and buy from them? Mr. McCulloch-In such cases they applied themselves, and hold possession of the land by their employes as their proxies. Mr. Walsh-You and the Attorney General have passed a resolution, Governor, allowing such proxies. Mr. Lubbock-I doubt it. The resolution was meant for people temporarily away from the land. Mr. McCulloch-These people, who are intelli-gent and have good lawyers' opinions, are holding the land under your resolution. There was some discussion between mem-bers of the board on this resolution, which, as printed in the board's circular, was read, and seemed to justify the claim that it contem-plated the creation of a deputy actual settler as construed by the applicants, and also by Gen. McCulloch-I don't think there is any remedy in the law as it is, and that a remedy must be supplied by legislation. I don't think the inclosure act can be enforced by civil au-thority out there. Mr. McCulloch-My plan would be first to go out there and tell them I was authorized by the board to lease the lands and to give pos-session. I would guarantee to protect the men in their possession with the full power of the state. Mr. Lubbock-Now, suppose we had an agent in the they and the full power of the state. In their possession. #### A SATA FE STRAW.

FORT WORTH, Nov. 27.-An engineer corps of the Santa Fe road is at work in the yard in this city, laying out four additional side+ tracks, two for passenger and two larger ones for freight use. This in itself is rather significant, and when taken into consideration with the fact that this road has recently bought about \$12,000 worth of lots adjoin ing their right of way in town, it would seem that the time for the extension of the road north is fast approaching.

her clothing and tying it in a hard knot around her throat. Prisoners confined in the other part of the jail, seeing her actions, set up an outcry that brought Sheriff Ogles-by quickly to the jail, who removed the im-provised noose just in time to prevent her going over to the silent maiority. A party of Mexican officers living in Coha-huila, Mexico, arrived here yesterday morning from the City of Mexico, and it is an understood thing that Salton is to re-ceive their government aid for Governor in the coming election, which takes place Jan. 4, and which will probably result in Salton succeeding Galan, the other candidate.

Foremost in the Kanks. It is the intention of one of the chroni-clers of THE News to apprise our readers in a few days of the many choice and appro-priate articles offered by the merchants on Elm and Main streets for the holidays, but perhaps it would not be premature or out of place to let our citizens know in time that Uhina Hall is decidedly the first place to be visited, as fully a half hour can be pleas-antly spent by seekers after the beautiful and curious in inspecting the formidable array of chinaware, chandeliers, toilet sets, vases and ornaments that make A MOST DAZZLING SIGHT. It would seem as though Mr. Goslin has made an effort to procure something of everything that could though Mr. Goslin has made an effort to procure something of everything that could please. His stock is not only very hand-some, but what is more surprising of all is the reasonable prices which they are of-fered for. As for toys, it would be hard too find a better selection, and, in brief, we can say that China Hall should be visited at once by all who have an intention of making purchases whether for every day use or for es, whether for every day use or for holiday presents.

The school lands he would have no standing in court.
Mr. Lubbock (to Mr. Templeton)—Suppose Gen. McCulloch had eight or ten rangers, and believed a fence was on school land, would he know the lines of the survey? They tell us that no one knows these lines, that they haven't been actually marked. Then, when he went with the rangers and attempted to cut the fence, I ask if the party claiming the fence can't go to a Justice of the Peace under the laws of this State and make affidavit that he is intruding upon his lands, and can't he get a writ to stop the State?
Mr. Templeton—I think not, if the lands are school lands, it would be a violent presumption that he would make such an affidavit.
Mr. Tobock—I ain't no lawyer, as you gentlemen are, but I would put my money on it he loads of minerals and said ne thought the State had no complaint to make, except there should be some income from coal mines.]

Mr. Templeton-Could the officers and people be relied upon to execute the law so as to pro-tect the interests of the school fund? Mr. McCulloch-I say not; with very few ex-ceptions the great majority of the people are interested in free grass, they are sheepmen, have horses or cattle. Nearly all the actual settlers out in that district are stockmen and going in for the benefit of the range, in fact for free grass; they are not agriculturalists. Mr. Walsh-Do the cattlemen divide up the range among themselves? Mr. McCulloch-Yes, sir, and they have very serious objections to anyone else coming in. Mr. Walsh-Would there be any system of annoyance to prevent an actual settler from going in there? Mr. McCulloch-I don't believe in any case there would not be serious objection by the leading men out there to new men coming into their ranges. I heard two of their leading men had warned a man who proposed to settle not to come in and stop there, or, as they said, "we will drive your cattle to hell." They admitted to me this had been said. Mr. Swain=And admitting they didn't own the laid?

Swain<sup>21</sup>And admitting they didn't own

Mr. Swam-And aumitting they didn't own the laid? Mr. McCulloch—One of them rents some of the land, but uses a great deal not his own and not leased, and the other leases none of the school land at all. Mr. Templeton—Did you pay any attention to timber depredations! They are general; nearly all the country and all the little towns are supplied with wood from the State lands. Mexicans supply the wood, and the citizens ask them no questions about where they cut and haul it from. At the mines they use a vast amount of wood. There are contracts for tim-ber in large quantities by parties who own no lands. The contractor just says to the Mexcan: I will pay you so much a cord for that you bring in.

Welsh—At and near Fort Davis, are they upplied with wood from the State lands— ineries in the mountains? McCulloch—Yes, that commenced before

the war. Mr. Walsh-I understand they have cut about all the timber on the school lands that is ac-cessible and a good deal not accessible to peo-ple generally, as they used soldiers to make

possession of school lands, offers to lease him at 6 cents an acre, and he refuses to lea and still keeps possession, can't we have legi lation to sue the man for the back rent and r quire him to pay it? Has the State no right claim money for the use of this property, an

him now. Mr. Lubbock-Why, then, isn't it done? Mr. Templeton-Don't you hear that the courts out there are against us? Mr. Lubbock-Then can't we sue and let the cases go over and be continued till the State will have a better show? Mr. Templeton-Won't the other side force trials and gain their suits? Mr. Lubbock-Then, if under the law we can't sue and continue the cases, let us make new laws. This board is in the habit of making law when it wants to.

Mr. Templeton-But we would lose over a year's time and the income from the lands dur-ing that time. Mr. Lubbock-I have been opposed to an extra session of the Legislature, but if we are to lose this money I would call it to-morrow morning and take the risk, though you know the Legislature has failed to do anything. Mr. Swain-I don't blame the Legislature so much. It did the best it could with the lights before it. Whatever law they might have passed it is pretty well shown we can't enforce it. The trouble is not so much with the law as in finding a way of enforcing it. Mr. McCulloch-My opinion, gentlemen, is that so far as enforcing the civil law out there by the civil authorities is concerned, whatever it might be, it is impracticable. Mr. Lubbock-General, you are a military man. I know from experience, history and correspondence, and know this State was under martial law, and you and myself helped to en-force martial law rigidly. It is true it was in war times and war measures justify such acts. But in his case the civil authority fails to protect our interests and there is apparently no other uthority to look to. If rangers were sent out here they would proceed with great caution and would not act without authority of law un-ess in some emergency that in the estimation of prudent men justified it. Mr. Lubbock-I took corn, meat and shorses, uut it was a military necessity. Mr. Swain-I don't think you understand the aw in this case which establishes the status of he rangers. They are not a military force ex-dusively. There is an appropriation for the uppression of lawlessness and crime, and here is a force of captains, lieutenants and here is a force of the country. ### The Question of the Succession-One Man Between Organized Government and Chaos-The Law's Deficiency.

#### St. Louis Republican.

WASHINGTON, Nov. 25.-Washington is so essentially a city of public men, of politicians, that it is not unnatural that the expressions of grief are mingled with those of serious apprehension over the critical condition of the country, once more thrown into the dangerous situation where there is but a single life between established order, regulated government and absolute chaos. The public mind of Washington at once jumped to a sharp realization of the fact that the experience the country had in the death of Garfield of the substantial dangers that might grow out of the insufficient statutory provisions in relation to the presidential succession had been shamefully ignored, as that there is to-day no one who is by law authorized to take the place of President Cleveland, if it should be the decree of fate for him to follow Hendricks to the other world before the assembling of Con-

"I have just been looking over the Record," said Congressman Springer this evening, "and I find that the Hoar bill, which was introduced in the Senate Dec. 4, 1883, and passed Jan. 25, 1884, was reported to the House April 24, 1884, with the unanimous recommendation of the special committee of which Mr. Eaton was chairman. It went on the calendar at that date, which was during the first session of the last Congress, and there it rested as completely dead as if it never had been reported. It could only be reached by unanimous con-sent, and that was impossible, although there was no particular political oppo-sition to the Hoar bill. That, you know, made the Secretary of State the suc-cessor in case of a vacancy in the office of President and Vice President, with no Speaker of the House or President pro tem. of the Senate to take the place. Next to the Secretary of State it made the other mem-bers of the Cabinet eligible to the succes-sion in the order in which their offices were created. I have felt so impressed with the danger of our insufficient law as the statu-tory provisions now stands that I went to the President last week and had a long talk with him about the urgent need of legisla-tion. I beghim to speak of the matter in his message, and he seemed so impressed with the situation that I had no doubt it was his intention to make this matter a particular feature in his message. I think some one should see to it now that he does not go out of the house until after Condead as if it never had been reported. It he left an enemy behind him, for despite his strong points of intellect and character, malice could not but pass him by. The mistake of his life was his separation from Mr. Tilden and the idea of the "old ticket" in IS80, but for which he would have been nominated and elected President, Mr. Tilden declining to be a candidate then as he did four years later. But, notwithstand-ing this error in a career singularly free from errors and the resentment which fol-lowed it, Mr. Hendricks had a strong hold upon the confidence and affections of his party, as was shown by that wonderful de-monstration in the Chicago Convention when he was nominated for Vice Presi-dent." loes not go out of the house until after Congress meets

This idea that the President should stay This idea that the President should stay in the White House for the next two weeks seems to have strong hold on Democrats, and it was to be heard expressed on every hand to-night. Every one has been free in the expression of what seems to be an almost universal apprehension that the situation may beget a second Guiteau. There is especial manifestation of an anxiety to tide over the ten days that must elapse be-fore Congress meets, although some people fore Congress meets, although some people say plainly that the danger ot the situation will not end as long as the Senate is Repub-lican, and the immediate successor of Cleveholds them in distrust and contempt. His political speeches were filled with this spirit, and like his fo-rensic arguments commanded respect by their breadth, elevation, vigor of reasoning and catholic comprehensiveness. In social life Mr. Hendricks was dignified, kindly, cordial, unaffected and generous. His sym-pathies were never denied to any deserving cause, or to any young man ambitious of usefulness and honor. Happy in his home, beloved by his fellow eitzens, his life was enviable, and though he did not fulfill all the days that his friends wished and hoped for him, his death too was enviable. He rests from his labors, and the sorrow and affec-tionate esteem of the whole country follow him to the tomb."

The President and Cabinet evidently do not share the feeling that it is necessary for him to seclude himself during the next ten days, as it was learned after the Cabinet meeting this evening had adjourned that it had been decided for the President and all e Secretaries to go to Indianapolis to the

Regarding the fact that there is no Presi-dent pro tem of the Senate to assume the duties of President in the event of a va-cancy now in that office, it may be stated positively that no one was elected at the special session of the Senate last spring. There are some rumors to the contrary to-night, but the correspondent of the Re-publican learns from the journal clerk of the Senate that no one was elected. This information is confirmed by the recollection of both Senators Vest and Cockrell. "No, we didn't elect anybody," said Senator Vest, "and it was not mere chance, either. It is generally the custom for the Vice Presi-dent to absent himself some days and give the Senate a chance to elect some one, but Mr. Hendricks was careful not to do this. Someone called his attention to what seemed an oversight, and reminded him that it was the custom better honored in the breach than the observance. He was just that it wide a Democrat." It holds that the secrets of the one of the strongest forces in politics, and political influence of both men was that they sought to work at all public questions from the standpoint of average mankind; that neither was an original thinker; that both trusted to get and act by the average sense of the people. It adds "The distinguishing features of Vice President Hendricks' political position at the time of his death was his opposition to the time of his death was his opposition to the progress of what is called 'civil service' reform, and the motive which led him to take his position and make himself the rallying point of all the Democratic opposi-to President Cleveland's reform policy is indicated, we believe, by this analysis. It sprang from what he understood to be the average sense of the people. He did not believe that they wished' for anything of the kind. He convinced himself that they wish the spoils system to be con-tinued, and therefore he was a cham-pion of the continuance. If he had been convinced that the popular sense is the other way, so also would have been his conduct. It remains to be proved whether his understanding of the people's wish is accurate. Our own convictions are that it is not; but that he was honest and sincere in his championship of the perni-cious system which President Cleveland is pledged to abolish, ought not to be doubted for a moment. However violent the antag-onism Mr. Hendricks encountered in a long life full of bitter controversies, those noble qualities, honesty and sincerity, never have been deliberately denied to him by any adversary." the progress of what is called 'civil service LOUISVILLE, Ky., Nov. 25.—Mr. Watter-son will say in the Courier-Journat to-morrow: "Mr. Hendricks was less conspicuous for brilliant talent than for a level head, a cool judgment and a kind heart. He rarely lost his balance. He was a steady partisan, but neither implacable nor extreme. His powers of persuasion were very great. He impressed an audience with his sincerity and his amiability. ## A Growing Town-Splendid Educational Fa-

cilities-Crop Notes.

Special to The News. GRANBURY, Nov. 27.-This town continues to improve. Several new buildings are in process of construction, both residences and business houses. Commercial men say Granbury is the best business town in this portion of the State that has not the ad-vantage of a railroad, and far better than most of the railroad towns.

Cotton continues to come in. The very favorable fall for maturing and gathering the crop has increased the yield at least 15 per cent over the earlier estimates. In deed, there will be about an average cotton crop. The grain crop of every kind was fine. Careful estimates place the produc-

theory. The grain crop of every kind was fine. Careful estimates place the producductions of Hood County for 1885 at: Cotton, 3700 bales; corn, 300,000 bushels; wheat, 140,000 bushels; corn, 300,000 bushels. While Hood County is a small county, it has the advantage of both sides of the Brazos River for a distance of sixty miles, following the meanderings of the stream. No land in the State is more productive than the valleys of the Brazos and its tributaries. This county is noted for its good and abundant water, its diversity of prairie and timber, beautiful scenery, good health and intelligent population, and it is unquestionably the banner educational county in the State. There are splendid schools and school buildings all over the county, notably the fine academies at Lipan, Paluxy and Actom Thorp's Spring has two splendid colleges, the Add-Ran and the Thorp College, At Granbury is the Granbury College, a fine three story stone building, owned by and under the auspices of the Methodist Church. In addition to this, Prof. Kilgore has a good academy and a good attendance. The Misses De Graffinreid, recently from Kentucky, teach the female institute, and Mrs. Spears teaches a splendid school for the little ones. pears teaches a splendid school for the

#### THE LAW.

Following is the law on the subject of presidental succession as found in the constitution and revised statutes of the United States:

#### CONSTITUTION.

Article 1, section 3, clause 4, says: "The Vice-President of the United States shall be President of the Senate, but shall have no vote unless they be equally divided."

Clause 5, same article and section, savs: "The Senate shall choose their other officers. and also a president pro tempore, in the ab-sence of the Vice-President, or when he shall exercise the office of President of the United States."

#### REVISED STATUTES.

Article 11, section 1, clause 5, says: "In case of the removal of the President from ffice, or of his death, resignation, or inability to discharge the powers and duties of said office, the same shall devolve on the Vice-President, and the Congress may by law provide for the case of removal, death, resignation or inability, both of the President and Vice-President, declaring what officer shall then act as President, and such officer shall act accordingly until the dis-ability be removed or a President shall be

elected." Section 146 says: "In case of a removal, death, resignation, inability of both the President and Vice President of the United States, the president of the Senate, or if there be none, then the Speaker of the House of Representatives, for the time being, shall act as President until the disability is re-moved or another President elected."

#### THE PRESS.

#### EXPRESSIONS FROM LEADING JOURNALS ON THE EVENT.

INDIANAPOLIS, Nov. 25.-[Special.]-The Sentinel (Democratic) will say in the morning; "The press of the land will speak this morning of his career as a great statesman. The Sentinel, published at his home, would speak to his home friends of his great heart and soul. However much engrossed in professional or public affairs, he never forgot his humblest friend nor failed to strike to advance his interest. No member of the community in which he lived and was familiarly known ever heard of a charge of dishonesty or injustice in business affairs made against him. Nature created him a lawyer, and as an advocate his generation knew few, if any, superiors. He possessed a personal magnetism that attracted admiration and af-

United States in all narties and among all descriptions of men, there will be genuine, heartfelt sorrow at the nation's loss. As an active, aggressive statesman, strong in his convictions and staunch in his constancy to the Democracy, Mr. Hendricks naturally was honored by political enemies and the hostile criticisms of Republican organs. But no opponent could gainsay his ability, and no assailant of his partisanship ever dare to question his purity and honesty. In his long public life he had filled the highest posts

NEW YORK WORLD. NEW YORK, Nov. 25 .- The World will to-

morrow say, editorially: "All over the

life he had filled the highest posts of honor and trust in his State, and all but the very highest in the United States, and he came out of them all with a clean, un-sullied record as a public servant, and with the increased respect, confidence and affec-tion of his party. The higher the trust be-stowed upon him by his party, the more brilliantly shone the lustre of his Democ-racy. The death of the Vice President will materially affect the situation in the Senate. Fractional opposition to the national admin-istration has been urged by the less scrupu-lous members of the Republican majority. It was felt by the people that Mr. Hendricks' influence, ability and/strength as a presiding officer would be a wholesome restraint upon those who advocate and a valuable aid to those Republicans who would deplore such an unwise and un-American policy. But the Republican president pro tem. of the Senate now becomes its permanent presid-ing officer until the vice presidency shall again be filled by an election, and it is to be feared that with a Republican in that important position conservative resistance will be weakened and the will of the more violent Senators will be in greater danger of prevailing. The political effects of the loss the country has sustained, must not, how-ever, be now considered. It is only fitting in this hour of sorrow to condole with the people in what is a national affliction, to ex-press our heartfelt sympathy with the be-reaved family, and to pay such weak tri-bute as words can convey to the ability, virtue and worth of the dead statesman. His public career was full of honor, his private life was without stain. <u>NEW YORK TRIEUNE</u>. of honor and trust in his State, and all but

NEW YORK TRIBUNE.

NEW YORK, Nov. 26.—The Tribune has the following: "The death of Vice President Hendricks was announced on the bulletins up town about half past 6 o'clock last evening, creating a profound sensation. At the principal hotels it became at once the chief topic of conversation. The general estimate of Mr. Hendricks' personal character was a favorable one. He was character was a rayorapie one. He was mentioned by Democrats and Repub-licans alike as a consistent, Demo-crat. There was no little discussion as to the presidency protem. of the Senate. At first some thought that Mr. Edmunds held that position, but it was remembered that since the meeting of the Senate under the new administration Mr. Hendricks never once left the cnair or was absent so as to givelan opportunity or excuse for the election of a president pro tempore. It was his of a president pro tempore. It was his object to delay that selection until some time as he hope the Senate might have a Democratic majority, when a Democrat could be elected."

#### THE NEW YORK TIMES.

NEW YORK, Nov. 26 .- The Times says, detion far beyond the circle of his personal acquaintances. During the last few years of his life he commanded a popularity never excelled by any statesman on this conti-nent. Indiana admired him because he was great, and loved him because he was sympathetic and kind. This morning, how-ever, the heart of this community is sadeditorially: Mr. Hendricks was a type of

dred students enrolled now at the begin ning of the schools. It is rather a coincidence that there are at this date exactly 400 scholars at each place. Of this 800 now attending school at the two towns 221 are boarders, 204 reside out of the county and 13 out of the State. Add-Ran College leads off with the largest attendance, having 350 pupils enrolled. Of this number 154 are boarders, 146 reside out of the county, and 12 reside in other States. The eight hundred includes only the at-tendance within the limits of the two towns. In addition to this there is a school well at-tended almost directly between the two, and the teachers think the attendance by Janu-ary will reach nearly if not quite one thousand. Still we are talking of building another college.

ed students enrolled now at the beg

ally will reach leading in hot differed in thousand. Still we are talking of building another college. C. B. Wilcox, a resident of this place, was arrested last night on information filed by parties residing in Tarrant County, charging him with theft of cattle. Wilcox has resided here nearly two years, and has hitherto borne a good reputation, his family being possessed of some means. In default of bail he now lan-guishes in jail. Work on the new jail goes rapidly on, and the building will probably be ready for oc-cupancy early in January. Thanksgiving was strictly observed here. The business men closed their doors. A shooting match by the gun club and a grand ball at night succeeded the usual religious services.

ball at night succeeded the usual religious services. Nutt Bros. sold their grocery establish-ment to Messrs. C. W. Glenn and R. B. Rid-coke on Monday. An occasional imurmur of the Fort Worth and Rio Grande Railroad is still heard here, but the people are waiting patiently for something tangible. While Granbury is considered a backs-woods town, she could astonish some of her more favored nighbors with quotation of real estate, property adjacent to town com manding from \$100 to \$150 per acre. The cotton crop is pretty well gathered, the total yield for the county is estimated at 4000 bales. The acreage of wheat has been cut short by the continued dry weather.

One of the pitiful sights of the world is to see a poor little pinched, penniless fellow staggering along under a great family name made by some one ahead of him.

OBSERVATIONS BY THE WAY.

What a Dallasite on a State Tour Jotted Down for The News.

Correspondence of The News.

MONTGOMERY, Nov. 22 .-- I am down here in the midst of the pine woods, having traveled considerable during the past three weeks.

1 started from Dallas Nov. 1 for Navasota. a town of 3000 inhabitants. Remained over one night. From there started next morning to Bedias, a small town of about 200 inhabitants, in the northern portion of Grimes County, a distance of thirty-five miles from Navasota; passing through a country, part of which is very rich and fertile, needing immigration, but largely inhabited by negroes. Passed through Anderson, the county seat of Grimes County, a small town with progressive elements. About ten miles from Navasota found numerous parties

INQUIRING ABOUT DALLAS

and the prospects they would have if they moved to that city. You may be sure I talked the city up, and give you as an instance of success Messrs. Howell Bros., who some years ago left Anderson for Dallas to enter the shoe business.

While at Bedias I talked up the Farmers' Alliance, and found every farmer wishing heartily for such an organization. They are all alive to the importance of the farmers of Texas binding themselves together to put forward and carry such measures as shall be beneficial to their interests.

From Bedias back to Navasota, thence to Hempstead, an ancient town of one thousand inhabitants; found some progressive men and a country rich in soil, but learned that the American born people were leaving and the foreign element fast taking their places. Many inquired about Dallas and her manufactories.

AT BRENHAM, BUILT ON A HILL.

From Hempstead to Brenham, a delightfully situated town of eight thousand, built on hill, with a commanding view, was my next advance. I found everything aiive, men on a push, all business. Brenham has a fine courthouse, also waterworks put up by a wide-awake Dallas man, W. C. Connor. During my stay a fire broke out and two houses were allowed to burn on account of the insufficiency of the fire department. I thought that if the Dallas boys were there all would have been saved. There appears to be some trouble about a supply of water, caused by the action of the City, Council.

FROM BRENHAM TO BELLVIEW.

the county seat of Austin County, the soil is sandy. Many citizens appear anxious to leave for Western Texas; found business

leave for Western Texas; found business dull; everyone complaining. Thence to Sealey, a new town on the Santa Fe Railway, the junction of that road and the Texas Western. Business menhere were in low spirits on account of failure of crops from an overflow of the Brazos. But money appeared to be plenty, and there was great excitement over the proposed ex-tension of the narrow gauge. Large receipts of corn were coming in, and as much as 55 cents per bushel being given for it. Met a gentleman from Hillsboro, who was mak-ing arragements to make Sealey his point of shipping corn to from the prairies. Now I have MADE MONTGOMERY,

The Santa Fe Road reached here some years ago, but lately moved their depot one mile away from town, much to the annoy-ance and injury of those men who have in-vested their all in this town. Many are anxious to leave on account of discourage-ment, and Northwest Texas is urged as the spot for them to locate. Two other gentlemen and myself, one from Dallas, T. H. Banco, representing the firm of J. B. Watkins & Co., land and mortgage agents; the other, J. E. Thorne, representing C. H. Chase & Co., Louisville, Ky., are to-day spending a quiet Sunday. This morning a man rode into the town, stating that a wreck had occurred on the Santa Fe, eight miles this side of Navasota, caused, it is thought, by an obstruction be-ing placed od the track. The train was a mixed one, some fifteen freight cars, bag-gage and mail cars and two coaches. It seems they were going up grade, and in a moment the engine and tender jumped the track with three freight cars, tearing up several rails. The engine and tender rolled down an embankment of twenty feet, bury-ing underneath the freman, killing him in-stantly. The engineer jumped and fell on his head and was dreadfully scalded. Aid came promptly from Yarbro, the near-est depot, the conductor telegraphing to Navasota for and. The engineer, named Russell, was speedily removed to the Geizel House at Navasota, accompanied with the body of his fireman, whose brother was telegraphed for to Fort Worth. On his body was found, strange to say, a note written: "T I am killed forward my body to Louis-viel, K.y." It has cast quite a gloom along the line, as both men were much liked. The engineer was married. His wife lived at Sealey, having just two days ago given birth to a son. Sealey, having just two days ago given birth to a son. THEY LIKE THE NEWS. There is some discussion here as to the Galveston and Dallas NEWS, many advocating the old NEWS, but a great number admiring THE DALLAS MORNING NEWS. Even down here I have found many copies of the Dallas paper. Every one is jubilant over the editorials, advertising, correspond-ence—all far exceeding in excellence the expectations of its friends and well-wishers. J. T. V.

#### A LOCAL OPTION LAW DECISION.

The Court of Appeals Affirms its Enforcement at Mexia.

#### Special to The News.

MEXIA, Nov. 27 .- The two banks and the postoffice were the only places which observed Thanksgiving Day here. No services were held at any of the churches. A drizzling rain prevailed all day, rendering the weather very inclement.

News was received here yesterday that the Appellate Court had affirmed the decision of the lower court in the case of Joe Lipari vs. the State, from this county. The case involved the validity of the local option election in this county, and the decision was awaited and watched with much anxie-

ty. Local option was carried in this county on June 13, by 1105 majority, and went into effect on July 24. The opponents of local option questioned the validity of the election and have used every effort possible to defeat the law. After exhausting all other remedies before the courts, an appeal was taken to the Appellate Court in the above case of Liperi vs. the State. Lipari was convicted for violation of the law in the County Court, and the decision of the Court of Appeals finally settles the matter after a long and strongly contested fight. The prohibitionists are greatly gratified at their final success. The decision in the case involves several very important points of law which have never before been settled by the higher courts, and will be of interest. Owing to the validity of the law being in doubt, but little effort has been made to enforce it since it went into effect, but many prohibitionists assert that since the matter is now finally settled they intend to co-operate in causing a strict enforcement ty. Local option was carried in this

matter is now finally settled they intend to co-operate in causing a strict enforcement of the law, and violators may as well be on the lookout. About fifteen cases for viola-tion are now pending. An election was held to-day to fill the vacancy in the Board of Aldermen caused by the death of Mr. H. C. Watson, and re-sulted in the election of Hon. C. L. Watson, a prominent citizen and brother of the de-ceased member.

Then turn-ing to the reporter, she continued: "I will tell you all about it." At this a couple of ladies who had been sit-ting in a remote corner of the room seemed to come to attention. The fair sex, as a general thing, are not inquisitive, but when one of their sex is involved in trouble it is no more natural that they should all want to know the whys and wherefores than that the roasting of a cat should call together all of the species. ### A CHAINED GOSLIN.

The Loving Links of Years-A Birthday Party Last Night.

A highly interesting gathering of several of Dallas' leading Hebrew citizens took place last night at Mr. David Goslin's residence, on Ervay street. Over a hundred persons of both sexes assembled there to elebrate the occasion of Mr. Goslin's fiftieth birthday and to present him with a very handsome gold watch, chain and locket in recognition of his sterling worth. The assemblage was quite as much a surprise, no doubt, as it was gratifying to that gentleman when he entered his home and discovered the rooms thronged with friends and relatives, all eager to extend their congratulations. Before he could recover from his first surprise he was met with another in the way of a presentation speech from Mr. S. Klein, who, in an extremely happy way, informed him that he had the pleasure of presenting him, the first president of the Temple Emanuel and conceptor of the Jewish school, as a token of esteem from the congregation of the Temple Emanuel, a gold congregation of the Temple Emanuel, a gold chain and locket. The links of the chain, Mr. Klein added, were emblematic of the golden ties which linked Mr. Goslin to the congregation he had molded into form. Mr. Gosling, who was deeply affected by the very flattering tribute, replied in a short but appropriate and well-worded speech. The guests were then invited to partake of refreshments in another room, where amid the flow of wine and kindly toasts the hours rapidly glided by. Both Mrs. and Mr. Goslin, considering the number of years they have been married, looked sufficiently youthful to prove the adage that, "Men are only as they feel." It was a grand and happy gathering, and

only as they feel." It was a grand and happy gathering, and presented a scene of domestic happiness that impressed THE NEWS representative most forcibly. There was no restraint of kindly feeling. The ladies, of whom there were a goodly number, were as ready to offer a sentiment as the gentlemen.

#### Jim Scott Captured.

Yesterday noon Deputy Sheriff Louis Jacoby received a telegram from Sheriff Smith, who is now at El Paso, saying: "We have Jim Scott in jail here. Will leave for home to-day." The reading public of North Texas hardly need an introduction at this late day to Jim Scott, who, on the 14th instant, as the result of a family trouble, shot the stepfather of his wife, T, J. McDonough, or "Big Mack," as he was familiarly called by the hack drivers of Dallas. After the killing, Sheriff Smith, in order that the slayer should not escape without a trial, offered a reward for his apprehension. He was first trailed to the house of Son Wright, four miles west of the river, and then the scent was lost, until a week ago last Monday, when the constable of Benbrook, the first railway station west of Fort Worth, telegraphed Mr. Smith to ascertain if he wanted T. J. Wells. Messrs. Smith and Arnold immediately stated for Benbrook, and were there satisfied by the description given of Wells that he was the party they were looking for. They then telegraphed to Gordon and received a telegram in reply that Wells had been there, appearing rest-less, and had shipped his valise for El Paso, saying if he got work on the railroad he could easily recover the valise by writing for it. They then freely used the wires, trac-ing their prey to several points, and cor-rectly estimating the date of his arrival at El Paso, were on hand to capture him. The officers started back with Scott yesterday. who, on the 14th instant, as the result of a

versation, saying: "I said in the office at Chi-cago: "What kind of a place is that? Do men go in your rooms? and he said I would work in the wine room." "No," said Mrs. Woodward, aroused from her meditation by a question. "We did not have any money to buy food before getting here, but this gentleman—handing the reporter a card which read, "W. A. Ish, Deputy United States Marshal?—"gave us money to buy our meals, He told us, when I told him what we were going to do, that he thought we would not like the place, and he said if we got in trouble and wanted a friend we could call on him. I telegraphed him last night to Waco, and told him how we had been treated, and he replied that it was impossible for him to come to Dallas as he was going south, and I telegraphed him again that we were in deep trouble. He is a kind, good man." "No," she continued,"I will not work there if I have to walk home to my childeren and beg my way. I will try and get employment here at some other business—I don't care what— and if I like it, I will bring out my mother and children, and if I do not I will wait until I can earn enough to take me back to Chicago or to Nebraska, where I have friends. I have hope of getting along. I can work, and besides a firm of lawyers are engaged in trying to get me a pension for the services of my husband in the war." In conclusion Miss Woodward said there was

pension for the services of my husband in the war." In conclusion Miss Woodward said there was a third girl named Kittie Powers, who had come with them from Chicago, but who had said she would not leave the place we went to until she had found out more about it. Later in the day the reporter learned that Miss Kit-tie, too, had canceled her engagement. The reporter, after bidding good bye to the stranded creatures, hied himself away as a missionary to the factory of Messrs. Blanken Ship & Blake, where he repeated the sad story of the young women to Mr. Blankenship. "Well," said Mr. Blankenship, "believe we are running full handed; but there is always a machine here for the good woman who has the courage to face the hardships of the world in

avoid the effect of State and Territorial quarantine laws, which are an in-terdiction upon interstate commerce, and are particularly unfriendly to Texas. The friends of the measure antici-pate action that will confine the splenetic fever district to the lowlands or coset equative and not to all Toward for splenetic fever district to the lowlands o coast country, and not to all Texas. Con gress is also requested to take what steps i can to suppress pleuro-pneumonia. Th convention was very harmonious. I thin the demands on Congress are sufficient! far-reaching to meet the requirements o Texas. If Congress should frame a nationa quarantine law it would invalidate all Stat and Territorial laws upon the subject Here is New Mexico with its quarantine lax that excludes Texas cattle unless passed b an inspector whose fee is 20 cents per head That tax is enormous and unauthorized The Colorado delegates were very friend! That tax' is enormous and unauthorized. The Colorado delegates were very friendly to Texas. Nothing was said about a trail. There will be no opposition developed in Congress against the object of the petition except what may come from the coast coun-try. In regard to cattle conventions, my opinion is that until this association meet-ing at St. Louis, State and national conven-tions never tended to advance the cattle industry; but I believe and hope that this convention will prove an exception to the rule established by former experience.

Nothing So Successful as Success. It is always pleasurable to mark the suc-cess of live and enterprising merchants, hence THE NEWS takes special pleasure in mentioning the firm of A. D. Aldridge & Co.,

mentioning the firm of A. D. Aldridge & Co., the stationers, steam job printers and book-binders of 623 Elm street, one of the oldest concerns of its kind in Dallas. Mr. Aldridge made a very modest start some seven years ago, having then but a limited capital. Being a practical sta-tioner, he soon built up an extensive busi-ness and has thus continued until now the firm finds it necessary to enlarge their premises once more, so that the store ex-tends 200 feet to Pacific avenue. At the Elm street entrance is the stationery de-partment, further back is the printing de-partment, while the presses are located in the rear. The second story is used as the book-bindery.

Quite a feature of this establishment for the next few weeks will be the prodigious array of goods suitable for the holidays. Their business is growing rapidly and ex-tends throughout Texas and adjoining courage to face the hardships of the world in States, reaching as far as New Mexico.

Case of "Walking Yellow Fever" at New Orleans.

### Special to The News.

NEW ORLEANS, Nov. 27. - The British steamer Venezuela passed quarantine station on the 25th inst. on her way up the river from Colon. The purser, Ernst Richardson, was feeling unwell, but was sitting on deck smoking a cigar. To-day he died on shipboard of what the health officers proon deck smoking a cigar. To-day he died on shipboard of what the health officers pro-nounced a walking case of yellow fever. The Board of Health took steps at once to thor-oughly fumigate the vessel, notwithstand-ing the protest of the captain, who insisted that the purser died from a bilious attack. While the steamship was at Colon the purser went ashore with the ship's passengers, but did not expose himself. The Venezuela is lying at the levee. As the weather is cold, with falling temperature, it is not likely that she will be sent back to quarantine, no fear of other cases being apprehended. of other cases being apprehended.

#### Morgan.

MORGAN, Nov. 27 .- The continued cold rain made Thanksgiving a very dull and dreary day. Dr. R. G. Burleson came down
