Intelligence Gleaned From Numerous Exchanges.
A Few Sparks From Everywhere.

Governor Foster has withdrawn from the Senatorial contest in Ohio.
Elkhart, Texas, was almost completely destroyed by fire on Christmas day.
Chicago is going to build a new and magnificent Chamber of Commerce.
It is hinted that Slosson was swindled in the recent international billiard match.
John Kelly is about to be bounced from the leadership of Tammany Hall. Good.
Emil Hoya, a prisoner confined in the Omaha jail, suicided on Christmas day.
The friends of George Eliot are seeking a place for her remains in Westminster Abbey.

Corporal Norton of the 2nd Artillery was drowned off Fortress Monroe on Christmas day.
Mrs. Kate Chase Sprague, wife of Senator Sprague of Rhode Island, has brought a suit for divorce.
Ex-Archbishop General Ackerman, of Georgia, is a candidate for the vacant Circuit Judgeship.

Many Jews residing in Berlin avoid being seen in public localities. They will emigrate to England.
H. T. Griffin, proprietor of a hotel at Rockaway beach, killed a man named Mahon on Christmas day.
Constable Ed. Hogan, of Las Vegas,

Cause, whiskey and a woman.
Jones & McDonald, heavy speculators in wheat at Chicago, have failed with liabilities amounting to \$500,000.
Frank Henry was shot by Mike McDonald at Central City on Christmas day; he died and McDonald has been arrested.
Ex-Gov. Scott, of South Carolina, the notorious carpet-bagger, killed a decent young man at Toledo, Ohio, last week.
The prisoners confined in the Columbus, Mo. jail manfined last week. The hose was turned on them and they sobered down.
Mrs. Henry Johnston of Trenton was burned to death by a fire in her drawing room on Christmas day. Her husband has been arrested.
Ann Eliza Young had a narrow escape from death in a fire at Auburn Center, Pa. last Sunday morning. She was rescued by a brave fireman.
It is supposed that Senator Blaine will be Secretary of State in Garfield's cabinet. Postmaster Filley, of St. Louis, is expecting the Postmaster Generalsip.
The Morey investigation is still progressing. It is said the real instigators of the Chinese letter are known and will soon be brought to face some damaging evidence.
The president has appointed Generals Crook and Miles and Messrs. Wm. Stickney and W. A. Newton as the commissioners to investigate the troubles of the Ponca Indians.
A. M. Conklin, editor of the Socorro N. M. Sun, was murdered by Mexicans last week. A posse of Americans are in pursuit of the murderers, who are guarded by two thousand of their countrymen. Serious race troubles are anticipated.
The Chicago Tribune's St. Louis special says: Miss Grover, a society belle, yesterday made a confession that she was the mother of a male infant, whose body was picked up in a vacant lot in the city a few days ago. She says she left her bed on the night of the birth—Sunday night—and took her child to the lot where its body was found. Miss Grover refuses to tell who the father of the child is. The coroner's jury found Miss Grover responsible for the death of the infant.

While the honorable Senator from Colorado may not have contemplated the encouragement of that spirit of landed monopoly which has already driven a heroic people to openly defy the authority of their rulers, and which, if not checked by congressional legislation will one day, not far distant, desolate this royal wilderness of the West, yet, Messrs. Editors, the proposed amendment of the mining law is easily adaptable to the purposes of monopoly, and should be regarded therefore with as much alarm as if it originated in the most sinister design. Yes, with all the more alarm, for the direst evils of government spring rather from the abuse of well-meant laws than from openly iniquitous conceptions or avowed attacks against the natural rights of man.
The miners of the Rocky Mountains now, indeed, enjoy a higher degree of freedom than any other class of laborers on earth. But in all seriousness I would warn them to guard with sleepless jealousy this, the immediate jewel of their souls, lest by subtle arts and contrivances they be robbed of their just and rightful privileges and degraded to the very level of slaves. When formerly, as it should be now, the government of the United States acted upon the policy of withholding from settlers upon its public mineral lands the absolute title to such lands, the landholders of mining sections and com-

munities were admirably subserved, I should say promoted. For a while government then reserved to itself the fee simple estate in these lands. It encouraged settlements thereon by protecting discoverers of mineral in the possession of their claims against trespassers and intruders and in the absolute title to the output or yield of ore. But this governmental sanction of the discoverer's right of possession was limited to the period of time during which he should in good faith and with reasonable diligence prosecute his work upon the claim. Then the locator was obliged to make his claim yield according to its capacity, and in default of the requisite diligence he forfeited all right to the claim and any other citizen of the United States was free to occupy, use and enjoy it, so long as he should comply with the measure of diligence it was reasonable to exact. Thus every mining claim was made to yield up its wealth and give employment to the miner, as well as profit to the owner and add to the activity of every branch of industry and trade. The fruits of this, the earlier policy of the government, were such that no effort was made for its disturbance until 1850, when a change was advocated upon the paltry and flimsy pretext of drawing revenue from the sale of the public mineral lands, but in truth and reality for enabling a few rapacious corporations to monopolize, as far as possible, the mineral wealth and resources of the land. After much discussion the proposed change was successfully resisted until the year 1866, when by an act deceitfully entitled an act, a plan of legislation for the sale of lands was inaugurated that has oppressed the laborers of California, until from being the foremost, the proudest and most independent class in the world, they have become the most starved, the most miserable and desperate on earth.
You will observe that the most likely person to own and be generally able to hold any number of claims is a corporation. It would not need to make its properties productive for the purpose of earning a sufficiency for the support and perpetuation of its existence. It could afford to bury its talents. And several soulless speculative concerns by hoarding their possessions for speculation merely, as they easily could, at a comparatively trifling outlay, would be able, as they frequently have done, to paralyze the most active and ardent industry and check, if not, by destroying confidence, stop the growth of any camp. True it is that under the present system of performing annually on each claim a hundred dollars worth of work, speculations are not, unfortunately, by any means powerless in respect to the amount of labor to be performed, or in the manner of its performance, for heaven's sake let not matters be made worse. If the government would abandon a short-sighted policy and adopt a measure that, in the end, by an increased production of silver and gold, could bring vast treasure to its coffers, let it renounce all idea of revenue from the sale of its mineral lands by repealing the law as it now stands. Protect locators of a mining claim and their heirs and assigns so long as they will work them to the extent of their availability. Protect them in the absolute title to the output of their mines and thus by wiping out all possibility of speculative holdings, emancipate mining camps from the blighting shroud of monopoly. Mining sharks will howl, but let them. They will decry mining investments as insecure. We cannot receive—for their investments we care not. Give us active, productive investments, such as would give profitable work to the miners and value and stability to mining stocks. Such as by honest development of the mining industry, bring wealth and prosperity, just and lasting, to every mining district in the west. Very resp'y and truly yours,
J. M. SEMPLE.

The above communication is worthy of consideration and was the outgrowth of a brief synopsis of the bill which we published last week, which stated that our Senator Teller had recently introduced a bill amendatory of the present mining law which provides, that any person owning six or any less number of mineral lodes, ledges or blanket claims adjacent to each other, or not more than half a mile apart, on which the assessment labor for the first year has been performed, may thereafter perform upon any one claim of the combined number the entire assessment of labor upon the whole number of claims, until pay mineral is reached in the claim so worked, when such claim shall cease to be counted as one of the combination and another may be selected upon which to work the assessment upon the remainder, and so on until pay mineral is reached in all, or the ground is abandoned. The bill also pro-

vides that mining claims located since the 10th of May, 1872, whether located by one or more persons, shall not exceed two thousand, five hundred feet in length along the vein or lode and that no claim shall exceed more than three hundred feet on each side of the middle of the lode or location at the surface. While we do not agree with our contributor in all the points made by him, still we are of the opinion that the proposed bill will require extensive amending before it can be of any practical use. There are loopholes visible that would be convenient points of attack for monopolists on the fortress of legitimate mining.

Adverses on Patent Applications.
DEPARTMENT OF THE INTERIOR,
GENERAL LAND OFFICE,
WASHINGTON, D. C., Dec. 10, '80.
To Registers and Receivers U. S. Land Offices:
GENTLEMEN:—In the matter of applications for patents for mining claims where adverse claims are filed in the manner prescribed by law and the official instructions, you will in notifying the adverse claimant that he will be required to commence proceedings in a court of competent jurisdiction within thirty days thereafter at the same time advise him that he will be required within fifteen days after such suit has been commenced to file with you a certificate of the clerk of the proper court that proceedings have been commenced and the date thereof.

It frequently happens that there is no court which has exclusive jurisdiction and in certain states it is competent to commence such suit in any district court of the state. It follows that the applicant for patent (the defendant) in order to prove that no suit had been commenced, would be compelled in such cases to furnish the certificate of every court in which the suit might have been instituted; while the adverse claimant can always, at the minimum expense and trouble, furnish the certificate of the court in which he has commenced suit.

In case no certificate of the clerk of court shall have been filed with you within forty-five days after the filing of adverse claim, the applicant for patent will be allowed to complete his entry upon making affidavit that suit has not been commenced by the adverse claimant.

J. A. WILLIAMSON,
Commissioner.

Lively Times at Robinson.
There was quite a racket last Saturday night at Robinson's Camp. The reporter of the Leadville Herald says that with the advent of Mr. Daly as manager of the Robinson mine, came quite a number of men whom he had placed on guard duty. Some days ago they made quite a disturbance by firing their guns and shouting in the night, but last Saturday night they put their best effort forward and made night hideous. About eleven o'clock the guard fusillade opened. The guards on the mine, which is just back of town, on the north, commenced firing their Winchester rifles and revolvers toward the centre of the town, and within ten minutes there must have been nearly two hundred shots fired. The balls came whistling over the town like a swarm of bees, two or three entering houses, but fortunately no one was hit. If we may credit all we hear at least twenty-five men only escaped by a hair's breadth. We don't care to have any closer interview than we did with three balls last night. We realized about how the boys felt in the army with the shots and shells whistling around them. To add to the entertainment the whistle at the mine joined in the concert for about ten minutes, you can bet your bottom dollar the town was excited.

Men were running and shouting and trying to dodge the bullets, and it was supposed that an attempt was being made to capture the mine. From various things that have come to light since, we are satisfied that no such attempt was made and that there was not even a scare. It is talked upon the streets here by our best citizens that it is a scheme gotten up for a purpose.

TAKING TELLER TO TASK.
Criticisms on the Late Bill Introduced by Senator Teller.

To the Editors of the Dolores News:
I beg that you will allow me to call your attention to a matter that would seem to be of interest to all who have allied their fortunes with those of mining communities and are deeply concerned in the rapid and substantial growth of the mining industry. Senator Teller, has, it seems, introduced a bill amendatory of the present mining law which provides that any person owning six or any less number of mineral lodes, ledges or blanket claims, adjacent to each other, or not more than half a mile apart, on which the assessment labor for the past year has been performed, may thereafter perform upon any one claim of the combined number the entire assessment of labor upon the whole number of claims, until pay mineral is reached in the claim so worked, when such claim shall cease to be counted as one of the combination and another may be selected upon which to work the assessment upon the remainder, and so on until pay mineral is reached in all or the ground abandoned.

While the honorable Senator from Colorado may not have contemplated the encouragement of that spirit of landed monopoly which has already driven a heroic people to openly defy the authority of their rulers, and which, if not checked by congressional legislation will one day, not far distant, desolate this royal wilderness of the West, yet, Messrs. Editors, the proposed amendment of the mining law is easily adaptable to the purposes of monopoly, and should be regarded therefore with as much alarm as if it originated in the most sinister design. Yes, with all the more alarm, for the direst evils of government spring rather from the abuse of well-meant laws than from openly iniquitous conceptions or avowed attacks against the natural rights of man.

The miners of the Rocky Mountains now, indeed, enjoy a higher degree of freedom than any other class of laborers on earth. But in all seriousness I would warn them to guard with sleepless jealousy this, the immediate jewel of their souls, lest by subtle arts and contrivances they be robbed of their just and rightful privileges and degraded to the very level of slaves. When formerly, as it should be now, the government of the United States acted upon the policy of withholding from settlers upon its public mineral lands the absolute title to such lands, the landholders of mining sections and com-

munities were admirably subserved, I should say promoted. For a while government then reserved to itself the fee simple estate in these lands. It encouraged settlements thereon by protecting discoverers of mineral in the possession of their claims against trespassers and intruders and in the absolute title to the output or yield of ore. But this governmental sanction of the discoverer's right of possession was limited to the period of time during which he should in good faith and with reasonable diligence prosecute his work upon the claim. Then the locator was obliged to make his claim yield according to its capacity, and in default of the requisite diligence he forfeited all right to the claim and any other citizen of the United States was free to occupy, use and enjoy it, so long as he should comply with the measure of diligence it was reasonable to exact. Thus every mining claim was made to yield up its wealth and give employment to the miner, as well as profit to the owner and add to the activity of every branch of industry and trade. The fruits of this, the earlier policy of the government, were such that no effort was made for its disturbance until 1850, when a change was advocated upon the paltry and flimsy pretext of drawing revenue from the sale of the public mineral lands, but in truth and reality for enabling a few rapacious corporations to monopolize, as far as possible, the mineral wealth and resources of the land. After much discussion the proposed change was successfully resisted until the year 1866, when by an act deceitfully entitled an act, a plan of legislation for the sale of lands was inaugurated that has oppressed the laborers of California, until from being the foremost, the proudest and most independent class in the world, they have become the most starved, the most miserable and desperate on earth.

You will observe that the most likely person to own and be generally able to hold any number of claims is a corporation. It would not need to make its properties productive for the purpose of earning a sufficiency for the support and perpetuation of its existence. It could afford to bury its talents. And several soulless speculative concerns by hoarding their possessions for speculation merely, as they easily could, at a comparatively trifling outlay, would be able, as they frequently have done, to paralyze the most active and ardent industry and check, if not, by destroying confidence, stop the growth of any camp. True it is that under the present system of performing annually on each claim a hundred dollars worth of work, speculations are not, unfortunately, by any means powerless in respect to the amount of labor to be performed, or in the manner of its performance, for heaven's sake let not matters be made worse. If the government would abandon a short-sighted policy and adopt a measure that, in the end, by an increased production of silver and gold, could bring vast treasure to its coffers, let it renounce all idea of revenue from the sale of its mineral lands by repealing the law as it now stands. DOLORIS NEWS.
 SINGLE COPIES 40 CENTS.
 PUBLISHED EVERY SATURDAY BY
 JONES & HARTMAN, PUBLISHERS.
 CHAS. A. JONES. FRANK HARTMAN.
 RICO, COLORADO.
 Dolores Carbonate Camp.
 SATURDAY, JANUARY 8, 1891.

OH! FOR OPHIR.

"Look ye Sir Lucius" exclaims Bob Acres in Sheridan's famous comedy, "is't not I that mind coward, coward may be said in a joke, but add poltroon, and odds darters and blows". "Look ye Dolores News" exclaims the *Muldoo*, "you have been hitherto masquerading in sheep's clothing, when you should have donned the garments of the wolf." Pithee, *Muldoo* spare us; far be it from the News to shirk its duty, even at the cost of creating the displeasure of our esteemed contemporary. The last issue of Ouray's chief newspaper contains some severe strictures on the course of the News, regarding our attitude on the county division, principally the annexation of Ophir to the new county. We can trace the fine Italian hand of Mr. Jerrold R. Letcher in the make up of the article, and we are sorry that it should be so. It will be remembered that the gentleman named was the nominee of the Democratic party for representative to the Legislature at the recent election. He received a very flattering vote, and had no more staunch friends and supporters in any part of the district than in Rico. His party friends labored hard and earnestly for him before and during election, and grieved because he had not a majority of votes. We believe Mr. Letcher to be an able, honorable man, but find it hard to reconcile his course during the canvass, with his utterances of to-day. The writer distinctly remembers, that Mr. Letcher promised to use his influence, if elected, to have Ophir annexed to the new county.

When approached on the question of annexing San Miguel, he said the people of that camp should decide for themselves, that if they wanted to remain with Ouray he would not try to force them to leave against their will, but if they wanted to hitch on to Rico and the new county, he would make no effort to prevent them. Such was his attitude then, high toned and manly, yet now we see him in the garb of a pettifogger, making lame arguments and explanations against his pledged faith when seeking the suffrage of the people. Mr. Letcher, from a remark made by him in his article, shows his *animus* when he says that a two faced game was played on election day, which, when translated means that he was sold out and Mr. Hudson elected on the merits of a private bargain. This is a mistake: Mr. Letcher's party friends gave him an honest, manly support at the polls and even now find no cause to regret it, notwithstanding the fact that he has seriously deranged his attitude on the great prevailing question, then as now before the people of this district.

We find that both the Ouray papers are fond of using the word "hoggish" and though we cannot compliment their taste in the choice of words, we think that particular word is far more applicable to Ouray than to Rico, Ouray county with a territory as large as some Eastern states, is selfish enough to try and prevent the young offspring of her own loins, from taking even a living share. We ask for nothing but our right, and that we demand. The business interests of Rico demand a new county, merely because of the arrant inconvenience attached to the transaction of business at the present county seat. No reasonable person should expect that we could bear that burden any longer. Just imagine, traversing eighty miles of trackless waste, mountain, defile and glen to reach the seat of the county! Ophir is but a little more than twenty miles from Rico; it is more than sixty miles from Ouray. According to the natural order of things, it belongs to the new county, and Ouray will be the personification of selfishness if it tries to prevent it. Mr. Letcher could certainly employ himself in business more congenial to his tastes, and more pleasing to his friends, than making a tall to Goudy's kite, or in other words playing second fiddle to that harlequin. Many, very many, of the best friends of the News reside at Ophir, and when we advocate their divorce from Ouray, and marriage to the young and charming Dolores, we seek their benefit as well as our own.

The press of Colorado is a credit to the State. The special New Year's editors of some of our contemporaries are simply superb, and places the journalistic profession not far from the top round of the ladder of Colorado enterprise. So far the *News* and *Tribune* of Denver and the *Mining Register* of Lake City have reached this office. They are all good, but the laurel must be given to the *Tribune*, which is as fine a piece of journalism as we ever saw. The *News* is very creditable, and the *Mining Register*, considering its facilities and disadvantages is very good. The people of Colorado should see that the papers named lose not by

the enterprise. 100,000 copies of these papers should be sent east, and a million dollars worth of benefit would be done the State.

"THIS LECTURES."

Prof. Seaton Turns Himself Loose on an Innocent Public.

Prof. Seaton delivered his long contemplated lecture on the "Science of Man" last Tuesday evening and truly it was a wonder in more than one sense. The Professor is, as is well known, the most thoroughly organized Polytechnic Institution in the San Juan country, and consequently has only to open his mouth and the mysteries of science will flow out of their own accord. He was greeted by a goodly audience, who wrapped in attention throughout, thereby displaying the grandest exhibition of patience it was ever our lot to witness. The Professor was assisted by Mr. A. H. Mundee, whose stage name is "Baubee." "Baubee's" business on this special occasion was to read copious extracts from the works of Prof. Fowler and others. The lecture began with "Baubee" at his post and the lecturer speaking low and looking wise. Professor John Quincy Adams, another scientist, interrupted the speaker, and asked him to speak a little louder, whereupon the learned orator of the evening indignantly remarked: "I'll chunt my voice to suit myself." We have not the space to give a detailed report of the lecture, but at heavy expense and a commendable outlay of enterprise, are able to lay before our readers the following literary gems culled from the lecture during its progress. He talked about man's "physognomy" of "gobler," (meaning globular); said he would not enter into any argument, as the book "corroboral" what he said; that no man was a "fack similar" of another; that man was possessed of "irascible tempements;" referred often to "clementativeness;" said he was proud to be able to address such an "intelligent ordinance;" said "you know" 177 times, actual count; addressed his hearers as "men and ladies"—a very fine distinction; said the "blooms of our life" pass quickly; that he was thankful to all who attended "this lectures" said in reply to Adams, who wanted a division of the time; "this is my meetin'" and when remonstrated with, said: "go and get a meetin' of your own;" said encouragingly, "people need not be disappointed because they haven't heads like Daniel Webster or me;" made an effort to say "comprehend," getting as far as "com—comp—compre—" and then scratched his head and said "understand;" said "a frog is froggy, a fish is fishy, and a man is manny." Talking of ladies, he said they were darlings from their "missy, up;" paid a compliment to the book from which "Baubee" was reading by saying: "that book can explain it nearly as well as I can;" talking of human nature, he said he "saw a man get so mad that he just laid down and died."

There were several other *bon mots* by the Professor, but the above are all the News reporter was able to catch. Towards the close, Prof. Adams' ambition to "examine heads" was gratified, but Mr. Seaton wanted it understood that such grace was owing to his generosity. A collection was taken up and \$2.85, one pack of cards, several quids of masticated tobacco and a couple of buttons were received. We understand that "this lectures" will be continued at some "previous" time—probably on next Tuesday evening.

The Jeldnes brothers, of Poughkeepsie gulch, want to snowshoe against any man or men in the world. We have seen them and know what they are. Their challenge "goes" for \$1,000 to \$2,000.

The entire nation seems to have had a "bad" fit during the holidays. Accounts of murders, lynchings, stabbings, shootings, suicides, etc., are too numerous for a timid person's contemplation.

ORDINANCE NO. 33.

Be it ordained by the Board of Trustees of the Town of Rico:

SEC. 1.—That it shall be unlawful for any person to carry any revolver, pistol or firearm of whatever nature in the streets of Rico, either concealed or unconcealed, without the permission of the Mayor of said town in writing.

SEC. 2.—Any person found guilty of the above offense shall, upon conviction, pay a fine of not less than \$10.00 or more than \$25.00 for each and every offense.

F. W. RAYMOND,
 Mayor.
 Attest: D. McGraw, Clerk.

NOTICE OF FORFEITURE.

Rico, Ouray county, Colo., Jan. 8, 1891.
 To Wm. Moore and Alex. Blair:

You are hereby notified that I have expended one hundred dollars in labor and improvements upon the George Washington Lode, situated on the north side of Horse Creek, on the East side of Elliott mountain, in Pioneer Mining District, Ouray county State of Colorado, as will appear by certificate filed in the office of the recorder of said county in order to hold said premises under the provisions of section 2324 Revised Statutes of the United States, being the amount required to hold the same for the year ending December 31, 1890, and if within ninety days from the service of this notice by publication you fail or refuse to contribute your proportion of such expenditure as co-owners, your interests in said claim or lode will become the property of the subscriber under the provisions of said section.

J. W. LAMON.

RAILROADS.
DENVER

—AND—
Rio Grande

R.Y.

SATURDAY, JANUARY 8, 1881.

Wants, For Sale, Etc.

These Notices at the Rate of Ten Cents per Line.

FOR SALE. A splendid residence location, apply at the News office.

FOR SALE. A HOUSE COVER, 18x22, of best quality ducking, only used about a month, good as new. Will be sold cheap. Apply at the office of the News.

Clear, but cold.

Firemen, see notice in this issue.

A dancing school is in contemplation.

The lecture of last Tuesday was an immense success.

Bring in your notices of forfeiture to delinquent partners. Time's up.

Keno Joe, sometimes called "Evil Eye of San Juan" says the Utah widow did not fire him.

Rev. C. M. Hoge, our Rico spiritual adviser, has arrived—in Durango. He brings his wife with him this time.

The Southwest has removed its office to Durango, an event which has long been looked for. Romney & Reid.

Mrs. Tremble has been quite sick during the past two weeks, but we are glad to know that she is now out of danger.

The bars of silver bullion in the Bank of Rico have a substantial appearance that does the soul good. They are from the Grand View smelter.

The "fair hands" that garlanded the hall for the Miners' Union dance were those of John Garland, the blacksmith. Grand opportunity for a pun thrown away.

The malicious burning of a young gentleman's coat the morning after the miners' dance, was a shame, and the perpetrator should be sought out and punished as such vandalism deserves.

Rico has a school in full blast. Daily the pleasant faces of the school children can be seen on our streets and their merry, joyous laugh heard. It is under the charge of Mrs. McCollon, a competent and efficient teacher.

Capt. W. H. Bennett returned from the end of the track on Wednesday. Messrs. Edlich and Arnold went on to New York, where they will transact some important business and return at once to inaugurate a season of active work at the smelter.

Subsequent developments indicate that in the shooting affray at Durango Wilkinson was acting in self defense. Public opinion in Durango is greatly in his favor, and had it not been for the advice of his friends he would never have left town.

A mutual admiration society has been formed here, the members of which have promised each other the offices of the new county. They nominate each other, second the nominations and in fact do everything but elect themselves. There's the rub.

The Durango Daily Record comes up from the new town. It is edited by Mrs. C. W. Romney, formerly of Leadville. Our partner is down at Durango and if he comes back safe we may have something more to say on this subject. Until then, mum's the word. Yes, mum.

Mrs. Romney and the Southwest man are already engaged in a newspaper hair-pulling. Its all about the meaning of the word "Durango," the former holding that it means "divergence," and the latter says it signifies "durable." It is man vs. wo-man, and may the best man win.

Burns & Co., forwarding and commission merchants, at Chama, have something to say in this issue. The firm is a sound one and they will do justice to consignees. We have long needed a No. 1 forwarding house at the end of track, and now we have it. J. L. McNeill, the well-known cashier of the Bank of San Juan, is one of the partners, which guarantees that everything connected with the firm will be conducted in a business-like and accommodating manner.

A. K. Prescott, our popular and efficient Postmaster, departed for the east last Tuesday. Before his return he will visit the scenes of his childhood, among the snow-capped hills of old New England. He will also visit Washington, Philadelphia, and the adjacent cities. Mr. Prescott made a competent postmaster, his administration of that office giving general satisfaction to all. We hope he will have a pleasant trip, and on his return be improved in health, ready to enter on an active campaign with the rest of the live Ricotites next summer. Fred E. Hutchinson has charge of the P. O. during Mr. Prescott's absence.

Ballou & Cowen, of the Hotel Windsor, Durango, are the best men in the best place in the west. Their many guests appreciate this fact and never lose an opportunity to return to the old place for substantial board and good, warm beds. The Hotel Windsor is the best furnished hotel in the new town and as hot meals are always ready on the arrival of stages

from either north or south and as a natural consequence it is headquarters for all travelers. When you have tried it once you cannot be induced to go elsewhere. "All the market affords" is a common expression, but it is realized to its full extent here, and what the market don't afford is kept down in the cellar.

Debating Society.

A number of young men met at Bean's Hall on Friday evening and organized the Rico Literary and Debating Society. This is a move in the right direction. An association such as the above, will be both pleasant and instructive, if properly managed, and we have every reason to believe that the one just organized will fill the bill. About twenty-five members enrolled themselves, and the following officers were chosen:

President, Julius Thompson; vice pres, Richard Pohl; secretary B. F. Klee; treasurer W. H. Bean. A financial committee, who are also a board of trustees, were chosen, comprising L. Alderman, O'Brien Moore and A. H. Munde. Fifty cents initiation fee is charged for gentlemen, and ladies are admitted to membership free of cost. The society will meet at Bean's hall next Thursday evening, when the question, resolved "that intoxicating liquors are more destructive to the human race than war" will be debated. Recitations, readings and essays will comprise the exercises of the evening. It is to be hoped, the ladies will turn out in full force and a pleasant time is guaranteed.

A Rico Boy Shot and Killed near Farmington, N. M.

Many of our readers were acquainted with Oscar Puett, who owned "Buckeye," the race horse and who was in Rico last summer. On Christmas Eve he was accidentally shot and killed at a dance given at the residence of P. M. Hamblat, on the Rio San Juan. The Southwest states that no invitations had been extended to Dyson Eskridge, James Garrett and Oscar Puett, and that they went to the dance with the intention of breaking it up. To use the language of that paper:

"Entering the house, they poured forth a volley of insulting epithets, whereupon Mr. Hamblat requested them to leave his premises. At this juncture Eskridge and Garrett ran out into the open space in front of the house, when they turned and fired several shots at the open door through which Puett, who had loitered behind, was just rushing out. The bullets carried death to friend and foe. Puett staggered, ran a few feet into the darkness, and fell dead. Young Brown, who was leaning against the door casing, received a bullet in the breast, and died within a few minutes thereafter."

During the time which Oscar remained in Rico his conduct was that of a quiet, gentlemanly boy, and it is hard to think that he should have acted in the manner above described. From private sources we learn that there was shooting on both sides, which renders it hard to determine whether or not Puett was as much to be blamed as would appear by the account given in the Southwest. There may have been circumstances which do not appear on the surface as yet, so we will give the dead boy the benefit of the doubt until the true inwardness is exposed to public gaze. Eskridge and Garrett left immediately after the shooting and their whereabouts is a mystery which remains to be solved.

BUSINESS DEPARTMENT

- Splendid Oat meal at D. McINTYRE'S.
Pure Apple Vinegar at D. McINTYRE'S.
Dried Fruits of all kinds at D. McINTYRE'S.
A large assortment of Canned Goods at D. McINTYRE'S.

Office at the drug store of Hunt & Munroe, where all orders may be left. Passengers taken on the return trip at \$5.00 each. 69-67 Dawson & Porter.

A Good Thing for Miners and Lawyers.

A seventh edition of that much praised book, COPP'S Hand Book of Mining Law, will soon be out; to contain the State and Territorial Mining laws, and instructions how to examine title, in addition to the lists of Government patents, digest of decisions, and other good things in previous editions.
Its editor, Henry N. Copp, of Washington, D. C., has an extensive work on the same subject in press. It will give in full, the Land Office and court decisions now in force, and be the authority on United States mining law without doubt.

NOTICE OF FORFEITURE.

Rico, Ouray County, Colo., Jan. 1, 1881.
To Theo. L. B. He, Gustave Belle and Mrs. Gertrude Schwenck:
YOU are hereby notified that I have expended one hundred dollars in labor and improvements upon the Sulphur Mine, in Pioneer Mining District, Ouray County, Colorado, as follows: On the 1st day of July, 1880, in B. M. S. No. 330, in the office of the Recorder of said county, in order to hold said premises under the provisions of section 224, Revised Statutes of the United States, being the amount required to hold the same for the year ending Dec. 31st, 1880. And if within ninety days from the date of this notice you fail or refuse to contribute your proportion of such expenditure as co-owners, your interest in said claim will become the property of the subscriber under said section 224. 69-83 CHAS. FORSBERG.

NOTICE OF FORFEITURE.

Rico, Ouray County, Colo., Jan. 2d, 1881.
To Levi Trentham and E. J. Sirel:
