### Extraordinary Offer to All Wanting Employment.

We want live, energetic and capable of great merit, ON ITS MERITS. An article having a large sale, paying over 100 per cent. profit, having no competition, and on which the agent is protected in the exclusive sale by a deed given for each and every county he may secure from us. With all these advantages to our agents, and the fact that it is an article that can be sold to every house owner, it might not be necessary to make an extraordinary offer to secure good agents at once, but we have concluded to make it to show, not only our confidence in our invention, but in its salability by any agent that will handle it with energy. Our agents now at work are making from \$150 to \$600 a month clear, and this fact makes it safe for us to make our offer to all who are out of employment. Any agent who will give our business a thirty day's trial and fail to clear \$100 in that time, above all expenses can return all goods unsold to us and we will refund the money paid for them. Any agent or general agent who would like ten or more counties and work them through sub-agents for ninety days, and fail to clear \$750 above all expenses, can return all unsold and get their money back. No other employers of agents ever dared to make such offers, nor would we if we did not know that we have agents now making more than double amount we guaranteed, and but two sales a day would give a profit of over \$125 a month, and that one of our agents took eighteen orders in one day. Our large descriptive circulars explain our offer fully, and these we wish to send to every one out of employment who will send us three one cent stamps for postage. Send at once and secure the agency in time for the boom, and go to work on the terms named in our extraordinary offer. We would like to have the address of all the agents, sewing machine solicitors and carpenters in the country, and ask any reader of this paper who reads this offer, to send us at once the name and address of all such they know. Address at once, or you will lose the best chance ever offered to those out of employment to make money.

## Connecting Rico and San Miguel.

On the subject of good wagon roads connecting Rico and towns of the San Miguel country, "Captain," the Ames in Kansas City in June, 1883. The quar correspondent of the Telluride Journal, rel arose over Stein's attentions to Fredhas the following sensible remarks:

"As the company that graded the read from Ames to Trout Lake has abandoned it, is it not time that the entire road up to the Dolores divide was open? We, on this side of the county, feel that we should receive some consideration from the board at this time, as the opening up of this road would be a great benefit to the entire county of San Miguel. Hoping our commissioners will take some favorable action at the next meeting, we dismiss the subject for the present."

The following articles relating to the same subject are from the Telluride News:

THE WEST DOLORES.

A General, Interesting Description of a Rich Locality.

The dormant sleep that has claimed the West Dolores since the little Suse's un founded boom is about to awaken into the realization of the credit of which she is deserving as a mineral producing camp of the San Juan. The small amount of development that has been made, has proved the camp far superior to its former reputation, regardless of the Bowen townsite boom. The camp is situated about 9 miles north west of Rico in the most pleasant valley of the Rocky mountains, having a natural outlet to the south which F. J. Walker commenced work for the at no distant day is destined to be a paradise. The valley is a natural resort for all curiosity seekers from all parts of the world. The old ruins found there are ev-Several hundred tons of ore are lying idence of inhabitants of whom there is no in sacks in the Trout Lake, Ames and history chronicled. articles used by intelligent human beings are frequently found. But from our southern meanderings to return to our camp; the beautiful valley is dotted with pleasant ranches occupied by families enjoying pleasant home life upon their ranches; and in their leisure hours enjoy ing themselves trout fishing, deer hunting and berry picking, in the most genial climate ever our God blessed any country

And now in alluding to our camp, which is situated at the head of the valley just mentioned, we will positively say it is one of the most pleasantly situated camps in n the San Juan, having the natural re ources alluded to above. Right in the heart of the camp are hot mineral springs highly approved of by learned physicians as being very beneficial for numerous diseases afflicting the human family. There is also a natural geyser spring of mineral water. This spring rises and falls inter the shaft. The property belongs to Henmittently about every half hour, giving a green and yellow stain to the rocks around it. Pence's bill providing that all convicts sentenced to be hanged shall be executed in the penitentiary was taken up in the House last Tuesday afternoon. The bill might possibly be of interest to some of our readers-if not now particularly, at

some future time, perhaps. The bill provided that the convict should be confined in the penitentiary at hard labor for six months before the execution. Mr. Stirman moved to amend this by srriking out the hard labor provision.

Mr. Pence accepted the amendment, but Mr. Gilmore and Mr. Rollins held that it would be more merciful to the prisoner to allow him to work than to keep him in confinement under the circumstances.

Mr. Stirman held that the time should be allowed him to prepare for death. A compromise was finally reached by

an amendment offered by Mr. Rollins, allowing the convict to be put at hard labor if he preferred it to remaining idle. Mr. Stirman offered an amendment allowing all members of the press to be

present at such executions; adopted. Mr. Pence moved to amend by providing that the expense of the execution should come out of the penitentiary ap-

propriation fund; adopted. The bill was reported for passage

Business For Ladies.

The opportunities for ladies to find employment that is both suitable and renunerative are limited; their pay is usu ally poor as compared with the salaries paid to men in same line of occupation. But there are some very noted exceptions journalism, the drama, music and plat-form offer equal advantages to men and women, and one occupation in which women are sometimes more successful than men, and that is in the management of agencies. In this line The Queen City Suspender Company, of Cincinnati, O. are offering inducements to ladies that we think ought to attract attention. They are now manufacturing and introducing their new Stocking Supporters for Ladies and Children, and their unequalled Skirt Suspenders for Ladies. None should be without them, our leading physicians recommend them, and are loud in their praise. These goods are manufactured by ladies who have made the wants of ladies and children a study, and they ask us to refer them to some re liable and energetic lady to introduce think that an earnest solicitation in every household would meet with a ready response, and that a determined woman

The Business of Prospecting. The Denver Mining Review says: The business of prospecting is recognized to be as legitimate and regular a means of gaining the necessaries of life, with a chance for some of its luxuries in the future, as that of the miner or mill owner. Every man who has a knowledge of nature's ways sufficient under ordinary circumstances to render him able to seek intelligently over the surface of a given section of country for mineral veins, possesses something which has cost him years of toil and hardship to obtain. Such a laborer is just as worthy of his hire as one in any of the other walks of life, and to think of being able to secure the services of a competent prospector for a mere grub stake. "with tobacco and clothes thrown in," is the height of absurdity. None but the lazy and utterly worthless vagabonds who every summer swarm through the mountains living off "grub stakes" furnished by unsuspecting novices in mining, will nowadays accept propositions involving, if honestly carried out, the maximum amount of trouble, and the minimum amount of reward, unless good fortune should befall. When, therefore, uninformed persons do not succeed, as is usually the case, in procuring property of some value, it will, when investigated, usually be found to be due to the employment of the class of mount ain vagrants described, and this being so, their strictures upon prospectors are merited, as applied to those they have had dealing with. The only sensible method, and the one which is regarded with the most favor among those with whom the prospector employed is furnished with and economically, according to dictates of his judgment. When we use the word individual whose chief qualifications consist in his ability to absorb large quantities of whiskey and talk loud and knowtheir special attention. Those versed in nature's hand book as revealed upon the leans is just 5 days. many open pages spread out before the gaged. Others might and often do con- Depot. ceal important discoveries until such time as they can secure it for themselves

It is the tendency of the times to get hold of bonanza mines. "Bring me a Train leaves at 6:30 a. m. property worth \$1,000,000," says the broker. "and I will find you a purchaser, at once." At the same time a mine that would be dirt cheap at \$10,000 goes begging for a purchaser, simply because it is too small a matter to get the attention of men who have money. Now it is a fact that money in mining is not made from have come to realize this long since. It is the undeveloped property or the promising prospect made into a big mine, that gives its owners the millions. If a fair interest upon a large amount of money is all that is desired, then it is well enough to invest in a bonanza mine, but the big money is not to be made in that way .- Denver Mining Review.

THE House by a unanimous vote passed the bill appropriating \$25,000 for the construction of a bridge across the Grand river in Mesa County. One of the conditions of the bill is that Mesa County will subscribe an additional sum of \$15,000 to aid in the construction of the bridge. This bridge, if built, will cross the Grand at a point about half a mile above the mouth of the Gunnison. It is on the old Salt Lake wagon road, and during a great portion of the year it will be an absolute necessity to enable people, other than railway travelers, to cross the Grand. There have been during the past two years a great many lives lost in attempting to ford the Grand, which is the largest river in the state and one of the largest in the West.

No less than ten thousand deer hides have been shipped from this place this week. Unless some check is put upon this wholesale slaughter of deer, in a few years they will be entirely exterminated. The law has no objection to a man killing enough for his own use, but it does intend to prevent men from useless and wicked slaughter. It is not probable in the scope of country these hides came from, that they were all used for food. IN THE WORLD Hunters should have more regard for the law .- Grand Junction News.

A. C. Schafer of Georgetown slaughtered a cow last week from the stomach of which he took about seventy five nails and twenty-five other metallic pieces, consisting of wires, rings, tacks, staples, etc. The animal had probably swallowed them while picking hay from the streets or elsewhere. The cow was fat and perfectly healthy, notwithstanding the miscellaneous hardware that she carried in her digestive organs.

To New Orleans and Return.

To the Public:

I now have on sale a full line of New Orleans Exposition and New Orleans Tourist tickets.

The Exposition tickets are good for 50 days' time and cost \$88.00 for the round

\$95.25 for the round trip.

Both styles of tickets are good for 15 you can be 15 days en route after starting from either Durango or New Orleans. This gives for the Exposition tickets 30 address

days that you can use en route, and 20 days at New Orleans as the utmost limitas much less than that as you desire; but no less time spent at New Orleans will give you any more time on the road.

The Tourist ticket is intended for such as desire to stay in New Orleans or any part of the South for several months or the whole winter. For instance, a party desiring to spend the winter in Florida can procure a Tourist ticket for \$95.25 that will take him to New Orleans, and from thence he can go to Florida for the winter and return on his ticket in the spring any time before June 1st.

The distance from Durango to New Orleans is from 2,000 to 2,300 miles, ac cording to what route is taken. This makes the rate an average of only 2 cents

The regular fare from Durango to Denver is \$31.45, or \$62.90 for a round trip. The rate from Denver to New Orleans being \$52.75 for the Exposition and \$60.00 business of prospecting and mining stands for the Tourist, it is easily seen that the in a favorable light, is that by which the D. & R. G. are doing their part in this matter, their proportion of either of the means and material to operate quickly rates being \$35.25 for the round trip, or only a small per cent. over half fare.

I am also prepared to check baggage prospector we do not necessarily mean an through to any point en route or to New Orleans.
