Agricultural Census Plans Announced

Plans for taking the 1964 Census of Agriculture, in Briscoe County were announced to-day by W. V. Swinburn, newly-appointed census crew leader for the county.

The job will be done in three stages, the crew leader said. First will come recruitment and training of enumerators to count all farms in the county. About one enumerator for each 150 farms will be needed.

Shortly after November 19 the Bureau of the Census, an agency of the U. S. Department of Commerce, will start the second stage by mailing agricultural census questionnaires to all rural boxholders in the county. This will give farm and ranch operators who are required by law to fill out the forms, a time to consult their records and fill in answers to the questions.

In the final stage, enumerators will visit each farm in the county to collect the questionnaires. At the time of this visit, ers complete answers to any Bill Clardy was born April guestions the farmers may have had difficulty with. Enumer-

Perfect Partner for Steak

I taith their steak may differ from the steak accompaniments rived elsewhere.

As you may have guessed, rice is a frequent partner for steak a the southern states which produce most of the rice used in the southern states which produce most of the rice used in also country. For example, Mushroom-Almond Rice, a favorite cipe from the files of a Texas homemaker, is often served with cak, and with roast beef, too. It is a savory mixture of rice cooked in beef bouillon with onion then mixed with sauteed amonds and mushrooms, and it takes lots less time to prepare han it does to broil a thick beef steak.

Indeed, families of the men who produce rice in this country ke to eat rice in every conceivable way and rice is kept on hand tall times, uncooked and cooked — the latter stored in their efrigerators and home freezers. They know how easy it is to look rice and how simple it is to reheat refrigerated and frozen ice. The magic 1-2-1 method of cooking rice, originated in the ce belt, is as follows: Combine 1 cup regular milled white rice, cups water, and 1 teaspoon salt in a saucepan. Heat to boiling, fir once, cover, lower heat. Simmer 14 minutes. Do not peek for reheat cooked rice, add 2 tablespoons liquid to each cup and cook, covered, for 4 to 5 minutes.
