Joe Weldon Bailey To Wed Canyon Girl

An announcement was made in the community recently that Miss Virginia Sturrock, daughter of Mr. and Mrs. Joe Weldon Bailey, son of Mr. and Mrs. H. J. Bailey, both of Quitaque, will be married to Mr. George Alexander Harrell, of Canyon. The wedding will be held at the home of the bride's parents on May 30, with the Rev. Arv C. Kiser officiating. It is expected that the couple will make their home in Canyon.

Local Group Attends Funeral of Pioneer

The school band of the Local Group attended the funeral of an elderly citizen of the district, as a mark of respect.

For Next School Year

The local school board has named the faculty for the next school year. The list is as follows:

Superintendent: E. W. Scheid
Principal: Joe D. Slack
Aggie Instructor: Faye S. Scott
Grammar School Principal: Anna May Curtis

Memorial Day Will Be Observed Tuesday

The annual Memorial Day observance will be held at the cemetery on May 29. Those interested in participating are asked to meet at the school at 9 a.m.

Notice, Car Owners

Let us give your car a REAL washing—finished up with proper Certified Mobilization.

We have installed a power car washer, using 400 pounds of pressure, which enables us to give you the fastest service in the best quality car washing obtainable. We do not wash the dirt wherever it may be—on the body, under the car and fenders or under the hood. We do a thorough job in much less time than has been possible before—and the charge is no greater than in the old slow way.

"THE QUICK and ECONOMICAL Way"

"Heroes at Leisure"

"Terraces Alone Do More Good on Farm and Ranch Than $20,000,000 Marshall Ford Dam Without consumption of any water through the irrigation works for farmers, ranchmen, and county agents, over 90,000 barley raised in 1938 and 1939. This and similar dams earned the same amount as $20,000,000 Marshall Ford Dam in the West Texas region last year. They saved the city of Terrell, Texas, the same amount at that held by the Blackwell Dam, which will save the city $8,000,000 a year. The State of Texas, therefore, is using the same amount, at least by the Blackwell Dam, which will save the city $8,000,000 a year.

The Blackwater Dam is the largest dam of its kind in the world—were built in the world—were built... in the world. The dam began to be built in 1938 and was completed in 1941 to provide the water for the Terrell, Texas, water supply. The dam is 900 feet high and 1,500 feet wide at the top. It is located on the Colorado River, approximately 30 miles north of El Paso, Texas. The dam has a capacity of 100,000 acre-feet of water, which is equivalent to 1,700,000 acre-feet of water. The dam is operated by the U.S. Bureau of Reclamation and is managed by the Blackwell Dam Authority, a public corporation established under the authority of the Blackwater Dam Act of 1938.

The dam is designed to provide a steady source of water for the Terrell, Texas, water supply and to provide flood control for the upper portion of the Colorado River. The dam has a spillway and a溢流 well, which is located on the west side of the dam. The spillway is used to release excess water from the reservoir during high flows and to provide a means of discharge during flood conditions. The溢流 well is used to provide a source of water for the Terrell, Texas, water supply.

The dam is also designed to provide power for the Blackwell Dam Power Plant, which is located on the west side of the dam. The power plant is operated by the Blackwell Dam Authority and is used to generate electricity for the region. The power plant has a capacity of 50,000 kilowatts and is operated by the Blackwell Dam Authority.

The dam is a key component of the Colorado River System and is an important part of the water resources of the region. The dam is operated by the U.S. Bureau of Reclamation and is managed by the Blackwell Dam Authority, a public corporation established under the authority of the Blackwater Dam Act of 1938.
