A GAS outdoor grill gives food a tangy outdoor flavor without the time and bother of charcoal fire. Char-broiled flavor comes from the smoke of meat juices dripping on hot briquets. Charcoal itself provides no flavor.

Permanent ceramic briquets in the gas grill reach cooking heat in a few minutes, and there is no long wait to start cooking. The heat is regulated manually so there is no need to move a grill up or down.

You have been so sympathetic through the long illness and the passing of our dear mother that we are at a loss in expressing our thanks for your prayers, cards, flowers and the wonderful meal that was served by the ladies at Turkey, and all other memorials and expressions of understanding from all of you.
