As I See It!

By Thelma Gafford

Last Friday we ended our nights of whopping, and hollering and acting like idiots all for the sake of a touchdown, tackle or extra point.

Now we parents and fans will be confined inside a gym beginning with a scrimmage at Valley tonight (Thursday) at 6 p.m. We probably didn't have enough time to get settled down, so we'll have to work on that.

Anyway, basketball is under way now and if you think things have been hectic before, you'd better grab another gear, or you'll never keep up.

Our Ag students did very well last week at Clarendon in the FFA leadership contests. We picked up two first places and one second place. We'll try to get a complete story and list of students by next week.

The Great American Smoke Out is coming up. I'm not sure of the meaning-Is it smoke out or go out to smoke? I already do that. I do try to show respect to non-smokers and maybe someday I'll manage to quit. I do admire the people that have won this battle.

Well, this is the D-Week. We school parents know what that means. Deficiency reports...the D---word. If one shows up in your mail, please take advantage of the tutoring.

That's it for now.

Answers To Tax Questions

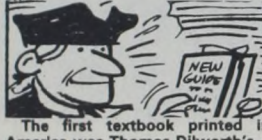

If you have a question about state taxes, write to: Bob Bullock, Comptroller of Public Accounts, Austin, Texas 78774, or call 1-800-252-5555.

Dear Bob Bullock: My company provides mowing and groundskeeping services to local cemeteries and funeral homes. Should we be collecting sales tax on our charges for these services?
M.G., Dallas

Dear M.G.: You shouldn't collect sales tax on your charges for providing grounds maintenance, such as mowing and pruning, to cemeteries. However, when you provide these services to a funeral home, or any other businesses or individuals, you should collect sales tax on your charges.

Dear Bob Bullock: I read recently that the taxability of items bought with coupons has changed. Could you explain the new rule.
B.P., Austin

Dear B.P.: I'd be happy to. Tax is due only on the actual price paid for taxable items bought with coupons. Store should subtract the value of the coupon before figuring the amount of sales tax due.

Hotel Rooms Available For Cancer Patients in Amarillo

The Amarillo Unit of the American Cancer Society, in conjunction with Amarillo hotels and motels, is helping to meet the lodging needs of cancer patients.

The Guestroom Program is a cooperative effort that provides complimentary housing for needy cancer patients and their families in the Panhandle, New Mexico, Oklahoma, and Kansas areas for treatment, reported David Rau, volunteer chairperson for the Guestroom Program.

The American Cancer Society is working with fourteen hotels and motels who have agreed to participate in the program. Qualified patients stay in only one hotel which is selected on a rotating basis.

"The program was designed to ease the physical, emotional, and financial hardships that occur when a patient has to travel great

distances for treatment. Cancer patients undergoing radiation therapy may need up to six weeks of housing. The hotels have been very generous to donate the rooms for the needed time period," said Mr. Rau.

A review committee evaluates each case to ensure proper placement and need. Two days advanced notice is required to coordinate placement with the participating hotel.

Hotels and motels participating in the A.C.S. Guestroom Program include the Amarillo Hilton, Big Texas Inn, Camelot Inn, Days Inn, Fifth Season Inn East, Fifth Season Inn West, Hampton Inn, Howard Johnson East, LaQuinta Inn Coulter, LaQuinta Inn, Amarillo Medical Center, Los Cuartos Inn, Quality Inn Westgate, and the Sheraton Amarillo Hotel and Towers.

Patients interested in utilizing this program should contact the American Cancer Society at (806) 353-1300.

Great American Smoke-Out To Be Held November 17

This 24-hour period annually is observed on the Thursday before Thanksgiving. Students in Valley and Silverton schools are having poster contests.

Smokers are asked to put away their cigarettes, pipes, cigars, snuff and chewing tobacco for one day, and not to smoke all day November 17.

ACS members hope that this will show smokers that if they can put them away for a day, maybe they can quit smoking.

The first Great American Smokeout took place November 20, 1976. At that time, 37% of the United States adult

population were smokers. A decade later, only 30% of the population still smoke. A total of 37 million Americans are ex-smokers. The decline in the number of smokers represents part of the progress made against the nation's number one health problem; however, there is still much work to be done to achieve the goal of a smoke-free society by the year 2000.

Board members and officers of the Briscoe County unit of the American Cancer Society in Quitaque, Turkey, and Silverton are making plans and distributing literature for the Great American Smoke-out, which is to be Thursday,

Money Is Available For Building Terraces

Local farmers who need terraces built can get cost share assistance through the Soil Conservation Service Office in Silverton.

Money is currently available in the Great Plains Conservation Program. The program pays approximately 50% of the cost of building the terraces.

Another practice that might need to be considered is wind stripcropping to reduce wind erosion and protect cotton fields from blowing sand.

Wind stripcropping is strips of wheat, rye, haygrazer, or permanent grass planted in alternating strips with cotton. The wind strips are usually 2 to 8 rows wide spaced 2 or 3 hundred feet apart with cotton grown in between. These have been proven effective in slowing the wind and reducing damage to the cotton crop from blowing sand. The windstrips take up a small fraction of the acres in a field and can be used as ACR or CRU acres if approved by the ASCS office.

The GPCP program will pay about 50% of the cost of these windstrips. Farmers usually plant the windstrips on the tops of terraces where cotton production is limited anyway. Several examples can be seen in local fields around Quitaque.

Farmers interested in terracing and wind stripcropping should contact the Soil Conservation Service Office in Silverton at 823-2320.

WTU Lower Winter Rates Take Effect

Customers of West Texas Utilities Company will see approximately a 12.5 percent drop in their rates beginning this month (November). The reduction is the result of using lower winter rates, which will be in effect six months. Using higher summer and lower winter rates is part of the States' plan to encourage energy conservation during the summer when air conditioning creates the peak demand on electricity use.

According to WTU local managers Charles Moore, Turkey and Keith Edwards, Quitaque "a residential customer using 476 kilowatt hours of electricity a month, the average for November 1987, will see his bill go from \$43.53 to \$38.02." Other customer groups will see similar reductions managers said. Since mild fall weather has reduced many customers' cooling and heating use, the actual decrease in the electric bill from September when average use was 906 KWH to November will probably be around 50 percent. That decrease includes the combined impact of lower winter rates and lower use resulting from mild weather. The actual size of a customer's bill is determined by their use.

According to local managers, the electric company is still waiting for final approval from the Public Utility Commission regarding a request to change the fuel portion of the bill. Fuel is used

at power plants to make electricity.

Although the average cost of fuel on the company's many fuel contracts has not changed significantly, WTU faces a December expiration of a very low cost 20-year gas contract at one of its nine power stations. That was for gas at pre-oil embargo prices of 22 cents per mmbtu and has saved customers \$350 million. It must be replaced with gas at today's prices which are almost \$2 per mmbtu.

Paying for this replacement gas will mean customers using 476 kilowatt hours of electricity will see an increase of approximately \$2.95 on the January bill if the PUC completes its review and approval process by then.

The local managers added that since 1985 WTU has lowered the fuel portion of the bill—called the fuel factor—five times, and had six refunds totaling almost \$50 million as the result of other fuel contract changes.

Toy Collection To Begin Soon

The Turkey Volunteer Fire Department has announced its time to start collecting toys for Christmas distribution.

Every Christmas Eve night, these volunteers visit every household in the Turkey area for Santa to hand deliver a toy, and sack of candy and fruit, to every child twelve years of age and under.

Santa and his helpers travel around on the fire truck and really cause quite a bit of excitement, instead of being home with their families.

When asked why these men do this, Fire Chief Lavon Gafford says "Why... because it's Christmas, and we have a bunch of kids around here, some of which wouldn't have much of a Christmas without us. The residents of Turkey have really been supportive for the toy collection, and if you could see the look on the kids' faces, you'd know there's no way to ever stop doing it."

New toys, or cash donations, can be taken to City Hall, or given to a fireman.

Local Team Wins Volleyball Tourney

School Attendance For October Good At Valley

Student attendance during the month of October is a major basis upon which state funding comes to school districts in Texas. Every day that a student is in attendance during this accounting period is a valuable economic factor for financing the school and becomes a special encouragement for students to practice good school attendance.

For the October accounting, all figures indicate that attendance at Valley School was good. Attendance records show that for the total school, 97.57 percent of the students were in school every day for the full month of October. The records further show that the average student enrollment stands at 306.

Compared to last year, the current year enrollment is down about five students but the average attendance is only down two students. A year ago the percent of attendance was 96.87, compared to the current 97.57. The average daily attendance last year was 300.65 while the figure for the current October accounting is 298.55. The school district is funded for average attendance from the state.

Each elementary in grades K-7 who registers a perfect attendance

will receive a 100% T-shirt for being in school every day. During this accounting time 168 students qualified for the prize. There are 203 students enrolled in those grades. Last year only 151 students were eligible for the shirt. Students with perfect attendance in high school were given an opportunity to win cash prizes at a special drawing. The Student Council played an important role in setting rules for the drawing.

The best attendance honors for a grade for the entire school was received by the fourth grade. The percent attending every day was an excellent 99.60 with only two recorded absences. Next best attendance honors was won by the 8th grade with 99.53% and only three absences. These classes were followed by the 5th, 11th, 7th, 6th, and 2nd grades respectively. All grades listed were above the 98 percentile attending with very few absences.

Valley School appreciates the efforts of parents and students that ensures good pupil attendance. It is important that students attend school every day - not just October.

Lockney Care Center Update

Residents, staff, and community members enjoyed their Enchilada Dinner on Friday night. Proceeds will be going to the annual Alzheimers fund.

Celebrating birthdays this week are Bessie Jackson, Lockney, and Henry Merrell, Flomot.

All the residents enjoyed the visit from the little Brownie Troops in their array of Halloween costumes, and from The Great Pumpkin, little Eddie Lee Fortenberry. He passed out little pumpkins to everyone.

Ward Rattan had a special group of visitors this week. From Longview and Gilmore, Texas were Jerry Landford, Bud Hensoc and Moody Daucus. These fellows came down to the Ratran ranch area to do a little quail hunting and visiting.

Sympathies go out to the families and friends of Mr. Esker Pyle.

Education News & Notes

Parent-Teacher Conference
You're going to school to meet with your child's teachers and you're a little nervous. Heed the advice of the National Education Association and the National PTA: relax.

The following tips are included in a brochure and video called "A Common Goal" the two groups are distributing this school year:

- Relax and enjoy the chance to talk about your child's progress and potential.
- Before the conference, jot down questions, including any concerns your child may have.
- Be prepared to discuss your child's reaction to school, health or emotional problems, hobbies or special interests, homework habits, and the type of discipline that works best at home.
- Afterwards, discuss the conference with your child, pointing out strengths first.
- Follow through immediately on any plans you and the teacher have discussed.
- Emphasize to your child that you and the teacher are working together in your child's best interest.

By Oochum

By this time, they will have most of the votes tallied up and we'll know who, but not what, we'll have to put up with for the next four years. We've been polled, surveyed, bally-hoed and generally wrung out to the point of just wanting to get it over with. Regardless of the winners, they still have couple of trillion dollar debt and a hundred and fifty million deficit and another trillion dollar budget. Regardless of who wins, we still don't have much to start with. It will be hard to get it in much worse mess than it's already in. . . The worst thing about it is that it's our responsibility, not theirs, so it's our fault. . . That's what we get for not all being politicians!

There oughta be a law. . . This idea of votes being counted in New York and the results released three hours before the polls close in California, two hours in Mountain Time and one hour in Central time don't make sense. . . Too many of us try to jump on the bandwagon. . . also, the networks exit polling of voters now makes it possible to project the winners three minutes after the polls close in the East.

We certainly hope that everyone got out and voted. . . That's the only way we'll ever know what the people's choice is anyway!

Regardless of who wins, you can now throw out all the promises and platforms anyhow. They mean about as much as weather forecast of rain in West Texas!

Computers are getting more humanlike everyday. . . I didn't know until last week that they could have a virus. . . That's a doctors word for "Your guess is as good as mine!"

We'd better get our utility bills paid up right now. . . If we don't, on Thanksgiving, we may have to go cold turkey!

Strange things are happening. . . I read where a guy blocked a fire hydrant with his car and got a ticket from a Police Dog!
