

Livestock Producers Should Be Interested in Brucellosis Program

Livestock producers in Callahan County will have a definite interest in the 1974 Texas Brucellosis Eradication Program, which officially began January 15, believes Greg Gerngross, County Agent.

Texas became "modified-certified" in August, 1973 which meant that less than 5 percent of the cattle herds and less than 1 percent of the cattle were infected. The new plan will make Texas a brucellosis-free state.

Brucellosis, commonly called Bang's, is a costly, contagious disease of livestock that may also affect human beings. The disease in humans is known as undulant fever. Although it may attack most farm animals, it is more common in cattle, swine and goats. Herds with brucellosis may produce as much as 20 percent less milk and 40 percent fewer calves. Thus millions of dollars are lost across the state each year.

The new program is designed to locate the infection, contain it and assist the owner of infected animals to eliminate the disease. Three different methods are used to locate infections: Brucellosis Ring Test for dairy herds, Market Cattle Test of all breeding cattle slaughtered, and Blood Test of all breeding cattle exchanging ownership.

All infected and exposed cattle are quarantined and their movement is limited to slaughter only. Blood testing proced-

ures are used to assist owners of infected herds to free their cattle of the disease.

All cattle, except steers, spayed heifers and vaccinated animals under two years old, must be tested within 30 days of any change of ownership.

A relatively simple "card" test has been developed that gives quick results - an improvement over the old system of sending blood samples to a laboratory. The cost of this initial test by a practicing veterinarian or other authorized person must be paid by the cattleman.

If a brucellosis reactor is found at a sale yard or slaughterhouse, federal or state personnel trace the animal back to its herd of origin. Traceback tools include registered back tags or ear tags that many sale facilities are routinely putting on consigned animals. Ear tags are required for interstate shipment of most cattle.

Other animals in consignment where the reactor was found can be handled any of three ways - sold immediately for slaughter, sent to a quarantined feedlot, or returned to the ranch for quarantine.

All members of the herd of origin are considered as exposed to the disease and must be tested at 30 and 120 days after the first reactor is found.

Government agencies conduct these additional tests and pay the direct costs. All reactor animals must be branded with a "B" on the jaw and sold immediately for slaughter. Meat from these animals is not tainted.

Final clearance on a state basis can be granted when no more than 1 per cent of the herds in any one county and not more than 2 per cent of the cattle in that county are confirmed reactors during the 18-month testing period.

The program is vital to Texas if we want to keep our interstate trade with brucellosis-free.

Three of Six Announced Changes in Peanut Program Being Revised

BAIRD — Of the six previously announced changes in the peanut program, three have now been revised. These are: transfers by sale, lease or ownership; resale policy will be 100 instead of 115 percent of the loan rate, and grower associations will continue to handle price support functions.

April 1, 1974 is the final date to transfer both cotton and peanut allotments by sale, lease, owner or by release and re-portionment. As a service to farmers, a listing of producers desiring to transfer acreage will be maintained in the county office. Information will contain the farm number, name, address, telephone number, acres and yields. The listing will be maintained on the counter for public use.

If you have a wheat allotment or desire to use wheat planted as history credit for feed grain or cotton allotments, do not de-

stroy wheat before it is measured. The wheat program provisions provide for a disaster payment if the crop is destroyed by natural causes and the farm has an allotment. A field visit must be made and the measurement service fee paid before the crop residue is destroyed in order to protect history and be eligible for any payments.

You do not have to have wheat acreage measured unless you plan to abandon it or destroy it prior to May 1, 1974.

Wheat, cotton and feed grain allotments may be protected (for the first time) by planting a non-conserving crop instead of the allotment crop and certifying the acreage. Approved vegetative cover may also protect allotted crops if a request is filed by not later than July 1, 1974.

The ASCS office will be closed Feb. 18, 1974, in observance of Washington's Birthday.

If your home depends on natural gas you can depend on having enough.

Despite today's national gas shortage, homeowners in the Lone Star area can be assured of continuing supplies of efficient, clean-burning natural gas for years to come. The reason: Lone Star's advance planning and the investment of some \$150 million in gas supply projects in the last two years.

Today Lone Star is working around the clock, drilling deeper wells and exploring new areas. We're participating with gas industry research on "synthetic" gas and other forms of energy.

Easing this country's energy crisis by increasing energy supplies is going to take cooperation between the government and the gas industry. And you can help also! By conserving energy in your home whenever you have the opportunity.

Rest assured that Lone Star Gas families who depend on natural gas can depend on having enough.

Grass Hoppers and Squash Bugs Think Spring Has Come to Rowden

Mr. Groundhog did see his shadow Saturday, and now we are wondering when that six more weeks of winter will start. Even grass hoppers and squash bugs have mistaken the warm days for spring. N. V. Gibbs saw hoppers not more than one-fourth of an inch in size last week while digging post holes, and those squash bugs that multiply by the hundreds are lurking under grass and leaves ready to attack your early plants. It is time to think about gardening too, if you can get your husband to till the ground and lay the rows off straight. This

writer and her daughter planted their hot bed with tomato and pepper seeds Monday in hopes of an early crop. Those visiting Mrs. Lella Gibbs during the week were Mrs. Elveda Sikes and Ernest Sikes of Abilene, Mrs. Tony Steele and Tonya. Visitors in the Bob Dye home Thursday night were the James Reynolds family and Robert Watson family. Mr. and Mrs. Jerol Price visited Mr. and Mrs. Jimmy West Sunday. Mrs. Frank Cunningham of Baird was guest of Mrs. Russell Dye at the Big Country Porce-

lain Art Club luncheon, at the Thunderbird Lodge in Abilene Saturday. Those visiting during the week with Mrs. Ruth Boen were Christine Bower of Abilene, Pam Baxter and Mrs. Roy Thornton and Arvin Thornton. Mr. and Mrs. Curtis Springfield of Azle visited briefly with Mrs. Lella Gibbs and the N. V. Gibbs family Sunday afternoon. Mr. and Mrs. Tony Steele and Tonya spent the weekend in Desdemona with the Lee Jernagan family. Mrs. Russell Dye and Mrs. Ruth Boen attended the Wednesday Study Club meeting in

the home of Mrs. Frank Cunningham in Baird Wednesday. Dale and Roger Gibbs of Abilene visited Raymond Gibbs Saturday afternoon. Mr. and Mrs. Charles Palmer of Clyde visited in the Sterling Odom home Saturday. Mr. and Mrs. Jim Needham and children of Coleman visited Mr. and Mrs. Robert Watson and sons Sunday. Other visitors in the home Saturday were Jim and Janet Reynolds. Those attending a slumber party in the home of Ellen Reynolds Friday night were Kim Strahan, Denise Miller, Bea Melinda Moore, Melinda Hinkle, and Vivian Franke, all of Cross Plains. Mrs. Bill Lawrence was in Abilene Saturday visiting the Glenn Lawrence family. Visitors in the Warren Price home during the week were Jim Lane of Baird, Mr. and Mrs. Russell Dye, Mr. and Mrs. Robert Watson and son, and N. V. Gibbs. Mrs. Don Harris accompanied Mrs. Lewis Fortune, Mrs. Bill Porter and Mrs. Jerry Tyler of Cross Plains to Dallas where they attended the All-Texas Beauty Show over the weekend. Mrs. Ruth Boen attended Mrs. Viva Hill's pupils piano recital in Baird Sunday afternoon. She also visited Mrs. Fannie Johnston and Miss Nettie Carlile.

REACHING THEIR GOAL

By LINDA PHILLIPS

The seventh game of District playoffs got underway like most other games, but ended differently for the Bulldogs. Clyde met Cisco in Cisco gym for this game. The first quarter was tied 16-16, and likewise for the 2nd quarter, 29-29. In the 3rd period, the Bulldogs fell behind 45-37. Clyde got within two points of Cisco with only a few seconds remaining on the clock. Those few seconds caused tension and strategy for the Bulldog team. The ball was shot, missed and rebound and the buzzer rang. Final score was 53-51 in favor of Cisco.

Clyde had only one player in double figures, Montia Setzler who had 13 points. Four players, Zane Howard, Robert Newton, Kim Harless and Jarrel Hurst each scored 8 points.

The 2nd string played a large part during the Eastland game Friday. The game began with the regular line-up, which did a fine job, but they were replaced by the second string in the first quarter. 2nd string consists of Jimmy May, Miller Scott, Randy Cummings, Billy Dugan and Mark Hogan. They scored a total of 29 points. The final score was 65-37. Clyde's

high point man was Robert Newton with 14, and Mark Hogan made 9.

Friday, Clyde will host Coleman for the last district game. The game will be played in the local gym at 8 p. m.
