**YOU DON'T HAVE TO GO TO CHURCH TO BE A CHRISTIAN?**

I often hear people say, "I can be as good a Christian at home as anyone; you don't have to go to church to be a Christian. The church is full of hypocrites anyway, and I can be just as good at home, or maybe even better!"

If that is true then you believe that a person who never tries to teach the message of Christ, who will not sacrifice his valuable time for church services, who never gives of his income to pay the bills, who never tries to improve his talents so that he can lead singing, prayer, or devotionals, IS AS MUCH OF A CHRISTIAN AS ONE WHO DOES.

What a farce! If that were true in religion the same would be true in life, and I could be as good a farmer or rancher as anyone and never ever farm.

I will grant that you can be as morally good as anyone and never go to church. But I will not say that moral goodness is Christianity. There is a difference. You can be morally good and not have faith in God, but you cannot be a Christian without faith. The Bible says in Hebrews 11:6, "But without faith it is impossible to please him . . .", and again in Romans 1:17, ". . . The just shall live by faith." That does not say that a Christian does not have to be morally good, nor does it mean that the church does not have some hypocrites in it. But that does not alter the fact that you can NOT be as good a servant of Christ and not go to church services. The Bible says in Matthew 22:1-10 (Please read for I shall just paraphrase): A king was preparing for a great wedding feast and he sent out invitations. But the invited guests were too busy—one had to farm, another had to care for his dry goods and groceries, and others just made fun of those self-righteous do-gooders, and nobody came. Now the King thought they were his very best friends even if they could not come to the wedding. NO! He sent his armies and killed them all and went out and invited the riff-raff of the town and they were his guests. BECAUSE THEY WOULD COME. To me one of the morals of this parable is those that do not attend are not as good a guest as those that do.

If one cannot be a guest without being present then neither could one be a Christian without being present. For the church is made of people—not bricks—and that group of people that meet together to worship God ". . . were called Christians first in Antioch." Acts 11:26.

You don't have to be a Christian to go to Church, but you can't be a Christian unless you are part of the Church for which Jesus Christ died to establish.

—Kenneth Castello

**THE CROSSROADS**

Who am I? What is life? Where am I going? Why am I here??? When will I know???

Almost everyone who's ever lived has at one time or another asked himself one or all of these questions. Or others—What shall I do? Where shall I turn? Why did this have to happen to me? Who will help? When???

Sooner or later every man seeks understanding. The seeking can be exhilarating, depending upon where one searches.

Those who turn to God and His Church find unlimited opportunities opening for them, as their concept of life is enriched and enlarged.

If you stand at the crossroads and the world seems a turmoil of conflicting ideas, turn to your church. Its truth never wavers. Its strength and purpose can make your life fuller and happier.

### GRAIN COSTS REPRESENT SMALL PART OF TOTAL PRICE OF BEEF

The housewife who sees the high cost of her succulent Sunday pot roast the result of increases in grain prices has unfairly placed the blame.

Fact is, grain costs are only 20% or less of beef's on the hoof price, according to a current study by Grain Sorghum Producers Association of Lubbock.

"If you deduct the entire cost of grain sorghum used in fattening a steer for market, beef still would be selling today for the price housewives were paying last January," said Elbert Harp, GSPA's executive director.

Harp points out that a 1,000 pound Texas steer will have consumed a ton of grain sorghum at market time. At today's price of \$5 per hundred pounds, the cost of grain to fatten a steer will run \$100 a head.

Subtracting the \$100 grain cost from the steer's \$500 price tag results in a price of \$400 or 40c a pound for the 1,000 pound beef. And 40c was the total price of the animal last January.

"The point is," Harp explained, "the increase in the grain price is not the big increase in cattle production cost."

Harp noted that even with grain at \$5 a hundred pounds, the cost of grain in feeding out a steer is only 20% of the total cost when cattle sell for 50c a pound. With 60c cattle and \$5 grain, the cost of grain would be about 16.7% of the animal's total sale price.

When the processing cost and store markup are added, the cost of grain to feed the animal is an even smaller percentage of the over the counter price paid by the housewife.

### "WORLD GATEWAYS" IS THEME OF STATE FAIR

The world of transportation, the world of tomorrow and the world of imagination will be superimposed over an outline of Fair Park when the State Fair of Texas presents "World Gateways Exposition" from October 6-21 in Dallas.

Sparkling international exhibits, reflecting worldwide progress and products, will highlight this salute to Texas as an emerging commercial center in the global community. Japan, Romania, Denmark, Mexico, South Africa and the Philippines are among the countries to be represented in the spacious World Exhibits Center.

A continental flavor will characterize the State Fair Musical production of Sigmund Romberg's ever-popular "The Student Prince." Old Heidelberg will come alive in the New Music Hall for 20 performances.

Musical groups from the earth's four corners, including the acclaimed Trinidad Cavaliers Steel Orchestra and Variety Show, will provide daily entertainment throughout the park. Each of the 16 fair dates will also feature multiple circus performances and a colorful parade of theme-designed floats, bands and marching units.

The Pan-American Livestock Exposition, October 6-14, spotlights a National Hereford Show along with judging of champion beef and dairy cattle, breeding swine, sheep and goats. The State Fair of Texas Horse Shows will present winners from the national show circuit against a background of music in the modern, air-conditioned Coliseum.

The lure of the 1974 models will attract many of the three million fair visitors to the Automobile Show for a panoramic preview of next year's cars. Fashion shows, food demonstrations and displays of winning entries in more than 900 competitive classes will be presented in the Women's Building. Corny dogs, carny barkers and a collection of amusement rides unsurpassed in carity and thrills make up the mile-long Midway.

New worlds of entertainment and experience plus all the old-fashioned fun associated with the nation's largest annual exposition mine whose "best shot" of fellow players in action is outstanding enough to win the \$1,000 first prize plus a \$625 Pentax ES camera.

Tournament director Bill Talbert says he expects most of the players will compete for the six cash-and-camera prizes totaling \$4,400, because many of the court stars are camera buffs.

Ilie Nastase, John Newcombe, Arthur Ashe, Evonne Goolagong and Rosemary Casals were among the early entries in the photographic competition.

are offered for the \$1.50 gate admission. Children under 12 are admitted for 75c.

### TWO GRADUATE COURSES PLANNED IN ANIMAL SCIENCE

The Texas Tech University Center at Amarillo (Pantex) announced August 14 that two graduate level courses in animal sciences will be offered during the fall semester.

They are Animal Protein Nutrition and Animal Energy Utilization. Both may be taken for two hours of graduate credit, and students may register between 3 and 7 p.m. Wednesday, September 5, at the University Center. The first classes will meet at 7 p.m. that day. Class times will be arranged then to suit the convenience of those registered.

Dr. R. Hollis Klett, superintendent of the center, said that the courses were designed to serve county agents, vocational agriculture teachers and those in the practice of agriculture and allied industries. Graduate credit earned may be applied to the master's degree. The courses also may be audited.

The course in protein nutrition offers a detailed study of protein metabolic systems and the application of this understanding to the practical feeding of livestock. Emphasis is on non-protein-nitrogen as a supplement and recent developments in protein nutrition.

The course in energy utilization emphasizes the application of knowledge about energy systems in formulating practical rations.

For additional information write or call Dr. Klett or Dr. Lloyd B. Sherrod, Texas Tech University Center at Amarillo, P. O. Drawer 7, Pantex, Texas 79069, telephone AC 806 335-1606.

### FEDERAL HIGHWAY FUNDS NOW AVAILABLE AGAIN

Federal Highway funds became available today following a two-year logjam as President Nixon signed the three-year \$20 billion act.

State Highway Engineer Luther DeBerry said the compromise bill was the result of hours of hard work led by Texas' own Senator Lloyd Bentsen and Representative Jim Wright in the 10-week Senate-House conference committee sessions.

"Passage of the act means we can go forward with dozens of highway projects throughout the state which have been pigeonholed," DeBerry said. He pointed out there will remain a backlog of vitally needed projects.

DeBerry said, "One provision, sponsored by Senators Tower and Bentsen, freed the state to complete the San Antonio North Expressway with state funds. Twice the project has been caught by changes in Federal law and procedures as a Federal-aid project and for some years the resulting impasse has denied the needed roadway to the people of San Antonio. This legislation should greatly shorten the time required to complete the project."

The new highway act, which for the first time contains funds for mass transit, also contains more than \$2 billion for safety during the three years, DeBerry said.

High on the list of such projects in Texas are replacement of narrow bridges and elimination of hazardous intersections and rail crossings. This is in addition to the increased safety benefits accruing from construction of modern highway facilities with more built-in safety features.
