CISCO, TEXAS, SUNDAY, MARCH 31, 1935.

NUMBER 47.

## Mayor and 2 Comm'rs to Be Chosen Tuesday

### Expect 500 To Attend WMU Meet

500 Baptist women are expected to gather in Cisco Tuesday and Wednesday, April 16 and 17, for the annual meeting of west Texas District 17 of the Women's Missionary Union. These women will come from an area of between 20 and 30 counties.

Sessions of the convention will be practically continuous throughout the two days. These will be held at the First Baptist church which will be the convention headquarters.

The visitors will be entertained in the homes of the city and luncheon and dinner will be served each day by the churches of the Cisco Baptist association which, with the First church, will be hosts to the gathering.

The detailed program for the convention is yet to be announced, but this includes appearances of a number of prominent speakers. Mrs. R. M. White of Abilene is president of the district.

Other officers are Mrs. H. J. Hanks, Abilene, treasurer; Mrs. H. J. McArdle, Cisco, recording secretary; Mrs. Ralph St. John, Abilene, corresponding secretary.

### Big Crowd Attends Community Program

One of the largest and most appreciative audiences ever to attend a community night program was present Saturday evening at the high school when Cisco students participating in the Eastland county league meet were presented on the following program:

One-act play, which won first in the county; songs by Margaret Blythe and Helen Green of the west ward; playlet "As You Like It" by west ward P.-T. A.; folk dance, by east ward pupils; story telling, by Betty Joe Slicker, first place winner in county; grammar school choral club, first place winner in county; chalk talk, by Miss Lucille Sprull.

### Collector's Office To Be Open Late

EASTLAND. — With April 1, last date to pay auto registration fees without penalty, near, Tax Assessor-Collector Tom J. Haley open until midnight Monday, if announced his office would be necessary, to accommodate car owners.

Rate of payment of auto license fees was high last week, Haley declared. He forecast an even greater rush Monday.

### Brother of Cisco Man to Preach Here

The Rev. W. E. Anderson, pastor of the Thurber Methodist church and a brother of J. T. Anderson, Cisco, will be the preacher for the morning worship service at the First Methodist church, the Rev. Frank L. Turner, pastor, announced.

The Rev. Mr. Anderson is widely and favorably known over the conference and a general invitation was extended the public to hear him.

### Cleveland Well Is Good for 3 1-2 Million

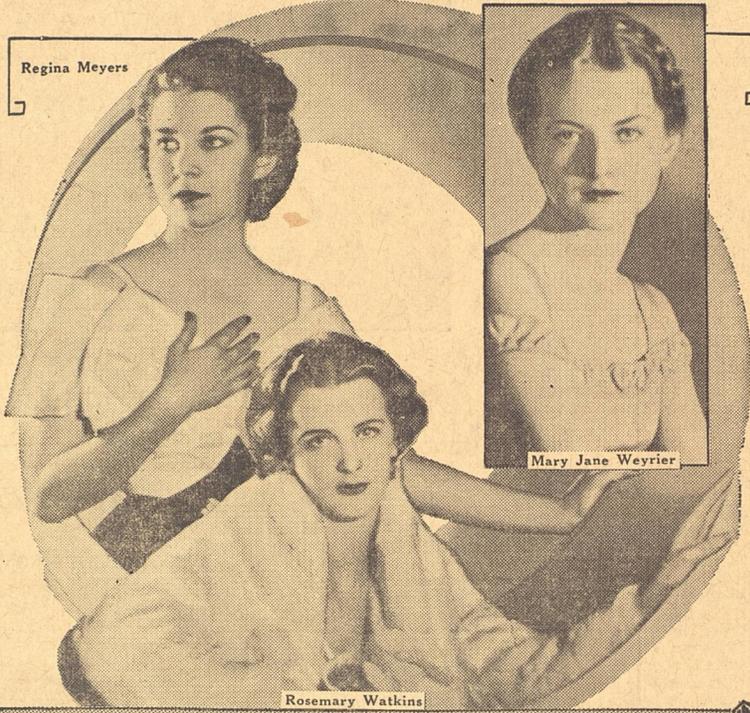

The Hickok Grover Cleveland No. 1, brought in for a gas producer last week, was running tubing Saturday. The well was still holding up to a production of three and a half million feet of gas which it gauged after a shot Monday evening.

It is located about 7 miles northwest of Cisco.

Mrs. S. C. Foster has returned to her home in Waco after a visit with her daughter, Mrs. H. S. Drumwright and Mr. Drumwright.

Mrs. Charles Hale of Kilgore has been spending the week with Dr. and Mrs. Charles Hale. Mr. Hale was expected to arrive Saturday night.

### Three Southern Beauties at Texas College

Rice Institute at Houston, Tex., has a double claim to fame. Its football teams are among the best in the south and its co-eds quite hold their

own with the beauties of other campuses. Regina Meyers, left; Rosemary Watkins, center, and Mary Jane Weyrier, upper right, are three of

the reigning campus beauties at Rice who were selected as the most attractive senior girls.

### Thurber Chosen as Site of Hi-way 89 Celebration

EASTLAND. — Twenty-four representatives of nine towns Thursday at Eastland took preliminary steps for a celebration at Thurber, marking completion of Highway 89, a 40-mile airline route from Weatherford to Strawn. Selection of Thurber as the celebration town was unanimous.

The meet called at instance of H. C. Davis, secretary of the Eastland chamber of commerce, was presided over by Judge B. L. Russell of Baird.

Milburn McCarty of Eastland was selected as chairman of the general committee. Date setting for the celebration, which will be decided by a time committee appointed at the meet, awaits contact with several speakers.

Committeemen to set date for the Thurber celebration were Dave Barner, Santo; Dr. Gandy, Lipan; Dr. E. W. Kimble, Gorman; R. M. Harris, Strawn; Robert Burke, Gordon; A. H. Henderson, Olden; Lawrence Santi, Gordon; Henry Clark, Rufus Higgs, Stephenville; Fred Cook, Putnam; J. C. Hayes, Weatherford; Bates Cox, Thurber; J. E. Spencer, Cisco; A. N. Larson, Ranger. Judge B. L. Russell of Baird will serve as chairman of the committee.

W. R. Ely, member of the state highway commission, has given indication he will attend, Milburn McCarty of Eastland, declared.

Gov. James Allred and other state officials will be invited. Thurber was praised for efforts extended toward securing the highway by Milburn McCarty and other speakers.

R. V. Galloway, secretary of the Ranger chamber of commerce, suggested the celebration be held at a date whereby condition of the road would not be the object of criticism.

Topping of the road is not expected to be completed until next year, although it will be treated with oil in the near future, one of the speakers said.

Bates Cox and Tom Wayne of Thurber assured representatives of towns attending that everything would be arranged for entertainment.

(CONTINUED ON PAGE 4)

### Latin Beauty Queen

Her typical Latin beauty won Senorita Rosario Negrete, above, the honor of reigning as queen of the Mexican carnival in Durango state in old Mexico. She was the popular choice by more than one million votes.

### Reimer Plant Has Latest Equipment

The latest dry cleaning equipment in the form of a pressure filter has been installed by Reimer's cleaning plant. This equipment insures the most complete and sanitary cleaning of garments and represents an important step ahead in Cisco dry cleaning service.

Mr. and Mrs. Reimer invite the public to call at their plant and inspect the new equipment.

The shop has been remodelled and now presents a very attractive appearance as well as providing great efficiency in the handling of patronage.

### BOOSTERS TO MEET AT 7:30 MONDAY EVENING

The Cisco Boosters board of directors will hold their regular semi-monthly meeting Monday evening at 7:30 at the chamber of commerce office, it was announced Saturday.

Don Sivalls has returned to his home in Midland. Mrs. Sivalls and Mary Martha will remain for several days visit.

### Additional Grant Made For Schools

The supplementary FERA project for completing landscape work at the high school and for improving other school grounds in the city system with new soil and with shrubbery where practicable has been approved, it was announced.

New projects being prepared include one for repairing the west ward school building, involving expenditure of between \$5,000 and \$6,000; rebuilding the stands at the football field and turtle-backing the gridiron; and construction of a large combination gymnasium and auditorium.

A project for rebuilding the tennis courts at the high school and adding tennis courts to the grounds of other schools is also being prepared.

### Recommendations Are Presented to School Board

Recommendations presented to the Cisco school board by Supt. R. N. Cluck at the Wednesday evening session of the board were:

1. Extend public school music in the grades to all of the ward schools and make it a permanent plan.

2. Part time evening classes in vocational home economics for the women of the town, three-fourths of expense being met by state and federal government.

3. Experiment with class of home economics for boys.

4. Work out a plan through which pupils in grades four to seven may be promoted by subjects, as practiced in high school, provided the student does not fail in more than two subjects.

5. Provide part time elementary librarian in order that children may be taught early the value of books, their use and value, and to raise the standards of reading.

6. Provide separate schools for the Mexican children.

7. Put out a new printed course of study for the Cisco schools.

8. As soon as finances will permit, employ specialist to supervise all grade school work.

9. Extend vocational courses to pupils in sixth and seventh grades.

10. Provide evening classes in commercial work, three-fourths of the expense being paid by state and federal government.

11. Add an additional teacher and grade to East ward if enrollment increases.

12. Give consideration to the advisability of employing a school nurse.

13. That you seriously consider some plan for providing a gymnasium large enough to accommodate the entire system.

14. Secure an expression teacher to be placed in the schools, her salary being what she makes if it through fees or tuition.

15. Seriously consider introducing Texas history, community civics, vocational guidance, business English, commercial geography and more industrial work as the need arises and finances will permit.

16. Buy duplicating machine (worth its cost as a teaching aid).

17. That you add additional library books and materials to the ward school libraries.

18. Under the agreement between the board and band committee we can meet state requirements on band music, I recommend that we meet those requirements and affiliate our band music.

Mrs. Silas George, mother of Mrs. Leon Maner, who underwent a minor operation Friday at the Graham sanitarium, is now at Mrs. Maner's home and reported to be improving rapidly.

Miss Lois Pulley, a student at Texas Tech at Lubbock is spending the week-end with her parents, Mr. and Mrs. Sam Kimmell.

### Hip Bone Missing

One of the rarest operations known to medical science will be performed in the case of June Garrey, 9, of Rapid City, S. D., pictured as she arrived at a Chicago hospital where an attempt will be made to replace a missing hipbone by manufacturing one from other bones of her body.

### Six Seeking Three Posts In Election

A mayor and two city commissioners are to be elected Tuesday. Six candidates are in the field, divided into two distinct tickets.

The administration ticket is headed by Mayor J. T. Berry and includes Comm'rs H. A. Bible and W. J. Foxworth.

Opposing these are J. M. Williamson, who served Cisco 16 years as mayor until 1931 when Mr. Berry was elected, and L. F. Mendenhall and W. W. Wallace.

Judges of the election will be D. A. Williams and Asa Skiles. Clerks have not yet been announced. They will be chosen by the judges.

The election booths will be in the city hall.

Both sides have waged strenuous campaigns and the maximum vote allowed by the number of poll taxes and exemptions is expected. These poll taxes, according to the records in the county tax collector's office, total more than 900.

### \$200,000 Finale for Film "Kid Millions"

As a magnificent gesture of confidence in the American public's appreciation of novelty in screen entertainment, Samuel Goldwyn expended \$210,000 on the production of a unique Technicolor fantasy ending for "Kid Millions," his new Eddie Cantor picture showing now at the Palace theater. Yet this sequence provides less than 600 feet, or slightly more than half of one reel, of the picture!

Nothing quite like this sequence has been filmed before. It may be best described as a "Silly Symphony," done with human beings and with exaggerated settings and properties instead of animated cartoons.

### SIX-STAR CAST ACTS "RUGGLES"

The amusing account of what happens to a perfect English butler-valet when he is exposed to American ideas of democracy is the plot and story of Paramount's "Ruggles of Red Gap," which comes Wednesday and Thursday to the Palace theater with Charles Laughton in the title role.

The picture, adapted from Harry Leon Wilson's famous story, first published in the Saturday Evening Post, features Mary Boland, Charles Ruggles, Roland Young, ZaSu Pitts and Leila Hyams in support of Laughton.

### Baptist Revival Is Drawing Big Crowds

The revival meeting at the First Baptist church, conducted by the Rev. P. D. O'Brien of Colorado, Texas, is drawing large crowds to hear the excellent preaching of the revivalist.

Rev. Mr. O'Brien will preach at both services today. A goal of 400 has been set for the Sunday school and 125 are expected for the BTU meeting.

The Rev. E. S. James, pastor of the church, will go to Colorado to preach at 11 o'clock this morning in the church of which the evangelist is pastor. He will return for the evening service.

### BUYS AIDEN JOHNSTON HOME

Mr. and Mrs. P. K. LeFevre have recently purchased the Aiden Johnston home, in the western part of the city. The deal was made through the Connie Davis agency.

# Successful Rabbit Show In Cisco Is Closed Saturday

## 92 Exhibits Are Entered; Quality Praised by Judge

One of the most successful spring shows of the Eastland County Rabbit club closed here Saturday afternoon. The show, which drew a total of 111 rabbits in 92 exhibits, including entries from Dallas and Fort Worth, was praised by Marvin O. F. Davis, Gainesville, judge. Mr. Davis declared that the quality of the rabbits exhibited was equal to any that he had seen in any show and that the rabbits entered here would compete with rabbits anywhere. Many of the exhibits had won first places in shows elsewhere, only to be defeated here.

The show was held in the former Sessions garage building across the street from Piggly-Wiggly. John A. Garrett was show manager and Joe Clements show secretary.

- Following are the awards:
- New Zealand Whites**  
 Senior Buck—1st, L. V. Simmonds, Eastland; 2nd, H. L. Owen, Eastland; 3rd, W. E. Staller, Eastland; 4th, H. L. Owen, Eastland; 5th, M. L. D. Smith, Ft. Worth; 6th, H. L. Owen, Eastland; 7th, Emerson Wells, Dallas.
- Senior Doe—1st, H. L. Owen, Eastland; 2nd, Louis White, Ft. Worth; 3rd, Louis White, Fort Worth; 4th, Emerson Wells, Dallas; 5th, H. L. Owen, Eastland.
- 6 to 8 Month Buck—M. L. D. Smith, Fort Worth.
- 6 to 8 Month Doe—1st, L. V. Simmonds, Eastland; 2nd, L. V. Simmonds, Eastland.
- Junior Does—1st, 2nd, and 3rd, W. T. Dowda, Cisco.
- 3 to 5 Month Buck—1st, Emerson Wells, Dallas; 2nd, H. L. Owen, Eastland; 3rd, W. T. Dowda, Cisco; 4th, W. T. Dowda, Cisco.
- 3 to 5 Month Doe—1st, Emerson Wells, Dallas; 2nd, H. L. Owen, Eastland; 3rd, John A. Garrett, Cisco; 4th, John A. Garrett, Cisco; 5th, John A. Garrett, Cisco.
- New Zealand**  
 Senior Buck—1st, Louis White, Fort Worth; 2nd, Louis White, Fort Worth; 3rd, L. V. Simmonds, Eastland.
- Senior Doe—1st, 2nd, 3rd, 4th, and 5th, L. V. Simmonds, Eastland.
- 6 to 8 Month Doe—1st, L. V. Simmonds, Eastland.
- 6 to 8 Month Buck—1st, L. V. Simmonds, Eastland.
- 3 to 5 Month Buck—1st, 2nd, and 3rd, L. V. Simmonds, Eastland.
- 3 to 5 Month Doe—1st, 2nd, and 3rd, L. V. Simmonds, Eastland; 4th, Doe and Litter—1st, L. V. Simmonds, Eastland.
- Heavy Weight Chinchilla**  
 Senior Buck—1st, 2nd, and 3rd, John A. Garrett, Cisco.
- Senior Doe—1st, 2nd, and 3rd, John A. Garrett, Cisco.
- 3 to 5 Month Doe—1st, John A. Garrett, Cisco.
- Doe and Litter—1st, John A. Garrett, Cisco.
- Standard Chinchilla**  
 Senior Buck—1st, L. V. Simmonds, Eastland; 2nd, and 3rd, John A. Garrett, Cisco.
- Senior Doe—1st, 2nd, and 3rd, John A. Garrett, Cisco.

### Here's Another Sign of Spring

Here's another sign of spring. Some of the candidates for the 1935 Columbia university football team at New York were given a stiff workout at spring training camp when Coach Lou Little, extreme left, instructed them in the art of bucking the line.

- L. V. Simmonds, Eastland; 4th, and 5th, John A. Garrett, Cisco.
- Best Heavy Weight Chinchilla Young—John A. Garrett.
- Best Senior N. Z. White Buck—L. V. Simmonds, Eastland.
- Best Senior N. Z. White Doe—H. L. Owen, Eastland.
- Best Dutch Doe and Litter—Ben L. Darby, Fort Worth.
- Doe—John A. Garrett, Cisco.
- Best Heavy Weight Chinchilla Young—John A. Garrett.
- Best Senior N. Z. White Buck—L. V. Simmonds, Eastland.
- Best Senior N. Z. White Doe—H. L. Owen, Eastland.
- Best Dutch Doe and Litter—Ben L. Darby, Fort Worth.
- Court Approves Insurance Case**
- EASTLAND. — Approval of the 88th district court of an agreement of E. O. Hughes and The Employers Liability Assurance company for the plaintiff to receive \$1,000 for asserted injuries was entered in the court records Wednesday.
- Hughes' suit had been appealed from the Industrial Accident Board.
- Hughes allegedly was injured while in the employ of the Morgan Construction, August 4, 1934, while working on a road near Ranger.
- The asserted injuries were received when the plaintiff lifted a heavy rock by a rock crusher, the petition of Hughes recites.
- Attorney's fees of \$333.34 to Grisham Bros., out of the award were approved by the court and court costs were assessed defendant.
- Mr. and Mrs. Winfield Gallagher have returned from Lubbock where Mr. Gallagher has been in a hospital for the past two weeks.
- Harrison, "De Lawd" of "Green Pastures," suffers collapse.
- SON IS BORN**
- EASTLAND. — Mr. and Mrs. Herbert Reed announce the birth of a son weighing five pounds and two ounces Monday. The baby, whose father is 88th district court reporter, is yet unnamed.
- Mrs. Alex Spears and daughters, Miss Betty Fee and Lillian, and mother, Mrs. C. H. Fee, are to leave Sunday for Tucson, Arizona, where they will spend a week.
- Mr. and Mrs. O. J. Russell are spending the week-end in Denton with their daughter.
- Black and White Dutch**  
 Senior Buck—1st, L. V. Simmonds, Eastland.
- Senior Doe—1st, L. V. Simmonds, Eastland.
- Junior Buck—1st, L. V. Simmonds, Eastland.
- Blue Dutch Senior Doe—1st, L. V. Simmonds, Eastland.
- Doe and Litter—1st, Ben L. Darby, Fort Worth.
- White Fur**  
 White Fur—1st, Louis White, Fort Worth; 2nd, Emerson Wells, Dallas; 3rd, M. L. D. Smith, Ft. Worth; 4th, Emerson Wells, Dallas; 5th, W. E. Staller, Eastland.
- Colored Fur**  
 Colored Fur—1st, L. V. Simmonds, Eastland; 2nd, L. V. Simmonds, Eastland; 3rd, John A. Garrett, Cisco; 4th, L. V. Simmonds, Eastland.
- Specials**  
 Best Senior Dutch Doe—L. V. Simmonds, Eastland.
- Best Senior Dutch Buck—L. V. Simmonds, Eastland.
- Best N. Z. Red Buck—Louis White, Ft. Worth.
- Best N. Z. Red Doe—L. V. Simmonds, Eastland.
- Best N. Z. Red 3 to 5 Month—L. V. Simmonds, Eastland.
- Best N. Z. Red Doe and Litter—L. V. Simmonds, Eastland.
- Best Standard Chinchilla Doe—L. V. Simmonds.
- Best Standard Chinchilla Buck—L. V. Simmonds.
- Best Standard Chinchilla 3 to 5 Month—John A. Garrett, Cisco.
- Best Heavy Weight Chinchilla Buck—John A. Garrett.
- Best Heavy Weight Chinchilla

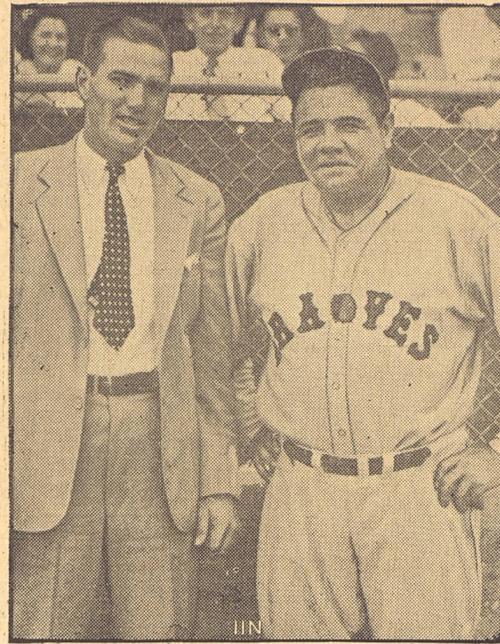

## Friendliness and Hostility Among Indians, Settlers

AUSTIN. — Friendliness and hospitality alternately reigned in relations of the whites with the Indians during the early days of Spanish colonization in Texas, it is evident from historic records. One tribe would be amicable, another bitterly inimical. Documentary proof of this paradox is given in a display of materials from the Bexar archives in the University of Texas library, now on exhibit in the archives room.

One item of this exhibit is an impressive citation dated 1781, and signed by Estevan Miro, Spanish governor of Louisiana, in recognition of the services of Apilahate, an Indian of the Yuke-mi tribe, in promoting peace between the Spanish and the Indians. He is given the title, "Chief of the Small Medal," as evidence of the esteem in which he was held in peace and war.

Another document in the display, dated in the same year, is the beautifully written report of the governor of the province of Coahuila and Texas, Don Domingo Cabello, who was also in command of the presidio of San Antonio de Bexar, then the seat of Spanish government in Texas. It is written in script as regular and exquisitely formed as fine printing and on paper whose fine quality indicates that it was imported from France. In it Cabello writes of the fierce depredations of the Lipan Indians at the very gates of the military garrison. He recounts the numerous sallies on which he sent pursuit parties from his small company, all of which were futile because of the facility with which the Indians could learn of their approach and could steal away, only to return and strike again. He describes in detail the horrible manner in which the Indians mutilated the bodies of their victims, and closed with the advice that he could no longer promise successfully to defend the settlement due to the inadequacy of his forces.

## Dean and Ruth End "Great Feud"

"It's okay, kid," smiled Babe Ruth when the great slugger met Jerome Dizzy Dean, left, star St. Louis Cardinal pitcher, when the two met at Tampa, Fla. So ended the "great feud" which started when Dean criticized the Babe for transferring from the American league to the Boston Braves. "Dizzy" apologized for his remark.

## Laundry Rug Service Is Proving Popular

The rug cleaning service, established by the Cisco Steam Laundry, is meeting a need that housewives have experienced for a long time. By means of this service rugs are made almost as good as new. Embedded dirt with its germs and filth is removed by a process of scouring that does no injury to the fabric and will not cause colors to run. As rapidly as the solution removes the dirt a vacuum sucks it out of the rug so there is no chance for even the cheapest dyes to run.

After the cleaning and dying process sizing is replaced in the rug to stiffen it and guard against curling.

After these west Texas sandstorms, which have been unusually frequent this year, the Cisco Steam Laundry cleaning service is a real godsend.

Barbecue Pits Ready For Summer Parties

Barbecue pits in the city and Lions-Rotary parks at Lake Cisco have been repaired and put in condition for the summer picnic season, Street Supt. Joe Clements said Saturday. Plenty of wood has been provided to be used by picnic parties in preparing outdoor meals over the pits, he said. Access to these parks and use of the utilities provided there is without cost to the public, who are invited to avail themselves of these facilities. Hurley, in Detroit, warns republicans against extremes.

Among the Derricks

ALBANY. — New drilling operations in various portions of Shackelford county are extended to new areas in northern and western Shackelford, with F. W. Peckham et al No. 1, J. A. Matthews drilling at 100 feet on a new test a half mile or more northeast of the producing area in the Cook pool, located in the southeast corner of NW 1-4 of NW 1-4 section No. 56, E. T. R. Co. lands, about 5 miles north of Albany.

Jones & Stasney et al No. 1, W. D. Baker, a new wildcat in extreme western edge of Sheckelford, near the Jones county line, is drilling at 250 feet, in the center of Wm. H. Watson pre-emption survey, two miles west of the Reliance-Jones & Stasney pool on the G. R. Davis ranch recently opened in the northeast corner of survey No. 4, T. & N. O. R. R. lands, with two good wells in the Bluff Creek sand at 1620 feet, initial production of 75 barrels with good sand condition.

Reliance Oil & Royalty Corp.-Jones & Stasney No. 5, J. H. Nail Estate in southwest 1-4 of section No. 124, E. T. R. Co. lands, proved a further southward extension of their Neil pool with 76 barrels initial production from Bluff Creek sand at 1600 feet.

Bob Elmore, Fort Worth operator, is reported to have acquired a block of leases in the Nail Ranch and will drill a new well on a wildcat location south of the Nail pool in section No. 124-133, E. T. R. Co. held by Reliance et al and States Oil Corp. of Eastland, Texas.

Owens-Snebold Oil Corp. of Ft. Worth, F. H. E. Oil Co. No. 8, T. W. Lee is drilling at 400 feet in the center of east line of W 1-2 NE 1-4 section No. 23, block 11, T. & P. R. Co. lands, and a new wildcat location has been staked by Owens-Snebold Oil Corp. in the T. W. Lee ranch in southwest 1-4 of section No. 26, block No. 11, T. & P. R. Co. lands, about 5 miles southwest of Albany.

Roeser & Pendleton, Inc., No. 52-A-61, W. I. Cook Ranch, a north extension well on northeast side of the Cook pool was completed with an initial production of 70 barrels in the Cook sand at 1180 feet. Roeser & Pendleton, Inc., No. 8, Dawson & Conway is a new test on the southwest flank of the Bluff Creek pool in the center of NE 1-4 of NW 1-4 section No. 202, E. T. R. Co. lands.

RELIAWELL IS PRODUCER

ALBANY. —Reliance Oil & Royalty Corp.-Jones & Stasney No. 2, G. R. Davis in northeast 1-4 of T. & N. O. survey No. 4, in western Shackelford proved the existence of a considerable pool in the Bluff Creek sand when it made 131 barrels for first 24 hours on flush with occasional swabbing and is estimated good for 75 barrels daily on pump, being located 450 feet southwest of Davis No. 1 which was completed for 60 barrels initial a month ago, uncovering a new pool for western

SAFE LOANS

There is a great deal of newspaper criticism of bankers today for not lending more freely — money which belongs largely to their depositors.

Every banker wants all the good, safe loans he can get — but he will not accept any which do not measure up to his standards of safety. Protection of his depositors' interests comes first, always.

THE CISCO STATE BANK

Federal Deposit Insurance — of Course

To The Citizens Of Cisco:

We respectfully request that you, at this time, consider carefully the administration of our city affairs during the past few years.

We fully appreciate the fact that at all times and particularly under conditions that have existed during the past five or six years it is very easy for any public official to make mistakes and to be censured, sometimes justly, by the public at large. However, we feel that, considering the many problems that we have had before us, we have made an unusual record, considering all conditions.

The records of the city were in a deplorable condition as reflected by all audits, including the audit prepared under the supervision of the old administration. It has been necessary that several audits be made in order to ascertain definitely the financial condition of the city and we believe that the records are in such shape now that there is no possibility of any just criticism.

Upon taking over the administration of the city's affairs we immediately inaugurated a system of counter-signing checks which precluded any possibility of money being improperly paid out.

Property values have been reduced so that the valuations are commensurate with actual values. Water rates have been reduced and the amount of water allowed under each particular rate and to each particular home, has been increased.

We have successfully contested the efforts of the Lone Star Gas company to greatly increase our gas rates and in addition to this have succeeded in having installed one of the most modern gas distributing systems in the state of Texas, there being expended, in connection with this, approximately \$130,000.00; \$60,000.00 of which was paid to Cisco citizens. Instead of there being an increase in rates there has been a substantial reduction. We have successfully carried on litigation and negotiation for settlement which have resulted in our bonded indebtedness being reduced to approximately 25 per cent, a reduction of near \$5,000,000.

We have at all times endeavored to keep the streets and alleys in a sanitary condition and have paid to home people for doing this work several thousand dollars. A cemetery wall has been built, and more than 40 blocks of streets have been resurfaced with gravel. City parks and the zoo have been greatly improved and our city has been benefited directly through the wages paid the Cisco men for this and through the lasting benefits that have been obtained. A new unit has been added to the pumping plant at Lake Cisco thus insuring against any possibility of a water shortage through failure of the equipment.

The city has been operated on a cash basis, no new debts have been made and all current accounts have been paid. An adequate amount has been deposited in the sinking fund at all times. We have endeavored to keep the city on a sound and reasonable financial basis and so far as we know no one of our many creditors have in any way questioned our methods of handling the financial affairs.

During the past two years we have been able, through the efforts of our city fire department and our city fire marshal, to reduce a 12 per cent penalty against the city fire insurance key rate, to a credit of 6 per cent, thereby saving the property owners of the city a large sum in insurance premiums annually.

We are constantly endeavoring to improve our city water and sewerage disposal services and have on foot plans to obtain construction of a large water treatment plant at Lake Cisco which we realize, and have realized all during our administration, that the city would need.

Every year we have cooperated with the chamber of commerce in holding a County Live Stock Show, furnishing the necessary finances when requested and otherwise cooperating in promoting and conducting this exhibition.

Rates for the removal of garbage in the business districts and other exorbitant charges for municipal services have been reduced to the actual expense of providing these services.

Through constant cooperation with the Chamber of Commerce, Boosters Club, and County Commissioner Arch Birt, we have succeeded in having ten miles of the Rising Star highway immediately south of Cisco resurfaced and the Lee-Ray county highway to Breckenridge greatly improved.

We have diligently worked toward the obtaining of a state park and a C. C. C. camp and believe that there is little doubt but that Cisco will attain the benefit of each of these projects within the very near future.

We feel that our constant and sincere efforts toward the general betterment of our conditions have been largely responsible for the fact that a great many new residents have come to our town within the past few months and that homes are now being purchased in Cisco for the first time since our deplorable financial condition became known.

We will appreciate an opportunity of continuing the work that we have been doing.

### BIBLE THOUGHT FOR TODAY

I will worship toward thy holy temple, and praise thy name for thy loving kindness and for thy truth; for thou hast magnified thy word above all thy name.—Ps. 138:2.

And when material sense is still,  
Faded the earthly dream,  
Thy holiness and love divine  
Will find transparency, and shine,  
Healing humanity.

—Christiana Willink.

When men recognize the rights of others, when they respect integrity, when they live moral lives, when they live the Golden Rule, the world will lose its troubles. The church is in the business of building character; man is at the task of building prosperity. Man needs the church, the church needs man.—Alice Frost Lord.

THE people of Cisco Tuesday will elect a mayor and two commissioners. Two tickets are in the field, representing two differing theories of democratic government and two records. The Citizen-Free Press has taken the position that the present administration should be continued in office. It has taken that stand upon a basis of honest opinion and from the standpoint of what it considers the best interests of this community. If it has been pointed in some of its remarks and frank in statement it was so because it felt and still feels that the choice now confronting the voters of Cisco demands a fair and thorough understanding of the issues involved.

### A Commonsense Election

OF all times, the few hours preceding an election ought to command the calmest reason and the soberest attention to realities. The voters should remember that the choice he or she makes in that brief and perhaps emotional period will endure for two years. One should not purchase two years with a whim or a prejudice. That large a package demands the most earnest and careful effort to justify the choice. The selection of a mayor for the city of Cisco certainly ought to command as much open-minded attention to quality and facts as the purchase of a car. Yet it is difficult for the voter to go to the polls with his mind made up as the result of a reasoned consideration of the facts. In too many instances he goes with his decision inspired by prejudice, the result of a deliberate intention on the part of the campaign manager.

In going to the polls Tuesday, the voter should ask himself or herself for what he or she is voting and why. What in the light of facts that are known, can be expected of the candidates for whom the vote is cast. For what reason does the candidate wish to be elected? Is his record such that he can be expected to carry out his campaign promises and his program without serious difficulty?

THE past year has seen a remarkable turn in the trend of municipal affairs. There has been a distinct and invigorating return of spirit to the community. Part of this has been due to the improvement in general economic conditions. Part of it has been due to the civic interest that has been inspired by a number of important local developments, most of which have been brought about largely through the efforts and policies of the present administration. To claim that Cisco is disintegrating or that the city is going to the dogs is not claiming a fact. On the contrary there has been and continues steadily to be a general bettering of local conditions. Property ownership is becoming increasingly desirable. Large industrial investments have been made in the city, giving employment to large numbers hitherto without

jobs. These industrial enterprises are destined to grow and in their growth to promote development elsewhere. This is what promotes constant and stable employment and the voter who goes to the polls Tuesday to cast a vote in the city election ought to be extremely careful that he or she does not endorse a candidate, a policy and a record that will react unfavorably upon this condition. He or she ought to be concerned to promote and to maintain conditions that will inspire confidence at home and abroad and thereby welcome new citizens, new investments and new enterprises to this town.

NO doubt the success of the negotiations for reducing the city's bonded debt from more than \$6,000,000 to slightly more than \$1,500,000 has played a definite part in this returning confidence. This success must certainly be placed to the credit of the present administration. To our knowledge, Cisco is the first municipality to accomplish such a success. That it was accomplished without costing the general fund of the city one cent is an additional credit to the administration.

IT would be closing one's eyes to the facts, indeed, to charge the administration with inactivity and futility in the face of that one accomplishment, alone. That does not take into consideration the fact that Cisco has been one of the few communities in the country to successfully reduce the rates charged its citizens for gas. This city is paying what is generally conceded a fair rate for gas. That is direct contrast with the experience of many other towns and cities.

Is an administration, able to accomplish that large saving to the citizens, inactive and impotent? We think not.

IN addition to these major achievements the present administration has to its credit numerous instances in which it has accomplished well. It is upon this record that it ought to be judged, and not from the standpoint of prejudice. Every voter is due his community the benefit of his reasoned opinion. Make the municipal election Tuesday a commonsense election, its verdict based upon an honest evaluation of the factors and the issues that are involved, and Cisco has nothing to fear at the hands of its electorate.

IN Friday's issue of the Cisco Daily News J. M. Williamson, candidate for mayor, accused Mayor J. T. Berry of ignoring his request that suitable representation be given the anti-administration candidates in the selection of judges for the municipal election next Tuesday. The charge is amusing, for the reason that it has been the stock charge of every ticket that has opposed the "ins" in a municipal election in Cisco. It was brought many times against Mr. Williamson's own administrations in election campaigns. There is an element of ironic humor in the fact that Mr. Williamson must needs now attack the very position he once maintained and the answer that he once gave to these charges.

As a matter of fact, which Mr. Williamson did not state, he and other candidates are allowed two supervisors at the election so that if any crookedness is attempted it may be readily detected.

THE present municipal campaign ought to show how easy it is for any candidate with imagination to make an issue out of nothing, and a mountain out of a molehill.

A great deal of interest has been aroused over the development of maintenance homestead farm colonies through the use of federal funds. These colonies, in four or five instances in Texas and in instances elsewhere, are proving their value in taking stranded families back to the land, where they can produce their own living, acquire an independence through land ownership and fortify themselves with a respectability that they could not attain in poverty on the concrete of the city.

CISCO has initiated a movement looking toward securing such a farm colony for this section of the county. The county itself, through the commissioners court, has taken steps to obtain such a colony. This is praiseworthy action. Such a colony would not immediately result in any appreciable relief of unemployment, but the influence of such an institution upon agricultural conditions in the county would be so profound that within a short while a distinct change would be realized. Perhaps no county in the state is so admirably adapted to diversified farming. The farms are generally in small tracts, while soil and climatic conditions are such that a great variety of crops may be grown. A maintenance homestead colony, by demonstrating the economic value of diversified farming, would tend to revolutionize the agricultural status of this county much to its profit.

## AIN'T WE GOT FUN?

## What's What at a Glance

WASHINGTON WORLD

Central Press Washington Bureau 1900 S street  
By CHARLES P. STEWART  
Central Press Staff Writer  
WASHINGTON, D. C.—The administration's plan to "take" nearly 675 millions of its so-called profit on dollar devaluation is a thing to make the average citizen's brain reel.

I know it, for I have consulted at least a couple of dozens of experts on the subject and most of them said it stumped THEM. A few tried to explain the trick to me, but, so far as I'm concerned, their explanations weren't explanatory. Possibly this is because a child, still struggling with the multiplication table, can't be expected to understand the solution of a problem in astronomical mathematics. Still, I can't recall that a majority of the experts themselves admit that they, too, are puzzled.

The program seems to be inflationary, but, even as to that, there are differences of opinion.

ALL THEORETIC  
To begin with, the government has a certain amount of gold in its treasury vaults. Theoretically United States money is based on it. It is only theory, however, for currency no longer is redeemable in it. In effect, it would be more correct to say that the government has SOMETHING (not clearly defined) that fixes money's value. By presidential decree, authorized by congress, it is declared that this "something" (referred to as gold, but it cannot be dependably so considered, for practically all authorities agree that it is unlikely gold redemption ever will be resumed) is worth approximately 41 per cent more than previously. Accordingly the treasury holds approximately 41 per cent's worth more of "something or other" than before the dollar was devalued.

MATERIALLY THE SAME  
In a material sense nothing has been changed; nothing added to the treasury's hoard, and nothing subtracted from it. The treasury simply is about 41 per cent richer. It is an increment totaling, arithmetically, nearly three billions, reckoned in dollars. There is no pretense that these three billions are anything except bookkeeper's figures. They represent zero in tangibilities. Treasury Secretary Henry Morgenthau, Jr., himself speaks of them as only "paper profit". Nevertheless, the government now is moving to "take" nearly 675 millions of its profit, to reduce its obligations and tighten its hold on the banking system.

Georgia Howard, of Fort Worth, and Mrs. Henson. Since his first coming to Cisco, Mr. Shockley has spent much of his life in other states, seven years of which he spent in Washington territory—from 1889 to 1896. Returning to Texas, he engaged in farming until incapacitated by rheumatism. He stated the town lot sale at Mangum took place about the time of his last return to Texas. "There were many tough characters when I came to this section," Mr. Shockley stated. "I re-

character of men. "I spent some time in the Rio Grande Valley before finally coming back to this section where I have lived ever since, but sold my interest there and located again in this section." "So far as we have been able to trace our relationship, our fellow townsman, F. E. Shockley, and I are not related."

WORDS OF THE WISE  
Adversity reminds men of religion.—Livy.  
A woman's whole existence is the history of the affection.—Iving.  
A moral, sensible and well-bred man will not affront me, and no other can.—Cowper.  
Never let your zeal outrun your charity; the former is but human, the latter is divine.—Ballou.

By LESLIE EICHEL  
Central Press Staff Writer  
NEW YORK—Something is occurring in these smaller cities—these cities of from a million on down to village size. They are beginning to hate New York (well, somewhat worse than they used to). "New York—bankers—money capital—cause of all our troubles."  
(Of course, New York believes that "fantastic" monetary and speculative ideas of the interior are the cause of all its troubles—but New York does not count for the moment.)  
The average man of the interior is rising to rule in a mass. It is a "ground swell" movement, mighty in its cumulative force.  
It was this same sort of movement in Germany, dramatized by the personality of Hitler, that brought government into the hands of the few who rode on the shoulders of the mass.  
Who will ride on the shoulders of the mass here?  
It doesn't seem as if the man has yet arrived.  
But he will have to be two-fisted—to be accepted.  
I overheard a young man say today: "We must get a strong man to set aside the constitution—to get things done. I am for a dictator, no constitution. The constitution always seems to stand in the way."  
That is strong talk. The young man never has been far away from his home town. He never has been to Germany or to Italy or to Austria. This thought has grown into him, isolated though he is. He seeks a solution by force.  
Why? Because democracy has failed?  
Because greedy interests prevent a democracy from operating, this young man would destroy democracy. Of course, he does not see it in that manner, but that is what his battery means.

Nature and Human Nature  
By W. F. BRUCE  
An intangible is something that cannot be touched, literally; some hidden factor or unmeasurable influence in life. Many times intangible values are underrated for the simple reason that their bearing on events is hard to estimate definitely, and we are not fond enough of mental effort to analyze a situation. Material objects and visible motions are given a large place in the attention of man. And yet the attributing of a happening to some incidental physical circumstance is often a most momentous fallacy. The cause may be an unseen force or a subtle influence. Intangibles may be either beneficial or detrimental.  
Political campaigns and other social movements are often determined by intangible influences. In our community at the present time there are such hidden forces at work. In the discussion concerning the coming city election, and to some extent concerning the school election, one would like for facts to be bared and motives to be revealed. There are many suggestions that raise questions, and questions that raise doubts; there are insinuations and hints; even some bold statements and some direct questions are neither as bold nor as direct as they might seem.  
Even with the most candid consideration we will differ on issues and policies and men. But we can differ in a good American way. What every voter is entitled to is a clear idea of the merit of issues and of the fitness of candidates. Most of what is being done now is to slur men and to muddy the issues. I am not discussing here either the candidates or the questions involved in this campaign; I am discussing the method of it. If the result is left to the honest judgment of the voters, and the voters put forth enough effort to arrive at fair conclusions, we may rest easy as to the outcome.

LESSON LEARNED  
The wealthy man who left his entire estate to his lawyer had learned about the shortest distance between two points.—Albany Knickerbocker Press.  
AMERICAN PLACE NAMES  
Hell-For-Certain, W. Va.

## Our Readers Say

Editor Citizen-Free Press.  
I want to offer some suggestions anent our coming school election. I am for the women candidates. Not that I am against the men, because they are good men, and have made good directors, considering that they are all men. That is my point. Am sure the men will feel relieved if the women are elected.  
Every school board should be composed equally of men and women. Men are usually better business managers than women and, on an average, have more executive ability than women. But in the education of our youth there is an element in their nature which I think is being neglected.  
U. S. Attorney General Cummings, called a conference in Washington last December of all enforcement officers, criminologists, educators, heads of women's federated clubs and others, to consider our crime problem. Among other resolutions, they resolved: "That overwhelming evidence has been presented to this conference of an intolerable breakdown in law and order throughout the nation."  
Bishop Boaz said in a recent sermon: "Social life of the nation has degenerated into an orgy of drunkenness, easy divorce, gambling and immorality."  
The daily newspapers carry a constant confirmation of these assertions, and statistics show the youth of the land are taking the lead in crime. If these deplorable conditions do not stir fathers and mother to action, what would?  
The cause is in our educational system. It is not enough to cultivate a child's intellectual faculties. Some of our most intellectual people are moral perverts. Training boys and girls to be good citizens is of first importance, and there is no course of study in our public schools directed to that end. We need a radical change in our system.  
Men have no natural right to be less moral than women, but the facts force us to admit that they are. The moral training we receive at our mothers' knees is the main anchor that keeps us men moored to things eternal. These beginnings should be supplemented by definite courses of training in every grade till our education is finished.  
That training in moral principles is effective, is shown in the records of the boy scouts. Although, on an average, out of every given number of boys, one will become a criminal, yet the records show that a scout rarely ever gets into court, and we have no record of an Eagle scout ever going to the penitentiary. They are not only lifted out of the average, but they are put into the safety zone. They are taught along with their rugged individuality to be mentally awake and morally straight; to be clean in body, mind and morals, and are taught these fundamentals of morals in a practical way.  
I believe that while the male members of the board are managing the business part of the board's duties, the mothers will put a mother's spirit of moral training into our school system. If we don't make some constructive change, the chaotic conditions of morals, of law and order, will plunge the world into a world conflict, and possibly an era like the Dark Ages. This must be avoided.  
Respectfully submitted,  
EUGENE LANKFORD.

## Road Meeting--

For the Bridge Player

Scope of the New Laws. The new international bridge laws which go into effect March 31st are designed to define correct procedure and to provide an adequate remedy in all cases where a player accidentally, carelessly or inadvertently disturbs the proper course of the game, or gains an unintentional but nevertheless unfair advantage.

Penalties are moderated to a minimum consistent with justice, and an offending player should be ready to pay a prescribed penalty graciously.

Divided Into Five Periods. In order properly to master and readily to find the various laws and proprieties, players should consider the game divided, as are these laws, into five separate and distinct time periods.

First and Second Periods. There are only two changes in the law pertaining to these periods which will be of interest to the average player.

Third Period, the Auction. During the auction the player may ask to have previous calls restated only when it is his turn to call.

Fourth Period, the Auction. During the auction the player may ask to have previous calls restated only when it is his turn to call.

# WHEN WORLDS COLLIDE

By EDWIN BALMER and PHILIP WYLIE

Copyright by Edwin Balmer & Philip Wylie WNU Service

### SYNOPSIS

David Ransdell, aviator, has been commissioned at Capetown to deliver a consignment of photographic plates to Dr. Cole Hendron, in New York. Tony Drake calls at the Hendrons' apartment. Ransdell arrives and Eve Hendron, with whom Tony is deeply in love, introduces Tony to Ransdell. A statement by Hendron says that Professor Bronson has discovered two planets approaching the earth. The result of the inevitable collision must be the end of this world. The approaching bodies are referred to as Bronson Alpha and Bronson Beta. To devise means of transferring to Bronson Beta is occupying the minds of the members of the League of the Last Days. Eve outlines to Tony the idea of the Space Ship, which Hendron has in contemplation. Tony rounds up suitable men and women to build the ship. Hendron has not been able to find a metal which will withstand the heat and pressure of atomic energy to be used in propelling the Space Ship. The tidal sweep to the Appalachians on the east and to the mountains on the Pacific side, and quakes change the entire surface of the earth. The Hendron settlement, where the Space Ship is being built, survives the earthquakes.

### CHAPTER VI—Continued

The respite brought by the second morning was comparative rather than real. The wind abated; the torrential rain became intermittent; and the visibility returned, though no one could have told whether it was early morning or twilight.

Tony rose to his feet the instant the wind slackened. Through all the long and terrible hours he had been absent from Eve. It would have been utterly unthinkable to attempt to locate her in the midst of that sound and fury. He found, however, that there was no use in looking for her immediately. So heavy had been the downpour of rain and ashes from the sky, that it not only reduced the field to a quagmire, but it covered the human beings who had lain there with a thick chocolate-colored coating, so that as one by one the people arose to sitting and standing postures, he found it difficult even to distinguish man from woman.

He was compelled to put Eve from his mind. It was necessary to think of all and not one. He found that his limbs would scarcely support him, but after he had staggered for some distance through the murk, his numbed circulation was restored, and his muscles responded.

Out of the subsiding maelstrom he collected some thirty or forty persons, most of them men.

"Any of you men working on the power plant?" he shouted. "Right. You two come over here. Now who else here was in the machine shop? Good. You fellows get to work on starting up the lights. They'll be the first thing. Now I want half of you to get beds in shape in the woman's hall." He counted the number he required. "If they don't look safe," he shouted after the disappearing men, "find a place that is safe, and put the beds there. We'll have to have a hospital."

With the remnant of his men he went to the dining halls. One of these buildings was a complete wreck, but the other still stood. They entered the kitchen. Its floor was knee-deep in mud. He recognized among those still with him Taylor, the student of light, whom he had sent to Hendron from Cornell. "Take charge in here, will you, Taylor? I'll leave you half these men. The rest of us are going to round up the doctors and get medical supplies ready. They'll want coffee out there, and any kind of food that they can eat immediately."

diately." He saw Taylor's mouth smile in assent, and heard Taylor begin to issue instructions for the lighting of a fire in one of the big stoves.

Once again he went outdoors. It was a little lighter. His anxious gaze traveled to the tower that housed the Ark, and from its silhouette he deduced that it was at least superficially intact. The shouting he had done had already rendered him hoarse, for the air was sulphurous. Besides the irritating vapors in the air, there was heat, such heat as surrounds a blast furnace—a sullen withering heat which blanched the skin, parched the lips, and was unrelieved by the rivulets of perspiration that covered the body.

Tony went back alone to the flying field. It was a little lighter. People were returning from what had been the flying field to the partial wreck at the camps, in twos and threes, many of them limping, some being carried. He found Eve at last, just as he reached the edge of the flying field. She was helping two other girls, who were trying to carry a third. She recognized him and called to him.

"Are you all right, Eve?" His soul was in his rasping voice. He came close to her. He looked into her eyes. She nodded, first to him and then toward the unconscious girl. She put her lips close to his ear, for she could speak only in a whisper: "Give us a hand, Tony. This girl has fainted."

He picked up the girl, and they followed him through the slough to the main hall of the women's dormitory. Beds were being carried there, and many of them were already filled. Some one had found candles and stuck them in window sills so that the room was lighted. Already two men who were doctors were examining the arrivals. Tony recognized one of the men as Dodson when he heard the boom of his voice: "Get hot water here, lots of it, boiling water. Don't anyone touch those bandages. Everything has to be sterilized. See if you can find anybody who knows anything about nursing. Get the rest of the doctors."

Somehow Dodson had already managed to wash, and his heavy-jowled face radiated power and confidence.

Tony went outdoors again. A gong boomed in the kitchen, and he remembered his thirst and hunger. Around a caldron of coffee and a heap of sandwiches, which were replenished as fast as they disappeared, were grouped at least two hundred people. Tony stood in the line which passed the caldron, and was handed a cup of coffee and a sandwich. The coffee tasted muddy. With his first sip he realized that brandy had been added to it. He wet his burning throat and swallowed his sandwich throat and swallowed his sandwich.

### CHAPTER VII

TONY'S senses reasserted themselves. He was able for the first time to hear the conversation of people around him.

He saw Peter Vanderbilt sitting pathetically on a log, a cup of coffee in one hand, a sandwich in the other, and his bedraggled handkerchief spread over his knees for a napkin. The elegant Vanderbilt's mustache was clogged with mud. His hair was a cake of mud. One of his pants legs had been torn off at the knee. His shirt-tails had escaped his belt, and yet as Tony approached him, his urbanity was unruffled.

Vanderbilt rose, "Tony, my friend," he exclaimed. "What a masquerade! What a disguise! I recognized you only by the gauge in which heaven made your shoulders. Sit down. Join me in a spot of lunch."

Tony sat on the log. "I'll have a snack with you," he replied. "Then I must go back to work."

The quondam Bean Brummel of Fifth avenue nodded understandingly. "Work! I never saw so many people who were so avid for work, and yet there's something exalting about it. And the storm was certainly impressive. I admit that I was impressed. In fact, I proclaim that I was impressed. Yet its whole moral was futility."

"Futility?" "Oh, don't think that for a minute I was being philosophical. I was thinking of the many years I had spent as a lad in learning geography, and how useless all that knowledge was to me now. I should imagine that the geography that I learned at twelve was now completely out of date."

Tony nodded to the man on the log. "So I should imagine. You'll excuse me, but I'm needed."

Peter Vanderbilt smiled and without a word rose and followed the younger man. They found Hendron emerging from the great hangar. He seized Tony's shoulder the minute his eyes lighted upon him. "Tony, son, have you seen Eve?"

"Yes. She's all right. She's working over at the emergency hospital."

Behind Hendron stood a number of men. He turned to them. "You go ahead and inspect the machine shop. I'll join you in a minute."

He then noticed that Tony had a companion. "Hello, Vanderbilt. Glad to see you're safe." And again he spoke to Tony. "What was the extent of the injury to personnel?" Tony shook his head. "I don't know yet."

Vanderbilt spoke. "I just came from the field hospital before I had my coffee. So far as is known, no one here was killed. There are three cases of collapse that may develop into pneumonia, several minor cases of shock, two broken legs, one broken arm, a sprained ankle; and there are forty or fifty people with more or less minor scratches and abrasions. In all less than seventy-five were reported so far."

Hendron's head bobbed again. He sighed with relief. "Good God, I'm thankful!" He rubbed his hand across his face. "Did you men say something about coffee?"

"With brandy in it," Tony said. Vanderbilt took Hendron's arm. "May I escort you? You're a bit rocky, I guess."

"Just a bit. Brandy, eh? Good." Before he walked away, he spoke to Tony. "Listen, son—" The use of that word rocked Tony's heart. "This was much more than I had anticipated. Much worse. But the ship is safe, although one side was dented against its cradle. That's about all. I've got to get some rest now. I'm just a few minutes away from unconsciousness. I want you to take over things, if you think you can stand up for another twelve hours."

"I'm in the pink," Tony answered. "Good. You're in charge, then. Have me waked in twelve hours." Tony bade the rounds again. In the hall of the women's dormitory, Dodson and Smith were hard at work. Their patients sat or lay in bed. Eve, together with a dozen other women, was acting as nurse. She smiled at him across the room, and he told her that her father was asleep.

Tony went next to the machine shop. A shift of men was at work clearing away the infiltrated dust on the engines and the mud that had poured over the floors. Another group of men lay in deep sleep wherever there was room enough to recline. One of the workers explained: "Nobody around here can work for long without a little sleep, so we're going in one-hour shifts. Sleep an hour, clean an hour. Is that all right, Mr. Drake?"

(TO BE CONTINUED.)

## 'Clean-up Week' Is Extended to Sixth of April

"Clean-up Week," sponsored by the City Federation of Woman's Clubs, has been extended until April 6, it was announced last week.

Cooperation of the citizens in the campaign to remove trash and unsightly and dangerous rubbish was urged. The women's clubs are joining with the city in this campaign, and extra trash wagons have been put on the routes to remove surplus accumulations of waste material.

The city has been districted and committees named for the districts as follows:

Mmes. J. T. Anderson and J. B. Cate, Third and Fourth streets; Mrs. J. R. Burnett, south D avenue from Ninth;

Mmes. J. E. Chesley and J. E. Spencer, Ninth to Eighteenth, M avenue to Front street;

Mmes. E. P. Crawford and C. D. Fee, Fifth street;

Mmes. T. J. Dean and J. B. Curry, Sixth street;

Mmes. Chas. Brown and P. Pettit, Seventh street;

Mmes. Chas. C. Jones and P. P. Shepard, Eighth street;

Mmes. Alex Spears and C. R. West, Ninth street;

Mmes. Homer Slicker and Geo. P. Fee, Tenth and Eleventh streets;

Mrs. Hubert Seale, Humboldt;

Mmes. Ernest Hittson and J. C.

## Moran Club Hears Cisco Collegians

MORAN. — Dr. Tyndall, president of Randolph college, Cisco, brought two of his students here Wednesday and furnished entertainment for the Luncheon club. These young men were Vernon Van Cleave and Richard Davis. They gave readings that were excellently rendered and were greatly enjoyed by everyone. Supt. Etheredge invited them to present the readings before the school following the Luncheon club hour, which they did.

This is the second time Randolph college has brought entertainment, and the club is always glad to have them present.

Spring fashions to make women look "ten years younger."

## "G Men" War on Criminals

### Army of Federal Agents Win Reputation as "American Scotland Yard"

By GAYLORD REAGAN International Illustrated News Writer

WASHINGTON—Recent raids conducted throughout United States by federal agents against vice activities of nearly every description gave further indication of the highly efficient federal law enforcement machine.

The raids marked the beginning of a nation-wide war on crime.

"The G Men," as the federal operatives are nicknamed, have won themselves the respect and fear of every type of criminal. Their relentless pursuit of lawbreakers has broken up most of the notorious gangs of the United States. More than 2,000 arrests were made in the recent "clean-up".

Criminals today are being beaten with their own weapons. In the basement of the huge new department of justice building is a rifle range where federal agents perfect themselves as marksmen for the times when they are drawn into gun battle with another Dillinger or "Pretty Boy" Floyd.

### 500 in Department

On another floor of this same building are the offices of J. Edgar Hoover, chief of the bureau of criminal law enforcement. One of the invaluable aids in his work is the vast system of finger-print records which contain more than 4,800,000 records.

An average of 2,800 finger-prints are received daily by this bureau of identification. Experts compare the various records and many "suspects" are thus identified as individuals wanted for crimes elsewhere.

An arsenal containing modern

weapons of all kinds is at the disposal of field agents assigned to bring in desperate criminals. Machine guns, sub-machine guns, and sawed-off shotguns—weapons traditional to gangsters—are now part of the department of justice equipment.

Less than 500 operatives comprise the division of investigation of the department of justice, the agency entrusted with active investigation and pursuit of criminals. Each agent is a picked man, highly trained, and fitted by long experience.

### Cummings Declares "War"

The average age of each agent is 35 years. More than 80 per cent of department members have had legal training. Sixty per cent of them possess university degrees. More than 50 of them are expert linguists whose ability to speak more than one language qualifies them to handle espionage, immigration, and similar cases.

In the past two years, the department has been built up until it has become a veritable "American Scotland Yard." United States Attorney General Harold S. Cummings has made criminal law enforcement a major objective of his administration.

"Racketeering and organized crime in United States must be stopped," said Cummings. "But to accomplish this it will be necessary to have greater co-operation between state enforcement agencies and the department of justice. The modern methods of the underworld have placed criminal activities on a scale which defy the efforts of any single group."

The department has to its credit a record of convictions in nearly 95 per cent of the cases which it investigated and brought to a jury.

## Advertising Proves Business Builder

Consistent advertising and ability to "deliver the goods as advertised" are building a growing service station business for A. V. Clark, proprietor of the Texas Service Station at E avenue and Eighth street. This station is noted for its superior greasing service and for the excellence of its washing and polishing jobs.

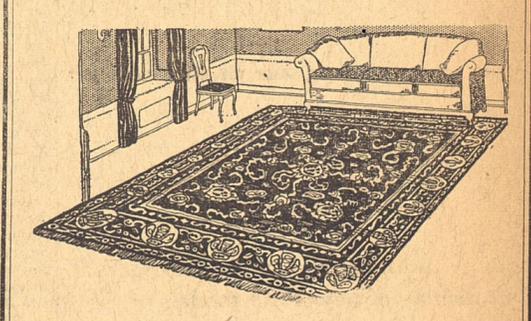

Mr. Clark's sales of gasoline and oils have constantly increased along with the increase in the other business handled by the station. Although not located on a highway, he has developed his trade by persistent advertising

and by giving bang-up service to those who patronize his station. His success is an inspiration for other business men who might be inclined to let handicaps get the upper hand.

AIN'T IT SO? Any community is glad to be given the works by PWA.—Arkansas Gazette.

## \$63,000 Student Aid Sent Out for March

AUSTIN. — Checks totaling \$63,120 were being mailed last week from the Texas Relief Commission to 80 Texas colleges to cover March expenses of the Federal Emergency Relief administration's student aid program.

Number of students to benefit by the grant will not be known until the end of the month, but it is anticipated that the payroll will be approximately the same as the February list of 4,613. February expenses totaled \$63,123.30.

Work of the students is divided into two classifications: intramural and extramural. Of the former, numbering 4,296 in February, the largest portion, 1,426, were engaged in office clerical work; 716 were employed in li-

## There's Joy in Watching Plants Grow in the Home

(Homemaking Helps)

By ELEANOR ROSS

MANY OF us are finding new joy in seeing house plants grow and thrive, becoming more handsome all the time. We have learned that flowering plants are more fun than just plain cut flowers, especially those of us that have no gardens of our own. We beam with pride as a cyclamen, begonia or azalea plant shows new buds and fine open blossoms.

We modestly affirm that we are lucky with plants and such but really we know that we have looked after our plants carefully, studying them as carefully as any horticulturist. It is lots of fun, too, and makes for beauty in the home as well.

Plants need such careful watching since no two seem alike. And this is only natural when we remember that the natural habitat of various plants varies from the arid desert to washy swamp. Therefore it must

follow that no two plants have the same drinking habits.

If you have been presented with a plant whose habits are unfamiliar to you, don't attempt to experiment with it until you have consulted a nurseryman or your local florist. Don't think that just dousing with water frequently will make any plant grow. Sometimes too much water will cause rot and even destruction. Generally, however, if the plant has been properly potted and has the right soil and general conditions, giving about half an inch of water two or three times weekly during the winter and daily in summer, is about right.

Too much water will only wash away valuable food for the roots. A good way of duplicating nature's way of bathing plants is to put them in a tub on inverted saucers, pour an inch or so of lukewarm water into the tub and place an old sheet or other large piece of fabric over them. Then the plants will be just damp enough and prepared for a good soaking with a spray.

Extramural students employees totaled 317. Of these, 80 were employed in various capacities in municipal recreational programs; 73 gave instruction to illiterates; 71 were employed in health and welfare work; and 93 were employed on special community projects, particularly caring for the grounds of public buildings.

## Mr. Property Owner . . .

We can help you to finance repairs and improvements to your property at the same rate of interest that is charged under the federal rehousing program.

Investigate our plan. You can do the whole job in one transaction, saving time, trouble and additional expense.

The Life and Letters of Peter

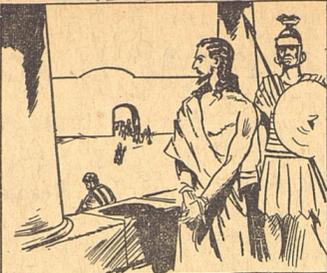

ILLUSTRATED SUNDAY SCHOOL LESSON

By the Rev. Alvin E. Bell And Alfred J. Buescher

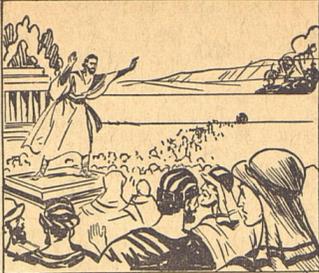

Scripture—1 Peter 5:6-11; 2 Peter 3:14-18.

When Peter wrote his two epistles he was looking back over almost forty years from that day Jesus found him at his fishing and called him to be a fisher of men. During these years he had grown in the grace and knowledge of our Lord.

How much Peter needed that grace he learned on that night of the betrayal when Peter so shamefully denied his Master. Had he relied less upon self and more upon God's grace he would not have fallen as he did.

The Lord Jesus was most gracious in forgiving Peter and restoring him to his position among the apostles. On the day of Pentecost, Peter was given grace to preach Christ boldly so that thousands were converted and added to the church.

Grace gave Peter power to heal the lame man at the temple gate and to give all the credit to Christ, saying it was done "in the name of Jesus Christ of Nazareth."

GOLDEN TEXT—II Peter 3:18

Income From Brazos Project Would More Than Care for Costs, Survey Discloses

(Editor's Note: This is another of a series of articles on the history of the Brazos river project and its objectives)

Years ago, when the Brazos question first came to the attention of the state legislature, and the people throughout the watershed, it immediately became apparent that to put on a program of such magnitude the expense would be prodigious, and wherefore some direct means of paying the bill aside from savings on flood losses, would be necessarily plotted in advance.

During the past three years \$50,000,000 has not been considered such a great deal of money, what with the vast amount of funds expended under the democratic administration's relief program. Nevertheless, at the request of the Texas people, no demand was made for an outright gift of 50 million dollars for the Brazos project, regardless of the fact that other states made such demands, and then filled.

In the first place, the state legislature pledged and appropriated—as a gesture of good faith—the taxes of ten overflow counties, to amortize the loan. The sum represented was more than \$300,000 per year. The ten counties from which the state tax is to be diverted are: Austin, Brazoria, Burleson, Fort Bend, Grimes, Waller, Washington, Brazos, Milam, and Robertson.

Engineer Retained Abraham Streiff, a Swiss engineer with many years of practical flood control experience in the United States, was retained by the State Board of Water Engineers to draw up a statement of the possibilities of liquidation of the \$50,000,000 Brazos program. His reports, a summary of which follow, show that the yearly income of the Brazos project would more than care for the yearly costs.

In the first place, there are 2,107,000 acres of land that would become irrigatable through the sale of surplus water. Calculated at \$3 per acre, only 200,000 acres of this might establish a revenue of \$600,000 yearly.

But the greatest feature of the project is the electrical possibility.

Over 500,000,000 hours of electrical energy per year may be generated through the use of the stored waters of the Brazos river

and its tributaries, if the \$50,000,000 project is approved.

Estimates made by the state board of water engineers show that in 1945 practically all of this energy would be consumed within a fifty mile radius of the seven power dams.

Billions of Kilowatts A total increase of more than a billion kilowatt hours in the area of Texas served by the Brazos river is forecast by the state engineers during the next 10 years. The total per capita consumption of electricity within the state of Texas is expected to average 412 KWH during 1935. In 1945 the per capita consumption will be approximately 590 KWH.

These figures are taken from exhaustive surveys made by the state board of water engineers.

The population in 1930 was 5,800,000 in Texas. On the basis of previous increases, the population of Texas today is 6,400,000; and in 1945, will be 7,550,000.

There are seven power projects proposed for the Brazos Conservation and Reclamation district. Population and electrical consumption statistics for the area show:

Within 50 mile radius of any of the power projects:

Population: 1930, 811,000; 1945, 1,056,000. Annual KVH consumption: 1935, 368,698,800; 1945, 622,981,000. Increase: 25,282,200.

Within 50 to 100 mile radius: Population 1930, 1,304,000; 1945, 1,698,000. Annual KVH consumption: 1935, 592,868,000; 1945, 1,000,000,000. Increase, 407,132,000.

Total Increase Within 100 to 150 mile radius: Population 1930, 1,127,000; 1945, 1,466,900. Annual KVH consumption: 1935, 512,280,800; 1945, 864,500,000. Increase: 352,219,000.

Total increase to be expected for the next ten years: 1,013,633,400 KVH.

The greatest peak load consumed in Texas in history was in 1929, when more than 2,900,000,000 KVH were used. The decline during that time was rapid until January, 1932. Consumption dropped to 2,240,000,000 KVH. Since January, 1932, a gradual rise has been registered.

The figures computed on the expected increase of consumption of electrical power were based, according to John Pritchett, office engineer of the state board of water engineers, upon the minimum

per capita increase in usage, without taking into consideration the peak load years.

The figures only involve the use of present electrical equipment and do not take into consideration extra use of energy possibly developed through the sale of additional equipment in regions where power is transmitted on a much reduced rate, industrial expansion.

The Brazos offers possibly the best stream source in Texas for generation of electrical energy. From its headwaters in the plains of west Texas to its mouth near Freeport, on the Gulf, there is a total fall of more than 3,000 feet. At Seymour, the Brazos has already dropped to 1,300 feet. Near Marlin the river drops 10 feet in a half mile. At one point on Clear Fork, near Eliasville, there is a drop of 30 feet in nine miles.

The board of directors contemplate no competition with public utilities. Rather, they hope to wholesale the energy to utilities and municipalities.

Three County School Board Candidates

Candidates for the county school board at the election next Saturday are Dr. P. M. Kuykendall, Ranger, candidate for trustee-at-large; Mrs. J. R. Burnett, Cisco, candidate for Precinct No. 1 place, and Jim Beard, Eastland, candidate for Precinct No. 4 place.

Mr. and Mrs. Glenn Keady, Miss LaVerne Bills and Dan Griffin spent Thursday evening in Eastland.

Committee Starts Tentative Work On Farm Colony

A committee consisting of E. P. Crawford, chairman, Charles J. Kleiner, J. M. Bird, Dr. Hubert Seale and E. A. Butler, conferred Thursday afternoon at the chamber of commerce upon tentative plans looking toward securing a maintenance farm colony for the Cisco trade territory.

A tract of land of approximately 6,200 acres would be required to be blocked for such a project, not necessarily in regular form but in a continuous block, it was explained. This land would have to be suitable from a soil and fertility standpoint, acceptable to the government and priced in keeping with land values and the actual productive value of the soil, it was explained. A number of counties and a number of communities in this county are pre-

paring to block up acreage to be offered the government for such homestead colonies, it was explained, and the chances of Cisco securing one of these farms would depend first upon the quality of the land obtained and, second, upon the price at which it could be obtained. The land, when purchased by the government, would be cut up into 50-acre blocks, improved with farm house, barn, livestock, poultry and necessary supplies and sold to carefully selected families now on relief rolls. These families would be allowed 35 years in which to pay for these farms out of the production of the land.

The farm colony would be governed by a committee of public-spirited citizens.

William Boaz, engineer retained by Eastland county to work out details of prospective maintenance farm colonies in this county, outlined to the Cisco Boosters early in the week, the proper procedure to be followed in efforts to secure such a colony. Thursday afternoon the Cisco committee voted to

Modern Automatic Electric Range

- Allowance for Old Stove
• Small Down Payment
• Easy Monthly Terms

It's easy to serve piping hot, delicious meals if you've an automatic electric range. You see the range does most of the work... and cooking failures are practically impossible. The oven control keeps the heat at the exact temperature required by your recipes... and the automatic clock control starts and stops your dinner cooking at the proper time. You really owe it to yourself and your husband to cook this easy, modern way. You'll be fresher, lovelier, less fatigued at the end of the day... a truly efficient housewife if you cook with electricity.

Do you know that your increased use of Electric Service is billed on a surprisingly low rate schedule... and adds only a small amount to your total bill?

recommend to the chamber of commerce directors that preliminary surveys of several sections of the Cisco country be made with a view to determining if sufficient land at sufficiently attractive prices could be obtained for such a colony.

Secretary Says Refusal Charge 'Utterly Untrue'

Citizen-Free Press:

The statement was made in a newspaper political article Friday that I, as city secretary, refused certain parties, not named, their request to see the minutes of the city commission.

The statement is utterly untrue. No one has asked me to see these minutes, with the exception of newspaper reporters, and these records are open to any person who is interested in or entitled to see them by reason of being a citizen of Cisco, representative of a citizen of Cisco or otherwise entitled to see them. I shall be glad

for Mr. Williamson or any of his supporters or friends to inspect these records. They are open to the public.

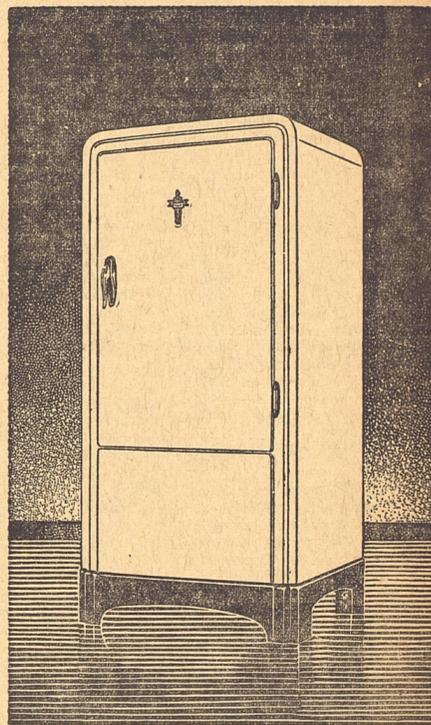

J. B. CATE, City Secretary.

Mrs. J. L. McMurray left Saturday for Hillsboro for a few days visit with her parents, before leaving for a three months trip to Porto Rico.

Mr. and Mrs. F. E. Harrell have returned from Temple where Mr. Harrell attended a meeting of the Brazos Reclamation and Conservation District board.

MODERN BEAUTY

Sweeps the 1935 Gas Refrigerator away out in Front!

From its glistening white exterior to its well-arranged interior, the 1935 Electrolux is the modern woman's refrigerator. It has a distinctive beauty which she helped design. It has operating advantages which no other refrigerator can give her. It has a remarkably low operating cost that provides savings enough to pay for her enjoyment of automatic refrigeration.

See this advanced refrigerator today. Learn the story of the amazingly simple method of gas refrigeration which does away with noisy, troublesome machinery and brings refrigeration costs down to about 25c a week. Compare its conveniences, its great advantages, its operating cost. Then you'll discover why the 1935 gas refrigerator is the best buy of them all for safe, economical food protection.

### Gov't Will Check Records of Men Handling Funds

Editor Citizen-Free Press.

Much has been said in connection with the city campaign about certain candidates promising employment to the unemployed, and it has been mentioned by some that the money is expected to be furnished by the public works program of the federal government.

Some seem to have the idea that the men in authority charged with the duty of placing this money are going to dish it out to anybody who might have a vision and would like to get hold of some of it.

Let us look this prospect of employment squarely in the face without prejudice to any one. Does it not appear to you that the government authorities are going to check up on the records of the men who are to handle this money to see whether they are sound business men with a record of safely handling business matters? The present administration has handled the business of the city on a cash basis, and at the same time has by cash payment and by dealing with the bond holders reduced the debts of the city more than \$4,000,000.00.

To my humble way of thinking, the government authorities will be far more willing to place these funds in the hands of men with this sort of record than they would with men whose records show by the reports of auditors recognized by the government officials as reliable, that the business of the city was not handled so well under their administration.

I honestly believe that those of us who may expect to get employment from these government funds had better give our support to the present administration whose record will satisfy the government authorities that the funds will be properly handled in their hands. The men will have a far better chance to get much greater amounts of the funds for our city.

Think this over, boys, we all have the same interest at heart.

As is well known, the present administration has in the making the establishing of a very large park between the city and lake Cisco. This project will require the services of lots of labor. Let us not throw anything in the way of this plan being carried out.

J. T. ANDERSON.

### Surprise Dinner Compliments Son

Mrs. J. C. Donica complimented her son, A. C. Donica, with a surprise birthday party, Friday evening at her home, 404 West Eighth street. An Easter motif was carried out in the house decorations and refreshment plates. The invited guests were Misses Betty Rue Logan, Gloria Jean Jobe, Louise Lawson, Barbara Blythe, Betty Lou Powell, Patsy Jean Hudson, Henrietta and Arlene Moss, Peggy Jean Gallagher and Messrs. C. L. White, Frank Turner, Paul Jackson, Norvell Gallagher and A. C. Donica.

Miss Madeline Shepherd has returned to her home in Houston.

### Arms Crisis Moves to Climax

Europe's arms crisis moved toward a historic climax as France took sharp exception to Germany's rearmament and proceeded with steps to increase her own military strength. Premier Pierre Flandin, right, requested a special session of the League of Nations to consider citation of Germany for violation of the Versailles treaty. Pierre

Laval, foreign minister, will represent France at the international diplomatic conference to be held between delegates of Italy, Russia, England and France over the rearmament issue. "It will be so easy to answer any arguments against Germany's step," was the reply of the foreign office at Berlin.

### Williamson Says Berry Refused to Follow the Law

Remembering the unfair tactics practiced one year ago, by the present administration in order to perpetuate themselves in office, the undersigned visited Mayor Berry and asked him to appoint on the election board some members favorable to our ticket as is provided by law. Mr. Berry said he would see about it and that before he appointed election officers he would let us know. The board which has been appointed are known to be ardent supporters of the present administration. Mr. Berry failed to keep his promise to confer further with us before the board was named. In the light of last year's efforts to keep opposing candidates off the ballot we did not expect fairness at the hands of those directing Mr. Berry, but we did expect him to live up to his promise.

In the interest of fair play we appeal to Cisco citizens to resent these efforts and these unscrupulous methods intended to prevent a fair election.

It has been the practice of the former administration to prepare petitions and secure signers for opposing candidates and to see that the names were placed on the ballot. On the other hand, the clique now in office have resorted to chicanery in order to prevent a fair expression of the people in the selection of their officers by leaving no space on the ballot for writing additional names and throwing out legal ballots which were cast against the present regime.

In the light of their past we are justified in our belief that every effort fair and unfair will be used to defeat the will of the people in retiring the present regime and establishing tolerable conditions.

The law providing for the appointment of election boards is as follows, viz.: In all city, town and village elections the mayor, or if he fails to do so, the governing body shall order elections pertaining alone to the municipal affairs, give notice and appoint election officers to hold the election, unless a different method be prescribed by the charter of such city, town or village; but in all cases, supervisors may be selected as in general elections and judges and clerks shall each be

selected from different political parties when practicable. (Art. No. 2951).

The above is the law which the mayor has flagrantly refused to follow and has allowed his masters to name a board from among his henchmen in order that the people who differ from him politically may be deprived of connection with the election and that citizens who differ politically from them may have no voice in the conduct of the election.

We call upon the citizens to resent this dictatorship by a policeman.

In the light of the above we appeal to the voters to go to the polls and reprimand these unfair methods by voting for J. M. Williamson, W. W. Wallace and L. F. Mendenhall. Remember that unless you elect all three nothing can be accomplished, therefore, unless all are elected we do not want any part.

J. M. WILLIAMSON.

Mr. and Mrs. Dick Starr and son, Dickie, and Mr. and Mrs. Goodson Sellers and daughter, Bobbie Starr, of Abilene are expected to spend Sunday with Mr. and Mrs. Leon Maner and Mrs. Silas George.

### Political Announcements

W. J. FOXWORTH.  
L. F. MENDENHALL  
W. W. WALLACE

### J. M. Williamson States Platform For Cisco Mayor

To the Citizens of Cisco:

In the closing hours of this campaign I want to call the attention of the voters to the fact that the paramount issue is whether or not we are going to take advantage of federal funds to provide employment for our people.

The opposition have not expressed their position on this issue, therefore, we take it for granted that they will continue their policy of lethargy and inactivity on this fundamental issue. In addition to securing federal funds for worthwhile projects including public improvements which if not secured now will have to be provided with tax revenue.

With the present distressed financial conditions delinquent taxes and delinquent water bills should be settled on a nominal basis and I propose to initiate measures that will lighten the tax load to the point where our long-suffering people will be able to pay their taxes and water bills from employment provided initially by public works until private industry can be stimulated to absorb unemployment.

The schedule of water rates has been so that the man who needed a garden most is unable to pay the rates in the schedule. The parkways are the property of the city and if the citizenship is willing to beautify these public properties the city should furnish water without cost. I believe that if this policy is carried out the parkways will be beautified, if elected in collaboration with the city commission will re-establish this schedule and it is my opinion that under this program the parkways along our principal streets will again become beauty spots and line our streets with well kept parkways, that shrubs and grasses that have died from want of water and care will reappear and give an added incentive to people seeking homes to locate with us. It is my opinion among the needed public improvements which should be brought about through the use of funds that can be secured from federal and state governments are a water treatment plant that will take care of the needs of Cisco for a period of years, a reserve standpipe with a capacity of at least 500,000 gallons, an auditorium, gymnasium and exhibit building which will take care of mass meetings and gatherings that may be brought to Cisco and at the same time be used as an exhibit building used for livestock and agriculture exhibits, which if properly followed up with necessary organizations, premiums and prizes will greatly stimulate agriculture and stock raising and at the same time extend our trade territory. Public roads and highways is another much needed public improvement which can be secured through the public funds to be distributed at an early date, direct all-weather roads to Carbon and Cross Plains should be secured in some way and in addition to furnishing employment for our unemployed will extend our trade territory materially and thus help our merchants and professional people to make Cisco the central trading point in several adjacent counties. In addition to these with the proper efforts parks, C. C. C. camps

and subsistence homesteads may be brought to our community, giving employment to many of our unemployed and furnishing additional customers and clients to our business and professional men.

I propose in cooperation with the city commission to reduce the cost of government in general by eliminating unnecessary expenditures such as heavy traveling expenses and unnecessary fees and salaries to commissioners and other employees and to use these funds in the securing of funds and projects that will furnish employment to our distressed people.

On a pledge to use my time and best efforts to bring about this program I ask your votes.  
J. M. WILLIAMSON.

### Extra Trucks Will Haul Off Rubbish

Trucks will be put on city garbage removal routes Wednesday to haul away trash accumulated in the city clean-up sponsored by the City Federation of Women's clubs in cooperation with the city, Mayor J. T. Berry announced Saturday.

The mayor urged citywide cooperation in the spring clean-up campaign.

Born to Mr. and Mrs. J. H. Kendrick, March 25, a boy. This couple now have apartments in the second story of the Cisco Flour mill.
