CISCO, TEXAS, FRIDAY, JUNE 22, 1934

NUMBER 42

Oscar Chastain Making Close Canvass in Race 17th Dis. Congressman

Oscar Chastain, candidate for congress from this, the 17th district, is making a close canvass of the district, and while in Cisco Tuesday spent some time in the Citizen office. He stated that he is greatly pleased with the reception he is receiving at the hands of the people wherever he goes. His opening speech in the campaign was made May 5 at Stephenville. Speaking of that speech he stated that there were at least 5,000 people to hear him. "I feel that it was proper for me to have opened my campaign in Stephenville, for it was in Erath county that I was born, and served the city schools of Stephenville as superintendent for six years, and like positions in Thurber, Merkel and Stamford. Feeling that having been born in the county, and it was there I held my first important school position, that I could expect and did receive a most cordial reception."

Concerning that address at Stephenville, a copy of which is before me, Mr. Chastain declared for certain fixed principles on which he is making this race. A brief synopsis of the things he stands for include repeal of the postal saving bank law, as it has served its purpose, and its repeal will put back into circulation one and one-half billions of dollars; a tariff on petroleum that will prevent the import of millions of barrels of cheap South American oil to the States, which competes with our petroleum; favors the payment of the soldiers' adjusted compensation certificates in greenbacks issued by the government, or by the issuance of government bonds in denominations of \$25, \$50 and \$100 to be delivered to ex-service men direct; endorses the acts of President Roosevelt in his effort to restore prosperity to the nation; opposes federal tax on Texas oil; opposes the dole system; favors the right of labor for collective bargaining and labor's right to receive a living wage, and some system that will insure the needy a comfortable living when they can no longer produce; favors collecting from European nations what they owe this country, and would deny defaulting countries the right to borrow a dollar in the United States; would court the friendship of federal departments that he might have his district favored with the benefits congress bestows to other congressional districts.

He stated: "When W. J. Bryan was a candidate for the presidency the Democratic party promulgated a platform which contained four major planks—bimetallism, election of United States senators by direct vote of the people, a federal income tax and the guaranteeing of bank deposits in national banks. Three of these planks have been enacted, and are now laws of the country. I believe we will see bimetallism a law during this generation. All of these I have ever favored."

In state affairs Mr. Chastain has served in the 41st legislature where he was active in the passage of the Small Riverbed bill. Also was elected two years ago to the 43rd legislature, when he served on some of the important committees, such as judicial districts, appropriations, education, oil and gas and other committees.

In 1908 was elected professor of history and economics at A. & M. College, which he held for ten years. He was made a member of the state text book board by Gov. Campbell, and the state board of examiners by State Superintendent R. B. Cousins.

H. M. Wood, manager of Perry's Store in Cisco, departed Thursday for Ennis to spend his vacation with home folk. He is relieved during the vacation period by Mrs. I. D. Everidge, who comes from the Mineral Wells store of Perry Bros.

Mrs. P. B. Glenn and little daughter, of Breckenridge, were guests of their parents, Mr. and Mrs. A. L. Mayhew, this week. Mrs. Glenn was the former Miss Mentora Mayhew.

Big Motor Car Races To Be Added Feature In Cisco This Fourth

July 4th, always a red letter day in the annals of Cisco, especially campaign years, but this year promises to eclipse all previous occasions. Each campaign year a political carnival has been staged, where many of the state and district candidates have waged wordy duels for the edification and amusement of the sovereign voters, and incidentally, in the hope of adding additional scalps to their political belt that would land them into the soft political seats they sought.

All this will be repeated this Fourth at Lake Cisco, when each of the candidates for state and district offices will have been extended an invitation to meet their opponents on the political rostrum. All details to make this Fourth at Lake Cisco a stellar event have been worked out by several committees of the chamber of commerce, and even the General will take advantage to put over one of his rackets to increase his advertising revenues. However, this time his racket is legitimate, and the town will be benefitted by our business people "falling" for his racket.

While all this is splendid, and for an ordinary town would be enough glory for one day, but Cisco puts over big things when all hands are on the job. So, in addition to the political carnival, and amusements features planned by the Lake Cisco Amusement Company, consisting of many entertaining and enjoyable aquatic and other features, we will have a dual attraction at the Walter Ray Race Track, six miles northeast of Cisco, on the Breckenridge highway. This attraction will appeal more to the red-blooded sports who find mere political discussions rather tame. At the race track will be staged probably the first motor car races ever held in Eastland county. A splendid half-mile circular race track will be the setting of these events, and there will be thrills a plenty. Automobile and motorcycle drivers will compete in dare-devil stunts that will make one's hair assume a perpendicular attitude. The time trials are to be held at 1:30 p. m., with the races proper beginning at 2 o'clock. Besides the races concessions have been sold for many and varied features to entertain the crowd that is expected to be in attendance. The program, we are informed, will conclude with an automobile head-on collision, though this feature is not advertised, but is expected to be put on as an added attraction.

Practically every merchant in Cisco will give out courtesy tickets to these races.

You will miss the biggest celebration

Many Mourn Passing of W. P. Moore, Whose Burial Was Saturday

Those who knew him best are still mourning the passing of one of Cisco's most honorable and upright citizens. Though more than a week has passed since the news of the awful tragedy came to Cisco that W. P. Moore had been mortally injured when struck by an automobile June 14, near Leuders, one frequently hears expressions of sorrow at his passing. A brief story of the accident was carried in the Citizen last week, and mention of his death a few hours later, but as the Citizen was on the press, at the time none of the details of the tragedy could be given.

The funeral and burial of this well known gentleman were held June 16, at 11 o'clock, in the First Methodist church, conducted by Rev. Frank L. Turner, pastor, with burial in Oakwood cemetery, directed by the Green Funeral Home. Active pall bearers were Will St. John, J. E. Caffrey, A. A. Michael, H. V. McCorkle, W. J. Armstrong, L. F. Mendenhall, W. J. Donovan and L. B. Norvell. Honorary pall bearers included about 30 of his intimate friends of Cisco and other cities.

He is survived by his widow and three children, Mrs. H. O. Duty, of Benavides, Duvall county, Texas; James T. Moore, of Cisco, and C. W. Moore, of Conroe. Several brothers and sisters also survive, one of whom is A. H. Moore, of Caddo Mills, Texas. Born in Virginia December 20, 1876, Mr. Moore came to Cisco from Caddo Mills in 1920, and had been a resident of this city continuously since, engaging in trucking business in which he continued up to the time of his tragic death, confining most of his operations to hauling for the Humble Company by contract. It was on a trip for that company when he became a victim to the accident that caused his death.

Accompanied by Ray Cearley, one of his drivers, they were returning from Hamlin and had stopped to make some adjustments to his radiator, parking the truck off the highway. Espying a piece of rubber which would make the adjustment he stepped onto the highway a few feet to pick it up, after waiting for a car to pass, and while in a stooping position was struck by a car trailing the other, according to statements by Cearley. The death car was said to have been driven by Mrs. Pat O'Donnell, of Hamlin, who became hysterical as she saw she was going to strike him.

He was taken to Albany, and from

in West Texas if you fail to come to Cisco July 4th. There will be no dull moments, as there will be something popping every minute.

RANDOLPH GRADUATE BECOMES BRIDE OF BRECKENRIDGE MAN

Miss Faye Horn, daughter of Mr. and Mrs. C. U. Horn, of Ibox, and Mr. Edward Rowe, Breckenridge, were married Friday, June 15, at 3 p. m. at the home of the bride's parents. The home was decorated with baskets of the season's flowers.

Miss Horn wore a gown of white chiffon organdie, with white accessories, and carried an arm bouquet of spring flowers. Her traveling suit was beige with brown accessories.

An informal reception for immediate relatives and a few out of town guests was held after the ceremony. Out of town guests were Mr. and Mrs. Coon, of South Bend; Mr. and Mrs. C. E. Garrett, of New Mexico, and Mr. Howard Martin, of Lubbock.

The bride and groom received many beautiful gifts, one being a modern home in Breckenridge from the bride's parents.

Mr. and Mrs. Rowe left for a wedding trip to Fort Worth, and upon their return will be at home at 1012 West Second street, Breckenridge, Texas.

This marriage is of much interest to Cisco folk, where the bride and her parents are well known and have many friends. Mrs. Rowe not only is an alumna of Cisco's junior college, but much of her early girlhood was spent here when her parents were residents of this city.

RINGOLD RUNNING ON A BUSINESS PLATFORM

A. E. Ringold, of Ranger, candidate for representative from Eastland county, the 106th representative district, was in Cisco Wednesday in the interest of his candidacy. Mr. Ringold stated that the reception that is being given him by the voters of the county is most gratifying. He is one of Ranger's foremost business men, and should Eastland county nominate him we will have one representative that will endeavor to represent his constituents in a business-like manner, and not worry about the legal technicalities that often defeat the very objective sought.

Sidney Mueller and Edgar Noell motored to Santa Anna Monday.

there was rushed to the Graham Sanitarium, where he succumbed to his injuries about 3 o'clock that afternoon. It was ascertained that his injuries consisted of a fractured arm and leg, besides head and internal injuries.

While never having been a seeker for public office, his friends drafted him as a candidate for city commissioner in the last municipal election, but being denied the privilege of having his name and his associates printed on the official ballot, the entire ticket was unsuccessful. However, the large number of voters who wrote his name on the ballot evidenced the high esteem in which he was held by the people of Cisco.

Cisco People Signing With New Company Ninety-Five Per Cent

Members of the canvassing committee, securing signers of our people to the contract to take gas from the Cisco Gas Corporation, subsidiary of the Hickok Consolidated Gas Corporation, the company that will save Cisco people from the clutches of the Community Natural Hijackers and their piratical progenitor, the Lone Star Gas Grabbers, are finishing up their work, and indications are that there will be a ninety-five per cent exodus from the derelict Hijackers craft just as soon as connections can be made with the new gas distributing system. There is a possibility of the desertions being 100 per cent, which is should be, exclusive of those employees and others depending upon the Hijackers and associated concerns for their daily bread.

The report comes to the Citizen that the signers have already passed the twelve hundred mark, and the end is not yet. The committee is now rounding up the stragglers—those who have not been at home when the canvassers came around.

This spontaneous indication to accept relief offered by the Cisco Gas Corporation is just as the Citizen anticipated. The Hijackers have assumed an attitude of a despot in every step it has taken since it took over Cisco's gas distributing system.

Not satisfied with a legitimate profit, for had they been, there would have been no opposition company to take over the business, but they have manifested the unnatural instinct of the monopolistic grafter to extract from the people every cent the traffic would stand, and then some. This was shown when Mr. Chester May came before the city commission with a threat to boost the domestic rate to \$1.60 per 1000, while fixing his optics on the ceiling, instead of looking Mayor Berry and the commissioners in the eye. Only the exhibition of that intestinal fortitude manifested by the commission saved our people from the greed of this soulless monopoly, when they answered the petition of Mr. Chester May with the adoption of an ordinance fixing the rate for domestic gas at 50 cents per 1000 gross.

They did it unto Eastland and Ranger, and had not our commission stood pat they would have done it unto us.

Some interesting reports of high-handed procedure of the Hijackers are being told to the canvassing committee. One where a lady was out of town for a few days after her gas bill was due. The Hijackers extracted the meter without warning, instead of charging the bill against her deposit. Another woman reported that her meter had been taken out while she was absent from home. But they put it back after she threatened to use her "sawed-off shot gun" on those responsible for enforcing the hard and fast rule of the Hijackers. Others reported that they disconnected with the Hijackers' line more than two years ago.

But the Hijackers are not so cocksure of their position now, and in some measure, are trying to make amends. One patron said that before it seemed that the Hijackers would have opposition his gas bill one month amounted to \$20. The next bill came after it seemed likely the new company meant business, and he paid only \$4. Both bills were for summer months.

But we hope this capitulation is eternally too late. The die is, we hope, already cast, and the Citizen will have no regret when it reports the last Hijacker meter has been disconnected. If they die they will have killed themselves. Peace to their ashes.

Friends here are cordially welcoming the home-coming of Miss Willie B. Green, now of Gladewater, but who will be remembered as the courteous salesgirl of the Palace News Stand.

Robert Strickland, of Lubbock, was the guest of J. W. Shepard Wednesday and Thursday.

Firestone

**CALLAHAN FARMERS LOAD
OUT FIRST SHIPMENT OF
THIS YEAR'S ONION CROP**

The farmers of Callahan county made agricultural history this week, when they loaded the first car of onions ever shipped from the county. Under the supervision of Robert E. Hayes, expert onion grader from Farmersville, Texas, 526 bushels of onions were loaded Thursday morning. They were inspected by the Federal Fruit and Vegetable licensed inspector, U. J. Backus of Eagle Pass, Texas.

Some 75 farmers had part in loading the car. No grower tried over 4 acres and the average was 1 acre per farmer. When no rain was received in May, all onion growers knew their onions were going to be cut short, as any other crop has been, yet some yields of as high as 75 bushels were reported. It is estimated the farmers have 400 bushels yet on hand. The price paid by Mr. P. L. Miller, buyer from Farmersville, was \$1.00

for No. 1 yellows and 85 cents for No. 1 Crystal Wax. Other grades were in proportion. The county agent Ross B. Jenkins, reports that more than 100 bushels were sold at the loading dock to railroad men, merchants and farmers who had failed to raise their desired amount.

The farmers have learned that some land can't raise onions and other. They know they have the right kind. Many have signified their intention of planting 2 to 10 acres next year. Nothing could have been more adverse to onion growing this year. There were four freezes, poorly prepared soils, inexperienced growers, and the driest month of May in the history of Texas. In spite of these obstacles, Callahan loaded a capacity car of onions.—Baird Star.

**Tires Should be Checked
During Early Summer**

There is no more important time for thorough checking of tires than the summer season, according to Huestis Bros., dealers for the B. F. Goodrich Rubber Company, who are located at 14th and Ave. D.

"Every motorist, at the start of the summer season, should have his tires checked by competent specialists to find whether they are safe for driving during the 'warm months,'" Mr. Ed Huestis says.

"Tires are put through their greatest strains in hot weather. The safety of the driver and his family depends to a great extent upon their condition. Thorough inspection is the only way in which tire safety can be checked.

"Too many motorists consider only the tread of the tires in making their own superficial inspection. This is not enough, especially for driving in hot weather. Treads are important, of course, but the interior of the tire, the combination of rubber and fabric that make up the tire carcass is equally so.

"It is here that the inspection of a highly trained tire man is invaluable from the standpoint of motoring safety. It is only the tire man, trained for a long period to detect wear which might lead to serious trouble later, who can guarantee that the tires are safe for travel.

"Checking of tires has become increasingly important due to the high speeds of modern automobiles. Motorists who want to take every precaution against accident to themselves and their families cannot afford to miss thorough inspection of their tires at this time of year."

**G. I. M'BEE GIVES MEANS
FOR DESTROYING MOLES**

Absolute control of moles in garden and peanut fields has been reported to the county agent J. C. Patterson, by G. I. McBee, of Mangum. This was accomplished by inserting into the run at various points grains of corn coated with a strychnine poison, such as used in raven poisoning.

This poisoned grain is made by dissolving one-half teaspoonful of laundry starch in a little cold water, pouring slowly into 8 tablespoonful of boiling water, stirring to prevent lumping. When thick like musilage, remove from fire and add 1-8 ounce of strychnine with 10 per cent saccharine mixed in and one teaspoonful of baking soda and stir rapidly; then add one tablespoonful of heavy corn syrup and stir to a smooth creamy paste. Pour this over one quart of corn and stir until grains are evenly coated.

This same mixture poured over wheat or milo makes a good poison for sparrows. Handle cautiously and keep in mind that you are working with poison.

**Why Should We
Pay Bankers To
Hoard Wealth?**

Refunding of a billion dollars' worth of the 4 1-4 liberty loan bonds and a quarter billion of short term treasury notes at 3 1-4 is neither good orthodox financing nor unorthodox common sense.

It amounts to paying bankers to hoard.

The treasury had available no less than \$7,817,000,000 with which to refinance those bonds.

Two billion cash on hand; \$2,817,000,000 profit from devaluation of the dollar, and power to issue \$3,000,000,000 in green backs.

Yet that vast sum of cash or potential cash is kept idle while the government offers to pay 3 1-4 per cent interest—\$40,000,000 a year—to bankers on the new bonds.

From a common sense point of view, no bonds should have been issued at all.

If the treasury, for reasons of its own, did not wish to use any of the nearly 8 billion dollars it had available then it could have retired the liberty loan bonds by discounting treasury notes directly with federal reserve and paying off the bondholders.

That way, the heavy interest burden would have been avoided.

As it is, the new bonds are a subsidy which invites bankers to hoard.

Government bonds are the equivalent of cash. Yet by keeping them

in their vaults instead of cash, the bankers can collect \$40,000,000 a year bonus. Meanwhile, commercial credit is diverted to government purposes.

The most infamous part of it all is that the federal government has slashed its recovery expenditures AS THE PRICE OF THE PRIVILEGE OF HANDING THE BANKERS THIS SUBSIDY!

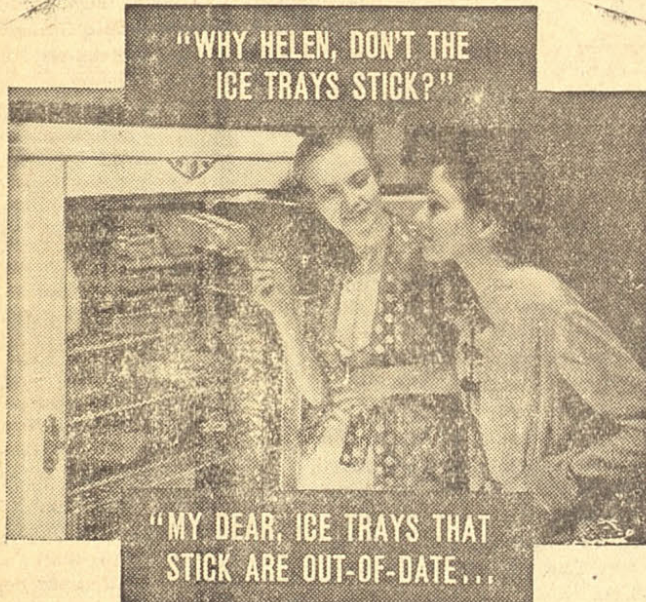

Those recovery expenditures are two billion behind the original program of the president. C. W. A. has been junked and Harry Hopkins announces that the government has cut its relief expenditures to a quarter of what they were.

All to balance the budget to please the bankers.—The Philadelphia Record.

**SPLENDID RAIN VISITED
CLYDE SECTION SUNDAY**

Reports from Clyde are to the effect that a two-inch rain fell in that section Sunday night, which extended to the outskirts of Baird, according to Charlie Kleiner, who was in that part of the state at the time. "Water overflowed the gutters in some places along the highway, and indications were that those people have sufficient moisture for some time," Kleiner said.

That was the night that heavy clouds hung over Cisco, giving promise of lavish precipitation, but failed to reach this section. The light rain Saturday night helped some, but was too light to be of much benefit to vegetation.

Ours is a Frigidaire '34'

Automatically—at a finger touch—ice trays glide from the freezer of the Super Series Frigidaire '34! And here are some of the other features:

Automatic defrosting; Lifetime Porcelain inside and out; Sliding Utility Basket; and the Frigidaire Servashelf.

HON. TOM HUNTER WILL BROADCAST SATURDAY NIGHT OVER 3-STATION HOOK-UP

Tom Hunter of Wichita Falls, candidate for governor will carry his program for a Texas recovery to the voters of the state over a three-station radio hook-up on Saturday night, June 23, during a half hour period, from 9 to 9:30 o'clock through arrangements effected by the Hunter-for-governor clubs at Fort Worth, Houston and San Antonio.

The broadcast will be a joint one over WBAP at Fort Worth, KPRC at Houston and WOAI at San Antonio. Tune in at 9 p. m. sharp.

ARKANSAW CROPS ARE FINE, JUDGE LANKFORD REPORTS

Judge Eugene Lankford, who returned from his old home in DeValls Bluff, Ark., last Sunday, says crops in that section are fine, as they have been blessed with plenty of rain. "The only thing necessary to insure the prosperity of that section seems to be fair prices, and the necessary circulating medium with which to purchase the produce the farmers raise. Corn and cotton are the principal products of the section of Arkansaw I visited, and present prices are favorable, but the people have no money with which to buy. Corn is one dollar per bushel. My brother has his entire plantation planted to corn, which promises an abundant yield."

Judge Lankford has land interests in the DeValls Bluff country, and it was to look after these interests that called him back to his old home section for a week's stay, which he has just concluded.

Cyrus Elliott is now cashier and bookkeeper of the Cisco office of the West Texas Utilities Co., transferred here from the Cross Plains office of the Utilities Co.

THE LARGEST HIGHWAY FUND GIVEN TO TEXAS

WASHINGTON, June 19.—State apportionments of the \$200,000,000 fund provided for in the new highway construction act were announced today by Rexford G. Tugwell, Undersecretary of Agriculture.

Texas received the largest fund, \$12,291,253, with New York getting \$11,327,921, Pennsylvania \$9,590,788, Illinois \$8,921,401, and California \$7,932,206.

The money will be made available immediately for allotment to construction projects on the federal aid highway system and its extensions into and through cities and on important secondary roads.

MAY CHARTERS SHOW A SIX PER CENT GAIN OVER APRIL

AUSTIN, June 14.—Charters granted to new corporations during May totaled 120, a gain of 6.2 per cent over April but a decline of 21 per cent from May last year, according to the University of Texas Bureau of Business Research. Capitalization of \$1,269,020 was 5.4 per cent less than in April and 36 per cent below a year ago.

Only one group, merchandising, showed an increase over May last year, and that of only 3 per cent. On the other hand, a number of groups showed increases over April of the current year: Manufacturing concerns, 21 chartered, against ten in April; real estate and building, six against four; transportation, two against one; miscellaneous, twenty against sixteen.

Mrs. Mose Blitch, of De Leon, is visiting her parents, Mr. and Mrs. J. B. Blitch.

The Cisco Lumber and Supply Co. is making some improvements at their lumber and paint store. A new front is being erected, and an extension which will give their store added capacity.

MCDONALD WILL SPEAK NEXT MONDAY EVENING AT EASTLAND AT EIGHT

The Citizen is advised and is requested to announce that the Hon. C. C. McDonald, candidate for governor, will address the people of Eastland next Monday evening at 8 o'clock. The speaking will likely be on the court house lawn, unless it should be raining, and in that event in one of the court rooms.

This will give the people of the county an opportunity to hear one of the leading candidates tell us what he stands for, as well as to hear one of the most brilliant orators of the state. Mr. McDonald is recognized as an orator, and a man with a fund of information, so it will not only be a pleasure for you to hear him, but he will tell you some things about the campaign that will help you form an intelligent opinion about the man, and the measures for which he stands.

IN COUNTY COURT
Texas Produce Co., Inc., vs. H. E. Andrews and H. P. Keynote.
E. C. Brand, banking commissioner, vs. George Phillips, suit on note.
Robert W. Russell vs. J. C. Bonham et al, collect note and foreclosure of chattel mortgage lien.

AGED CROSS CUT WOMEN ARE BEATEN AND ROBBED

CROSS PLAINS, June 20.—Three men were held at Brownwood late today in connection with a brutal attack on two aged women at Cross Cut, seven miles south of Cross Plains before daylight, and the theft of \$40 from the mattress on which one of them slept.

No charges were filed against the men and officers were not certain they were implicated in the case. Only one man was seen in the home in which both women lived.

Mrs. Lige DeBusk, 82, was beaten severely and Mrs. Abbie Hounshell, 83, was knocked to the floor by blows from a pistol in the hands of an unidentified man. Physicians treating them at their home said tonight they were improving normally. Mrs. DeBusk suffered seven gashes about the head and three on the arm.

A. G. Bardwell is reopening the Magnolia filling station at Avenue D and East Ninth Street. He plans a formal opening, probably next week, when he will be ready for business.

CHRISTIAN SCIENCE CHURCH SERVICES

"Is the Universe, Including Man, Evolved by Automatic Force?" is the subject of the Lesson-Sermon which will be read in all Churches of Christ, Scientist, on Sunday, June 24.

Among the citations which comprise the Lesson-Sermon is the following from the Bible: "And God saw everything that he had made, and behold, it was very good... Thus the heavens and the earth were finished, and all the host of them" (Genesis 1:31, 2:1). The Lesson-Sermon also includes the following passages from the Christian Science textbook, "Science and Health with Key to the Scriptures" by Mary Baker Eddy: "God creates all forms of reality. His thoughts are spiritual realities... nothing exists beyond the range of all-inclusive infinity, in which and of which God is the sole creator" (page 513.)

BIBLE THOUGHT FOR TODAY

But when the Comforter is come, whom I will send unto you from the Father, even the spirit of truth, which proceedeth from the Father, he shall testify of me: And ye also shall bear witness, because ye have been with me from the beginning. - John 15: 26, 27

*Is this the truth? Is this the Comforter?
Is this the living message come again?
Is this the Word made manifest in life?
Is this the law of God revealed to men?*
—Myrtle Ella Robertson.

The man who believes that there is a divine presence and Love to which he can turn, and who at the day's beginning and the day's end commits his life into that great care and keeping, has a medicine for life which is better than all the medicine in the world.—Rev. Sidney Berry.

OUR WATER PROBLEM (?)

As stated last week Cisco has no water problem. We have no pressure, but the fault is not in the water supply. The water department has never claimed that the pump was out of repair, though we all know something is wrong. I am told that the pump at Lake Cisco has a capacity of lifting 750 gallons of water per minute, if so why is it not being done? We are told that the people are using more water than can be pumped, but is this true if the pump is functioning, and if not, why not?

No official has charged that there is anything the matter with the pumping machinery, and if that is true at 750 gallons to the minute there should be going in the standpipes 1,080,000 gallons of water every day, or 32,400,000 gallons every 30 days. Estimating that there are 1,500 meter connections, and every meter was registering the allowable 10,000 gallons per month, the water consumption in Cisco would only be 15,000,000 gallons every 30 days. That should leave in reserve 17,400,000 gallons, ample for all other purposes, such as fires, washing the streets or any other manner that should be desired.

But all will be hotsy-totsy hereafter. The city official organ last Sunday told us that the city commission had purchased another pump, one used only a short while by the Humble Co. I believe it was stated that the new pump had a capacity of 400 gallons per minute. If the old pump is functioning (no one claims it is not) the water department now has facilities for lifting an additional 17,280,000 gallons every 30 days, which gives the city 49,680,000 gallons to supply the 1,500 meter connections, or 34,680,000 gallons more than the 1,500 can account for if every meter was registering the full minimum of 10,000 gallons, which they will not average.

If the pump at Lake Cisco is all right we do not need another pump, and its purchase was useless extravagance. If the pump is not functioning as it should somebody is responsible, and that is inefficiency.

If the city needed an additional pump why not recondition the pump at Lake Bernie? Surely to put it in repair would hardly cost as much as another pump. We have heard it said that the "Bernie pump was not worth repairing." Repair men told the Citizen that all machinery is worth repairing. But if it has been allowed to deteriorate to the point of worthlessness, isn't somebody responsi-

ble for its present worthless state? Doesn't that also spell i-n-e-f-f-i-c-i-e-n-c-y?

If the water problem is one of inefficiency is the water commissioner functioning as he should if he does not have these pumps manned by men who understand their business.

Lake Cisco has enough water to supply every town from Ranger to Abilene inclusive, and there is no sane reason why the pressure in the standpipes should not be adequate for all domestic and fire protection needs of Cisco. We say no sane reason, for it is not a sane reason if the cause of the low pressure is due to inefficiency, and there is inefficiency if the pumping machinery has been allowed to fall into a state of disrepair that it will not now supply 15,000,000 gallons of water, when its capacity is more than twice that amount.

Only a few years ago this same pump kept the water towers running over, and train loads of water went from the loading racks every day to supply Texas & Pacific towns as far west as Monahans.

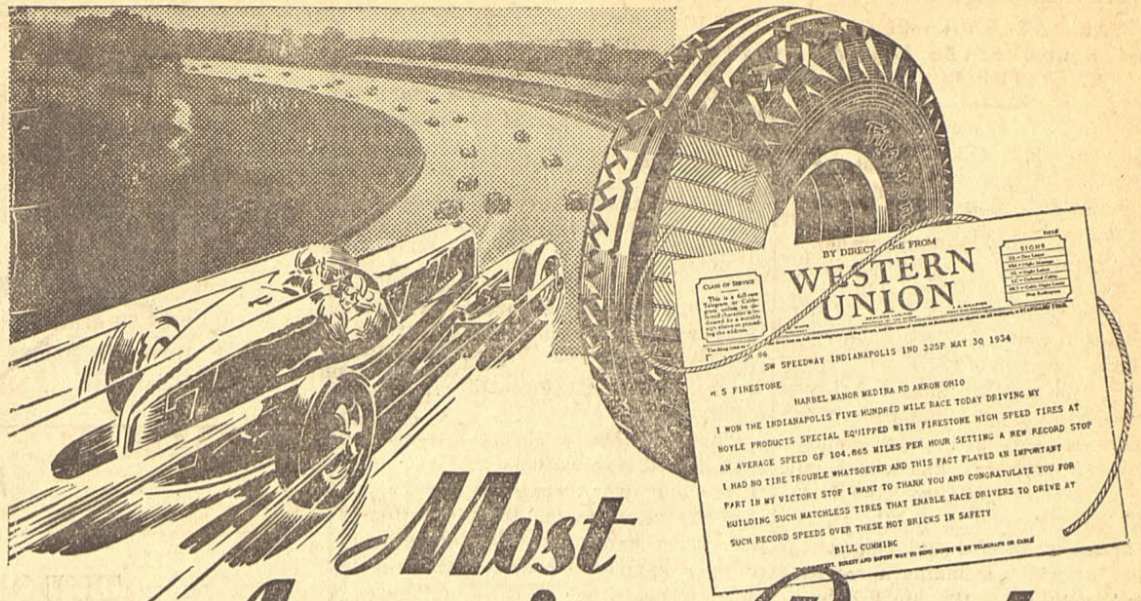

A large number of Cisco people have endorsed the story carried in the Citizen last week, and I believe I have made this story so clear that even the water commissioner will not deny the fact that every word of it is true.

In refuting the charge that we are using more water on "account of the dry season," than the machinery will supply I am only attempting to protect the people who have planted their vegetable gardens under the guarantee that the city would allow them a minimum of 10,000 gallons, and protest the commission cutting off their water at this time when these gardens are needing it more than at any time since they were planted. I don't want to be ugly about it.

ABE LINCOLN, PROPHET

I am not one that extols the merits of the martyred president, Abraham Lincoln. I suppose the rebel blood in my veins flows, inherited from a Confederate officer, inclines me to be somewhat prejudiced, but it has always seemed to me that one of Mr. Lincoln's greatest achievements was to have been murdered by a zealous sympathizer with the Lost Cause. While willing to concede many admirable humane qualities to the civil war president of the United States, but I have never been willing to concede to him that superior statesmanship that some are wont to crown him with, especially from those of the Southland, who, like myself, come from those who followed the ill-fated fortunes of Lee, Jackson, and other Southern immortals. But as a seer I am willing to accord him all the glory of a prophet, as is shown in the following message to congress in 1861. Mr. Lincoln, 73 years ago, drew as correct a picture as could have been penned had he written this message yesterday. Read it, then tell me if you can write as true an indictment of predatory wealth as that which he pictured nearly three-quarters of a century ago.

"I see in the near future a crisis approaching that unnerves me, and causes me to tremble for the safety of my country. As a result of war, corporations have been enthroned, and an era of corruption in high places

Most Amazing Proof

OF EXTRA STRENGTH • SAFETY AND DEPENDABILITY
Ever Known!

WORLD RECORD BROKEN!

IT IS almost inconceivable that human ingenuity could build tires that would withstand the terrific punishment of the 500-mile grind at Indianapolis, May 30.

'Round and 'round the blistering track they streaked, hour after hour, under the blazing sun . . . the low moan of powerful motors rose to a terrific roar as they hit the straightaways at 150 miles or better—grinding, pulling, pounding around treacherous tire-destroying curves faster than they ever dared before. Sliding into the turns at these terrific speeds, there was nothing to hold the car to the track except the tire.

Mile after mile, lap after lap, greater and greater heat and increased centrifugal force developed to separate the tread from the body of the tire. Every conceivable force known was working to tear the tires to pieces—yet Firestone High Speed Tires, with Gum-Dipped High Stretch Cords, withstood this most gruelling test.

Thirty-three demons of speed—thirty-three cars equipped with Firestone High Speed Tires—all protected by Gum-Dipped High Stretch Cords—entered the Annual Speed Classic. Every tire was bought by the driver or owner of the car.

In all the heat—in all the grinding—in all the straining and pulling—not one cotton strand loosened—not one life was endangered by tire failure—not one car was forced out of the race by tire trouble. Six of the winners finished without a tire change.

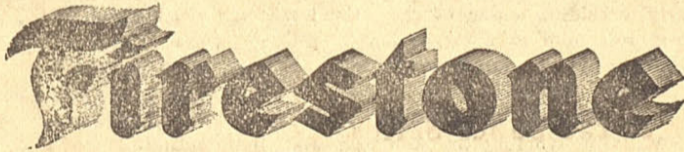

What a tribute to the Extra Strength—Safety and Durability built into Firestone High Speed Tires.

WHAT THIS MEANS TO YOU

The amazing record of Firestone dependability at Indianapolis was made possible by the Firestone patented process of Gum-Dipping. Every fiber of every cord in every ply of the tire is saturated and coated with pure liquid rubber; there are eight extra pounds of rubber to every 100 pounds of cotton cords.

There is greater adhesion between the plies of the Gum-Dipped Cord body and between the body and the tread. As a result of this patented process of Gum-Dipping Firestone engineers have been able to build a wider tread of flatter contour, with more and tougher rubber and deeper non-skid, giving you more than 50% longer non-skid mileage.

Don't delay! Call on the Firestone Service Dealer or Service Store in your community today and equip your car with the new Firestone High Speed Tires for 1934. Drive with security and peace of mind.

will follow, and the money power of the country will endeavor to prolong its reign by working upon the prejudices of the people until all the wealth is aggregated in a few hands, and the republic is destroyed. I feel at this moment more anxiety for the safety of our country than ever before, even in the midst of war. God grant that my forebodings may be groundless.

"Monarchy itself is sometimes hinted at as a refuge from the power of the people. In my present position I could scarcely

be justified were I to omit a warning voice against the approach of returning despotism. It is not needed nor fitting here that a general argument should be made in favor of popular institutions; but there is one point with its connections, not so hackneyed as most others, to which I ask brief attention. It is assumed that labor is available only in connection with capital; that nobody labors unless somebody else owning capital, somehow by the use of it, induces him to labor. Labor is

prior to capital, is independent of capital. Capital is only the fruit of labor and could not have existed if labor had not first existed. Labor is the superior of capital and deserves much higher consideration. I bid the laboring people beware of surrendering the power which they possess, and which if surrendered will surely be used to shut the door of advancement of such as they, and fix new disabilities and burdens upon them until all of liberty is lost."

SPECTACULAR KNOCK-OUT SALE COMMENCES THIS A. M. AT THE BOSTON STORE

A veritable feast of bargains awaits the buying public at the Boston Store's spectacular Knock-Out sale, which commences this morning with the opening of the doors at 9 o'clock. The usual opening rush is anticipated, for it is well known to the buying public that these sales mean a feast of bargains for the entire Cisco country. I. Moldave, manager of the Boston Store, says: "We realize this is between seasons, and the prices we are offering to make this sale all its name implies, a real spectacular knock-out sale, means a sacrifice, but we have decided to give the buying public all the advantage of careful and economical buying, as well as making a sacrifice in pricing this selective stock of merchandise at the figures we are quoting. The continued dry weather makes it necessary to give the people just a little more value for their money. Despite the fact that money is scarce, all must have seasonable merchandise, and the prices we have placed on our large and selective stock of merchandise will give everyone an opportunity to get everything they need in ladies and men's wearing apparel, piece goods, dress material, shoes, hose and everything for the entire family. We ask all to read our advertisement in this issue of the Citizen, then to read carefully our large circular telling of the many bargains we have. The sale starts promptly at 9 o'clock this morning, and we anticipate a big rush with the opening of our doors. Every article listed is a bargain. These prices are marked down on staples as well as novelties. For instance you can get genuine bleached Hope domestic for 10c a yard; good brown domestic, 6c; 400 yard spool cotton thread, 7c; men's dress oxfords, \$1.97; ladies white kid slippers, \$1.98, and everything else at prices in proportion."

THREE-YEAR OLD SEEDLING PECANS READY FOR BUDDING

Last year Billy Wyatt, of Carbon, budded several topworked pecan trees and now reports that the new growth is heavily loaded with papershell pecans. He informs County Agent Patterson that seedlings, grown from pecans planted three years ago, are now ready for budding.

FOR SALE—155 acres good farm land near Cross Plains, most of it in cultivation, rest in pasture. Bargain prices for cash. See Mrs. Hart, 410 E. 18th street. 2tpd

APPLICATION FOR TAX-EXEMPT TAGS MAY BE MAILED IN NOW

The Agricultural Adjustment Administration announced that applications for identification tags for cotton ginned prior to June 1, 1934, which is exempt from the tax provisions of the Bankhead control act, will be received after June 15.

In a previous announcement, holders of old cotton were asked to make these applications prior to June 15. Applications may be made by letter or on the government form, through the county agent.

County agents are being instructed to hold all applications received by them and deliver them to taggers when they are ready to tag the old cotton. Old cotton, under a special regulation of the commissioner of internal revenue, is permitted to move untagged in the channels of the trade through the month of June.

These instructions are issued as a result of numerous inquiries by telegraph and telephone in order to assure persons interested in the cotton business that all old cotton will be tagged as soon as it is physically possible to accomplish the task and that taggers will act on applications even though the applications are filed after June 15 and are not on government forms.

In making application, holders of old cotton should state the number of bales ginned prior to June 1 and their location.

11TH COURT OF APPEALS INVALIDATED \$67,000 OF CROSS PLAINS WARRANTS

Holding that the "encumbrance of municipal plants for more than \$5,000 to secure payment for extension is void unless authorized by an election," Judge O. C. Funderburk, of the 11th court of civil appeals handed down an opinion June 1 which cancelled \$67,000 water and sewer improvement warrants of the city of Cross Plains. This decision, which if concurred in by the supreme court, may have a far-reaching effect on securities of other municipalities similarly issued, Cisco for example.

Cross Plains appealed an adverse decision of the 104th district court on the ground that the improvements made were faulty. The decision was not on that point, but constitutional grounds.

DR. SENSABAUGH RETURNS TO CISCO AS PRESIDING ELDER OF THIS DISTRICT

It is gratifying to former friends of Dr. O. F. Sensabaugh here to learn that he will return to Cisco to fill out the unexpired term of Dr. C. Q. Smith as presiding elder. Dr. Smith's resignation was made necessary by his appointment and acceptance of the presidency of McMurray College, at Abilene.

Dr. Sensabaugh's coming is by appointment of Bishop H. A. Boaz, who relieves him from his duties as commissioner for the Southern Methodist University. Dr. Sensabaugh was formerly presiding elder of this district, and was held in high esteem by all, irrespective of church affiliation.
