DECISIVE BATTLE NEAR AT SHANGHAI

State Witness in Marshall Trial Faces Perjury Charge

DECLARES HE TOLD GRAND JURY NOTHING

WAXAHACHIE, Feb. 11.—Despite perjury charges against his wife and another earlier witness, Bud Mace, slated to be the state's main witness against Schuyler Marshall, Jr., former Dallas sheriff, today "failed to remember" his grand jury testimony and also was charged with perjury.

Road Building Is Added to Bill

WASHINGTON, Feb. 11.— The senate without record vote today adopted an amendment by Sen. Norris, Rep. Nebraska, to broaden the Cogan-Lafollette unemployment relief bill to provide for road building at federal expense.

KITTENS TO PLAY BOWDER TEAM TONIGHT

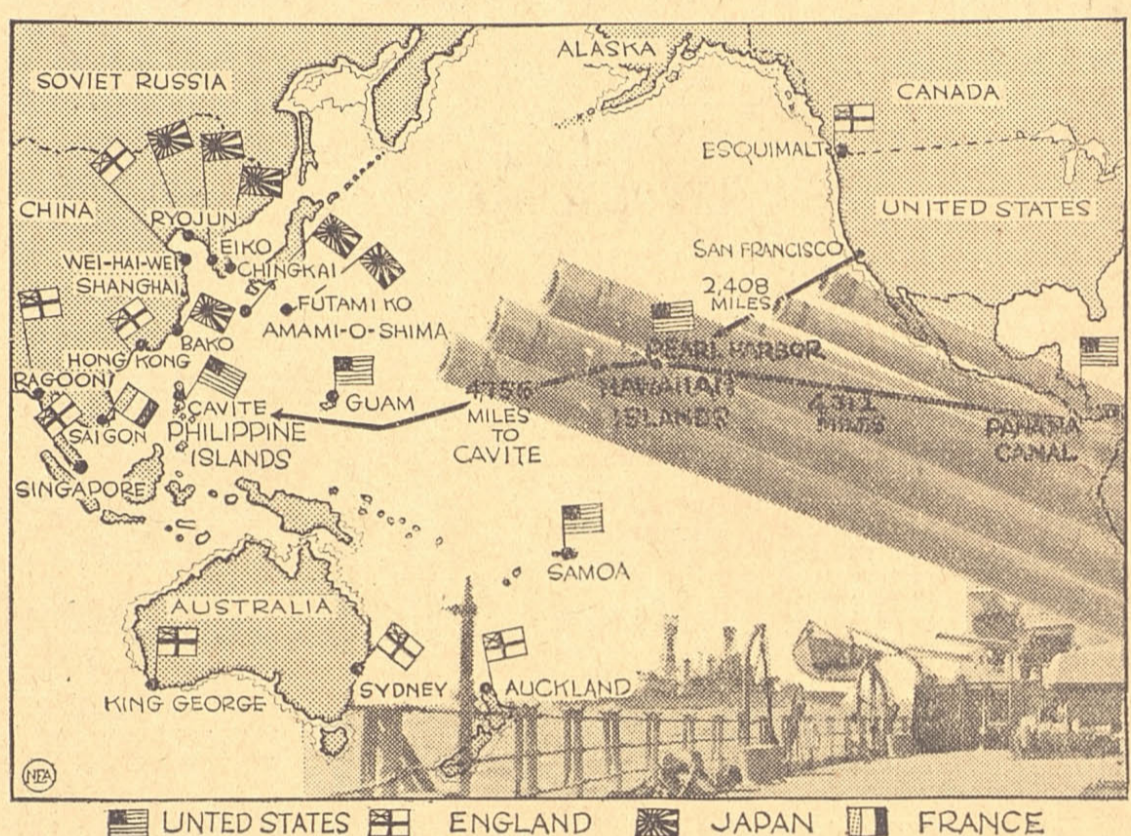

The Randolph college Kittens with their team intact save for one player, will meet the Bowder Ice company sextet, of Fort Worth, this evening at 7:45 at the high school gymnasium Marie Russell, who received a knee injury in a game at Houston a short while ago, will be out of the lineup for the Kittens but the rest of the team is in good condition and ready to go.

Wilson Derrick Is Blown Down

Last night's gusty weather blew down the oil derrick which has been standing near the home of Mr. and Mrs. C. P. Wilson, just north of Cisco, for the past three years. The structure, standing over a gas well tumbled during a particularly fierce blast of wind between 9:30 and 10 o'clock. A small building, used as a shop by Mrs. Wilson, was also demolished by the wind. No other damage of any consequence was done about the place, however.

MEDICAL EXAMS UP. DETROIT, Feb. 11.—The Tuberculosis and Health Society of Detroit gave 16 per cent more medical examinations during 1931 than in the previous year, according to George F. Granger, executive secretary of the society. Granger reported 6,984 examinations in the year.

Pacific Ocean? It's War-Like Now!

FIVE MEXICAN GENERALS IN SAN ANTONIO

SAN ANTONIO, Feb. 11.— Five Mexican generals who once held the highest military rank below the Rio Grande, live here in political exile and comparative poverty. All once commanded divisions and two were candidates for president.

W. C. BEDFORD ANNOUNCES FOR COUNTY CLERK

W. C. Bedford, of Desdemona, well known in Cisco and Eastland county, today announced his candidacy for county clerk subject to the action of the democratic primaries in July.

J. H. Cook, of Putnam, Dies This Morning

J. H. Cook, 85, pioneer Putnam citizen and father of Fred and Gene Cook, formerly of Cisco, died at his home early this morning after a brief illness.

J. E. SPENCER AGAIN HEADS CO. RED CROSS

J. E. Spencer, for the past several years, chairman of the Eastland county chapter of the Red Cross was re-elected chairman at the annual meeting of the organization held at the chamber of commerce offices here yesterday afternoon at 2 o'clock.

8-CYLINDER FORD CAR IS ANNOUNCED

DETROIT, Mich., Feb. 11.—Henry Ford today announced creation of a new eight-cylinder Ford to augment the present model four-cylinder car and add to the times such as these every one must be willing "even for a time to do business without a profit to start the normal processes of industry and business again."

Mother Is Defense Rebuttal Witness

WACO, Feb. 11.—Mrs. J. J. Beck of Wills Point, white-haired mother of William Beck, college youth on trial here for murder, today was a rebuttal witness for the defense.

Leaps to Death From Park Bluff

WACO, Feb. 11.—An unidentified 24-year-old man leaped to his death today from a 100-foot bluff in Cameron Park here. Fishermen dragged the body from the Brazos river into which it rolled after striking rocks.

LEGALLY DEAD BANKER'S WIFE ASKS \$132,000

FORT WORTH, Feb. 11.—A suit for \$132,000 against the Southland Life Insurance company, of Dallas, was filed here today by Mrs. Emma R. Norwood, who says she is the legal widow of Sydney B. Norwood, former Cleburne banker.

Baptists to Begin Training School

A Baptist Training Service school of instruction will begin Monday night at the First Baptist church and continue through Friday night.

Tech Students Denounce Preacher for Charges Made Against Some of Faculty

WASHINGTON, Feb. 11.—The Reconstruction Finance corporation today announced establishment of two new loan agencies in Texas. The new branches and their managers will be at Houston Texas— R. F. Ford and San Antonio, Texas, Otto Meer-cheid.

Rosendahl Will Get Sea Service

WASHINGTON, Feb. 11.—Lieut. Commander Charles Rosendahl Cleburne, Texas, commander of the dirigible Akron, will be transferred to sea to allow him to qualify for promotion. Commander Alger G. Dressel, now in charge of the Los Angeles, will take charge of the Akron.

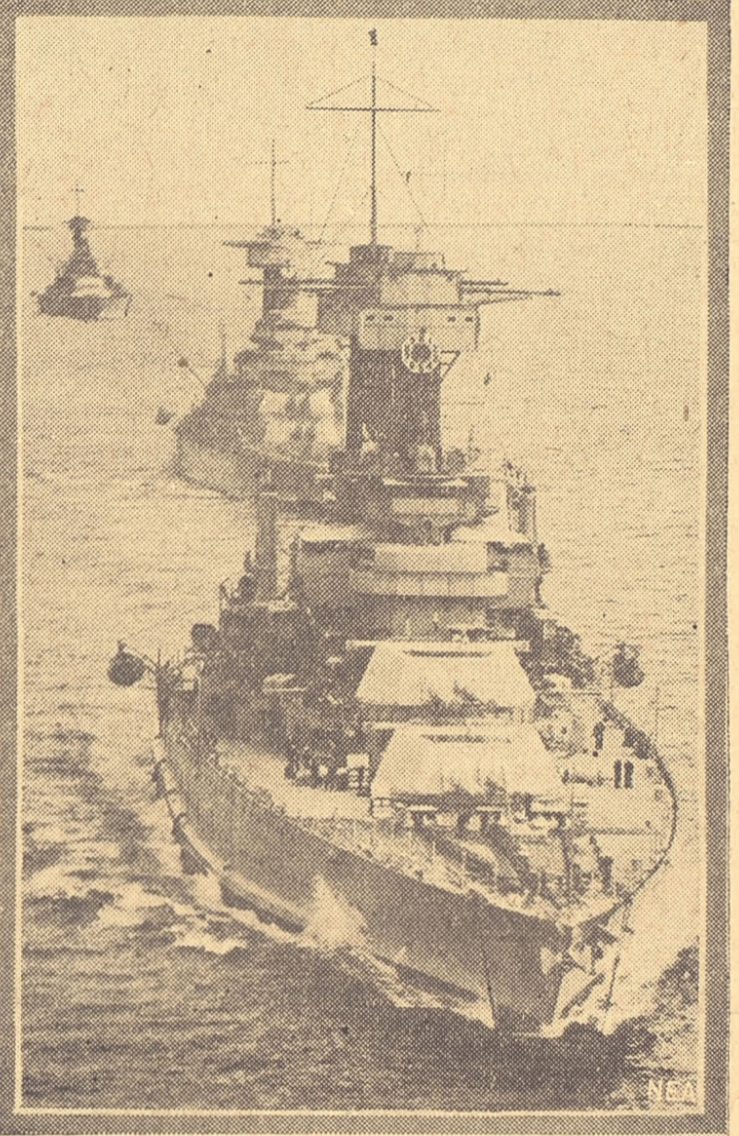

Now Faces Liquor Law Charges

MIDLAND, Feb. 11.—M. E. Ward failed to answer a summons for jury service and as a result now faces a liquor law violation charge.

Leads Players at 84

RANDOLPH, Vt., Feb. 11.—At 84, Edward W. Hyzer remains one of Vermont's leading checkers players. He finished third recently in Class B competition among members of the Vermont Checker Players' association. Hyzer has been playing checkers 60 years and was state champion twice.

The Fleet Sails West to Go East!

Led by the mighty West Virginia, the equal of any fighting ship in the world, part of Uncle Sam's battlefleet is shown in this unusual aerial view as it steamed westward from Los Angeles toward the Far East for

Uncle Sam's war maneuvers off the Hawaiian Islands. The fleet will be in readiness in case it is needed to protect Americans in the Sino-Japanese war zone. Front to rear, the warships are: the West Virginia, the Colorado and the California.

JAPS EXPRESS REGRETS FOR BOMBING MILL

SHANGHAI, Friday, Feb. 12.— The Japanese and Chinese armies marshalled their forces early today for a decisive battle while a complete lull in the fighting prevailed in preparation for a brief truce.

COMMUNITY GARDEN IDEA IS ABANDONED

The Cisco Charity and Welfare association has about decided not to have a community garden this spring. J. T. Elliott, general chairman, said.

Mussolini Visits Pope at Vatican

VATICAN CITY, Feb. 11.— The long dispute between the Vatican and the Fascist state was definitely ended today when Premier Mussolini visited Pope Pius XI amid brilliant surroundings.

Stock Market In Strong Advance

NEW YORK, Feb. 11.— The stock market during the forenoon swung through the broadest, strongest and most active two-hour period of the year, prices advancing one to six points and absorbing from profit taking.

FOX HIDES IN CHIMNEY

LLANTHONY, Gloucester, Eng., Feb. 11.—Byer Fox, hard pressed by the hounds, swam the Severn, and then bolted into a private house, here and ran up the chimney.

WEATHER

West Texas—Fair, colder. Freezing northwest portion tonight, Friday fair.
East Texas—Fair and colder. Frost in northwest and central, and freezing in northwest portion tonight, Friday fair.

TAXPAYER'S DOLLAR USED FOR UNHEARD OF ACTIVITIES

EDITOR'S NOTE: This completes a series of stories on the cost, employment and activities of the government, as shown in the budget and other authoritative reports.

WASHINGTON, Feb. 11.—The taxpayer's dollar once it gets into the United States treasury is liable to be used in some governmental activity of which the taxpayer never heard. An hour or two spent turning the pages of the Federal budget will show that Uncle Sam has more uses for the dollar than even the taxpayer himself.

For instance: Teaching Alaskans how to raise reindeers, \$34,300. Suppressing Alaskan liquor traffic, \$1,344. Employing a valet for President Hoover, \$1,500. Recording the Indian sign language, \$4,000. Employing assistant football coach for Howard university, negro. Employing a head coach, nothing.

Contributing toward the expenses of the International Society for Exploring the Arctic Regions by Air \$300. Contributing toward the Convention of the Liquor Traffic in Africa \$55. Transporting high explosives to the naval ammunition depot at Hawthorne, Nev., rather than on an ocean steamer, \$3,401. Maintaining the Ottoman empire in Egypt, Ethiopia, China and Persia \$8,500. Caring for the lepers in Guam, \$33,657, and for Alaska insane, \$156,000. Honoring some memory by erection of monuments, celebration of birthdays, or the purchase of birth sites, \$2,421,007 — including \$2,500 spent for portrait of late President Harding.

Complexity of Government
The complexity of the government is hard to realize. There is hardly any field in which it is not active and in each of these fields there is much more to be done than any one of us laymen know. Take the matter of money itself. Receiving old silver coins alone cost \$646,748 last year. The paper for the government's bonds cost \$845,000.

Perhaps the industrial worker may not see the importance of the government's annual expenditure of millions of dollars in combating various agricultural pests, such as the cattle tick and the boll weevil, but on the other hand it is likely that the farmer will consider wasted the \$1,923,485 spent in developing trade in foreign countries. The dentist perhaps, would have little interest in either, but he is a hearty supporter of the work the Bureau of Standards is doing in improving the standards of the material used in false teeth and other dental supplies.

Case of the Mongoose
There are around Washington hundred of government workers who each morning slip into an alpaca coat and bury themselves in some work of which the public never heard. The chances are however, that each week these men save the government more than the total of their year's salary. As an example, take the case of the mongoose.

If your knowledge of the mongoose is based on Kipling, or the moving picture of the mongoose battling a cobra, you probably have a high opinion of the valiant little beast. Not so with the Biological Survey. It would much prefer you bring 10 cobras into the country than one mongoose. Each year no few of the tax dollars are spent in protecting America from his ravages. The trouble with the mongoose is that he does not stop with killing snakes. He kills everything he can get hold of, chickens, birds and all "ground life." In places where years ago he was imported to handle the snake situation, he now costs millions of dollars a year in an indirect damage to crops ordinarily protected by the birds and animals the mongoose kills.

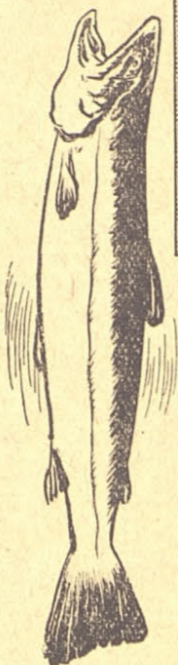

Indians Costly
Indians cost the government \$6,821,190 in 1931, including an special appropriation of \$87,162 used in combating the liquor traffic. National Parks cost \$9,158,358, the Botanical Garden \$201,738, the Library of Congress \$3,819,597, the Smithsonian Institute \$1,208,711.

Murdered at Cisco!

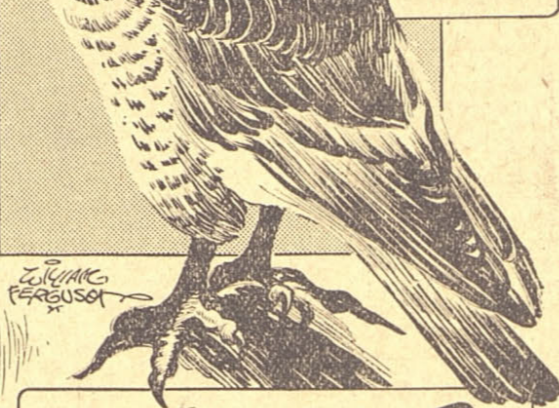

Mr. All Cash and Mr. Low Price are charged with killing Old Man Depression. Dr. W. I. Ghormley, Optometrist, 1503 Ave. D, Cisco, Texas, is charged with being accessory to the crime. Dr. Ghormley is charged with fitting glasses for \$12.80 All Cash that faithfully represent the same service for which he received \$30.00 during the years of 1910 to 1929. All other prices for his services reduced in proportion. He is also charged with the promise to allow One Dollar off for gasoline used by any person coming over thirty miles to have glasses fitted. Dr. Ghormley is doing this as his bit toward the resurrection of that popular citizen known as Prosperity. He makes the positive assertion that he is fitting glasses not cheaper than at any time during his twenty-nine years experience in his chosen profession. This is the fourth reduction in prices in the last two years and he believes it will be the last. Dr. Ghormley has moved his office to his residence, 1503 Ave. D, where parking space is plentiful, and has cut Office Expenses to the minimum. He declares he will pass this saving along to the patient, and that he is going to stay in his office all the time now, that he can be found there day and night. His telephone number is 337.—Adv.

Poultry
Turkey Raising for Beginners — D. H. Reid — Head Poultry husbandry department Texas A. and M. College.
Turkeys can be made a profitable crop in the Southwest every year if the person raising them gives them proper attention.
Starting with the breeding flock be sure your stock comes from a healthy flock. Next, be sure that your eggs are hatched in a clean incubator. This gives your young turkeys a much better chance to live and may do much to increase your profits.
Size is no longer the first qualification of a breeding turkey, for the medium sized turkey, evenly covered with a layer of thick flesh is now the market ideal. This change in market class is in favor of the southwest with the short fattening season. Choose a breeding flock of medium sized early maturing birds, and avoid large bony breeding stock. Weak late maturing or closely inbred stock is never wanted.
March and the first fifteen days of April is the best time for turkey eggs to be set. Turkeys hatched after the middle of May usually have a higher mortality unless raised in small flocks under very sanitary conditions.
From the breeding flock, through the fattening for market. Every dish used in feeding or watering must be kept clean all the time.
The breeding flock should be wormed, freed from lice, mites, blue bugs and then vaccinated to prevent attacks of fowl pox. Worms can be removed by any one of several remedies on the market. Use lice remedy and then remove the lice and blue bugs by cleaning and painting the roosts some morning with carbolicum. Clean up the ground under the roosts and sprinkle it with lime.
A great deal of worry and time can be saved during the laying season by confining the breeding flock to a four or five acre pasture. Cows run in this pasture will not interfere with the turkey flock at all provided the turkey feed and water troughs are fenced in by a three-wire fence.
Nesting boxes and barrels should be placed at quiet spots. Be sure there is a hole in the bottom side of each to prevent the accumulation of water. Three inches of litter, made of dead grass or leaves, should be put in each nest.
The breeding flock needs to be fed a good complete ration. Begin by furnishing fresh clean water each day. Next, see that there is a good supply of oyster shell. Feed chicken laying mash in limited amounts, fresh and dry. Try to feed today what the turkeys will eat today. Feed some grain each evening. It is best to put all feed in clean troughs and never feed on dirty ground.
If no green feed is available, put a small amount of alfalfa hay or green dry corn stover where they can pick at it.
Gather the eggs each day and

place them in a shallow padded box in a cool dry place. Set them once a week and do not hold any turkey eggs more than two weeks, for usually every day over ten days the eggs are kept hurts the hatch.
Keep Infection Low as Possible — United States Department of Agriculture. As a rule, when a bird becomes sick the best policy is to kill it, for the reason that it may be affected by a contagious disease which, before it is recognized, may spread to many others in the flock. Also, if the poultry owner attempts to treat such birds, there is great danger of carrying infection from the sick to the healthy in handling or feeding. If a disease becomes established in the flock, however, a line of treatment should be undertaken when possible. In some diseases, such as cholera and the cholera-like diseases, fowl typhoid, tuberculosis, and aspergillosis, treatment of affected birds is of little value, and preventive sanitary measures must be depended on to keep infection as low as possible.
In controlling outbreaks of infectious diseases (the first effort should be to separate the sick from the healthy birds as soon as symptoms become noticeable. The droppings should be removed from the houses daily and placed where the fowls will not have access to them. The houses and all feeding and drinking utensils should be frequently cleaned and disinfected. The use of permanganate of potash in the drinking water serves to prevent the spread of infection by means of the water, which otherwise is likely to be contaminated by discharges from diseased birds. The proportion is one-third teaspoon of permanganate to the gallon of drinking water. It is also advisable to give the entire flock a dose of Epsom salt in the proportion of one-half teaspoon to the adult fowl. The salt may be mixed in a sufficient quantity of mash for one feeding.

Good disinfectants destroy the germs of contagious diseases, the external parasites, such as lice, and mites, and in some cases the eggs of parasitic worms. The disinfectants should be thoroughly applied to the interior of the houses, working into all cracks and crevices, spread over the ceiling and the floor, the roosts, dropping boards, and nest boxes. At the same time the feeding and drinking troughs should be disinfected by pouring boiling

water into them and afterwards drying them in the sun. Disinfectants are most easily applied to the walls and ceilings with a spray pump or with a brush. As it is difficult to keep them from coming in contact with the feet and hands the more harmless of these mixtures should generally be used. Ordinarily lime wash, made from freshly slaked lime is excellent, and its properties are well known. In the case of an actual outbreak of virulent disease it is well to add to the lime wash 6 ounces of crude carbolic acid to each gallon to increase its activity as a disinfectant.
The kero-sene emulsion, which is frequently used to destroy mites, may readily be converted into a disinfectant. To make the emulsion, shave one half pound of hard laundry soap into half a gallon of soft water and boil the mixture until all the soap is dissolved, then remove it to a safe distance from the fire and stir into it at once, while still hot, 2 gallons of kero-sene. This makes a thick, creamy emulsion or stock mixture. When it is to be used for killing mites in the houses, 1 quart of this emulsion is mixed with 10 quarts of water. When it is to be used as a disinfectant stir well then add 1 pint of crude carbolic acid or crude creosole, and again stir until all is well mixed.
The compound solution of cresol is one of the best disinfectants and may be purchased ready for use. It contains 50 per cent of cresol, and 1 pint of it added to 10 quarts of soft water makes a solution of proper strength to apply to the houses or to spray over the ground a 5 per cent solution of carbolic acid (1 pint of carbolic acid to 10 quarts of water) in about equally efficacious. The choice between the two is a matter of convenience.

YALE GETS STEINMETZ DESK
NEW HAVEN, Conn., Feb. 11.—The time-scarred desk at which Charles Proteus Steinmetz, electrical wizard of the General Electric company, used to stand—not sit—has been presented to Yale by Professor Robert E. Doherty, former assistant of the scientist.
Austin — Sander and Hurlburt, Fort Stockton, received \$47,403 contract for 10.9 miles grading and drainage structures from 50 miles east of Fort Stockton to 10 miles west of Sheffield on Highway No. 27.
