

ADVERTISING CISCO SCHOOLS BEGINNING MANY PEOPLE HERE

Expected Fifty to One Hundred Families Will Come By Beginning of School Year — Chamber of Commerce and Production Keeping Up the Work — The Many Advantages.

The Chamber of Commerce and Production is just completing the work of sending out between 5,000 and 10,000 circular letters setting forth the advantages offered by Cisco as a desirable place for the education of children.

This circular letter sets forth what Cisco has in its perfect school system, carries a cut of one of the buildings, has a list of the heads of the schools, and also calls attention to the desirability of Cisco as a place of residence.

These letters are being sent to all parents in Eastland, Callahan, Stephens and Shackelford counties, all localities of easy access to Cisco. Responses already received would indicate that from fifty to a hundred families will come here by the beginning of the school year.

The circular letter sent out is as follows:

"The city of Cisco desires to call attention to the advantages of Cisco as a residence city, and especially its educational advantages.

"The public schools have been given special attention the last few years and have now reached a high degree of efficiency.

"Our equipment consists of one large high school building and two splendid new ward buildings. Each is adequately heated with steam, and in the very best sanitary condition. Every desk has been chemically sterilized. Arrangements have been made to protect against any possible shortage of gas.

"A bond election for \$250,000.00 has been ordered for July 24th, for a new high school, with every prospect of being carried.

"There has been added to the general public school a commercial course, consisting of typewriting, bookkeeping, stenography and penmanship. Music in all the classes, domestic science and manual training have been developed until they have reached an unusual degree of efficiency. All of these courses are free. A first class kindergarten has been established.

"Prof. J. J. Godbey, superintendent, is one of the best in the state. Professor Geo. W. Wells, principal, has been principal of the Texas public schools for three years. Professors Jan McMurtry, teacher of science and director of athletics, has had large experience in his work. We have a corps of thirty-five teachers, carefully selected.

"We have the largest number of credits of any public school between Fort Worth and El Paso.

"Patrons desiring to take advantage of the benefits of our schools should make transfer of pupils before August 1.

"Cisco has many advantages as a residence city. Its water supply is the largest and best of any city in all West Texas, consisting of two large lakes with complete filtering plants. A third lake, costing one million dollars, is now under construction and when completed will impound approximately ten billion gallons of water.

"The water is chemically pure, being free from all disease producing bacteria. The city is protected by a monthly examination of the water by the state. In case any contamination appears the city is prepared to treat the water at once.

"Cisco has thirty-five miles of water mains, thirty miles of sewer, fifty blocks of brick pavement, seventy blocks of macadam streets and concrete sidewalks throughout the city.

"Cisco is located at the junction of

BOLSHEVIKI SWEEP OVER LITHUANIA AS POLES ARE FLEEING

WARSAW, July 19.—The Poles are withdrawing to the southwest from the railway junction of Lida, which has been occupied by the bolsheviks. The bolsheviks are sweeping across Lithuania, giving them a rich harvest as they are occupying thousands of acres of grain and hay in stacks.

The Polish populations are fleeing. The roads are jammed with peasants, livestock, vehicles and household goods. Food in Bielsostock warehouse, to feed the children by the American relief association, is being shipped to safe places, and refugees are being removed.

The Poles say the retreat is orderly and according to plans. Railroads change from Russian broad-gauge to standard gauge at Lida, thus hampering the Russian advance.

OPERATIONS ABOUT LEERAY DURING WEEK SHOW GOOD RESULTS

LEERAY, July 19.—Church Oil Interests C. A. Baggett No. 3, located a mile north of Leeray, came in Thursday at 3:57 feet, furnishing a spectacle seldom witnessed at the shooting of a well. The fuse was lighted and the squib dropped at 4:30 p. m., and eleven anxious minutes elapsed before the debris from the shot came up. During this interval, a sullen escape of vapor and smoke were all that gave witness that the shot had taken effect. Then, with little "groaning," came a mass of mud and black line which shot well over the derrick, followed by nine separate spurts of increasing volume, until the much-desired yellow fluid came up in a beautiful geyser, enveloping the derrick and lasting for ten minutes. Oil soon began to gush into the flow tank, and the first 24 hours' gauge showed over 600 barrels counting ten days' fishing. A 30-quart shot was sent off in the C. A. Baggett No. 2, on the adjoining location, to attempt to dislodge a tool for which the drillers have been fishing for some days. This well will be ready for the final shot in two or three days.

Texas Co.'s Tomlinson No. 2, which came in Monday for 500 barrels, took a step forward in the gauging records each day since, recording Thursday 1200 barrels. This well, located a half mile from Leeray, northwest, is on the location next to the G. M. Church-C. A. Baggett No. 1, the pioneer well of the Leeray field, which came in last December with 2400 barrels. The latter while the Tomlinson was increasing its flow, gave out; but the pump being immediately installed, it gauged seventy-five barrels more than the previous 200 barrel flow.

Harris-Stevens-Turner N. 1, a mile and a half northeast from Leeray, was reported late Friday to have come in for 200 barrels, at a depth of 1925 feet. Virginia Oil Co.'s Thorpe No. 1, adjoining Leeray townsite, came into shallow oil sand at 1925 feet Sunday, on top of the sand. Production not yet determined.

HASKELL - STAMFORD FIELD SHOWS GREAT DRILLING ACTIVITY

HASKELL, July 19.—Drilling operations in the Haskell-Stamford field as reported today by the West Texas Chamber of Commerce, follows:

Kouri No. 1, 12 miles east of town, drilling in the grey lime at 3375 feet, after passing through salt water up to 3217 feet. Analysis of lime now being penetrated shows much oil. Prospects are bright for this well. Underreaming of 6 5/8 casing to shut off salt water is progressing. The well will be drilled deeper until a good well is found.

Kouri No. 2, on the Couch ranch, 10 miles northeast of town, is drilling at 1475 feet. More than 500,000 feet of gas was struck at 1225 feet.

The Texas Venture's Colbert No. 1, between Haskell and Stamford, is drilling around 1730 feet. At 1300 feet an oil well drilled several years ago found a fine sand that made a producer, but the well was ruined.

EVEN BARYS BOTTLE PAINTED WHITE TO CAMOUFLAGE BOOZE

International News Service. NEWARK, Ohio, July 19.—A baby cab, with twins, both singing merrily in the key of a squall, rolled down the main street, with a rowing papa pushing and pleading with his "ill do-daddies" to cease.

The infant coach brought up to a halt before a drug store, which papa entered to use a phone.

A kind-hearted policeman, noting numerous milk bottles within the carriage, opened one in an effort to bring peace to the neighborhood.

Inside he found "hooh."

The outside of the bottles was painted white. When papa came out he was taken with his "ill do-daddies" to jail.

BOY DROWNED WHILE SWIMMING IN LAKE VICINITY OF PUTHAM

The 16-year old son of Tom Rutherford, who lives at Scranton, was drowned this morning in a lake near Putnam. He was visiting here and with a number of other boys was swimming in the lake when he lost his life. But meagre details of how it occurred were received here.

P. L. Parker, candidate for tax collector, and L. C. Reed, candidate for district clerk, were Cisco visitors today.

"We have a population of about twelve thousand.

"Paved roads being built by the county radiate in all directions from the city. "Cisco takes pride in the fact that it is a home town. citizenship is the best. We have churches of all the leading denominations. We have, in fact, every facility for making all new comers and new patrons of our public schools comfortable and satisfied.

"For further information, write, wire or phone."

GOVERNOR COX WILL STAND FIRMLY FOR LEAGUE OF NATIONS

Republicans Construe This As Meaning He Upholds the Wilson Foreign Policy and Senator Harding Says He is Ready to Fight Along That Line — Statement Issued.

Associated Press. WASHINGTON, July 19.—Unity of opinion on the League of Nations in particular and the democratic platform in general, was proclaimed by President Wilson and Governor Cox in a statement published today, treating on yesterday's conference at the white house.

The Wilson statement said the party nominees are "absolutely at one with regard to the great issue, the League of Nations," and Governor Cox is "ready to be the champion in every respect of the honor of the nation and for the peace of the world."

Harding Is Ready. Associated Press. MARION, Ohio, July 19.—Assurance that the League of Nations will lead all campaign issues was seen by Senator Harding's advisers in the over-Sunday developments and the announcement in Washington that Governor Cox stands in perfect accord with President Wilson was taken here to mean a plea by the democratic party for vindication and the perpetuation of the Wilson foreign policy, on which Senator Harding is ready to make the fight of his political life.

Many of Senator Harding's associates were surprised that Governor Cox took council with Wilson at the outset of the campaign, and took aggressive measures to hold up the present administration, with which he was not closely associated.

Ordinarily important issues failed to supply any part of the point of conflict. The League of Nations is expected to remain in the spot-light.

GONZALEZ INSISTS HE TOOK NO PART IN LAST REVOLUTIONS

Associated Press. WASHINGTON, July 19.—Governor Cox, in summarizing the result of his conference, said it brought out the fact that he and President Wilson "are agreed as to the meaning and sufficiency of the democratic platform and the duty of the party in the face of threatened bad faith to the world in the name of America."

SHORTAGE OF CEMENT CALLS FOR BIG PLAN

Associated Press. AUSTIN, July 19.—Many samples of cement materials are being received by the bureau of economic geology of the University of Texas for testing, according to G. A. Perkins, assistant testing engineer of the bureau. The purpose of these tests is to determine whether the samples come up to the required standard. They are sent in principally by highway engineers and others who are interested in the construction work.

"There is undoubtedly a shortage of cement in Texas at present, and there is plenty of room for a big cement plant," said Mr. Perkins. "There are abundant deposits of cement materials in this state and cement could be manufactured cheaply."

TWO COUNTIES JOIN TO CREATE LEERAY SCHOOL DISTRICT

Special to The News. LEERAY, July 19.—The Stephens county school board, at a meeting Saturday, voted four and a half mills for that county's share in the formation of the new Leeray school district. The local district will have grants of territory from both Stephens and Eastland counties, being partly in each.

ELDERLY MAN MAKES NEW GOLF RECORD

Associated Press. SASKATOON, Sask., July 19.—A. R. Turner, war veteran, made what is believed to be a new world's record for a day's golf play when he made 167 holes over a local course recently. Turner started at 3:02 a. m. and finished at 8:25 p. m., nearly 17 hours and a half play. He averaged 99 1/2 strokes per round while his electric score gave him a round in 19. All told he made 928 strokes and is said to have walked nearly 40 miles. Every round was authorized and signed score cards were turned in by players accompanying him.

EFFORT BEING MADE TO GET GRAIN CARS FOR THE PANHANDLE

Associated Press. FORT WORTH, July 19.—To relieve grain congestion in the Panhandle the International & Great Northern was ordered today by the interstate commerce commission to deliver to the Fort Worth & Denver here fifteen supply cars daily to send to Northwest Texas.

MEXICO MAY RESUME COINAGE OF SILVER, MINT TO BE OPENED

Associated Press. NOGALES, Ariz., July 19.—The Chamber of Commerce has joined with Charles Butters, mining expert of New York and San Francisco, to promote the formation in Mexico of an association of silver mine owners and silver producers to rebuild the abandoned mints throughout the nation and thus bring about at once the more free and unlimited coinage of silver. Mr. Butters states that if the old-time minting plan is established it will mean that Mexico will coin 500,000,000 ounces of silver.

The mining expert has extensive interests in mines in Mexico, Salvador and Nicaragua, and is known for his introduction of the cyanide reduction process in Mexico. He says the greatest need of Mexico today is small change and "hard money."

The revolution and the world war, said Mr. Butters, have stripped Mexico bare of silver coin. In its place, he said, is a vast quantity of paper money issued by the varying governments as fiat money. He blames the great flood of paper money in Mexico for most of the suffering in that nation in connection with the various revolutions.

His plan, backed by the Nogales Chamber of Commerce, is to have the old mints rebuilt and placed in operation by the association of silver mine interests at the cost of the association and place the mints in operation. Then the cost of the renewed mints would be recovered by the association from the mint profits over the course of years. Upon the paying out of the capital charge in restoring the mints, they are to be returned to the Mexican federal government as its property to be thereafter under supervision of the federal government.

This system, according to the silver mine expert, has three-fold benefit. First, it will at once restore to Mexico the "hard money" and small change needed by merchants, banks and business men and now lacking. Second, it will provide a permanent primary market at home for a large amount of the silver production. Third, it will stabilize the silver market because the Mexican home consumption will take up a great quantity of silver now exported and sold on a speculative market through San Francisco for the Orient.

Also, this will serve to stimulate silver production because of the better market conditions and thus raise the primary market price for the semi-precious metal.

President Bracy Curtis of the Chamber of Commerce has named a committee of prominent men to take up the mint proposal with General Alvaro Obregon on his impending visit to his home in Nogales, Sonora, this month.

Meanwhile, the proposition will be submitted by the Nogales Chamber of Commerce to the civic bodies of all other border cities and the officials of the border states.

WIFE TOOK HIM BACK AFTER MANY YEARS

International News Service. AMERICUS, Ga., July 19.—J. W. Clark left his wife and home here twenty-five years ago. He returned the other day and his wife received him with open arms.

In his absence Clark's two children died, the oldest daughter having been buried three days before his return.

When Clark left home he was poor. In Oklahoma oil fields he made a fortune. He wrote his wife several letters, blaming himself for leaving and telling her to get a divorce. She refused and said she would wait.

WILL RESUME DRILLING ON SEBRING WELL TODAY

ROTAN, July 19.—Drilling will be resumed probably tomorrow on the Sebring well, which was stopped at 1700 feet when the derrick was burned. This will be a thorough test.

The Barron ranch well has been abandoned at 3500 feet. The hole was plugged. A strong flow of salt water was encountered.

Interest in the oil situation here is still high, despite the failure to bring in a well on the Barron tract. Activity is increasing in this section, reports the West Texas Chamber of Commerce.

ANFU PARTY DEFEATED

WASHINGTON, July 19.—Forces of the Anfu party in China were defeated by regular troops and driven back, the American legation at Peking reported.

GERMANY TO PROFIT FROM NEW ORDER OF HAMBURG-AMERICAN

Ships Following Old Trade Routes They Believe Will Open Commercial Relations With United States — Hope to Renew Friendly Relations — The President's Statement.

Associated Press. HAMBURG, July 19.—It is believed here that the agreement between the American-Hamburg steamship company and the American ship commerce corporation, by which former German trade routes will be opened to American shipping, is one of the most momentous events for Germany since the war.

Through it the Germans see a means of regaining touch with the outside world, and also attach much political significance to it as a trial at re-establishing good relations between the two countries.

The president of the Hamburg-American company said "the way we have taken was the only possible one to resume relations between Germany and foreign countries in the near future. The normal state of things can only be restored if representative economic interests endeavor to bring their mutual interests in a new and more binding connection than was possible in pre-war times."

Miners Imprisoned. Associated Press. PITTSBURGH, July 19.—Seven miners are reported imprisoned at Renton, Pa., following an explosion. The United States bureau of mines' first aid car was dispatched there.

FORMER RESIDENT IS SURPRISED WHEN HE SEES THE NEW CISCO

S. H. House, of St. Louis, a brother of Mrs. N. W. Moell, is visiting the family of Hezlie Gresham. Mr. House was a resident of Cisco thirty-eight years ago, owning and conducting a blacksmith shop, and was later proprietor of the Old City Hotel.

Over thirty years ago Mr. House went to St. Louis, and became the inventor of the famous cold tire setter, from which production he has become a millionaire, having his patent business in many states and Canada conducted by his two sons and two sons-in-law, who have all been residents of Cisco.

In conversation with Mr. House Saturday he expressed himself as surprised at the rapid growth of Cisco, and its many advantages over other cities in West Texas. Its splendid school system, its fine water supply and the site that has been procured for the largest water supply in West Texas; also the magnificent streets and handsome homes built where corn and cotton only recently were grown.

Mr. House lived in Cisco when all congregations worshipped together, and many times the place where they worshipped was converted into an opera house. He was a staunch member of the Methodist church, as he is to this day, and the wonderful new structure pleased his eye, and he realized that the congregation must be more vast now than in the '80's when all bowed the head and bent the knee under the same roof.

After a brief stay he will return to his home in St. Louis to dwell upon the wonderful change in the once little town of Cisco, now a booming city, destined to become the abiding place of all who are seeking a place to live and invest in property.

WIFE TOOK HIM BACK AFTER MANY YEARS

International News Service. AMERICUS, Ga., July 19.—J. W. Clark left his wife and home here twenty-five years ago. He returned the other day and his wife received him with open arms.

In his absence Clark's two children died, the oldest daughter having been buried three days before his return.

When Clark left home he was poor. In Oklahoma oil fields he made a fortune. He wrote his wife several letters, blaming himself for leaving and telling her to get a divorce. She refused and said she would wait.

WOMAN FOR CONGRESS

Associated Press. GRAND RAPIDS, July 19.—Mrs. Altha Wheeler, a Grand Rapids linotype operator in the government printing office at Washington, has announced as a candidate for the republican congressional nomination in the fifth Michigan district.

RUSSIA READY TO QUIT

LONDON, July 19.—The British government today received a note from the Russian soviet government stating that Russia is prepared to agree to an armistice and make peace with Poland.

CHAMBER MEETS TUESDAY

There will be a regular meeting of the Chamber of Commerce and Production on Tuesday night at its room in the city hall.

UNIONS ESTABLISH FACTORIES TO STOP WILD PROFITEERING

Associated Press. NEW YORK, July 19.—Profiteering in the women's garment industry will be fought with union-owned shops, factories and stores by the International Ladies' Garment Workers' union.

This became known here today when officials of the union announced that it has a committee at work laying the foundation for the first group of union-owned factories, which are expected to be in operation by next spring.

These factories are to be established, according to Benjamin Schlesinger, international president, to demonstrate that the workers can be paid first class wages, work less hours and enjoy better working conditions than they are now getting and reap a "reasonable profit" from their product and still sell it considerably, under the regular market price.

The union proposes to sell its output to consumers through their own stores. The first group of six factories will be established in New York, together with a number of union stores, union efficiency said. Others will be located in Chicago and Philadelphia.

Ample funds for the factories have been provided by the international union. Mr. Schlesinger said, and later as more money is needed, "union shop and factory assessments" will be levied to finance the project until it is put on a paying basis.

"We expect to be turning out medium and high price garments for the spring trade," A Baroff, secretary of the union said. "The first factories will probably employ about 1,000 workers to be selected by the union." They will pay higher wages than are paid by employers in the garment industry and a seven-hour work day will be in effect, he added. The workers now work an eight-hour day with a half-holiday on Saturday.

The local unions of the ladies' garment workers, according to Mr. Baroff, are also taking steps on their own initiative to defeat the high cost of living by establishing co-operative restaurants and stores. A number of stores have been started in New York and a restaurant is being operated by unions in Philadelphia, he said.

COMMUNIST PARTY IN ENGLAND BE FORMED IF PLANS CARRY OUT

Associated Press. LONDON, July 19.—An attempt will be made to form a communist party in England August 1, at a national convention of "left wing" socialist and industrial organizations. Socialist bodies of the extreme left have been holding "unity conferences" intermittently for several months with that end in view.

The invitations to the convention point out that three points are considered cardinal by the promoters, the dictatorship of the proletariat, the soviet system, and adherence to the third international.

The direct promoters of the convention are the British socialist party, the anti-war majority section of which was once the social democratic party; the workers' socialist federation, composed of Miss Sylvia Pankhurst's followers, and the communist unity group of the socialist labor party. The socialist labor party has not signified its intention to participate in the convention.

A great deal of discussion has arisen over the attitude the powerful labor party may take toward the convention. The British socialist party is affiliated with the labor party, but the workers' socialist federation and the communist unity group have refused to be connected with it, and the labor party itself so far has made no official pronouncement concerning the proposed convention.

There is a difference of opinion among the political groups whether the convention will succeed in forming a communist party with a following sufficiently large to give it any considerable influence, but it is considered virtually certain that as a result of the convention there will be a big readjustment and re-grouping of socialist bodies to correspond to irreconcilable differences of policy.

REPRINTING BALLOTS

Special to The News. BAIRD, July 19.—The pledge at the top of the primary ballot adopted by the State Democratic Executive Committee: "I am a Democrat and pledge myself to support all the nominees of the Democratic party at the November election, both State and National," is declared both unconstitutional and illegal by Attorney General C. M. Cureton, in a telegram to County Attorney J. Rupert Jackson, and in consequence, the ballot for Callahan county's twenty precincts, having been printed and about to be distributed, several to-be absentee electors will be deprived. A new ballot is being printed with this pledge at the top: "I am a Democrat and pledge myself to support the nominees of this primary."

BUT "MISERABLE ROT."

Associated Press. CHILLICOTHE, Mo., July 19.—Chas. M. Hay Democratic candidate for the senate, replying today to Senator Reed's six questions to senatorial candidates on the league of nations, declared Reed's arguments against the league are but "miserable rot" and retaliated by asking Reed six questions.

YACHT RACE TOMORROW

Associated Press. SANDY HOOK, July 19.—Captain William P. Burton will be given a chance at the wheel of the Shamrock Sir Thomas Lipton, owner of the challenger, threatened to supplant Burto because of alleged bad sailing. The next race will be tomorrow over a triangular course. The Saturday race being called.

WHEN WAGE AWARDS WHEN WAKE AWARDS KNOWN TO WORKERS

All the Chiefs of Sixteen Railway Brotherhoods Are in Chicago Awaiting the Board's Announcement — Already Claimed Railroad Men Say It Will Be Unsatisfactory.

CHICAGO, July 19.—If reports reaching railroad brotherhood leaders regarding the wage award tomorrow by the railroad labor board are correct, the decision will be unacceptable and rejected, the union leaders declared today.

While some would predict publicly, a general strike, it is possible if the award is unsatisfactory they will assert the privilege.

Trustworthy information reaching them is that the award is so low as to be not accepted.

Some leaders say the temper of the men is such that they doubt if an immediate walkout, authorized or unauthorized, can be averted, if the men are not satisfied.

Associated Press. CHICAGO, July 19.—The first grand council for more than a year, of the executives, general chairmen and general committeemen of sixteen recognized railroad brotherhoods, opened here today to pass upon the wage awards of the railway labor board, to be made public tomorrow. Approximately one thousand union officials are expected to be present.

According to union rules, all wage increase questions must be submitted to a referendum but it is pointed out today that the grand council was called to "consider and pass finally upon the awards." It is not known whether the award will be submitted to referendum or be passed finally by the council. A referendum vote would require more than a month.

Samuel E. Heberling, president of the Switchmen's union declared that if they decided the award was unsatisfactory, "concerted action would be taken by the sixteen brotherhoods."

Railroad workers numbering nearly two million asked for an increase totaling a billion dollars. The demands range from twenty-five per cent for shopmen to 65.4 per cent for maintenance of way employees.

Both W. G. Lee and S. M. Heberling, representing the switchmen's organizations, said among the bitter opposers the award is understood to be handed down tomorrow, but they are working with others to prevent any hasty action by the men.

Heberling said, "The conference is looked upon as the most vital conference of the Associated Railway Crafts and you know we are not bound to accept the awards of the labor board. The Esch-Cummins bill does not make the award compulsory, neither the workers or the railroads are forced to accept the ruling. I should not like to see a general strike called. It would tie up the country in twenty-four hours. In forty-eight hours the industries would be forced to close."

John Grunau said his union would consider the awards separately and recognize the unions.

STRIKE IS THREATENED

CHICAGO, July 19.—The wage award of the Federal Railway Labor Board will be rejected by the union chiefs, according to a report Sunday. The award is expected to be announced in Chicago Tuesday. If the award is rejected a general railroad strike involving more than 2,000,000 men will be called, it is said. According to information secured tonight the award will grant an increase of 20 per cent to the highest paid group of workers—engineers, conductors and firemen—and 27 per cent to the lowest paid group—the shopmen, trackmen and helpers. The brotherhoods had demanded an increase of 25 per cent for the highest paid workers and 65 per cent for the lowest paid men.

TWENTY-NINE BOMBS HURLED AT TROOPS INJURE SIXTY-FIVE

Associated Press. CORK, Ireland, July 19.—Two military lorries, loaded with soldiers on the streets of Cork, were blown up by civilians throwing twenty-nine bombs and injuring about sixty-five soldiers. Street fighting caused a reign of terror in Cork yesterday.

YACHT RACE TOMORROW

Associated Press. SANDY HOOK, July 19.—Captain William P. Burton will be given a chance at the wheel of the Shamrock Sir Thomas Lipton, owner of the challenger, threatened to supplant Burto because of alleged bad sailing. The next race will be tomorrow over a triangular course. The Saturday race being called.

A CLEAN CITY.

There is an oft repeated saying, "show me a dirty city and I will show you a busy city," implying that the people were too busy to keep their city in a sanitary condition.

The first duty of municipal government is to protect the public health, all other duties imposed upon an administration being secondary thereto.

It is the duty of the ruling body of a city to enact ordinances and create a board of health, and to appoint health officers, empowered to enforce the ordinances to a point which shall keep the city in good sanitary condition.

After vainly trying to clean up the city, the Cisco officials announce that they have been compelled to resort to all the remedies afforded by the ordinances and, beginning today, they will undertake to compel citizens to "cease sweeping and throwing garbage and refuse into the streets and to compel them to keep their premises in sanitary condition."

The officials threaten arrests for failure to comply with the orders of the health officers. This should not be necessary. Every citizen should realize the duty he owes to himself and to his neighbor, to remove, or destroy all substances which become a menace to health and to keep his premises clean.

Even if neglectful of health precautions, civic pride should prompt every citizen of Cisco to keep the city clean. The city is taking on rapid growth and strangers are coming here in great numbers, every day, and surely no citizen is proud of what these visitors witness when passing through the principal streets filled with store sweepings, waste paper, broken material left where buildings have recently been erected or improvements been made, or the street paving obliterated with dust.

The hearty co-operation of every citizen should be given the health officers in their effort to clean the streets, alleys and premises and put the city in a sanitary condition.

It is to be hoped all this will be brought about without it being necessary to make a single arrest, but, unfortunately, a few cases have developed where has been shown a disposition to hamper rather than assist the health officers. In cases of this kind, the only remedy is the arrest of the offender.

NO MORE FOREIGN LOANS.

When Premier Lloyd George at the conclusion of a statement with the German delegates, over the coal question and the time allies, at the same time, entered into an agreement to aid Germany to float a loan to meet its indebtedness to the nations, regretted that the United States was not represented in the conference.

Why? Because he thought it

would be easier to induce this government to pledge its people to aid in this attempted German rehabilitation? Was that his thought?

Germany must be aided if it is ever to pay out. But just now it is like taking hold of a worked-out farm, it is not only going to require incessant labor upon the part of the tenant, but it is going to require unlimited amounts of capital.

The American people have very fully endorsed the idea of "no more loans to foreign nations" and it is not probable that they will go in very strong for aid in floating a loan for Germany.

The United States itself has not yet recovered from the war, nor will it until all its railroads are rehabilitated and equipped and the transportation problem solved, for until this is done and the prompt distribution of foodstuffs and all commodities made possible, the cost of living cannot be reduced.

And it is the high cost of living which has created a spirit of unrest which is a greater menace to government in this country than anything that can possibly happen in Germany.

When the allies begin paying off their indebtedness to the United States, it might be time to consider further loans, if those payments shall prove sufficient to place the great industries on their feet, relieve present trying conditions and make possible living without suffering on the part of any appreciable number of the people of the United States.

Premier Lloyd George would hardly have made a cat's paw out of this nation, even had it been represented at the conference.

HURRY AND SCURRY.

When is the old leisure, the old idleness, the ancient habit of gossamer? The hurry and scurry that have become, unhappily, so much a part of our national consciousness, particularly in large cities, are like to wrack us more if we are not on our guard.

A friend of mine recently declared that what we need more than anything else, after his buffeting with the perils of a roundabout world, is the quietude of a roadside inn. People seem to be more positively restless when he made the suggestion, and in his pitiful search for companionship he could find no one who was willing to wander forth with him at a slow pace.

"But I do not wish to ride," answered our friend. "I want to stretch my legs and feed and invite my soul in the way that men were intended to do since the beginning of time." "You will be run over," cautioned many. And, true enough—that proved to be his imminent danger when he set forth—alone.

Speed has become the national disease. There is nothing pleasanter than motoring under the right conditions, but seldom can one find a chauffeur who will glide through the green country at the proper gait. Always he must overtake the car just ahead of him—and there is always a car just ahead of him. Sudden turns in the road bring into immediate view other automobiles rushing ahead like mad, and it gets to be a game to catch up with them, blow one's horn and while past, as if something were to be gained by the trick.

What does it all mean? Is it possible that our nerves are forever on edge and that we have to hurry in order not to break down? The clamor of the country on a week-end is hideous; and we think the silent hills must smile as they watch us pitiful humans rushing through the valleys, this way and that, mad to beat someone else to a goal that means nothing when we arrive there.

A return to that large leisure and ease which our forefathers knew would be a salutary thing for America. We are altogether too keen about getting nowhere in particular; and then equally keen to get away again instantaneously.—The Outlook.

SPREAD OF BOLSHIEVISM.

The worst of Bolshevism is not its teaching but the wreck it makes of manufacturing and transportation, the creations of the last 100 years, which have made it possible for Europe and America to support many extra millions of people over what was possible before. Russia had not progressed very far in this direction. She is rapidly going back to her starting point. She is suffering from the disease of chaos. The disease is spreading westward. It now has its grip on the states that border Soviet Russia, the Baltic states of Estonia, Courland and Latvia, on Poland, Czechoslovakia and German Austria. The Red Cross report on these regions is explicit enough, but those whom it does not convince may verify it by recalling what has happened in those less efficient countries, torn by four years of desperate strife. This line of new states in the hands of amateur governments is the No Man's Land between 1920 and 1926. Between modern economic

systems and the purely agricultural system of 100 years ago. If chaos takes this line of states now it will go westward. Germany will be the next victim, and if these states and Germany fall, there will be vital danger to the whole structure both in Europe and here, for at least it will mean a financial panic and the breakdown of foreign trade.—The World's Work.

THE DAY OF THE NATIVE-BORN.

The fact that for the past four months arriving immigrants have somewhat exceeded emigration may stir alarmists to paint pictures of alien perils to our citizenship. Within a short time the census figures of our foreign-born population will eloquently remark such pessimists.

In spite of the inward movement this spring, the emigration for the full fiscal year ending June 30 exceeded immigration, and has usually been the case since the war began. Before that giant upheaval, immigration had been heavy. In the 16 years immigration has exceeded emigration by rather more than 1,000,000 souls. But in the meantime the normal death rate has operated upon a foreign-born population that began the decade with 12,515,000 and possibly rose in 1914 to 12,000,000 or more.

The steady drain of such percentages produces effects that are startling when first encountered in totals. The census should show a foreign-born population smaller than in 1910, and probably below 12,000,000. It should show that the percentage of foreign-born, which was 14.7 in 1890, 12.8 in 1900 and 14.7 in 1910, has now dropped to about 12 per cent.

The day may come when immigration may fairly be considered a menace—though that conclusion will mean a wrench away from old American ideals. Such conditions are still remote. At present the native-born American is in possession of the United States as he has not hitherto been for many, many years.—St. Louis Post Dispatch.

BRING UP A CHILD IN THE WAY HE SHOULD GO.

Make it easier for the child to do what is best for him than to have his own way. The kind of punishment you use is of great importance, but the way you use it is more important still.

Be sure you are right and then don't let the child outdo you by getting his own way—repeated triumphs make him unmanageable. Positive and constructive discipline is better than letting the child's health depend on his whim.

Punishment, if it is of the right kind, tends to do away with the necessity for its repetition. Physical punishment is rarely necessary. Happiness has a positive health value.—Exchange.

From Texas Exchanges

Era of Prohibition. The latest prohibition move is the inauguration of a campaign to prohibit divorce by federal constitutional amendment. Rev. Walter Gwynne of New York, secretary of the new society and vigorous propagandist will be carried on to extend the membership of the organization to every Christian denomination in the country, and ministers of every creed will be urged to refuse to perform the marriage ceremony for any person who has been divorced.—Coleman Democrat-Voice.

Two of a Kind.

Vill's threats against the new government of Mexico are not surprising. Who ever expected a wide-ranging hyena to make terms with a zoological gardener?—Dallas News.

Same Here.

Are you cutting the weeds about your premises this week? Remember the Civic League calls upon every citizen to perform this duty and help make Crandall the cleanest town on the T. & N. O. The request should be cheerfully complied with by all residents of the town.—Crandall Star.

The Awful H. C. L.

Occasionally you see some city father plodding home under a load of family supplies, a crisp in his back, a falter in his step and a droop to his shoulders. Once, the other fellows tell you, the old man used to have more pep than a two-year-old colt behind a brass band—now he looks like a government mule hauling pig iron.—Pecos Enterprise.

Beware the Buttermilk.

If buttermilk contains more alcohol than beer, which the scientist claims it does, we better quit churning—especially out in the country where we have no ice—or the whole country will go to the bad.—San Saba Star.

BITS OF HUMOR

A Penny Saved. The butcher grumbled angrily to himself as he put up the ten-cent meat order. "Cheap skate," he muttered, "if she ever let loose of a dollar."

Just then a small boy burst excitedly in the door. "Hey," he shouted, "are you putting up mamma's order of cat meat?" "Yeah," replied the butcher, "and all I gotta say is—"

"Unwrap it right away," announced the boy. "Kitty's caught a sparrow."—American Legion Weekly.

Danger! Beware!

A woman who was too economical to subscribe for her home paper sent her little girl to borrow the copy given by her neighbor. In his haste the boy ran over a four dollar stand of boxes and in

ten minutes looked like a warty summer squash. His cries reached his father, who ran to his assistance, and, failing to notice a barbed wire fence, ran into it, breaking it down, cutting a handful of flesh from his anatomy and ruining a five dollar pair of pants. The old cow took advantage of the gap in the fence and got into the corral and killed herself eating corn. Hearing the racket, the mother ran, upset a four gallon churn of rich cream into a basket of kittens, drowning the whole litter. In her hurry she dropped and broke, past all hope of mending, a twenty-five dollar set of false teeth. The baby left alone, crawled through the spilled cream and into the parlor, ruining a twenty dollar carpet. During the excitement the eldest daughter ran away with the hired man, the dog broke up eleven setting hens, and the calves got out and chewed the tails off of four fine shirts.

And all to save fifty cents! Moral: Subscribe for this paper at once and protect yourself from such calamities.—Lakeville Ind. Standard.

And With Eyes Shut.

"I am in a great hurry," said the bald-headed man as he climbed into the barber's chair. "Can you cut my hair if I leave my collar on?"

"Sure," said the barber as he glanced at the shiny dome, "even if you leave your hat on."—Portland Express.

Going Up.

Mrs. Getaway—Twenty-seven dollars for that ticket! Why, I bought the same trip last year for \$26.50. Husband—But the price of paper has advanced since then.—Billings (Mont.) Gazette.

And, Going Up!

"How much will this cloth cost a yard?" asked the man who was measured for a suit. "Twenty-seven fifty," replied the tailor.

"H'm," mused the customer. "I guess I don't need a suit. You'd better just make me up a watch fob."—Bartow (Fla.) Union.

Passenger (after first night on board ship)—"I say where have all my clothes vanished to?" Steward—"Where did you put them last night?"

"I folded them up carefully and put them in that cupboard over there." "I see no cupboard, sir." "Are you blind man? I mean that one with the round glass door to it." "Lor' bless me, sir, that ain't no cupboard. That's the porthole."—New York Globe.

Shocking!

An elderly lady of very prim and severe aspect was seated next a young couple who were discussing the merits of their motor cars. "What color is your body?" asked the young man of the girl at his side, meaning, of course, the body of her motor.

"Oh, mine is pink. What is yours?" "Mine is brown with wide yellow stripes." "This was too much for the old lady. Rising from the table, she exclaimed: "When young people come to asking each other the color of their bodies at a dinner party, it is time I left the room."—Ex.

Federal Land Bank.

Associated Press. HOUSTON, July 19.—There are 126,000 actual borrowers from the federal land bank, according to Judge W. H. Joyce, member of the land bank of Washington. There is \$254,000,000 on deposit, he said here recently, and all the land banks are paying dividends. More than 40,000 farm loan associations are connected with the bank system, he added.

Wants Glass Factory.

Special to The News. SANTA ANNA, July 19.—Efforts will be made to have a glass manufacturing plant here. Millions of tons of very high test glass sand are found in the mountains near town, some of which is now being shipped to glass-making plants in Wichita Falls and Texarkana.

THIRTY-NINE TONS OF CATS ARE KILLED IN WASHINGTON CITY

International News Service. WASHINGTON, D. C., July 19.—A cat "leads a dog's life" in Washington. Thirty-nine tons of cats met violent deaths during eleven months of the past year.

During these eleven months 11,701 defunct tabbies were picked up in the district streets, and the pound master made ghosts of 1,000 more during the same period.

Edward S. Schmidt, Washington bird and animal man, estimates that the average cat weighs six pounds. With the aid of an adding machine you can probably figure it out for yourself.

During the fiscal year ended July 1, 1919, a total of 12,375 cats gave up the ghosts in the streets and 2,128 departed officially, with the kindly assistance of "Unfortunately the district has no authority to capture stray cats, so residents are denied the fun of seeing a perspiring man with a long-handled net scale fence and climb trees in pursuit of the elusive feline."

All cats collected by the Health Department and commended in the tender mercies of the poundmaster are taken from the homes where the tabbies have worn out their welcome.

When the poundmaster gets them he slays 'em so efficiently that all their nine lives, or whatever number are extant at the time, depart at one fell swoop. He never has to kill them again.

When Poundmaster Walter R. Smith has a sufficient number of doomed cats on hand to make a mess he herds them gently into a pitch dark, caven-like chamber about six feet square. After the meowing, spitting and hissing carnivores have passed the death house portal the door is hermetically sealed.

Inside is blackness. Such blackness as gave rise to the expression "black as a stack of black cats" at midnight.

The interstices are filled with charcoal gas, almost pure carbon monoxide forced in through pipes. The cats get sleepy. They lie down. Their souls—nine to a cat—mingle slowly with the fumes of the charcoal and flutter upward. Then the poundmaster opens the door and rakes out the carcasses.

The bodies are turned over to Charles J. Mann, dead animal collector, who also gets the dead felines found in the streets. All these bodies he ships down the river to Four Mile Run. No attempt is made to save the fur, the authorities holding that it costs more "to skin a cat" than it is worth, with labor conditions as they are now.

However, the bodies of the defunct Tabbies and Toms, those "faithful friends of ancient mado, the deadly fow of rats," are converted into oils and greases.

Thus, to paraphrase the justly celebrated remarks of Hamlet about "Imperial Caesar, dead and turned to clay," "slipping a hole 'to keep the wind away," we could with some appearance of logic enunciate: The tuneful Thomas, dead and rendered into soap.

PLANS FOR OLYMPIC GAMES AT ANTWERP ARE ALL COMPLETED

President Kirby of the American Committee Returning From Belgium Gives Many Details—Change in Route of Marathon to Avoid Grade Crossings—Housing Arrangements.

Associated Press.

NEW YORK, July 19.—When President Gustavus T. Kirby of the American Olympic committee returned from his recent official visit to Antwerp, Belgium, he presented an exhaustive and very interesting report of his visit to the scene of the coming Olympic games, to the other members of the national committee. Almost every line of the lengthy document is of interest to followers of athletics as Mr. Kirby has gone into detail in reference to the contests in which America will be represented. The following excerpts from the report may give the readers a good idea of the vastness of the arrangements which have been made for the world's greatest athletic competition as well as a program which embodies every health giving exercise known in the world of sports.

The marathon race will not be laid from Brussels to Antwerp, as was originally contemplated, for the reason that the numerous railroad crossings at that route would make such a course too dangerous and to build stairways or in-vine-ways over the railroads would be too exhausting to the runners. The course has been, therefore, changed so as to have the runners start in the stadium and follow the course for half the distance and return over the same course to the stadium, which will be traveled once. The course is practically flat, there being but one hill near Malines and this is of but little consequence as hills are considered by us. The surface over which the runner would take place has about 99 per cent of dirt or fine broken stone, the same being a rather narrow bicycle path along the main highways (many of which bicycle paths exist in Belgium). As it is, 10 per cent of the distance will be of Belgian block and not of the best laid Belgian block, at that. Moreover the bicycle path is so narrow that until the runners become strung out many of them will have to run on the main highways of Belgian block. I am confident that unless the marathon runners are properly shod for the character of the surface to be run over, that there will be many incapacitated from finishing through bruised or lacerated feet.

Housing. As has been announced by the Belgian Olympic committee, its plans for the housing of the teams was, and is, to place them in the numerous school houses in the city. Your president, after considering the situation very carefully, concluded that the plan of the committee was by all odds the best one and has, therefore, arranged for the athletic team, the swimming team, the gymnastic team; in fact, all of the teams, excepting the shooting, rowing, polo and horse riding, to be housed in the school for boys at the Rue Oudaen. This school is one of if not the largest in Antwerp. It is supposedly large enough to lodge 400, but the entire building will be turned over to the American teams. The rooms are large and airy, and the building faces on the street and a large in-

terior courtyard, approximately 60 by 80 feet, containing trees, walks and benches, and is a very pleasant and suitable place.

Amusement. The Belgian Olympic committee is so arranging its program of events as to make it possible for the contestants in one sport to see the contests in the other sports; for example, the track and field events will start at 9 o'clock in the morning and be over at or before 3 o'clock in the afternoon. In the afternoon the swimming events will be decided, the last in point of time on each day being the water polo. In the evenings in the large amphitheater at the zoological gardens in the center of the city will be held the wrestling and boxing contests. In addition to the opportunity thus given for the members of the various teams to enjoy the sports, there will be in stockholm and most important of all, is the present intention of Generals Allen and Sage, to have personally conducted tours made to the devastated regions and those over which the actual fighting took place. Of course, for such trips there will be the necessary railroad charges, but all will be without profit. A cordial invitation has been received from Mon. Victor Breyer, editor of the l'Echo des Sports, for the American team to take part in the athletic meetings to be held in Paris on the Sunday following the finish of the athletic events in Antwerp; their expenses to Paris being paid and the proceeds of the meeting going to some charitable institution and as to which invitation your president has stated that no invitation could be accepted which would in any way interfere either with the events or festivities of the Seventh Olympia.

Rowing. Date of contest: August 27th to 29th. Place of contest: On the canal running through Brussels. The race strating at the village called Vilvorde, which is about 36 minutes by automobile from Brussels, and considerably longer by train from Antwerp. The water is absolutely still and the canal is approximately 60 meters wide. It is said that races for four eight-oared crews in one heat had been held upon the canal, and it is contemplated that in the final of the eights, as with the other events, there will be three crews of contestants. The canal is not only narrow but shallow, especially on the edges, probably not being more than three feet on each side. It would seem that the crew in the middle course would have a decided advantage and while it is that the canal is as straight as an arrow if it is that the crews are not steered equally straight, fouling will be difficult to avoid. The question was asked if it would be permissible for the leading crew, which started on the side of the canal, to take the middle course, and the answer was that such had been done quite often. It is certain that a good start, and the best of steering, is the requisite for the race. Along one side of the canal runs a railroad and on this there will be an observation train. On the other side there is a road along which automobiles will be permitted. If as many turn up as are expected to stand along the banks to see the race and if the police are paid as little attention to as seems to be invariably the custom with the Belgians, there will be many spectators in the canal, under the observation train, or the automobile on the days of the race.

Cycling. Date of contest: August 9 to August 12. Place of contest: On the concrete motorcycle track near the stadium, such track being saucer-shaped and having added thereto an additional concrete strip about seven feet wide at the bottom of the "saucer," such strip having

but little slope and thereby permitting one to ride without speed. This strip is not sufficiently wide to do more than allow one man to pass another thereon. It is possible to pass by riding up the slope of the main track and probably with speed, one would do this in any event.

The many places of refreshment in and around the city give opportunity for rest and recreation and the excursion to the battlefields can be taken at almost any time. The very attractive program of the Seventh Olympia and the exposition has been gotten out in print and the English translation should be received by the American Olympic committee within a fortnight. This guide, or program, tells of the neighboring cities, and Brussels, Ghent, Broges, Ostend, Zeebrugge and many other towns of ancient and war interest. There is no doubt whatever, that the visitor to Antwerp will have not only the opportunity of seeing the best sport of the world, but also a most interesting and educational time in visiting many places referred to.

Belgium is certainly on its toes in the rehabilitation of its industries and commerce and the reconstruction of its country, and while much is still left to be done, so far as the tourist is concerned, he will find the trains running at regular schedule time, the shops well stocked, the food of the best, and prices approximately that of our own country, certainly no more, and probably somewhat less, by reason of the present rate of exchange. The hotel and housing problem is the most serious one, for it is a fact that the hotels in Antwerp, are overcrowded and that those in Brussels and at other cities, while not so bad, must have reservations made therein in advance to be sure of proper accommodation. So far, however, as concerns the visitors to the Olympic games, it can be stated with positiveness that all will be properly housed by the Belgian Olympic committee, for the good people of Antwerp having made up their minds that irrespective of the crowded conditions of their main hotels and the desire on the part of hotel keepers to take unfair advantage of the situation, they will not permit visitors to their city and especially American visitors, to be imposed upon, or uncomfortably lodged.

The housing committee of the Belgian Olympic committee has received from the best people of Antwerp offers for the use in their homes of rooms which are large and comfortable, many with modern conveniences and all of the character wherein any visitor should be comfortable. All that is necessary for anyone about to visit Antwerp to do, is to send full and explicit information to the American Olympic committee, Antwerp, Belgium, stating just what is wanted, the time of arrival, the period of occupancy, the number and character of the individual or family to be cared for and the maximum amount willing to be paid for the accommodations. The representative of the American Olympic committee will then take up with the Belgian committee the matter of obtaining the accommodations desired and the applicant can rest assured that on his, or her, arrival at Antwerp, proper accommodations will be found. If time suffices, the applicant will be notified by letter or telegraph just where to go on arriving at Antwerp.

BALL PLAYER HAS THE FASHIONABLE DISEASE

Associated Press. POCAHELLO, Idaho, July 19.—"Chic" Gandil, star first baseman for the champion Chicago White Sox team last year and recently purchased by St. Anthony of the Snake River Yellowstone league for \$10,000, has been released by that team and will play no more baseball this season. Gandil is said to be suffering from appendicitis, and goes to Los Angeles, where it is expected he will undergo an operation.

KILLS CHILD, HOUR OLD, CONFESSES, IS PAROLED

International News Service. AKRON, Ohio, July 19.—Although admitting killing her new-born babe and pleading guilty to manslaughter, pretty twenty-one-year-old Clara Marr, escapes with a parole and a suspended sentence to the State reformatory for women. When the babe was an hour old the young mother cut its throat and stabbed the back of its neck with a knife similar to those used in local rubber shops, according to County Prosecutor Roetzel, who asked the court to extend clemency to Miss Marr, who, he said, had been betrayed by a coward on a false promise of marriage. Her betrayer disappeared. Clara has been given employment in a private family. The court ordered she remain in the family until she is twenty-four years old. If, however, this plan does not prove acceptable to the wife in the family, Clara is to report to the court.

Coming here from Leetart, West Virginia, where her parents and eight brothers and sisters live, Clara found employment in a factory where she met a man from Pennsylvania who made love to her and then betrayed her.

Free Dipping Vats. AUSTIN, July 19.—Eighty-five vats will be turned over to officials of Travis county for use free of charge in dipping cattle in compliance with orders of the Livestock Sanitary Commission, according to a poll taken at a meeting of the commissioners court with several hundred farmers. Approximately forty other vats have been refused the county by their owners, but it is thought these tendered will enable the dipping campaign to be carried out with the county having to construct public vats, which would cost approximately \$25,000.

In connection with other work, Dr. Baten has for many years been a close student of the law. 124

CISCO PLAYERS ARE COMING HOME FOR NINE GAME SERIES

Scouts Playing Real Ball Now and Have Best Shot in the League for the Penant—Only One Game Behind Leaders at Close of Sunday's Game—Team Greatly Strengthened.

The Cisco Scouts will arrive home tomorrow to begin a nine-day series on their own grounds.

The Scouts are now only one game removed from first place, and should they win from Ranger today, those two teams will be tied, Ranger now being in the lead.

The Scouts are now playing real ball and with recent additions to and the strengthening of the team, they look like pennant winners. Manager Carson has added another strong player, taking on Johnnie Gray, who has been the Gorman star player. With Gray in the line-up and all the recent cripples fully recovered, the team certainly looks the best of the league.

Tim Griesenbeck is back behind the bat and playing a streak before he had the misfortune to break his thumb, five weeks ago.

Ranger will be here for three games, beginning tomorrow. This will be a famed series between the contestants for first place. Then will come Eastland, Thursday, Friday, Saturday and Sunday, and Gorman for three games the first of next week.

With the Scouts putting up the quality of ball they are now doing, they are entitled to the very best patronage. None is going to be disappointed if they go to the park to see a real game of ball and appreciation shown the players while at home ever encourages them in other games. If Cisco people want to see their club win they should make the fact known by attending the games.

Yesterday the Scouts walloped Gorman to the tune of 13 to 6. Eastland defeated Abilene 6 to 0, and Mineral Wells beat Ranger, 6 to 5.

EASTLAND 6, Abilene 0. EASTLAND, July 19.—Darrough pitched a fine game and Eastland knocked G. Hill's shots all over the lot and won from Abilene, 6 to 0, here Sunday.

By agreement the teams were to play a double-header, but rain interfered, the first game being called in the last half of the sixth inning. The feature of the game was the hitting of Payne.

MINERAL WELLS, 6, Ranger 5. Special to The News. MINERAL WELLS, July 19.—Mineral Wells took the second straight from Ranger, 6 to 5, Sunday. Ranger had a five-run lead in the fifth when the game was protested by Ranger on account second base tagged with only one pin.

Score by innings: R H E Ranger . . . . . 600 230 600—5 11 4 Mineral Wells . . . . . 000 020 402—6 7 2 Batteries: R. Hill and Penn. Toler, McQueen and Byers. Summary: Three-base hit, Tate; two-base hit, Noakes, struck out by Toler 1, by Hill 4, by McQueen 2; bases on balls, off Toler 1, off Hill 4, time of game, 1 hour 55 minutes; umpire, Wakefield.

PERSONAL MENTION

Lloyd James, of Wichita-Falls, is the guest of the family of Mr. and Mrs. E. D. Stansbury.

Mr. and Mrs. E. B. Issacks left this morning on an extended visit to relatives in Georgia. They will make brief stops at Marshall, Texas, and New Orleans.

Miss Merle Stansbury made a brief business trip to Elva and today.

Mrs. G. C. Davis, accompanied by her son, Carroll, and sister, Mrs. Shipp, of Anniston, Ala., left Sunday night for a month's stay at Galveston, where they will visit the parents of Mr. Davis, who will join them later for his summer vacation.

Mrs. J. W. Shepard had for her guest Sunday her sister, Mrs. John Sue, and Mrs. Elsie Davis and son, of Eastland.

Mrs. Addie Lee Holloway of Dallas, a niece of Mrs. W. W. Moore, is spending the week at Mrs. Moore's home on Avenue J and Seventh street.

Mrs. C. L. Tunc returned home Sunday night from a trip to Fort Worth.

Miss Ellen Bacon, who is now taking her summer vacation, left Saturday for a two weeks' stay in Mineral Wells.

Ernest Jones, candidate for county clerk, was a visitor in Cisco today.

Mr. and Mrs. Harry Hargett and Mrs. Dixie Walker leave tomorrow for Mineral Wells to remain several days.

The Missionary Society of the First Presbyterian church held their last meeting in the home of Mrs. E. P. Crawford, 505 West Fifth street. After a brief business session, a social call was had. The hostess served pineapple sherbet and individual cakes. The next meeting will be held in the home of Mrs. E. P. Crawford, 505 West Fifth street.

FORTY-SEVEN DAYS SINCE THE FIREMEN HAVE BEEN CALLED

The Cisco fire department has a record for forty-seven days without a fire, the last one being June 11. There may be gathered from this that the work of the last survey, whereby the fire hazard of the city was reduced 80 per cent, was most thoroughly performed.

The rapid growth of the city will compel the purchase of additional apparatus and the building of a central fire station can be no longer delayed. The mayor called attention to it at the last meeting of the commission and it is expected work will begin on the construction within a very short time.

The department is said to be in excellent shape, barring the need of room for its apparatus.

A meeting of the society will be Tuesday afternoon, July 20, at 4 o'clock, at the home of Mrs. C. H. Fox, 409 West Fifth street.

Mrs. J. D. Leslie and son, Francis, will depart for Kerrville this week, where they will attend the Presbyterian encampment. Miss Bonnie Leslie will go to Weatherford, where she will be the guest of friends for a few weeks.

Before the city can expand to any great degree, Cisco must have more dwelling houses. This should be kept in mind when inviting outsiders to east their lot with us.

Commission Meets Tonight. There will be a meeting of the mayor and commissioners tonight. The chief business to come before the meeting will be passed upon claims and accounts, tonight having been set apart especially for that purpose.

CITIZEN WRITES IN TELLING ABOUT SOME CISCO CONDITIONS

The following communication from a Cisco citizen reached The News office today:

"Sunday morning's issue of The News brings the glad announcement of the rigid enforcement of law by the commissioners and health officers, to compel a thorough cleaning up of the city of Cisco. Much has been said about this matter, but the rush of business and the grading of streets, building of the new water supply, and building new sidewalks, and many other improvements that are too numerous to mention, but every tourist has an eye on them, has taken so much of the time of the city officers that their plans have not materialized. But, as much of this unfinished work is about completed, and more time is to be given to making a 'cleaner Cisco,' it is hoped that every resolution forged by the city government will be carried into effect and all will co-operate with them in making this the 'City Beautiful' and make it a place worth advertising, in order to bring people here.

"Much advertising goes out from Cisco, much to foreign lands, and into the domain and every part of the world the name of Cisco, Texas is sent. Many and many letters are received asking more about this wonderful country, and its advantages. All know that cleanliness brings its results. No husband loves an unclean home, no wife loves an unclean man, no man loves to come home to find his wife and children unclean, disatisfied, and soon results come, the tourists pack their grips and seek cleaner resorts.

"Naturally all visitors will go to the city hall. What are the surroundings near there? Vacant lots grown up with weeds, every kind of trash and unsightly articles that can possibly be found in any trash pile near a city. The sidewalks are grown up with weeds, and almost impassable, and at night all around are dark and hidden paths, making it a daring place to go after dark. Across the street near the lumber yard are weeds that hide people as they pass. On the other corner in a mud hole in which green water stands almost every week in the year.

"Now make your first clean-up around the beautiful city hall, spread out and out from there until every part of the city is reached, so when drives are being made, conducting strangers over the city, there will not be an unsightly spot to point them to. This can be done. We have a live set of officers, and wonderful work is being conducted under their supervision. Do not let it be done a few days ago, that a man by town would be the best place to die in he ever saw. When asked the reason, he said because one would dread to leave the earth there less than any place he knew of.

"Make Cisco a place that all will dread to leave. You can do it, and make every citizen help you.

"Don't spend so much printer's ink on asking that loose paper be picked up and limbs from trees cut off. For goodness sake, let the limbs grow; Cisco is over thirty-nine years old and has less shade trees than any other town in Texas of its age. Now, as they are beginning to grow, woodman, spare that tree. Keep up the good work in Cisco."

Wall paper! Wall paper! wall paper! We have it at our own price. Artercraft Paint & Paper Co. Phone 248. 156

SCOTCH HOOGH "WAY UP"; DEMAND GREATEST EVER

International News Service. LONDON, July 19.—The world's consumption capacity or desire for Scotch whiskey has taken a startling jump in the past three months.

Since the government controlled price of bottled whiskey was advanced from ten shillings to twelve shillings six pence a bottle, the domestic demand has advanced enormously. Distillers have more orders booked than they can fill. Simultaneously the foreign orders have rolled in in daily increasing numbers, perhaps partly due to the cessation of manufacture in America.

"If we could ripen all the whiskey we now have in hand and release it, we could sell every gallon we own," a prominent distiller declared to the International News Service.

"Every distiller in Great Britain could completely sell out his stock, close up his plants, retire wealthy enough to forget the whiskey business and let whoever desired carry on the trade. We would not have to worry about future markets.

Fifty per cent discount on all wall paper for the next ten days. Artercraft Paint & Paper Co. Phone 248. 156

Let's Go, Hazel.

International News Service. HATBORO, July 19.—Mrs. J. R. Snyder, of this borough, has a great-granddaughter living in Newfield, N. J., who claims to have more living relatives than anyone in the state. She is Hazel Letts. She has one grandfather, two grandmothers, three great-grandfathers, and two great-grandmothers, one 80 years old, and a great-great-grandmother, who is 104 years of age.

Dr. Baten's many friends fully expect him to be elected justice of the peace by large majorities. 124

HOW ONE FARMER IS MAKING MONEY FROM LAND IN WEST TEXAS

Special to The News. AVOCA, July 19.—For any five or ten-year period an acre of Central West Texas land will make the farmer more revenue than an acre of land in any other part of the nation, declared Thomas Murphy Caton, for 50 years a farmer.

Mr. Caton, now 63, has farmed in North Carolina, Arkansas and Texas. He came to Jones county in 1892, bought land and paid it out inside of four years from proceeds of sales of wheat, oats and cotton.

"With the exception of 1917-18, when the west had its worst drouth, I always managed to make a living and had to spare," said Mr. Caton to a staff representative of the West Texas Chamber of Commerce. "In 1919 I sold more than \$20,000 worth of stuff from my farms." He raised 102 bales of cotton from 130 acres and 50 tons of maize. In 1918 Mr. Caton says he made from 65 acres fifty 500-pound bales of cotton.

"My farm makes more to the acre now than it did thirty years ago," said Mr. Caton, "although," he explained, "I never use fertilizers. I believe in crop rotation. I have invariably followed the idea with the utmost success. Cotton produces more on land that last year grew maize. Last year 30 acres in maize produced 75 tons of grain. Half of it was left to rot in the fields because of no labor."

Success in farming West Texas lands cannot be predicted on heds-bound rules and methods. One must be familiar with West Texas to make the best of any year. The seasons are so different. This is the statement of Mr. Caton. One year he plows deep; the next shallow. He follows the signs of the heavens.

This summer when many other farmers in his vicinity were complaining of web worms, Mr. Caton's fields were free from the pests. He explained that he had destroyed the weeds early. That was his secret. Others permit the careless weeds to become pest incubators.

MOTOR THIEVES ARE AIDED BY MEN POSING AS GOOD CITIZENS

International News Service. BOSTON, July 19.—Revelations from a trustworthy source in the case of Herman L. Barney, who escaped from State prison and then suddenly gave himself up, showing that among the men higher up identified with a country-wide auto thief system are:

Unscrupulous insurance adjusters who operate with gangs of auto thieves.

Alleged agents of certain reputable makes of cars who secretly work with auto thieves and distributors of stolen cars on the side.

Certain second-hand dealers. Business men who deal extensively in stolen cars and who hide behind legitimate lines of business in which they are engaged.

Dishonest automobile owners who pay thieves to steal their cars so that they may collect the insurance money.

Representatives of insurance companies who pay thieves bonuses to recover stolen cars, a practice which District Attorney Joseph C. Pelletier, in the recent case of Jacob Levy, branded as "the compounding of a felony," and threatened to prosecute the company in question if it committed the offense again.

Evidence shows that thieves get but \$50 or \$75 for cars from the fellows, higher up who sell them all the way from \$500 to \$1,000. These figures were testified to by veteran automobile thieves in the cases recently prosecuted by District Attorney Nathan A. Turfina and his first assistant, George Stanley Harvey, in Middlesex County.

It was also learned that in tight periods of the inner-world auto market cars have actually been sold to prospective customers several days, and even a week, before they have been stolen.

Advance Ice Prices? Associated Press. PORT WORTH, July 19.—Ice dealers advanced the price of ice to 70 cents per 100 pounds, a 10 cents increase, because of the scarcity of fuel. This is the second advance in ice prices this season.

Judia Theater "Alarm Clock Andy" Today and Tomorrow

A Rhymed Review By Russell Holman

Despite his pep, shy Andy Gray At selling trucks proved quite a flyer. He stuttered—and before he'd say A word, his knees would start to quiver.

Then came the day a girl and Fate Combined to put him to the test. His bluffing rival got the mate. And bashful Andy got the rest.

Don't miss this film with Charlie Ray. "Alarm Clock Andy"—laughs galore. The kind you don't see every day. Note: Ray's a country boy once more.

PROFITEERS IN RICE RECEIVE A TRIMMING IN HONG KONG MARKET

HONG KONG, July 19.—Hong Kong has been stocked with rice bought for export and held for a rise in prices even during the rice shortage which has become serious in some cities of southern China and other parts of the Orient.

The manager of a big commercial firm here estimated that there was more than \$10,000,000 worth of Saigon "long" rice stored in Hong Kong.

Recently the price fell rapidly and dealers and exporters found themselves loaded up with rice while the banks were pressing for the payment of bills. Japan was not able to buy owing to the tightness of her money market, and it was stated that America, ordinarily one of the largest buyers of rice in this market, has ceased to purchase because she had obtained a sufficient supply. The Daily Press stated that about 75 per cent of the rice exported from Hong Kong goes to Cuba, but that Cuba's supply had been purchased direct from the producers instead of the Hong Kong middlemen.

There were food riots in Shanghai in the latter part of June owing to the high prices of rice there. On June 29 there was only a four days' supply of rice available in Shanghai.

American Become Japs. Associated Press. TOKIO, July 19.—Edwin and James, the two sons of Edwin Dug, former United States minister to Japan, have taken out naturalization papers as Japanese subjects. Their father married a Japanese woman. The two sons will go to Ohio, Edwin's native state, to pursue their education and later return to Japan for their business careers.

Vote for A. E. Baten for justice of the peace. 134

MOONSHINE STILL IS FOUND IN CHURCH. JANITOR IS JAILED

International News Service. CHARLESTON, W. Va., July 19.—Moonshining is on the increase in West Virginia, according to figures and reports on file in the office of the prohibition department. More stills were raided in the last month than any other time in the history of the department.

All classes appear to be engaged in the manufacture of contraband booze, according to the reports.

In one raid a still was found in the attic of a church, and the janitor was arrested for moonshining. Another still was found turning out liquor within fifty feet of the state capital. In Summers county stills were confiscated in the homes of two men who have been school teachers for sixteen years.

A raid in Lincoln county revealed a whiskey-making outfit on the premises of a wealthy farmer.

A unique arrest occurred here. Officers were returning from a raid a few miles away, when the automobile in which they were riding collided with another. The officers were looking over the wreck, when one of them discovered several gallons of moonshine in the other machine.

Leeroy Light Pant. Special to The News. LEBERAY, July 19.—Engineers from Eastland have been estimating the prospective consumption of electric lights in the new town. They also surveyed locations for the plant, poles and wires, and have made a favorable report to the company proposing to put in this plant within thirty days.

A great saving can be made in wall paper by visiting this sale. Artercraft Paint & Paper Co. Phone 248. 136

WEST TEXAS TOWNS WITHOUT ICE OWING TO SHORTAGE OF CARS

Associated Press. HAMLIN, July 18.—The long sweltering days of July are tedious in many West Texas towns due to the inability of ice factories to secure refrigerator cars for shipment to towns without plants. Rotan, a considerable town, is frequently without ice. A number of towns in the oil fields are feeling the effects of the car shortage, including Burkburnett, it is reported.

According to information from the West Texas Chamber of Commerce refrigerator shortage is due to a draft made upon this equipment by fruit growers of California. The organization is trying to get the railroads to retain sufficient of this equipment to care for the ice needs of Texas.
