HENRY FORD AS A RUBBER GROWER

Henry Ford invaded Brazil and invested millions in the rubber industry. He purchased vast tracts of land. He planted millions of rubber bushes. He built villages and outfitted his factories with all the machinery necessary to produce rubber. It will be recalled that the British controlled the rubber industry in their far-away fields, they restricted production, they housed their staple, they sent the price of crude rubber skyward and then three distinguished Americans, embarked in the game—Henry Ford, Harvey T. Firestone and Thomas A. Edison. After gorging themselves and their coffers with American money the British rubber combines blew up. Now there is a rumor that Wizard Ford has abandoned his Brazilian venture or investment.

There was a time in the not remote past when the British rubber combine had the buying world in a viselike grip. Now the reverse is true. There was a time when the sugar the public is not. Advertise! and the coffee combines absolutely controlled the trade and fixed the prices. These combines have gone to pieces. It is a merry old world for the man who marches with the procession and has a closeup of the crashing and the smashing of umns just the same as they do the well-laid plans of men and the crumbling of their little the news columns. Will Rogers made his humanity tour of Texas. He collected \$82,000 to feed hungry men and women and children while the government is doing nobly in its work of feeding the hogs in the same section of the southwest. Humorist Rogers would have made a remarkable evangelist. If he had taken that route he would have been able to fill the plate every time he appealed to an audience. He directs his hundred million dollar shipping interests and is a director in four other great corporations. He was born in Scotland in 1844. He escaped from Scotland at the early age of 18 and discovered the lumber regions of Canada. From that day to this he has been one of the marvels of the business and the shipping world. This is what a diet of oatmeal cakes and thistles does for a plucky and ambitious Scot. He has more millions than he can count. Now he is going to organize an all-Chinese shipping company to skim the seas of the Orient. He is an optimist and has never been known to lose his nerve.

FOOD MILEAGE

Fueling the household machine is an important item these days. After all, on the road of daily life, most of us have to get the last mile out of every dollar we spend.

High food mileage means careful buying . . . thoughtful selection of the foods that not only suit the tastes and physical needs of the family, but the pocketbook as well.

That's the value of advertising. Every day, here in your paper, are presented new and interesting food ideas. New ways of preparing old, reliable favorites. New combinations of the foods the family needs . . . in ways they'll like.

Standard, unvarying quality is the outstanding feature of advertised merchandise in general . . . and of food products in particular. Quite a factor in getting high food mileage!

> Read the food advertising here in your daily paper . . . it will show you the way to higher food mileage.

PUBLIC WORKS PLANOFITALY **LEADS NATIONS**

By WEBB MILLER
United Press Staff Correspondent
ROME, Feb. 6. — The Fascist government is carrying out the most gigantic system of public works ever executed by any country in a short space of time under the direct impulsion of Mussolini

The public equipment of the nation is being renewed, expanded and transformed. Italy has not witnessed public building on such a grandiose scale since the days of the Roman Empire. The Fascist regime is proud of its immense

accomplishments along this line.
At every turn the traveller sees evidences of this veritable regeneration of the nation's equipment and physicial resources. The government is pouring billions of lire into the work from the northern frontier to Sicily, Sardinia and the African colonies

Lady Tells How Black-Draught Helps To Relieve Many Complaints.

Decatur, Ala.—After having used Thedford's Black-Draught when needed for many years, Mrs. W. J. Riley, of this city, tells others about the help it has been to her family. "In my mother's home Black

Draught was our family medicine," says Mrs. Riley. "Mother gave it to us children when we complained of not feeling well. Mother gave Black-Draught in the form of a tea. "Since I've been married and

had a home of my own, I have continued to use Black-Draught, as I have never found anything else to take its place. One of my children suffers from indigestion. Her stomach is easily upset. I have found that giving her Black-Draught tea will relieve her quicker than anything else.
"My whole family takes it for

constipation and biliousness. It is a good thing to take it occasionally, to keep the system clean. I give it children for bad colds. Mrs. Riley says that when her children had whooping cough and needed a laxative, she gave them "Black-Draught to keep their bowels open and they did fine." NA-305
