England Sees Increase in Crimes Of Violence—Absence of Head of Family During War Given as Cause

MINICH HELD FOR THEFT OF \$20 RELEASED

J. A. Minich, who was arrested here about ten days ago in connection with the theft of \$20 from F. A. Lavoise, was completely exonerated by the county attorney and the case dismissed, after an investigation. No evidence could be produced connecting Minich with the theft of the money after the county attorney had thoroughly gone into the matter, and then it was ordered the case dismissed. Minich was not charged directly with the theft of this money, but arrested merely as a suspect, as the arresting officers were told by another party that Minich had laughingly told him that he was going to get Lavoise's purse.

HEALTH REPORT FOR JUNE MADE TO CITY BOARD

Dr. J. W. Gregory, city health officer, has just submitted his monthly report of the city health board, consisting of Drs. W. P. Lee, G. W. Griswold, E. L. Graham, in which it is found that the health of Cisco is excellent. June is the summer month, in which sickness generally occurs in most cities, while here the health would compare most favorably with the healthiest seasons of other Texas cities. There has been four mild cases of scarlet fever, all recovered, and two cases of typhoid imported by the victims visiting other cities. These are now convalescing.

Following is the report in full: Gentlemen: In accordance with law I herewith read and deliver to your body monthly report as city health officer. Month of June, 1925.

I have made thirty personal inspections during the past month. All sanitary conditions within the city are in very good shape at this time. The house fly and mosquito control has been diligently attended to and with the exception of a few isolated sections of the city the house fly has been greatly reduced. Occasionally a report has reached my office that some mosquitoes were seen. The sanitary policeman has had charge of the oiling system and very water pond was well oiled several times during the month.

I have quarantined four cases of scarlet fever at various places in the city during June. These cases have been carefully watched by the attending physician and all cases will soon be discharged. No other quarantinable diseases have been reported to me. Two cases of typhoid fever was reported to me during the past month.

Eight deaths have occurred in the city during June. Four persons dying with a combined age of 311 years. Cause of death as follows: Premature birth, 1; fracture of skull, 1; hypostatic pneumonia, 1; mitral regurgitation, 1; apoplexy, 1; cerebral hemorrhage, 1; heart failure, 1; heart lesion, 1. Much time has been given the dairy farms during June. A new bacterial count was made about the 20th. The count is very much lower than the first one. Some improvements have been noted with in the past three weeks. Within the next three weeks a much better condition of our milk dairies will be seen. The domestic water supply is in good condition as per a copy of the latest laboratory examination, a copy is herewith attached for your inspection. These reports have been seventeen births reported to me during June, eight boys and nine girls. I spent two days in and near Dallas inspecting small and large dairies for first hand information. I herewith submit you this report.

Joseph W. Gregory, M. D. City Health Officer.

LONDON, July 3.—It is not only in America that there is discussion of crime increase. Here, for instance where general crime has been decreasing, crimes of violence have been on the increase.

The other day I had a chance to raise the subject with two men one of whom is an official in the London police force and the other a member of the Berlin force. They happened to agree on an explanation that does not appeal to me, but that ought to have something in it to be picked out by two men so experienced and intelligent. I began the conversation by quoting the last of several remarks I had noticed as being made by judges in passing sentences. This particular judge, in talking to a young man who had apparently committed a murder merely to destroy evidence of a robbery, said that a new kind of young desperado seemed to be coming into existence.

New Crime Wave
I asked the police officials if in their two countries they saw a new type of criminal and if so whether the cause might be in the habits of the war.

They both admitted the increase of these crimes but firmly denied the direct influence of fighting as being the cause. The criminals are mostly too young to have been in the war. Both officials picked out as the cause the loosening of home influence due to the father's absence for four years. A boy, say, in the years of 14 to 18, particularly needs this influence and will be likely to suffer morally if he is without it.

Explanation Fails
The reason I found difficulty with this explanation, in spite of its admirable sources, is that I could not see how to apply it to the United States, where the number of fathers away from home was comparatively few and for a much shorter period, whereas the phenomenon itself seems more marked with us than with any other nation.

Another branch of sensational crime is certainly attracting more attention here than ever before and apparently is on the increase. Within a few days I have asked two countesses, of different upbringing and ideas, about the increase of sensational cases dealing with adultery in nobility. They were not sure about the increase, although inclined to admit it. What they were clear about was the greater willingness of the parties to such a mixup to have it come into the open. The reason for this greater willingness is that the social penalty is much less than it once was.

PARKS CAMP VOTED BONDS BUILD SCHOOLS

PARKS, July 3.—Without a single dissenting vote the Parks Independent school district voted to sell \$6,500 in school bonds with which to buy an auditorium and six school buildings, in an election held Wednesday. The school buildings and auditorium have been in use here for the last three years, the Texas Company, which owned them, letting the school district have them free of charge during this time. They now become the property of the district.

Sufficient funds are provided in the bond issue to pay for repainting the buildings and for laying sidewalks around them, according to Dr. P. C. Wray, chairman of the district school board.

The auditorium which will be bought, seats several hundred people and is used for a combination assembly place and gymnasium. It is made of extra heavy stucco and has hardwood floors. The schools will accommodate approximately 225 children during the coming school year, though they have a capacity of at least 100 more than this. All of the buildings are good frame structures.

Port Arthur—Nurses' Home at Mary Gates hospital, recently damaged by fire, being repaired at cost of \$3,600.

Deputy Supervisor Burkett of State Oil and Gas Department, Opens Office In Cisco and Will Move Family Here

R. V. DAVIDSON ONCE ATTORNEY GENERAL DEAD

DALLAS, June 3.—R. V. Davidson, attorney general of Texas from 1905 to 1910, died this morning at his home here after a brief illness. General Davidson achieved fame while attorney general by fighting the famous case against the Waters Pierce Oil Company for violation of the anti-trust laws, which resulted in a fine of two million dollars against the oil company, the heaviest fine ever assessed for a similar offense in Texas.

FRENCH ARE TO PAY US A VISIT AT EARLY DATE

PARIS, July 3.—The French cabinet today decided to send its debt commission to the United States as soon as possible to conduct negotiations toward funding the French four million dollar war loan. This announcement was made by Foreign Minister Briand at the close of cabinet meetings.

JIMMIE WEST AND WARREN'S WELL BEST YET

MORAN, July 3.—The Warren & West well and the Texas Co. No. 22 well that came in this week add much to the great field being developed on the Diller ranch eight miles west of Moran, The Texas Co. No. 22 well struck the pay Wednesday afternoon at 550 feet. It will possibly make better than 200 barrels. This is the fourth gusher brought in on the Texas lease within the past few weeks.

The L. A. Warren and Jimmie West well is said to be good for 260 barrels on section 49, L. A. lands, on the Diller fee Monday, at a depth of 555 feet. This is the fourth well brought in in this pool and prospects are good for many more. This well is the biggest producer found in that pool. Gas was found in enormous quantities before the oil began to flow, and the oil sand was penetrated some 27 feet, and no bottom found at that depth. The finding of this well adds much hope to this great field and it will no doubt be drilled up as soon as possible. This is the best shallow oil field in the state, and no doubt many more of these splendid wells will be found in a short time.

The Spence Oil Co. brought in a nice well on the Gunn farm, a few miles south of town this week. The G. S. Anderson Oil Co. is spudding in the No. 4 well on the Formby lease, section 69, L. A. lands. This company recently brought in a nice well on this lease which is making a good production. Brannon & Murray brought in a good well this week on section 48 L. A. lands. This is their No. 5 well.

THURBER WILL PLAY TWO GAMES AT BRECKENRIDGE

THURBER, July 3.—The Thurber baseball club will play the Breckenridge Dynamo at Breckenridge Saturday and Sunday. The game on Saturday, the fourth, will be played in the forenoon, starting at ten o'clock. Sunday's game will be played as usual in the afternoon. Those teams have played four games this season with Thurber winning three and closing one. The games have been hard fought battles, and the contests Saturday and Sunday promise to be better than ever before, as both clubs are determined to win. Breckenridge won the last game played with Thurber and have also recently defeated Ranger, one of the strongest teams in the Oil Belt.

A division office of the oil and gas department of the state railway commission was opened in Cisco today, with Deputy Supervisor Omar Burkett, formerly of Eastland, in charge. Mr. Burkett will move to Cisco just as soon as he can secure a good house. This oil and gas district is now composed of nineteen counties, Coleman and Brown counties and the south half of Shackelford county having recently been added to the original sixteen counties comprising the district. Deputy Supervisor I. J. Killough will remain at Eastland and work out of that city in conjunction with Mr. Burkett.

Cisco is very fortunate in securing the headquarters office of the oil and gas department and is glad to have Mr. Burkett as a permanent resident. He will have offices in the chamber of commerce building.

Mr. Killough who is well known in Cisco accompanied Mr. Burkett to Cisco this morning. In speaking of the office to be located here Mr. Killough said full credit for the Cisco office should be given to D. J. Moss and J. M. Williamson, who took the matter up with C. V. Terrell of the railway commission several months ago.

SIGN LOYALTY TEST, REQUEST OF PRESIDENT

Mayor Williamson, in conformity with the proclamation of President Coolidge, who at the request of the war department has designated July 4 as National Defense Day test, calls upon all Cisco folk to sign one of the rosters that will be at booths at Lake Cisco during the dedication celebration tomorrow.

Mayor Williamson states that there will be three different rosters—one for men between the ages of 18 and 45, one for men above the age of 45, and one for women above the age of 18. He urges every Cisco citizen to call at one of these booths and sign the roster, which is simply a pledge of loyalty to our nation, and will give all an opportunity to express their loyalty to our country and to maintain Cisco's reputation for doing things.

There will be one or more places on the grounds at Lake Cisco tomorrow where all may register. This loyalty program is in charge of H. G. Bailey, commandant of John William Butts post, American legion, Minter Womack, ranking officer of the 358th infantry, with mobilizing headquarters at Cisco, Osher Goldsmith, ranking officer of the cavalry troop of the reserve army, with mobilizing headquarters at Cisco, together with others who will be called into service by the above committee. D. J. Moss heads a committee from the Rotary club who will be on the grounds to assist citizens in registering and giving information to those who wish to register.

Following is the obligation for men between the ages of 18 and 45: "July 4, 1776—July 4, 1925. The undersigned men of military age, 18 to 45, sign this roster as an expression of loyalty, as favoring national defense, and as one day volunteers for the unit named above. By this act no obligation is assumed for any military service."

For men over 45 and women over 18: "July 4, 1776—July 4, 1925. The undersigned signs this roster as an expression of his unwavering loyalty to his country and flag, and as favoring national defense with the understanding that, by this act, he assumes no obligation whatever for military service. I have signed and will sign no other roster for the second defense test. (Here follows blank space to sign.)"

NAVY DIRIGIBLE

LAKEHURST, N. Y., June 3.—The navy dirigible Shenandoah left here this morning at 9:15 for Bar Harbor, Me., where several governors in convention there will be taken aloft for brief rides. It was planned for the dirigible to fly over Swampscott, so the president and Mrs. Coolidge could see it.

AL. FLORENCE CAPTERED IN FT. WORTH

Albert Florence, who murdered Arthur Toombs here on the morning of June 22, will be in jail at Eastland by tomorrow morning, according to a message received by the police department last night, stating that Florence was held in the Tarrant county jail at Fort Worth, and would be delivered to Sheriff Bob Edwards of Eastland county upon his arrival.

Florence was arrested early last night, according to the information reaching here, while asleep in a rooming house in Fort Worth. It is stated he confessed being the man wanted, and admitted that he had assaulted Toombs; also he is said to have told the officers where they could find Toombs' car, in which he escaped after slugging Toombs.

Toombs was struck down from behind as he was unsuspectingly driving Florence as a passenger in his car. The only incentive apparent was theft of the car and what money Toombs might have had on his person. At the time Toombs was said to have carried nearly \$100, but the blow failed to knock him unconscious, and he managed to escape from his assailant, who made his get away with the car.

A Hard Customer
PORT WORTH, June 3.—Blaming his predicament on wild women and liquor, Albert Florence admitted slayer of Arthur Toombs, prominent Cisco garage man, stared gloomily at the walls of his bare cell in the county jail here today, at the end of his "path of roses."

The sixteen year old astounded officers here by his apparent "hardness and knowledge of the world," and by the nonchalant manner in which he related the Toombs and other misdeeds.

He told how he had twice robbed Fort Worth filling stations after the Cisco killing, the second time slugging the attendant. Each time he spent the money for whiskey and women on wild parties at Dallas.

On his last trip to Dallas he wrecked the Toombs car while drunk, sold the wreckage for ten dollars and returned to Fort Worth where he was captured.

"It was just too much of a craving for liquor and wild women that got me into this," Florence told the police here today during the questioning regarding his fatal injuring of Toombs. Florence admitted he had served a term in a California reformatory. He denied he knew he had killed Toombs until told so by officers.

MAN ARRESTED BELIEVED ROBBED CISCO STORES
"We believe we have the right man in jail who is responsible for recent burglaries," said Constable Looney, who, in company with L. A. White, returned from Graham last night, having under arrest George Gillespie, who was arrested in Young county on a charge of chicken theft committed at Olney recently. Looney stated that Gillespie denied ever being in Cisco, but that he had witnesses who saw him here, and says he can prove that he offered for sale cigarettes to parties known to him. Looney also stated that Gillespie mailed a parcel containing cigarettes to Jimmie Hurst, who is serving a term in the state penitentiary from Breckenridge. In the recent burglaries committed in Cisco when the stores of George Wilson, O. W. Shepherd and the Piggy Wigly were entered, cigarettes were the principal loot taken. Gillespie is now in the city jail.

AUSTIN, July 3.—Exchange market were steady to unchanged but Texas markets firm to slightly higher for eggs this morning. Poultry continued about steady with an uneasy undertone, and butter, particularly packing stock country, was fully steady.

Poultry: Hens at 16c, Springs 20 at 27c, mostly 22 at 26c; old roosters 9c, turkeys 13 at 17c pound live weight; geese 75c, ducks 50 at 60c, guineas 25c each. Eggs: No. 1 candeled, per case of 30 dozen, cases included, \$8.40 at \$8.50; infertiles mostly \$9. Butter: Packing stock country mostly 25 at 25c pound; creamery A 43c, creamery B 41c.

Thousands Will Witness Dedication of Great Dam, Spectacular Aquatic Events And Unsurpassed Display of Fireworks

No date in the history of the United States means as much to Americans as July Four, and henceforth to Cisco our national anniversary will have an added significance aside from commemorating the date of our country's birth as a nation, for hereafter all can point back to July 4, 1925, as the day Cisco people formally dedicated the one and one-quarter million dollar dam that impounds the waters of Lake Cisco. Prominent Texans will deliver addresses at the dedication ceremonies and a most interesting program has been arranged to amuse the thousands who will be here for this epochal celebration.

Closing the day of festivities a most spectacular display of fireworks has been arranged, which will be in charge of A. A. Weldon of Houston, an experienced pyrotechnician, surpassing anything of the kind ever staged in West Texas. This feature of the program will open with a three-gun salute that can be heard for a distance of fifteen miles, and will present a vivid display of colored lights at a height of 700 feet. Following the opening salute the complete display will be touched off in rapid succession. Rockets of every hue of the rainbow will flare in the sky and have their colors reflected in the waters of Lake Cisco. One part of this display will be the beautiful weeping willow, a mechanical fire device, that will spread its sparkling branches over the lake at a height of 800 feet, suspended by parachutes in the sky, allowing the silver fire to stream down to the water's surface.

The "golden necklace," is a new creation in pyrotechnic art, and will prove a beautiful sight as it releases its golden fire over the water. A series of bursting shells will release parachutes at varied elevations ranging from 1,000 feet down, and the colored fire will be released in the form of a chain, producing a startling effect. Magnesium lights, green and red fire and star shells will illuminate the entire lake and grounds producing a most thrilling sensation, especially to those who have never seen fireworks displayed over water, according to Mr. Weldon.

But this will be but a fitting climax to one of the greatest events in Cisco's history, another feature of which will be the pageant of bathing beauties, representing Cisco and towns of West Texas at 8:30 p. m., when beautiful young ladies will be seen in gorgeous bathing costumes on an iceberg on the surface of the lake. In this bouquet of beautiful girls, other than those representing their respective communities, will be a number of water nymphs representing various Cisco business houses. Other aquatic events, including swimming contests for handsome prizes, will be just as interesting.

The program will open at 10 o'clock with the swimming contests, which will be continued in the afternoon. At 5:30 the dedicatory ceremony will begin, with Hon. Walter Morris, of Fort Worth, delivering the principal address, which will formally dedicate the largest hollow concrete type dam in the world. Other speakers of the evening will be Hon. M. H. Hagaman of Ranger, legislative representative from this county, who will talk on "industrial development of the southwest." Senator Jesse R. Smith of Breckenridge, will speak on "individual irrigation plants." A. B. Spencer, secretary of the Fort Worth chamber of Commerce, will talk on "Fort Worth and her relation to West Texas." Fred Morris, deputy fish, oyster and game warden, will take for his theme "state and federal fish hatcheries, and what they can mean to West Texas." Hon. Ben L. Russell of Baird, will speak on "Cisco as a future resort and playground for the state of Texas." Hon. Amos G. Carter, president of the Fort Worth Star-Telegram, will talk on "conservation of the flood waters and what it means to Texas."

Miss Ester Hale is chairman of the committee on entertainment of the bathing beauties, with Misses Ruth and Helen Williamson, Mary and Addie Fee composing the other members of the committee. This committee will entertain the bathing beauties and their escorts with a dinner at 6:30 at Laciaco Inn.

The following towns will be represented by beautiful young ladies in the bathing pageant: "Miss Cisco," Miss Lydia Prescott; "Miss Moran," Miss Leota Pettus; "Miss Colorado," Miss Eleanor Thomas; "Miss Rising Star," Miss Lucy Mae Alford; "Miss De-demonia," Miss Betty Barry; "Miss Fort Worth," Miss Libbie Mae Ewing; "Miss Eastland," Miss Willie Belle Williamson; "Miss Thurber," Miss Gussie Oyer.

In addition to these representatives there will be individual firms represented by the following young ladies: Hogan & Patton, Miss Billie Lang; Jno. H. Garner's, Miss Caddie Mayberry; J. C. Penny Co., Miss Pauline Flaherty; West Dry Goods store, Miss Gwendolyn Clements; Gray Hardware Co., Miss Louise Camden; Kleiman's Department store, Miss Nell Parker.

SANTA BARBARA HAD ANOTHER SHOCK TODAY

SANTA BARBARA, June 3.—Harassed Santa Barbara was aroused by a continuation of earthquake shocks today. Extremely mild tremors, punctuated by a few heavy rollers, sent sleepless thousands rushing madly into the street at 3:30 a. m., who were drenched by the heavy downpour of rain that followed the shock.

RIFF TRIBESMEN FIERCELY FIGHT FRENCH IN LEBAN

LONDON, June 3.—The French position in the upper Lebanon in Morocco was shaken by a fierce bayonet drive of Riffian tribesmen. Hand-to-hand fighting resulted and many are killed on each side. Abdel Krim is expected to strike his hardest, blow against the French near Malla.

MORAN SHIPPED ITS FIRST CAR OF WHEAT OUT

MORAN, July 3.—The first car of this year's wheat was shipped from Moran this week. This is not only the first to be shipped out, from here, but is the first to be shipped from any point between here and the cap rock, and as far south as Waco. The wheat graded as No. 3 wheat, and brought \$1.40 per bushel. The car was bought by Gene Oyer, grain dealer of this city.

Wheat is very short over the state, but Moran is far above the average in wheat production this year.

POULTRY AND EGGS

AUSTIN, July 3.—Exchange markets steady to unchanged, but Texas markets firm to slightly higher for eggs this morning. Poultry continued about steady with an uneasy undertone and butter particularly packing stock country, was fully steady. Poultry: Hens 14c to 16c, springs 20c to 27c, mostly 22c to 26c, old roosters 9c, turkeys 16c to 17c pound live stock weight, geese 75c, ducks 50c to 60c, guineas 25c each. Eggs: No. 1 candeled per case of 30 dozen, cases included, \$8.40 to \$8.50, infertiles, mostly \$9. Butter—Packing stock country mostly 24c to 25c pound, creamery A 43c, B 41c.

POSTOFFICE EMPLOYEES WILL CELEBRATE FOURTH

The delivery window at the Cisco postoffice will open tomorrow at 9 o'clock a. m. and close at 10 a. m. Those desiring to receive their mail will call at delivery window during that hour. The city carriers will make one delivery during the day. Other than these two exceptions no business will be transacted at the Cisco postoffice tomorrow, as all the employees will celebrate the glorious Fourth. Rural carriers will not go out on their routes at all.

In addition to these representatives there will be individual firms represented by the following young ladies: Hogan & Patton, Miss Billie Lang; Jno. H. Garner's, Miss Caddie Mayberry; J. C. Penny Co., Miss Pauline Flaherty; West Dry Goods store, Miss Gwendolyn Clements; Gray Hardware Co., Miss Louise Camden; Kleiman's Department store, Miss Nell Parker.

JUSTICE IN CHINA

The American public isn't much inclined to question Senator Borah's size-up of the Chinese situation. The evidence obtainable seems to show that the real trouble is the merciless exploitation of the Chinese by foreigners. It is primarily an economic revolt. The chief exploiters, according to the Chinese themselves, have been the Japanese and English, but unfortunately Americans have had their hands in it, too.

There is always a strong sentiment in favor of protecting national interests at all hazards when they are threatened in foreign lands. It is recognized that American property should be protected, and still more so American life.

If there are any unprovoked offenses committed by the Chinese against either, the government at Washington will doubtless take action according to the usual diplomatic procedure, and be ready to back its demands with a show of force.

But there is no disposition in this country to use either the moral or military force of the nation to pull out of the Asiatic fire the chestnuts of other powers, or those of any American interests that can be shown to have provoked Chinese retaliation for arrogance and injustice. America is not only the traditional friend and defender of China, but its whole foreign policy is built on principles of even-handed justice. Moreover, it has never found ancient and honorable China less sinned against than sinning.

PSYCHIC ANGLE IN MEDICINE

Dr. Charles Hunter, associate professor of clinical medicine at the University of Manitoba, in a recent public address, stated his opinion that the medical profession was becoming too materialistic. The rapid advance of science and the vast increase of medical knowledge were causing doctors to overlook the psychic angle of healing.

In his seventeen years of experience he has reached the conclusion that a study of the patient's state of mind and his domestic or business background is just as important as a study of his physical symptoms. He has found that developing some hobby or diverting the mind from immediate troubles has often helped greatly in relieving the patient's physical ailment.

The combination of practical psychology with practical medicine may seem to add a good deal to the requirements of the medical course. But they are not such separate fields as specialists in each one may think. The successful practitioner of general medicine, though lacking special training in "psycho-therapy," usually has or seeks to acquire a sympathetic understanding of his patient's whole condition and environment and he makes use of this knowledge even while he applies physical treatment for specific bodily ills.

If modern medical study has been crowding out this phase of a doctor's work, it is well that men within the profession are demanding its restoration.

AERATED CONCRETE

Something quite new in building material, and possibly very important, has been developed in Sweden and is attracting attention at the British Empire exhibition in London. It is "aerated concrete."

In making this concrete, the cement and water are mixed with fine coal and certain other substances that produce hydrogen gas and swell up the compound just as yeast swells bread. The bubbles expand until the concrete becomes as light as wood, floating on water and weighing only 20 pounds to the cubic foot, as compared with 130 pounds for the ordinary cement block. Yet it is said to be hard and strong.

It is fireproof, it resists noise, and the air spaces make it more resistant to heat and cold than an ordinary concrete wall. It is said to make house-building much cheaper, too, than wood or brick, and is looked to in England to help solve the housing shortage. We shall probably hear more of it in this country.

COLLEGE COURSES FOR TAILORS

A Buffalo clothing manufacturer wants the International Association of Clothing Designers to establish a college course somewhere to teach the designing of men's clothing. There are special college courses for architects, painters and sculptors, he says; then why not also for clothes designing, "which is just as much of an art and profession."

The creation of sartorial styles may be, indeed, a great art, as any self-made art critic realizes when he contemplates feminine costume, particularly of the present day. If we may judge by results, the world's dressmakers are doing better at present than representatives of the more honored arts. Gowns and hats are prettier than pictures, and deservedly attract more attention. The side-walks have become our finest art galleries.

But men's costume has not kept pace with the development. It is almost hopelessly dull and sad. If colleges can do something about the matter, let them go to it, by all means. Only let them beware of teaching "college styles" as art.

ELIXIR OF LIFE

Judge Gary, head of the steel trust, believes he has found the elixir of youth. He gave the formula for it on his seventy-eighth birthday.

It is not a simple thing. But neither is it mysterious. There are no occult rules for compounding it, no mystic rites to go through, no secrets borrowed from ancient magicians. The seeker doesn't have to go to any far country, or even to the nearest health resort. Here is the whole formula, as the hale old judge gave it to the press:

Moderate exercise, plenty of good air and pure water, plenty of sleep, calm temper, hard but not prolonged work, mental and physical, and a simple diet, consisting mainly of green vegetables, with some whole wheat bread,

fresh fruits, little meat, little starch or fat or sugar, and no alcoholic stimulants.

And just because it is so simple, sensible and easy, most people will pay no attention to it.

WRONG PUBLICITY

Publicity sometimes overshoots the mark. The moving picture representatives who arranged to land an American film in England with military honors, rendered by a company of British soldiers, thought he was "pulling off a great stunt." He certainly did attract attention. He attracted altogether more than was good for him or his company or his industry or his country.

The British people, to whom their army is a sacred institution, rose en masse to condemn what they regarded as a petty trick played upon the military authorities. It doesn't do American movies any good anywhere in the British Empire. Neither does it do American business in general any good.

Publicity has become a sort of religion with a certain class of American business men. Some of them fail to appreciate what a very delicate and sensitive thing it is. Nothing else calls for more intelligence, taste and judgment.

WHY REFORM THE ALPHABET?

A perfectly serious dictionary editor says that we need an alphabet of "at least 48 letters or symbols" in order to render correctly the various sounds in the English language. He doesn't want to be piggy about his alphabet, but he admits that we could use 100 symbols if we desired to be extremely exact in our renderings.

It seems obvious that many of the letters in our alphabet have to work overtime. The Oxford English dictionary uses about 50 characters to indicate the varying sounds of the five vowels. It devotes another 27 to the consonants.

Most of us are content to have those symbols confined to the dictionary. If they are printed in intelligible tables so that any ordinary mortal, looking up a word, can figure out its correct pronunciation, that's enough for us. Why need school children learn a 48 or 100-word alphabet just to take care of all these extra sounds?

DON'T SPOIL THE BIRDS

It is a commonplace of professional charity work that indiscriminate charity pauperizes the recipients. The organized charity ideal is to give, only the help actually needed and stimulate the spirit of self-help.

Now a naturalist applies this philosophy to wild life. Good people, he says, have been pauperizing the birds. Not content with throwing out crumbs and hanging suet in the trees during the winter, they keep right on feeding the birds all summer. When the ground is covered with snow and no natural bird food is obtainable, this charity keeps them alive. But in seasons when Nature herself has provided food for them, it weakens the birds' moral stamina, makes them less hardy and resourceful and ends by diminishing their numbers.

They live and thrive not only by eating food, but by hustling for their food. "Without the summer feeding stations," he says, "the birds would flourish as they did before feeding stations were ever heard of."

DINNER STORIES

On the station platform of a little Georgia village a visitor ran into an old darkey standing zealous guard over a dilapidated crate housing an ancient billy goat. The goat was methodically chewing upon what seemed to be a piece of rather stiff paper. The gentleman spoke to the darkey:

"Hello, Sam."
"Yass suh, maw'nin', suh."
"Where are you sending the goat, Sam?"
"I doan know boss; he done eat up de place what he was goin' at."

The town council of a small Ontario city had decided upon some extensive improvements in one of the local parks, the chief feature of which was to be the installation of an artificial lake. The majority of the councillors, not without the deepest misgivings on the part of Mayor Sandy MacPherson, who hailed originally from Aberdeen were planning that it should be stocked in a really sumptuous manner. Swans were to be purchased, and ducks and drakes and geese and goslings and all sorts of strange birds. The mayor listened with growing apprehension to the rash proposals of his over enthusiastic subordinates. At last when it was moved that they should purchase eight gondolas, it was more than

MacPherson could stand; "Aw weel, gentlemen," he said, "I hae no doubt but that maun hae gondolas, but we'll be no gettin' but a pair o' them—a male and a female—and leave the rest tae the Lord."

Nobody seemed to take much notice of Green. He tried to get in a word now and then, but somebody with a stronger voice always took command of the conversation. At last the talk turned on the subject of dogs, and Green felt sure

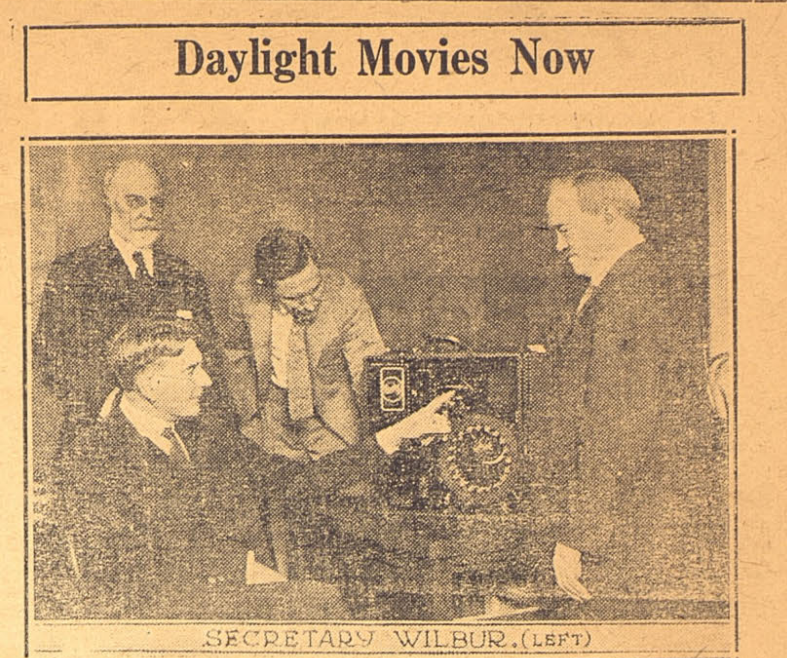

that his chance would come, for he owned a dog of which he was proud. "There are some dogs," remarked Robinson, "that have more intelligence than their masters."
"That's quite right," said Green. "I've got one like that."

MISSISSIPPI SOCIETY

I read the general call issued by Mr. Brummell, of Carbon, asking all former Mississippians living in Eastland county and adjacent communities to meet in Cisco, July 11, at 2 o'clock, for the purpose of forming a county-wide organization of Mississippians. I live in Cisco, but that grand old commonwealth is my native state. I am anxious to help in any way I can to make the called meeting and the permanent organization a success. It is claimed that Eastland county probably has more native Mississippians living within its confines than any other county in Texas, according to population. Here's hoping the proposed meeting and the big basket picnic to be held later at Lake Cisco, will be a howling success. I believe several thousand visitors will attend this picnic.
FORMER MISSISSIPPIAN.

TRIALS MADE ON NEW HEALIGHT LAW AT AUSTIN

AUSTIN, July 3. — For the past two weeks the photometric laboratory of the University of Texas has been carrying on extensive experiments and trials concerning the new motor vehicle law. The purpose of this work is to perfect and test the various proposed methods for prevention of glaring and blinding headlights. The law requires a sufficient intensity of light on the road, and limits the intensity above the road to the level of the eyes of a driver 100 feet away. It has been found that at this distance light of over 800

Secretary of the Navy Wilbur examined the moving picture machine invented by C. Francis Jenkins and his associates, which makes daylight showing of movies possible.

candlepower blinds the approaching motorist.

This station which has been officially designated by the state is one of the three stations in the United States which are carrying on work of this nature, the others being the electrical testing laboratory of New York, and the bureau of standards at Washington.

The anti-glare law becomes effective September 1, and by this time 3,500 testing stations will be established throughout the state. In Travis county alone 31 garages have been designated as testing stations, and all car owners of the state of Texas are required to have their car lights tested on or before September 1 and all defects adjusted.

It is estimated that 75 per cent of the present automobiles have lights that are capable of being adjusted, with normal expense, to meet the requirements of the new law, accord-

ing to officials of the photometric laboratory. At each state station there will be a fee for examination of 25 cents, plus any charge for adjustment, and all car owners will be required to show a certificate of such examination.

CONCRETE EXPLODES AS ROADS GET HOT

OKLAHOMA CITY, July 3. — In several sections of Oklahoma, during the recent hot wave which swept the country, concrete pavement whose laying was comparatively recent, exploded under the sun's rays, in some cases causing considerable damage. A chunk of concrete weighing nearly 300 pounds was blown 20 feet into the air at Britton, a suburb of Oklahoma City. The concussion was such that window glass was shattered in the vicinity and houses shaken throughout Britton.

With Eggs Now at \$10.50 Per Case Highest Ever Paid at This Season Petaluma Has Its First Competitor

DEE JOHNSON GIVEN CLEAN BILL BY JURY

Dee Johnson, indicted at the present term of the grand jury for burglary of the John H. Garner store in Cisco, a few months ago, was placed on trial at Eastland Wednesday and acquitted by the jury. It is said failure of the witnesses who purchased some of the loot from Johnson to positively identify him, was the reason of the verdict for acquittal. Constable C. S. Looney, who went to Henryetta, Okla., and brought Johnson back to Eastland county, was not placed on the stand. Looney stated that while in Oklahoma Johnson told him where some of the loot was located, which he recovered, and during the return trip that Johnson said he would plead guilty if he knew he would get only two years. Some of the loot taken was disposed of around Olney, and it was these witnesses who failed to identify Johnson in the trial Wednesday.

PARKS PUBLIC RIFLE-PISTOL SHOOT JULY 4

"The president of the United States has designated our national holiday for holding the national defense test, and Parks Rifle club will celebrate the occasion with a public rifle and pistol shoot at the club gallery," said J. P. Mason this morning. "The Parks Rifle club invites the public to make free use of their 22 target and pistol gallery, furnishing targets free to any who wish to shoot. The club's rifles will be loaned to all who use the gallery. The club has light rifles for the ladies and heavier ones for the men. The gallery has electric lights and is equipped with a 75-foot range, and will be operated from 8 a. m. till 12 m. by club members, being closed in the afternoon so the members can attend the celebrations in the neighboring towns. The public is invited to take advantage of this opportunity to get some practice and to try their skill with the rifle and pistol," said Mr. Mason.

BROWNWOOD, July 3.—Plans are now well under way for holding a great poultry show in Brownwood Dec. 16, 17, 18 and 19. The Brown County Poultry Show will be held in connection with the International Cornish Exhibit, which is to be here at the same time the local show is being held.

"With eggs selling wholesale at \$10.50 per case, and the local demand greater than the supply, Petaluma, the great egg center, for the first time has a competitor," said W. S. Jarrett, sales manager for the Bankhead Marketing association, "as eggs are higher in this market than was ever known at this season of the year. Eastland eggs are bringing more on the local market now than Petaluma whites.

"The poultry people are paid weekly through the Bankhead Marketing association \$961 for eggs, and around \$400 for chickens handled by the association. Eggs are scarce, and the demand continues to climb. We are only selling eggs to Eastland county towns, and cannot supply our regular customers who are clamoring for association infertile eggs. Breckenridge dealers, who have been good customers for association infertile eggs, have been dropped for the reason that we could not supply them. I look for the prices to go still higher before the fall laying begins. At present we are handling around 90 cases of eggs every week, and we are paying the producers 33 1/2 c per dozen, which distributes among the poultry raisers of Eastland county about \$961 per week for eggs, and added to this the association is handling about \$400 worth of chickens, making a total of \$1,361 distributed among the poultry raisers of Eastland county every week.

"New members are being added to the association every day. One of the latest to come in with us is Louis J. Thomas of Staff, who has around 3,000 chickens, but others are coming in, and the association is rapidly gaining popularity among poultry people all over the county. Many of the older members are talking of doubling their flocks, and it is likely that every one will increase the number of chickens this fall and next spring. At the present prices, and the production of infertile eggs, the poultry business is a paying institution, and the association is functioning on a safe, sane and sound basis.

"But the increase is not confined to Eastland county poultry folk. Inquiries are received every week from outside people wanting to come here and establish poultry ranches. I have an inquiry now from a Mr. Cooper at Tonkawa, Okla., who wants to buy land for a chicken ranch somewhere near Cisco. I am looking for him here any day now to look over the situation, and am sure he will locate when he sees and understands conditions here. He was attracted here by the solution of the marketing problem through the Bankhead Marketing association.

"This will be one summer that there will be no eggs to go into storage," said Mr. Jarrett, "as the demand consumes more than we can supply. My observation is that there will be few eggs placed in storage anywhere in this part of the state, and I predict that the stock now in storage will be depleted before the laying season begins, as storage eggs are now being withdrawn, and storage eggs are being sold on the local

Three New Chicken Ranches Being Built Near Cisco; Finnigan Ranch Lake Road, Has 9 Houses Finished

Since the functioning of the Bankhead Marketing association, which is a solution of the poultry problem, many are seeking land on which to establish chicken ranches, and others have already bought land and improving the property to raise chickens according to the most approved style. As poultry business is being demonstrated as a profitable occupation others will be coming in, and soon Petaluma will have a real rival in Eastland county as a chicken country.

Among those who are building new chicken ranches are Louis Finnigan, Shelton Caton and R. C. Greer. Mr. Finnigan recently purchased a tract of land out on the Lake road, and has nine chicken houses already built, and a flock of five hundred pullets on the ground. All of these pullets are white leghorns, purchased of the Frazar White Leghorn farm, and are high bred stuff. The entire tract of his land is fenced with chicken wire six feet high, and he is having water pipes laid to his poultry houses. Mr. Finnigan will add at least one hundred more pullets to his flock, which he expects to increase to 2000 later. He is getting everything ready for the fall laying, and his pullets are thriving. Mr. Finnigan stated that there are lots of grasshoppers out at his ranch which materially reduces his feed bill, as the pullets feed on the hoppers and very little other feed is necessary.

In speaking of Cisco as a chicken country, Mr. Finnigan stated that this section had Petaluma bested in more ways than one. "I have lived in Petaluma, and raised chickens there, and know the chicken business both in Petaluma and Cisco. California has no better climate, we are nearer to market, should we have to ship, and feed is cheaper here than in that state. I am well pleased with conditions as I have found them in Cisco. One of the best indications of the success of the poultry business here is the enormous local demand for eggs and chickens. When poultry people can sell their produce at home you know exactly what to expect," said Mr. Finnigan.

Shelton Caton of Eastland has bought a tract of land of five acres five miles east of Cisco on the Bankhead highway, an dis built a ranch, and has already joined the Bankhead Marketing association. He has one chicken house finished and has 300 pullets on his ranch. He will add 300 more right away. Pullets for the new ranchers are selling \$1 each now.

R. C. Greer's ranch is located east of that of Shelton Caton, on the Bankhead highway. He has not yet stocked his ranch with pullets, but is fencing the land, clearing off to build chicken houses and getting all things shaped to into the business in earnest.

market at the present time. With this prospect the chances are that the present prices of eggs will hold good all the fall and winter."

SANTA BARBARA VICTIM NEPHEW OF KUYKENDALL

Oscar Barnett of Burnett, Texas, one of the victims of the Santa Barbara earthquake, who was killed in that disaster, was a nephew of L. P. Kuykendall of Cisco. News of his death has just been received here. The body is being shipped from California to Burnett, where the funeral will be held. Mrs. Kuykendall will leave here Saturday to attend the funeral, which will likely be held Sunday.

TENANT LOSES ALL IN FIRE ON PARMER FARM

Warren G. Jessup, tenant of W. L. Parmer, living four miles west of Cisco, had the misfortune to lose all of his household effects, by the burning of his home Tuesday at noon, according to Mr. Parmer.

Special Reduction on Permanent Waving until July 15 CISCO BEAUTY SHOP

mer who was in Cisco this morning soliciting aid for Mr. Jessup and his destitute family, rendered so by this fire. Mr. Parmer stated that the house, a seven room well built structure, was ignited while the noon meal was being prepared from some cause unknown. He stated that he had recently let the insurance policies lapse on his tenant houses, but still carried insurance on his dwelling. The house is a total loss to Mr. Parmer but his loss, while greater in dollars, is insignificant compared to the loss of his tenant, who saved only a small quantity of the bedding. All clothing, furniture, groceries, etc., were a total loss, and the family saved only the clothing they were wearing.

Mr. Parmer said that the family was badly in need of edibles, clothing, or anything that they can use as the fire left them without anything.

HOLDS CITY NOT LIABLE FOR AN INJURY IN PARK HOUSTON, July 3.—A decision of far reaching importance not only to Houston but indirectly affecting all municipalities of the state was handed down by Judge Charles E. Ashe in Eleventh district court here Tuesday, when he ruled that the city of Houston was not liable for injuries received by anyone in the city's parks. The decision was the result of a suit brought by Mr. and Mrs. Ed Vandervort for \$25,000 damages on

account of the accidental drowning of their 2-year-old daughter in the wading pool at Settegate park last August. Judge Ashe sustained the general demurrer of the city on the grounds that the handling of the parks constituted a governmental

function of the municipal government, as distinguished from a proprietary duty in its corporate function, regardless of the acts of negligence on the part of city employes, agents or servants.

Cooler Wives

And cooler kitchens this way QUICK QUAKER cooks in 3 to 5 minutes No hot kitchen, no muss, no bother

FLAVORY and delicious... the summer breakfast your appetite calls for and your health demands, cooked in 3 to 5 minutes! The kitchen stays cool. And so do you. No frying, no stewing, no morning's fuss and trouble.

Just get Quick Quaker at your grocer's. It's a new kind of Quaker Oats that's made to order for women who seek easier ways in housekeeping. All that rare Quaker flavor is there. All the richness that made Quaker Oats famous. Cooks faster, that's the only difference.

What the World Is Doing As Seen by Popular Mechanics Magazine

Ten Million Radios Predicted for U. S. in Five Years

Predicting an expenditure of \$450,000,000 for radio by the "fams" of the nation during 1925, experts have estimated that by 1930 there will be 10,000,000 receiving sets in operation in the country. Five years ago, approximately \$2,000,000 was spent for apparatus, and last year the amount had increased almost 175 times that figure. In 1923, there were 145,350 sets in use on the farms, and one year later the number had more than doubled. At the beginning of the industry, all apparatus were assembled by the owners, but with the steady development of parts and hookups, the volume of ready-built instruments purchased increased until about forty per cent are now sold ready to tune in. To supply the more than 4,000,000 homes now equipped with receiving sets, programs are broadcast from 563 stations.

One-Cylinder Motor Plow Replaces Four Horses

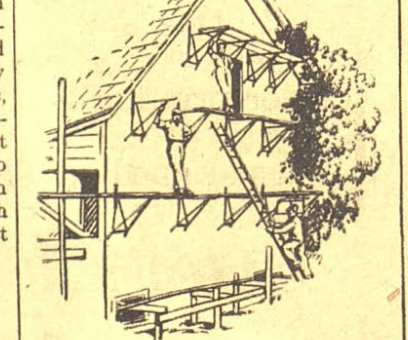

The horse, rapidly being displaced in cities and on farms by automobiles and tractors, has a powerful rival in a one-cylinder motor plow, said to do the work of four of the animal toilers at half the cost. The implement, introduced on an English farm, is readily handled by one man, and owing to its compact construction, can be driven into corners and close to fences generally inaccessible to horse-drawn tools, resulting in increased planting

space and a saving of hand work to turn the soil. It requires little attention for upkeep and consumes a small supply of fuel, besides relieving farm hands of the constant care required by draft animals.

Steel Brackets for Scaffolds

Steel braces that are attached to the wall with four nails and have two legs that rest against it to keep them from shaking, have been found practical for stucco and other construction jobs. They can be set up in much less time than is required for the usual wooden staging, are made of steel that will not bend, and fold up for easy carrying. They are manufactured in two lengths, three and three

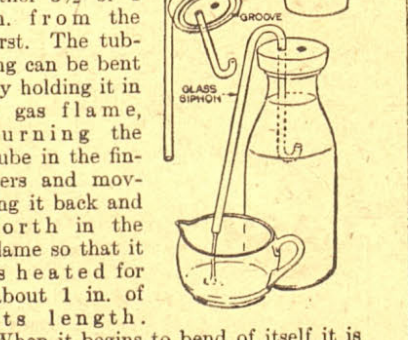

Water Is Sweetened with Air to Prevent Disease

New York City's water supply is carried through pipes for such a great distance that it is necessary to sweeten it with air and sunshine to guard against contamination. This is done in huge aeration plants where the water is ejected through perforated pipes. High, open country amid flowering fields is chosen as the place for the process, and the area is fenced in to prevent foreign matter falling into the water. A mist hangs over the falling jets usually, and on sunny days, rainbows are plainly visible in the spray.

Windows and mirrors can be cleaned effectively with thin, cold starch, which is wiped off with a soft cloth after being allowed to dry thoroughly.

Separating Cream from Milk

A separator that siphons off the cream from a bottle of milk and automatically stops the flow when the cream line is reached, is shown in the illustration, and can be made for about the price of a bottle of milk. All that is necessary is a No. 11 2-hole rubber stopper, and a 15-in. length of 3/16 or 1/8-in. glass tubing. Two bends are made in the tubing, one about 8 in. from the end, and another 3/4 or 4 in. from the first. The tubing can be bent by holding it in a gas flame, turning the tube in the fingers and moving it back and forth in the flame so that it is heated for about 1 in. of its length.

When it begins to bend of itself it is taken by the ends and bent gently, at the same time moving the point where it is bending most to the edge of the flame. By bending slowly and spreading the bend over 1 1/2 in. of the tube a smooth even bend will result. The tubing is broken off just above the second bend by scratching it on one side with a three-cornered file, grasping it on either side of the scratch with the fingers and giving it a quick snap. The rubber stopper is cut with a very sharp knife to leave a section 3/16 in. thick, this is laid over the mouth of the bottle and the outline of the mouth traced on the rubber. Concentric with this another circle is drawn, 3/16 in. smaller in radius; now, with a sharp knife a circular groove is cut around the stopper, about 3/16 in. deep, between the circles. The stopper and tube are then assembled as shown, and put in place so that the short arm comes to the cream line. Close the open hole in the stopper with the thumb and thrust sharply downward, then withdraw the thumb. The sudden pressure starts the flow of the siphon and it keeps on running until the cream line is reached.

Watson-Ridgeway

The wedding of Sherman Watson and Miss Jewel Ridgeway took place at the Methodist parsonage, Thursday afternoon at 3:30 o'clock. Rev. T. E. Bowman performed the impressive ring ceremony in the presence of a few friends and relatives. Mr. Watson is a graduate of Cisco high school and is employed at the T. L. Shepard Drug company. Mrs. Watson is the attractive and accomplished daughter of Mr. and Mrs. T. N. Ridgeway of West Tenth street. The young couple left yesterday for a short visit with Mr. Watson's parents, who reside about fifteen miles west of Cisco. On their return they will make their home in the Neal Turner home, where they have secured an apartment.

Actress Gets Long Time Run In New Role Of Underwriter

FOR five years Frances Wright, formerly a successful actress, has been making good in a new and difficult role, and thus enjoyed a longer continuous "run" than any one now on the Broadway stage.

Miss Wright left the stage to take up insurance, and to-day she is one of the foremost women underwriters in the country. There is an unbelievable drama in insurance, says Miss Wright, who does not in the least regret relinquishing the glamour of the make-believe for the drama of the real. Nevertheless, she still counts the theatre as among her major interests. Another is her home. She loves to make unusual dishes. Very unusual, indeed, is the Apple Skillet Cake she so often makes. This is her recipe:

Apple Skillet Cake
Batter
1/2 cup Sugar
1 Egg

1/2 cup hot Milk
1 cup Flour
1/2 tsp. Salt
1 1/2 tsp. Baking Powder
Skillet Mixture
4 tbsps. Crisco
1 cup Brown Sugar
6 small cooking Apples

Beat the egg and sugar together until light. Stir in hot milk, then flour sifted with salt and baking powder. Put Crisco and brown sugar in a frying pan over a slow fire and stir until melted. On top of this caramel mixture, place the apples pared and sliced. Pour the batter over the apples. Bake in a skillet in a moderate oven 350° F. until the cake is done. While still hot remove from the pan to a serving dish with the apple side up. Cover with whipped cream and dust with cinnamon.

Note—Our readers may obtain free a new 80 page cook book by addressing the National Household Service, 565 Fifth Avenue, New York City.

Thursday evening with Dr. and Mrs. W. Griswold.

Friends will regret to hear that Mrs. C. O. Weiser is confined to her home on account of illness.

Rev. and Mrs. Frank H. Stedman, rector of the Church of Our Savior, Episcopal, left today for Dallas, where he will confer with the bishop, and will go to El Reno, Okla., where he will preach Sunday. Owing to his absence Mr. Alex Angus will conduct lay services at the church Sunday morning.

FAMED TURKEY TROT AT CUERO CALLED OFF

CUERO, July 3.—Cuero's famous "Turkey Trot" is off. The reason given by speakers at a chamber of commerce meeting were that crop conditions in this neighborhood are unfavorable and some of them said, the turkey crop this year will be short. Cuero's turkey trot was famed throughout the land. In former years turkeys were driven like sheep, in great flocks over country roads to this market, which was one of the major turkey markets of the country.

RANGER WILL SEEK FIELD DEMONSTRATION

RANGER, July 3.—Designation as an official landing field will be sought for Ranger's newly completed flying field, it was stated today by C. C. Patterson, secretary of the chamber of commerce. The field has been cleared of all growth and obstructions and is situated in the edge of the city. The field is marked with flags and a white circle and is 175 feet in width and approximately 2,000 feet in length.

Forgotten Fashions of Yesteryear Inspire The Sweater of Today

LO, the poor Indian, with his picturesque colorful blanket, is no longer a common figure on the plains of America—those vast broad lands that were his ancient heritage. But, all the beauty—the primitive glory of the color and symbolism of his day still flame in bright silhouette against the time-old trees that have watched the red man give way to the swelling tides of white civilization. The old reds, the hard, bright yellows, the wood browns, even the patterns that were his, go down to the links every morning on the new sweater and hose that the smartest sets are wearing. Sometimes the sweater turns turtle at the neck—and just as often it does not. At Newport the crew neck nava-jo slipover and hose is most popular—especially when complemented by a jersey skirt in white or tan, with smart "kick" pleat. They're really quite chic! Harry Hope Kane. Copyright by Fifth Avenue Fashions Service.

AMUSEMENTS

Broadway Last Time Today
Monty Banks wrecks a large portion of perfectly good scenery in "Racing Luck" and entirely wrecks the dignity of everyone at the Broadway Theatre yesterday, where his first feature length comedy, an Encore Picture, was shown for the first time.

Brimful of laughs and thrills is this story of a young man whose troubles start when he falls in love with pretty Rosina, who is desired by a ward boss and gang leader. Monty has to fight his way out of the most ludicrous situations imaginable.

Then there is a big auto race, with Monty who is not on familiar terms with any part of a car, as the main participant. Monty drives off the course, wrecks everything he comes in contact with, and winds up in an explosion that almost wrecks Monty, but as it lands him into the arms of his sweetheart and out of the grasp of the villain, he's perfectly happy—and so are you!

WIFE BEQUEATHED GRAIN MAN'S MONEY

ST. LOUIS, July 3.—Mrs. Inez B. Hall, of St. Louis, is bequeathed \$125,000, the bulk of the estate of her husband, the late Marshall Hall founder of the company bearing his name and one of the best known grain men in this section of the country. In addition in his will filed yesterday, two sisters will receive \$10,000 each; his four children \$1,000 each, and two brothers will get \$500 each.

Syndor Hall is expected here from New York to take up his father's grain interests.

Dallas — The Dallas Vocational Training school purchased 15 acres

Over 17 Million Jars Used Yearly

of land on Cedar Springs road adjoining Perry Heights for construction of one of the largest schools of its kind in the United States.

PIMPLES QUICKLY CLEARED UP

So-called skin diseases are caused by poisons from the perspiration becoming congested in the tiny pores and the glands of the skin because they can't get out. Unhealthy skin holds them back and you know what must happen when you continue to let this condition exist. For this reason "skin lotions," etc., can't possibly help you any. You need what is known as Black and White Ointment, which heals the sores, builds up the tissue of the skin and makes it active, so it naturally expels all the acid poisons which the system must throw off through the pores. Then, pimples, blotches, "breaking out," etc., quickly disappear.

Black and White Ointment is economically priced in generous packages. The 50c size contains three times as much as the 25c size. All dealers have Black and White Soap, too, so you can keep your face, neck, hands and arms lovely and clear.

Have a Flyless Home in few minutes

Insects breathe their last when you spray Ni-Late in a room. Just a whiff and flies die in their tracks; there is no escape for insects of any kind.

Yet, Ni-Late is harmless to humans and animals. It cannot injure anything in the home. It is quick, safe, convenient and costs only 50c for large bottle with sprayer free.

Use Ni-Late today. Rid your home of every filthy germ-laden insect pest.

Announcement!

Dr. Scott wishes to announce to his patrons that he has returned from a post graduate course at Chicago, and has resumed his regular practice.

CLOSED

Our shop will be closed all day tomorrow, the 4th. Just hold your order for printing until Monday, and we'll be glad to call for it, and give you our usual good service—Thanks.
