ARMY PLANES CRASH IN AIR; 4 DIE

Allred Ordered to Investigate Oil Industry in Texas

HOUSE VOTES 76 TO 43 FOR PROBE TODAY

AUSTIN, July 16. — Attorney-General James V. Allred was ordered today by the Texas house of representatives to begin an investigation of the oil industry, seeking evidence of monopoly, conspiracy to restrain trade and violation of anti-trust laws.

The vote in the house was 76 to 43. Rep. Lee Satterwhite, of Odessa, whose resolution for a legislative investigation of the oil industry was defeated yesterday by three votes immediately renewed his efforts for that proposal in a modified form.

WRECK VICTIM, MEMORY BACK, UNCONSCIOUS

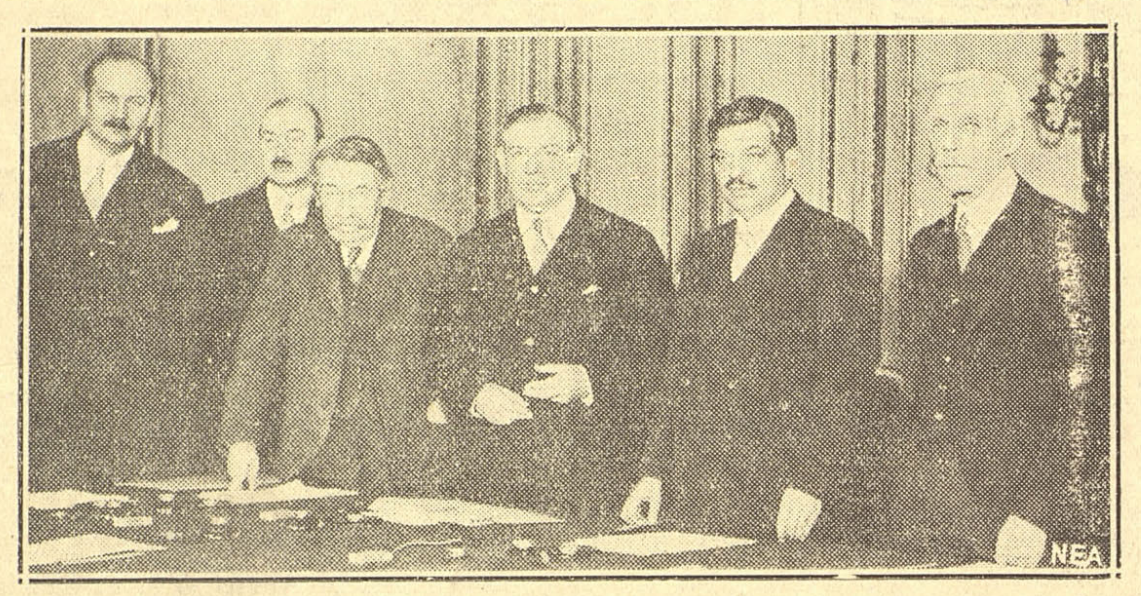

MARSHALL, July 16. — One day of complete memory, which allowed Thomas Scott Goolsby to ponder school days when he starred on the gridiron for Emory college at Atlanta, Ga., ended last night in unconsciousness for the 25-year-old chessman.

Goolsby was injured late Tuesday in a car crash. Either a blow against his skull or the shock of the crash revived a memory that was dimmed into nothingness four years ago, he told hospital attendants here yesterday.

16 BOY SCOUTS LEAVE TODAY ON CAMP TRIP

Sixteen Boy Scouts left this morning on a ten days camping trip at Camp Martin on the Llano river. These belonging to troop 4 who went were: Eugene Lankford, L. B. Campbell, Jr., Livius Lee Lankford, Mark Reed, Gerald Merket, W. C. White, and J. E. Wyatt.

As Debt Accord Was Reached in Paris

GERMAN BANKS FACE CRUCIAL TEST TODAY

BERLIN, July 16. — The country faced another crucial test in the strain on its economic structure today with reopening of banks after a two-day emergency holiday.

MISSSES ELY ENTERTAIN ROTARY CLUB

The Cisco Rotary club was well entertained today when Misses Madeline and Jewel Ely, young Cisco musicians, were presented by Program Chairman E. H. Varnell in a series of vocal, piano and violin numbers.

260 BOY SCOUTS LEAVE TODAY ON CAMP TRIP

Sixteen Boy Scouts left this morning on a ten days camping trip at Camp Martin on the Llano river. These belonging to troop 4 who went were: Eugene Lankford, L. B. Campbell, Jr., Livius Lee Lankford, Mark Reed, Gerald Merket, W. C. White, and J. E. Wyatt.

Here's the "big five" of the maximum conference conducted in Paris between representatives of the United States and France. An agreement regarding President Hoover's proposed one-year debt holiday was virtually assured when this picture was taken at the Ministry of the Interior in Paris.

TWO PICNICS ARE HELD AT LAKE CISCO

The Sunday school of the First Christian church enjoyed a picnic at Lake Cisco last evening with an attendance of between 100 and 150 persons.

NATIONS JOIN IN MOVE TO AID GERMANY

Germany's financial troubles brought the nations together today in an unprecedented effort at international cooperation. Statesmen of the United States, Great Britain and France gathered in Paris and discussed Germany's problems. It was decided to invite the chancellor and foreign minister of Germany to come at once and join in the negotiations.

BAND GOES TO GORMAN TOMORROW

The Cisco Lobo band will make its second goodwill trip of the recently inaugurated summer series when it goes to Gorman tomorrow evening to give a concert.

HALL PLANS TO BACK NEW WORLD FLIGHT

OKLAHOMA CITY, July 16. — F. C. Hall, wealthy Oklahoma oil man who sponsored the world flight of Wiley Post and Harold Gatty, announced today he would back another world flight in an attempt to break the record of the Winnie Mae monoplane.

HUNGARIAN FLIGHT ENDS SUCCESSFULLY

BUDAPEST, July 16. — The first politically inspired flight across the Atlantic ended successfully today when George Endres and Alexander Magyar, Hungarian army reservists, landed their monoplane, the Justice for Hungary, at 12:40 p. m. C. S. T., at Bischof, 15 miles from Budapest.

OVER 200 ARE EXPECTED FOR F. F. T. CAMP

With assurance of attendance continuing to come in from schools, many of them—for example Taylor, Texas—remote from Cisco, the number of boys to attend the Future Farmers encampment here next Monday, Tuesday and Wednesday will probably exceed the 200 expected.

Boy, 15, Faces Trial for Life

Fifteen-year-old Varner Corry, Chicago high school boy, faces trial for murder with the possibility of electrocution as the result of the refusal of Mrs. Helen Smith, widow of a policeman whom he killed, to permit a plea guilty and a lighter sentence.

NEW RULING REDUCES AGE LIMIT FOR FREE TUITION

New regulations governing free public school attendance, recently promulgated by State Supt. S. M. N. Marrs, following a decision of the state supreme court respecting scholastic qualifications, were explained today by Supt. R. N. Cluck of the Cisco public schools.

TRAGEDY IS WITNESSED BY YOUTH, 13

SAN ANTONIO, July 16. —Wings of army training planes, flying in opposite directions, met four miles south of Brooks field to send four army fliers crashing to death today. The dead: Major Charles V. Hart, 54, medical corps officer, with a pilot's license; Captain Charles J. Chamberlain, 37, New York plastic surgeon and national guard officer, Hart's passenger; Lieut. Kenneth Austin Rogers, 24, Columbia, Mo., pilot of the other plane; Flying Cadet Endicott Longacre, 22, Duncan field, San Antonio, pupil of Rogers.

TRAGEDY IS WITNESSED BY YOUTH, 13

Officers believed the ships were flying at a height of 400 feet when they met over the pasture four miles south of Brooks field. Major Hart was from Harrisburg, Pa. He was sent here recently from the Philippine Islands for special training. He was one of the few flying surgeons in the army.

TROT LINES NOT ALLOWED IN BIG LAKE

City Council Elliott today warned fishermen against the use of trot lines in Lake Cisco. At its last meeting the commission passed a resolution giving holders of city fishing permits privilege of using trot lines in Lake Bernie.

BARNUM'S GIFTS PRAISED

BRIDGEPORT, Conn., July 16. —Phineas T. Barnum's activities as a philanthropist and municipal booster were not as well known as his reputation for showmanship, according to the Rev. Charles Kramer, the clergyman devoted a sermon to praise of Barnum's gifts of parks to Bridgeport and his efforts to bring industries here.

STARTED COLLECTION NORWAY

NORWAY, Ia., July 16. —Twenty years ago Jasper Brown found an arrowhead around which he has built a collection which numbers 1,434 flint arrowheads, 1,600 other Indian relics, 300 rare bird eggs, a varied assortment of unusual marine life, and a group of rare dishes and lamps for which he has been offered thousands of dollars.

WEATHER

West Texas — Partly cloudy tonight and Friday, probably showers in extreme west and north portions. East Texas — Unsettled, probably scattered showers tonight and Friday.

DAILY BIBLE THOUGHT

THY KEEPER:—The Lord is thy keeper; the Lord is thy shade upon thy right hand.—Psalm 121: 5.
RESTORE THE ERRING:—Brethren, if a man be overtaken in a fault, ye which are spiritual, restore such a one in the spirit of meekness; considering thyself, lest thou also be tempted.—Galatians 6: 1.

AN OIL CRISIS FACES LAWMAKERS.

Texas lawmakers organized in special session Tuesday. They are face to face with an oil crisis in the economic world and Texas is the leading producing state in the economic world of oil. Seriously speaking it is about the toughest proposal that has faced Texas lawmakers in many decades. There are low price levels which are astounding. Gasoline is selling at a higher figure per gallon than crude oil is selling for a barrel. There is chaos everywhere in the Southwestern producing fields.

There are so many factions and factors that it is a puzzling situation all around. There are major companies who are deeply concerned. There are independent producers who do not know which way to turn. There are lease holders and royalty takers-down who are scrambling for a place in the sun. Regents of the Texas University have asked for a shutdown of their wells in certain fields. Kansas and Oklahoma producers are calling for a shutdown, but all are waiting for the enactment of legislation by the lawmakers of this imperial state.

There are oil producers who are clamoring for drastic laws to control production and pipe lines and all other agencies of marketing but they are said to be opposed to an elective state conservation commission. They prefer that the state railroad commission should be the supreme agency clothed with additional extraordinary power. There are outstanding lawmakers and oil producers who insist that a state conservation commission, appointive, would work out the only salvation in these critical times and that it should be the outstanding conservation state machine or commission to regulate or control the mineral wealth of Texas and conserve the soil wealth which has been damaged to the extent of billions by soil erosion and all the other evils which attend non-scientific farming.

These are times when economic problems and their solution call for the best in legislation by those entrusted with the duties of a lawmaker by the people of Texas. There should be a short session, a constructive session, a harmonious session and the laws which are enacted should be fair to all interests and destructive to none. There are economic crises everywhere the wide world over. Here in the greatest of the empire states in a republic which is setting the pace for the world there should be decisive and intelligent action on the part of public servants who are asked to solve a most intricate problem, stabilize one of the greatest industries and conserve the wealth which the Creator placed under the surface, for the people of this matchless and ever marvelous Southwestern territory.

WORLD AUTO FIGURES.

It is highly significant that there is one automobile for every 4.59 persons in the United States, compared with the next highest rate, Canada's of one to every 8.9 persons, but from a strictly national viewpoint it is more interesting to learn from the latest motor vehicle census that ratio of car to population is higher in the rural sections than in the great centers of population. For example, there is only one car to every nine persons in New York City.

The automobile, once the plaything of the urban rich, has become the necessity of even the rural poor. Out in the great open spaces where distances are greater and isolation more real the motor vehicle is an indispensable part of the transportation system, if not the only means of rapid transit.

These census figures furnish some interesting information as to future automobile markets. Australia has only one car to every 11.4 persons, while the ratio in France, England, Argentina and Brazil ranges from one to 27 to one to 202. And there are areas in Asia where the ratio is one to 50,000.

In the production of motor vehicles the United States is holding its own in spite of foreign embargoes to promote domestic domestic manufacture in countries enforcing them. American manufacturers supplied more than 87 per cent of the cars registered in foreign countries last year.

That the industry was not entirely idle last year is apparent from the 2 per cent increase in world registration in spite of the scrapping of 3,400,000 cars.

Personality is the vague something that enables you to get by in a dress suit without making anybody wonder what restaurant you work in.

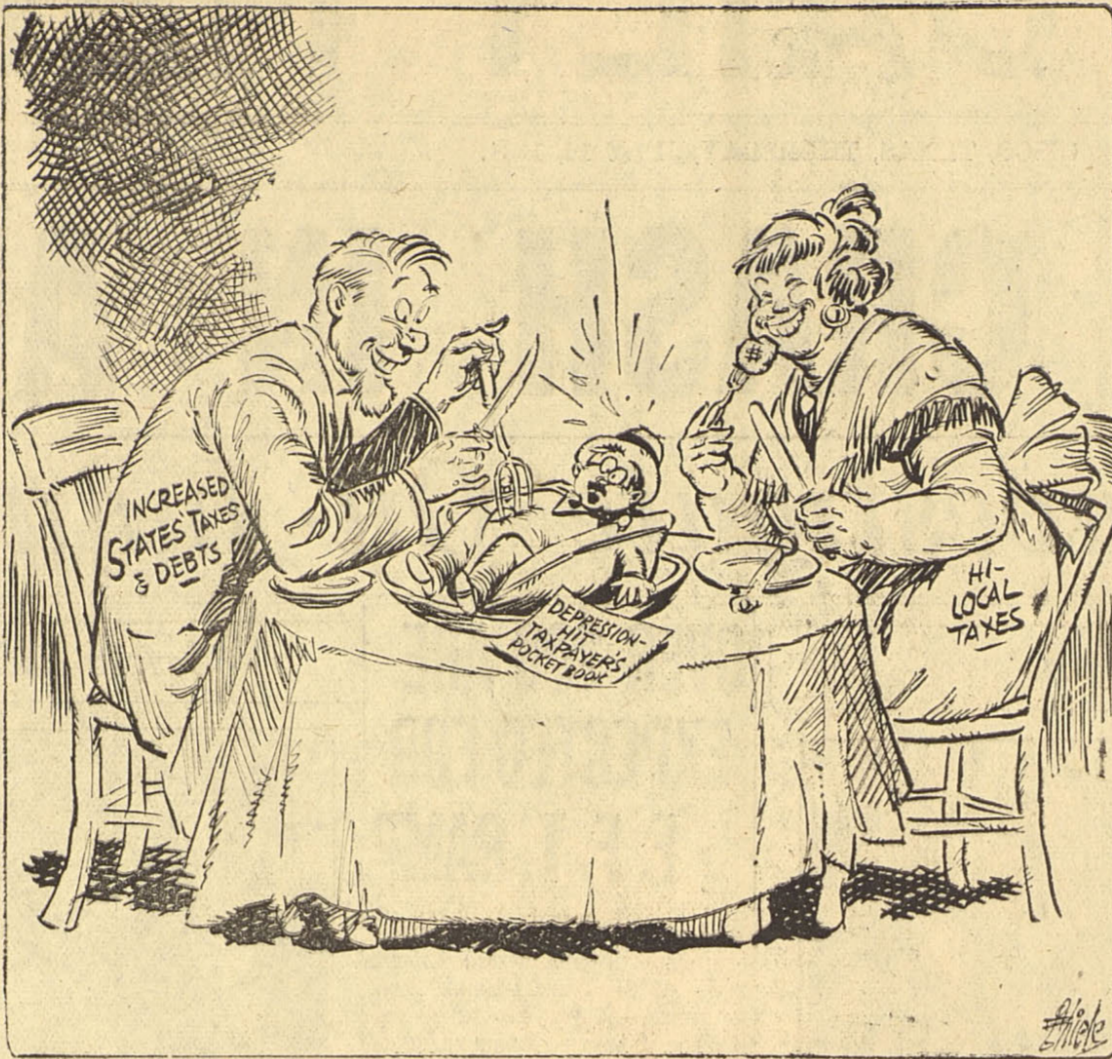

VALUE OF AMERICAN RAILROADS.

Value of American railroads was fixed at \$24,078,000,000 on Dec. 31, 1930, by the Interstate Commerce Commission. Now the commission has made public the data made for public use in rate hearings which are on. It concerns all shippers and all consumers. A rate increase of 15 per cent on all classes of freight is asked. Valuations which include capital for the various districts, as adjusted by commission engineers and accountants follow: East district, \$10,370,000,000; Southern district, \$4,158,000,000; Western district, \$9,550,000,000. Tentative valuations of the commission adjusted to Dec. 31 without working capital were: Eastern district, \$9,918,000,000; Southern district, \$3,758,000,000; and Western district, \$8,615,000,000, or a total of \$21,691,000,000.

Huge insurance companies and investment companies are said to carry \$12,000,000,000 in rail securities. All these are concerned.

There is bus competition everywhere. This investment represents billions. There is truck freight competition every-

Mr. and Mrs. "Jack" Spratt!

where. This industry is said to represent a billion or two. There are air carriers of passengers and the airlines are getting to be real competitors of the rails and buses. In coming times there will be air carrying freighters. Regardless of the upheaval and readjustment phases of civilization that are on, this is the most marvelous age in the history of the world. It is great to be a part of it and it is fascinating to make a study of the car of progress and the highway which it will take after readjustment has settled down to a bedrock basis.

MORE OF THE LAW OF COMPENSATION.

Albert B. Fall will be permitted by his government to serve a term of a year and a day in a prison in New Mexico where the climate is salubrious and the conditions more inviting than within the stone walls of the Washington jail. There is a man who had his paradise on this earth and now with death staring him in the face will have his hell of atonement. There is no dodging the law of compensation. It exacts its dues.

Bismark in the long ago crushed France. He robbed France of Alsace and Lorraine. He imposed a war indemnity of \$2,000,000,000. Years later a mad kaiser started out to conquer the world. Now he is in exile. Germany is a republic. Alsace and Lorraine are French provinces. Germany was stripped of its grandeur and its glory and its ships and commerce and ordered to pay an indemnity of \$75,000,000,000 in 65 years. There appears to be a law of atonement for nations as well as for individuals, but why should the innocent suffer for the pranks of mad monarchs? Regardless of all this the world will right itself in the long run. It will return to sanity and peace and prosperity. This is in accordance with the eternal law. Wherever the diggers are permitted to toil they restore the wealth of nations. This too must be in accordance with the eternal plan of the invisible and yet all wise Creator.

Education really will increase your earning capacity unless you become an educator.

Laws are like men. Every one that doesn't work makes things harder for those that do.

Things even up. The poor man may find it harder to trick justice, but he has less reason to.

OTHER OPINIONS.

MECHANICAL DEFENSE

A Dallas man has invented a mechanical defense against bank robbers that seems so simple the wonder is that nobody has thought of it during the past dozen years when so many banks were visited by armed invaders. The plan is to catch the robbers alive, with their loot, merely by barring all avenues of escape from the building and pushing a button starts machinery to accomplish that highly desirable thing.

According to The Dallas News, C. G. Miller is inventor of the mechanical bank bandit catcher. The device is "operated by buttons attached to all cages and desks in the bank. Pressure on any button

has an alarm along an inexpensive wire to police headquarters, and also starts a motor in the basement which silently closes down bars over doors and all other avenues of escape." Even when bank employees are locked in the vault they can fill the robbers by pressing a button available there for just such an emergency.

It would be a bit unpleasant, of course, to be locked in a bank building with one or more disappointed bandits, who might be more or less annoyed by their inability to escape, but if Mr. Miller's invention does what he promises for there is a probability that banks equipped with the device would have few bandit visitors — Brownwood Bulletin.

In the Political Arena

By HUGH NUGENT FITZGERALD

All the European world appears to be seated on the apex of a gigantic dynamic house with the financiers and statesmen of the European world awaiting an explosion that will shake the universe. President Hoover made a magnificent gesture. It called for a moratorium in the payment of world war debts for a 12-month. Great Britain accepted the proposal in the twinkling of an eye. Italy accepted. Belgium hesitated. France flatly refused to accept the original proposal and a conference was held. France became the dog in the manger. France advanced stipulations which owing to political and financial conditions in Germany made it impossible for the German government to agree to the demands of the ruling forces in the "and of the Allies." France became the dog in the manger.

Europe. Now an explosion may take place that will paralyze two-thirds of the governments of the nations of Europe and result in chaos where peace might have been the order of the day and economic rehabilitation the fruits of the Hoover plan.

William E. Borah is one of the outstanding statesmen of America, and the world for that matter. He is chairman of the senate committee on foreign affairs. Collier's Weekly carries a notable contribution from the pen of the Idaho statesman in its current number. It should be read by all Americans. It covers all the ground. It advances the argument that without disarmament of the costly armies of Europe, with the exception of Germany which was disarmed at the conclusion of the World War there is no hope for the masses of the nations of Europe and that no peace or economic rehabilitation is possible without a thorough revision of the Versailles treaty. It would be well for Americans who wish to be fully informed as to conditions in Europe to read the Borah contribution to the economic literature of the day. That treaty imposed a debt

been drawing to themselves new industries, homeseekers and investors in large numbers.

Helpful Signs Seen for Silver

LONDON, July 16. — A marked improvement of conditions in the silver industry in the autumn of 1931 is forecast by financial experts.

Two helpful signs have been noted. They are: A falling off of production in the first quarter of 1931 by 11,000,000 ounces as against 1930; continental sales of demounted silver are virtually completed.

In addition, the hope is advanced that the end of the economic depression will be in sight within a few months, thus providing the industry a fresh tonic.

The production slump was especially cheering to those who have watched prices drop steadily for two years until, on February 9, 1931, they touched 11 15-16 pence an ounce, the lowest in history. It was estimated that if the present voluntary restriction in production is maintained a total of 40,000,000 more ounces of silver will remain underground in 1931 than in 1930.

Brokers said, despite the fall in silver prices, there had been few speculators in the market. The range in prices was so small, one explained, that it made speculation impracticable.

NOTICE TO MILK PRODUCERS

All dairies and persons producing milk for sale, regardless of number of cows, are notified to report number of milk cows owned, both in production and out of production, to city health office or call 383 between 8 a. m. and 5 p. m. for tuberculosis test purpose. City Health Department — Adv.

When Neuralgia, Neuritis, Rheumatism, Lumbago, Sciatica, send their knife-like pains thru your quivering nerves... when Muscular Pains torture you... when Periodic Pains lay you low... these are the times you need Dr. Miles' Anti-Pain Pills. Did You Ever Stop to Think?

By EDSON R. WAITE
Shawnee, Oklahoma.

That cities that are known as progressive cities attract the attention of investors and homeseekers. Cities that are alive and know it never lost any time in telling others so the waiting world may know it. They tell of the glories of their city and of the many money-making opportunities to be found there.

They do not boast, but deal out cold facts. Every city that is progressive and keeps telling the world about it has a glowing future.

Modern cities are facing wonderful opportunities, bigger than most of them realize. Now is the time for them to look ahead and plan to quicken that additional prosperity that is so desired by all.

Cities that realize the importance of building better business and making and putting better business plans into effect are the ones who will profit most. Cities that have been alive to their opportunities have for years

Renew Your Health By Purification

Any physician will tell you that "Perfect Purification of the System is Nature's Foundation of Perfect Health." Why not rid yourself of chronic ailments that are undermining your vitality? Purify your entire system by taking a thorough course of Calotabs, —once or twice a week for several weeks—and see how Nature rewards you with health. Calotabs purify the blood by activating the liver, kidneys, stomach and bowels. In 10 cts. and 35 cts. Packages. All dealers. (Adv.)

NEW FEED IS DEVELOPED FOR DROUGHT AREAS

WESLACO, July 16.—A representative of the Weslaco chamber of commerce advises that the Delta Development company, has in a large acreage of Grohoma. This is an excellent feed.

W. L. Forbes, president of the company, had this acreage planted after investigating its success in Oklahoma. It is apparently drought resistant, and Oklahoma farmers made over one hundred bushels to the acre, when other row grains made less than twenty-five per cent of the yield of Grohoma.

In view of the fact that a dependable and reputable concern has located a packing plant in Brownsville and except to pay the same amount of money for hogs as paid at Fort Worth, Mr. Forbes has made plans to fatten and raise hogs on this feed.

This grain is a cross between seeded ribbon cane and kaffir, and makes a large head of seed. The size of the head far exceeds any other row grains in Texas. The foliage is very heavy and high in food value to live stock. It contains many of the food elements necessary for dairy cattle to produce good quality of milk.

Irrigation is not necessary to the successful growth of Grohoma.

Mr. Forbes told a representative of the Weslaco chamber of commerce that he expected to feed about 300 head of hogs and 500 baby calves.

Reed Lehman, chairman of the agricultural committee of the Weslaco chamber of commerce states that in many localities successful farming is carried on by converting feed stuffs into butter fat, pork and other dairy or poultry products.

Mr. Forbes further stated that he plans to plant 1,000 acres next year in order that he may increase the number of hogs and calves to fatten. He is so enthusiastic over this feed that he preferred one acre of Grohoma to three acres of any other row grains. The stalk is very sweet and is relished by live stock.

Since this is a new project to the Valley, Mr. Forbes has consented to start a "Field Day," on Friday, July 24th, at this place northeast of Edcouch. The Weslaco chamber of commerce wants to urge anyone interested in a better feed to avail themselves of the opportunity of visiting Mr. Forbes place on July 24th. Anyone interested in a better feed will thereby have the opportunity of seeing this feed at first hand.

Arrangements for a program are being made. The method of selecting various heads to be retained for seed, and talks by authorities on seed and grains will also be made. The program starts at 2 p. m. and arrangements are being made for the attendance of 1,500 to 2,000 growers on this field day.

AGRICULTURAL EXTENSION NEWS

From the Office of the County Agent and The Home Demonstration Agent.

The home demonstration club dress contest was climaxed with a county wide show in Eastland Saturday, July 11. One hundred and twenty-five dresses were exhibited. One hundred modeled. The fourteen clubs were represented by from one to thirty-five members and families. The first place was won by Mrs. L. C. Owens, Grapevine club, a trip to the Annual Short Course at College Station July 27th to August 1st. Mrs. Owens will enter the state contest representing Eastland county. These dresses were made at cost ranging from 45 cents to \$2.16 with an average of 3 1/2 yards of cotton material used, per dress.

Corn

The reason for canning corn is here and the following recipe may be used. Use tin cans and the No. 2 size for canning corn. Gather the corn the morning to be canned; shuck, silk and cut. The cutting depends on the size you like. The best method is to cut the grains (silk) and scrape the cob lightly. Add water to suit the individual (some like the corn with more water than others), half as much water as corn is plenty. Heat until the starch thickens or the corn looks clear, fill No. 2 cans within one-half inch of the top, seal and process at once for 60 minutes at 12 pounds pressure. Remove from cooker and put in a tub of cold water and cool quickly. When cold, dry the cans and store.

Stuffed Pepper Mango

Soak sweet peppers in brine, (1 cup salt to 1 gallon water) for 24 hours. When ready to stuff, take from brine, rinse in fresh water carefully cut circle off the top of each pepper and save same, to be placed on peppers after stuffing. Remove the seeds and white sections. Soak in clear cold water for 1 to 2 hours. Drain carefully. Stuff with Dixie relish (in last week's paper), being careful not to press it too tightly. Place top on pepper and make secure by one or two stitches or by tying in. Pack as many stuffed in the jar without crushing. Then fill the jar to overflowing with spiced vinegar. Process for 15 minutes in

Fashions of Bygone Days Reflected in Winter Styles at Paris This Year

By MARY KNIGHT
United Press Staff Correspondent
PARIS, July 16.—Thirty-three Paris creations in the form of feminine finery have just shaped themselves into a huge mirror wherein is reflected definitely the trend of the mode for the approaching fall and winter.

These 33 models were exhibited by the "Grand Prix de l'Elegance," style show of 1931, just held in the Grand Palais in the Champs-Elysees.

Theater and movie stars, favorites of the French capital, acted as mannequins, displaying gowns that were the living, breathing images of the 1700's, 1830's, 1860's and 1870's.

Prize for the most stunning costume was awarded to Mlle. Suzanne Vernin, French film star, who wore a chic black and white afternoon ensemble. Incidentally, 12 of the 33 gowns exhibited were combinations of black and white with white predominating.

Variations of the 1830 model hat known as the "feminine bowler," "Amazon," "Pudding basin," "English walking hat," the "tilted boat-shaped bonnet" were out-standing features. Some of these new hats were worn so far on the side of the head that they had to have tiny velvet ribbons tied around the head to keep them from falling off. Practically all of them were trimmed with feathers and plumes.

Next in favor to the black and white model — white with offsetting points in black — was aquamarine. Graduated ruffles, all the way from the waist to the floor, pointed the way to the entrance of "period" styles for the fall and winter. Lace bodices with skirts of satin, crepe or chiffon, formed another interesting feature of the incoming styles. Backs of evening gowns will grow noticeably higher, and trimmed with fur, will grow longer.

So dominant an influence is the past holding over the present and future trend contour that it has even affected hair, and curls are appearing where curls have never appeared before — for the present generation. Mme. Mary Costes, film star and wife of the transatlantic flier, emphasized the old-fashioned idea by a tiny black and white lace sunshade and little ear-rings and curls that fell almost to her shoulder.

Mlle. Vernin's prize-winning frock was of black satin, with a short white coat, very snug-fitting and trimmed with black fur. Fingerless lace mittens in black and white will be conspicuous by their presence with many types of ensemble, and when hoops begin to lend their support to bouffant skirts, lace pantaloons will be a corresponding necessity. The hoops will be collapsible, as in the old days, to permit easy bus riding, subways, tramming and taxiing.

PLATES TO BE COPPER

PHOENIX, Ariz., July 16.— Determined to aid the copper industry in every possible way, Governor George W. P. Hunt has asked the highway commission to insist that 1932 automobile license plates be made of copper.

News want ads brings results.

NEW METHOD OF MEASURING EARTH PLANNED

By SAMUEL DASHIELL
United Press Staff Correspondent
BOURGES, July 16.—If there is anything new under the sun, French astronomers and geodetic engineers are going to find it out, according to Abbe Moreux, director of the Bourges Observatory.

While preparations are going on to make a new measurement of the earth, the famed astronomer-priest agreed to explain some of the most interesting details for the United Press.

The question of the exact spherical qualities of the planet; the answer to the German thesis that continents move about on a liquid substratum; and the vagaries of sun attraction and equatorial displacements will all be scientifically established so that the distance, for example, between Paris and Melbourne can be computed almost to the fraction of an inch.

Advanced Measurements
Abbe Moreux, who has succeeded, more or less, to the place of Camille Flammarion as the outstanding French astronomer says: "Our savants have conceived a plan of measuring the earth which is an advancement on the methods used by Leretore.

"Geodetic operations undertaken so far all have shown that this ellipsoid which they call the planet and which looks like a flattened out ball is neither perfect nor regular nor symmetrical.

"The plane measurement is not equal for the two hemispheres; the arcs which correspond to the meridians do not all measure the same, and the equator is not an exact circumference, but rather resembles a band deformed and divided into three parts.

"Although the great spherical globe exhibited at the Colonial Exposition appears perfectly balanced, it is true that this planet enters into no measurement so far admitted into the standards of geometrical volume or mathematical measurements.

Watermelon Rind Preserves

2 pounds watermelon rind (prepared), 2 quarts sugar, 4 quarts water, lime-water proportion 2 tablespoons lime or calcium oxide, 2 quarts water; 1 lemon sliced thin; juice of one-half lemon, 6 or 7 pieces root ginger.

The thick rind melon is preferred for preserves. Removes peel and any pink meat of the melon. Soak in lime-water over night, using proportions as given above.

Next morning drain and allow rind to stand in fresh cold water for 2 hours. Drain, drop in boiling water, cook very rapidly for 10 minutes. Drain again and add gradually to the syrup (made by boiling together the 8 cups of sugar and 4 quarts of water). Add the lemon juice and root ginger which has been cut into one-half inch lengths. Cook until the rind is tender and transparent. About 15 minutes before it has finished cooking, add the slices of lemon. Avoid breaking or tearing the lemon slices.

Pack firmly into sterilized glass containers, (plins better). Fill to overflowing. Seal and process for 15 minutes at 10 pounds pressure, or boil 45 minutes in water.

Check on Solar Influences

The reason for determining this exact surface distance is important for two reasons: We should like to know if the sun relief varies or changes totally during the course of the centuries; and if this system is once established there will be an absolute check on the solar influence.

There is also an interesting theory proposed by the German Vegeter to the effect that the continents

Check on Solar Influences

move about on a liquid substratum and that it is possible for the European continent to change places with that of North America.

"In this hypothesis the wireless will be of the utmost help. The hour of Paris can be transmitted to any other point to the hundredth of a second. When coupled with the speed of light transmission we can calculate any distance to the equator within 30 feet. Thus it follows that any observatory determining its local time exactly through astronomical calculations can communicate with the observatory of Paris and the distance can be measured to within 30 feet, and this diminished in ratio as the point near either of the poles, so that the points in the north temperate or south temperate zones would be quite closely figured. This method has already been used between the observatories of Paris and Algiers, Shanghai and Washington.

"Improvements on this method are already in progress, and it is anticipated that before long the Paris Observatory will register signals to a foreign post to within a thousandth of a second, which, for example, could determine the exact distance between Paris and Melbourne to within 50 centimeters.

Check on Solar Influences

It is for that reason that many astronomers, instead of calling it an ellipsoid, prefer to call it a terrestrial geoid. For example, the admitted measurements of Hayford show that the equatorial distance is 6,378,388 meters, while the polar extension is 6,357,383 meters. To fix any point on the globe, one must find the degrees, minutes and seconds of latitude and longitude.

"What we ignore so far is that in measuring distances on the surface we do not realize that the actual distance is quite different from that computed by the longitude and latitude method, which is based and determined on astronomical calculations.

"In other words, although I can find exactly the location by latitude and longitude of the observatory of Peiping from a post in Paris, I cannot exactly calculate the distance on the surface of the planet between those two points. This distance depends on the exact form of the globe, and in calculating such a vast space between Paris and Peiping there is nothing yet precise.

Check on Solar Influences

ANDORRA, July 16.—The general council of this mountain republic has decided that the Andorra treasury has put one policy, everything comes in and nothing goes out.

Acting on that belief, the general council has refused to pay back the \$15,000 paid over by an Australian syndicate for a sweeping concession. The syndicate requested the refund on the grounds that the Co-Princess, the Spanish Bishop of Urgel and M. Gaston Doumergue, former president of France, opposed the concession. The council has decided that since the council, not the co-princess, granted the concession the syndicate merely has to come and get its money's worth.

Andorra intended to use the \$15,000 annual revenue from the concession to build a hospital and is holding the \$15,000 first payment for that purpose.

The council has granted French interests a 50-year concession to introduce telephones to the republic. The new phones will link Andorra with the French frontier towns and with Barcelona, and it will even be possible to talk from New York with Andorra for the system will have the privilege of linking up with the transatlantic telephones.

MILLIONS FOR AGED

BOSTON, July 16.—Approximately \$3,000,000 is expected to be distributed annually among some 8,000 persons under Massachusetts' Old-Age Assistance Act, which went into effect this month. All needy citizens 70 years or over, who have been in the state at least 20 years, are eligible for assistance, which ranges between \$2 and \$3 weekly.

CLOSING OUT SALE

Two Oil Well Fires Are Being Fought

KILGORE, July 16.—Fire fighters battled on two fronts in the east Texas oil field today, both crews resorting to unprecedented methods in their campaigns against major conflagrations.

Chemicals were brought into play against the Vitek Oil company's No. 2 Eaton near Overton, which caught fire last week and burned three men to death. B. F. "Blackie" DeLong, Berger oil fire fighter, was directing work of smothering the burning gusher with carbon dioxide gas.

DRIVES FEET IN GROUND

MANILLA, Ia., July 16.—When lightning struck on the farm of Frank Recker it killed a horse, driving the animal's forehead more than 20 inches into the ground. Recker, driving the horse was only stunned.

TOWN GETS PORTRAIT

LONGVIEW, Wash., July 16.—A portrait of R. A. Long of Kansas City, founder of Longview, done in oil by Miss Margaret Lindsay Williams, was presented to the Longview Library.

Sanderson — "Times" installed new Linotype.

Consider your Adam's Apple!!*

Don't Rasp Your Throat With Harsh Irritants

"Reach for a LUCKY instead"

Place your finger on your Adam's Apple. You are actually touching your larynx — this is your voice box — it contains your vocal chords. When you consider your Adam's Apple, you are considering your throat — your vocal chords. Don't rasp your throat with harsh irritants. Reach for a LUCKY instead.

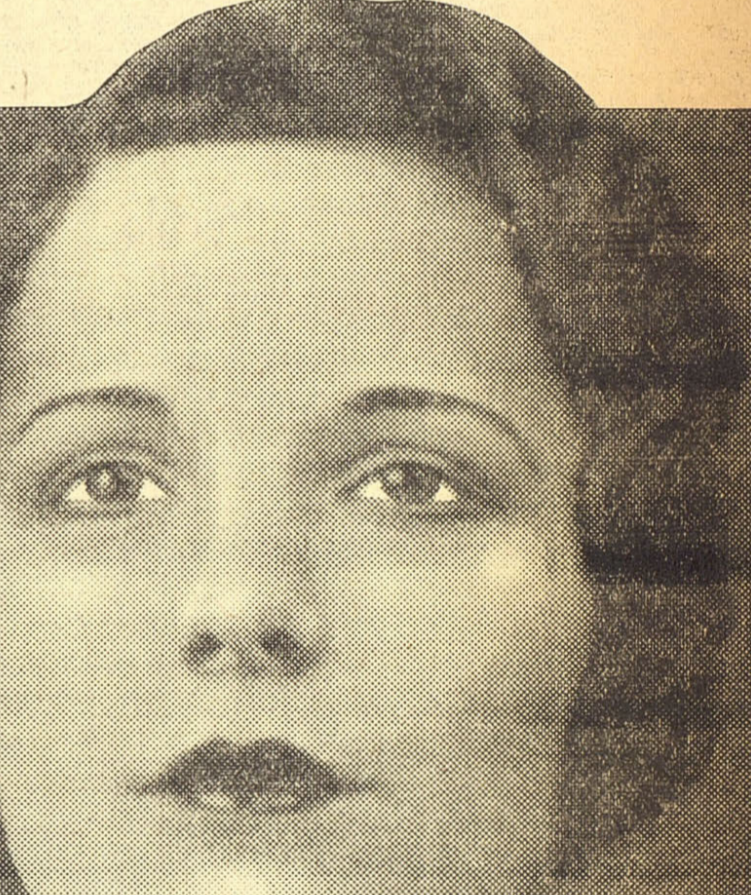

Here is what one of America's great scientists, whom we retained to study LUCKY STRIKE'S manufacturing process, says about the mellowing effect of Ultra Violet Rays which are included in our exclusive "TOASTING" Process:

"The effects of this ultra violet treatment on the tobacco have been tested and are found to involve an increase in what is called the 'mildness' of the tobacco."

One of America's greatest writers and editors says this:

"When I visited Reidville and went through the LUCKY STRIKE plant, I found one explanation for the growth of LUCKY STRIKE. Your use of the Ultra Violet Ray in the 'Toasting' of tobaccos is a splendid example of achievement. It is the new order of the day."

Remember, LUCKY STRIKE is the only cigarette in America which offers you the throat protection of the exclusive "TOASTING" Process — that secret heating process which expels certain harsh irritants present in all raw tobaccos, and which includes the extra mellowing benefits of modern Ultra Violet Rays. And so we say "Consider your Adam's Apple". Be careful in your choice of cigarettes.

LUCKIES are always kind to your throat

Heart of Liane

by MABEL McELLIOTT

BEGIN HERE TODAY

When Cass Barrett, actress, takes her daughter, Liane, to Willow Stream, L. I., for the summer, the girl has just escaped from an unpleasant experience. Liane had been present during a speakeasy brawl where a man was shot. Shane McDermid, young police officer, comes to Long Island to tell Liane the man will live.

At Muriel Ladd's house, Liane meets a mysterious stranger she has seen once before. He is Van Robard, and Cass, hearing his name, begs Liane never to see him again. Muriel, a debutante, has another suitor, Chuck Desmond, a reporter. One night Mrs. Ladd dispatches Van after the pair, believing they have eloped. He takes Liane with him. Later she hears gossip about Van and Mrs. Ladd and is crushed.

Liane goes to stay with the wealthy Cleespaughs in the fall. She likes Clive Cleespaugh, who does not get on with his mother. News comes of Muriel's engagement to Van Robard. The same day Liane learns of her mother's illness in a Philadelphia hospital. Cass nearly dies but is finally nursed back to life. Mrs. Cleespaugh insists on her returning to Willow Stream to convalesce. Clive asks Liane to marry him and although she is at first offended at the idea of a marriage of convenience she accepts, partly to provide her mother comforts.

Later Clive offers to release Liane from this promise but she refuses. Fanny Amberton and Tressa Lord, old friends of Mrs. Cleespaugh, arrive as house guests. Tressa is rude to Liane.

NOW GO ON WITH THE STORY CHAPTER XIX

Liane stood outside the door for a moment, catching her breath. She clenched and unclenched her small hands. "I hate her," she said to herself. "Oh, I hate her!"

She had said no to Clive's proposal that they announce their engagement before the arrival of Miss Lord and her sister. Now she wished she hadn't. That would have given her at least a sort of standing. It would have been a protection against snubs.

She went into her mother's room now and shut the door softly behind her. Cass was sleeping. The shadows under her eyes had almost disappeared. Liane had a sudden wild desire to snatch her up, to dash back to the shabby little flat in West 68th street where they had been so poverty-stricken and oftentimes so happy. But she knew that she couldn't do that. No, she must go through with this preposterous agreement. She had given her word and she must keep it.

"Who does that Liane girl look like?" Fanny Amberton was saying as she brushed her short black hair and pressed the wave in with skillful fingers.

"Don't know," Tressa answered shortly. "Like no one I know. Why?"

"It's rather perplexing," mused her sister, wriggling into a black net. "I've never seen her before. But of course it's nonsense. She's a little more than a child."

"Nineteen," Tressa said and laughed shortly. "A highly improbable age!"

"My dear," murmured Fanny Amberton significantly, "do you realize Clive will be 25 soon after the first of the year?"

"I do." There was something unpleasant about Tressa's brief laugh.

Fanny made up her lips metiulously. "He'll have—well, millions!" she said.

Tressa stood in the doorway of the bath which connected the two rooms the sisters occupied. She wrapped a citron-colored negligee, sheer and tight and dripping cream-colored lace, tightly around her. Her silver blond hair, adroitly shingled, glistened against the background of raspberry tints.

Fanny exclaimed artlessly, "My dear, you're like some thing in the colored advertising pages."

Tressa glanced at herself in the long mirror of the door. "This rag is rather good," she observed. Her long-lashed green eyes had the sleepy look of the well fed cat. She laughed again. "Must get some other like it for my trousseau."

Fanny looked arch. "My dear, I hope it won't be long now."

Tressa's smile was confident. "Don't worry, old thing. I'll surely pull it off this time." She dabbed the stopper of the Chanel bottle against her pink-lobed ears.

slipped the exquisite beige lace frock over her head and stood eyeing its artful simplicity, the manner in which it prisoned her curves and flowed away into lines of sheer innocence.

"Oh, Miss Barrett, do hook me up, won't you?" Tressa asked in a drawing voice.

"Certainly." With dignity Liane managed the intricate fastenings. She stood up. "Is that all?" Liane's face was like a white mask. Her manner was chill, impersonal.

"Thank you so much. No lady's maid could have done better."

"You're quite welcome." Liane met the insolence with studied unconcern. But as she left the room her heart was hammering with anger. It was to be war then. War to the teeth!

Liane stood like a trapped young thing in one corner of the library. Van Robard faced her, grim in his black and white, his splendid head arrogantly lifted.

"You've got to hear me out," he was saying doggedly.

Liane stammered, "The others are coming, Miss Lord—Muriel—they'll be in any minute. They mustn't find us." She cast a despairing glance around.

He said, coldly resolute. "They're playing ping pong in the game room. Mrs. Amberton is at backgammon with my aunt. You've got to stay. I've been trying for months to explain. That's why I came tonight."

The young girl drew herself up proudly. "There's nothing to explain."

"Oh, my sweet—" Was there a break in his deep voice? Liane steeled herself against it, against the charm this man held for her.

Across that the radio was wailing mournfully:

"What is—this—thing—called—love?"

This—funny—thing called love? The girl ground her nails into her palms. She repeated, "There's nothing you need to explain, is there?" She even smiled.

The man in the perfectly fitting dinner coat folded his arms grimly, staring at her.

"There is," he said. "And well you know it."

Liane sat down suddenly, meekly. She passed a shaking hand before her eyes. "Go on, then, and do be quick about it," she said faintly.

"You knew," Van Robard said softly, "that I was mad about you last summer. It was like a fever. It hit me—hard. Like nothing else I've known. You knew that?"

Liane nodded. Pride and reserve were swept away. She forgot this man was betrothed to another girl. She forgot everything except the burning fact that they had five moments alone together and that they loved each other.

"Well—" Robard struck one clenched fist into his open palm. "Well, that was that. I meant to, wanted to tell you. Then—well, I got tangled up in this hideous mess. Muriel ran off with that actor fellow, Blue. You know. His wife turned nasty, threatened to sue and name her as co-respondent. Adele nearly went frantic. I happened to be in Atlantic City that night. She wired me, asking me to stand by. She flew down and made a fearful row. Got me to say I would tell Mrs. Blue it was I Muriel had gone off with. I did it and the dreadful woman professed to be satisfied. But she said unless our engagement was announced before the week was out she'd carry out her original threat. I was the goat," he finished bitterly.

Liane felt quite ill.

"You were under obligations to Mrs. Ladd?" she asked, her throat constricted as she formed the words.

"Oh, you've heard that gossip? Liane, sweet, you mustn't believe all you hear of me. Indeed you must not! People have filthy minds and filthy tongues, too."

of light looked lowering.

"You flatter me, my dear," he said, lightly. "I'm growing old. My technique is out of date. Can't try it with these youngsters."

"Your technique always has been grand, love."

"Charming of you to say so," he dawled.

"Truly, I'll never forget how mad I was about you the summer before the summer before last," said Tressa mockingly. "I thought you were simply swell. Prince Charming. The first time you kissed me—"

Van winced with a side glance at Liane who stood white-faced and uncomfortable.

"Now you are flattering me." His voice was low. "You know I never stormed that citadel."

"Ah, my dear, would you fling a lady's memories in her teeth?" Tressa's green eyes shone with malicious pleasure as she watched him squirm under her rallery.

Liane, with a low toned exclamation, slipped from the room. She passed Clive on the stairs.

"You're not leaving so early?" he asked in polite concern.

"I must. I have a fiendish headache."

(To Be Continued)

TORONTO, Ont., July 16.—Admiral-of-the-Fleet Earl Jellicoe, former commander-in-chief of the British Grand Fleet, will be honor guest at a banquet to be given by former officers and enlisted men of the Royal Navy in Toronto August 27.

ANCIENT FOOTPRINTS. SOUTH HADLEY, Mass., July 16.—Land surrounding a ledge in Smith's Ferry in which are imprinted footprints believed to have been made by a prehistoric dinosaur is to be made a public park.

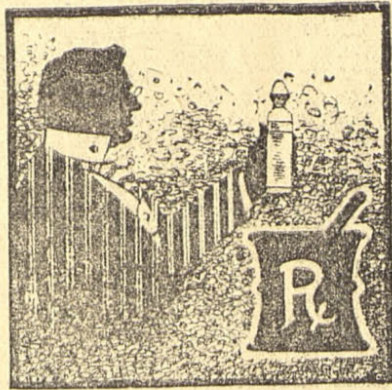

Brownsville — Historic post office razed here, to be replaced by \$4,500 structure.

Alice — Central Power and Light Co., reduced local electric rates one cent per kilowatt hour.

RADIO PLAYED MARCH. MEMPHIS, July 16.—When a local radio station announced they would have a program of wedding music, two couples announced they would be married and their radics would furnish the music. The couples were married in different parts of the city.

Midolthian — John Foote leased City Bakery from W. L. Murphee.

Haskell — Nine-hole golf course here to be improved.

GOVERNMENT BUYS 1,500 FORD CHASSES

The United States Post Office Department has just placed an order with the Washington branch of the Ford Motor company for 1500 motor truck chasses of which 500 will be 3-4 ton carrying capacity and 1000 of 1 1/2 carrying capacity. The purchase of the motor equipment was the largest made by a government department since the war. With this order Ford sales to the post office department during recent years reached a total of 2900 units.

The purchase marked another step in the department's program of building up its fleet of several thousand trucks and also to replace some of the surplus trucks turned over to the post office department by the army at the close of the war. Deliveries are to start immediately and continue as rapidly as the bodies constructed for are ready for installation. The completed trucks will then be distributed to some 60 cities throughout the United States.

The order was placed with the Ford Motor company after an exhaustive test conducted by the department with the cooperation of the bureau of standards. The tests were under the supervision of W. A. Jacobs, automotive engineer of the bureau of standards, and William Wolma of Chicago and Morris Carrier of Brooklyn, motor vehicle engineers of the post office department.

About Cisco Today

SOCIETY EDITOR, MISS MARJORIE NOELL—PHONE 80 OR 81

Dr. and Mrs. G. M. Stephenson and children have returned from Monzaco, New Mexico, where they spent a vacation in the Monzaco mountains.

Mrs. John H. Kleiner, who has been quite ill at her home, 511 West Fifth street, is reported to be improving.

MRS. SHEPARD HOSTESS AT SOCIAL MEETING.
About twenty-five or thirty guests were present Wednesday afternoon at the home of Mrs. P. P. Shepard on West Seventh street when Miss Eudora Hawkins of Abilene gave a very interesting as well as instructive talk pertaining to carpets. The guests first gathered inside the house which was beautifully decorated with many varieties of summer flowers. Later, they were ushered to the park like yard bordered with hedges and flowering plants at the rear of the home. Refreshments of pink and white brick cream, white cake squares with pink icing, and lemonade were served. Dainty favors were given. A feature of the afternoon was the presentation to Miss Eudora Hawkins of a colonial bouquet which was in reality a hankieholder shower honoring her birthday. Mrs. Shepard was assisted by Misses Delphia Mae Blair and Paulette Ruppert.

Among those present were: Misses Eudora Hawkins, Lucille Starr, Betty Smith of Rising Star, and Ruby Dicky of Moran, and Mesdames R. Elliott, A. J. Moon, A. B. McGuire, Guy Austin, H. H. Lamb, Ray Haley, Walter Ulrich, Jack Emby, J. T. Asbury of Throckmorton, E. S. Gaines, H. L. Jackson, Arthur Mitchell of Cross Plains, Lillian Rankin of Throckmorton, Verda James of Baird, Carl Wilson, Douglas Anderson, O. J. Tunnell, O. J. Russell, M. D. Paschall, and the hostess.

FED WITH EYE DROPPER.
BELLAIRE, O., July 16.—Poultry breeders on the J. J. Hoge farm, near here, are feeding a freak chicken with an eye dropper. The chicken was hatched with three legs and four feet. The extra leg is located back of the normal position.

Who Is a Capitalist?

This is the **BANK** that **SERVICE** is Building

Modern Safety Deposit Service

First National Bank

IN CISCO, TEXAS
Member Federal Reserve System

A CAPITALIST is one who accumulates beyond his consumption. It is said that a thrifty man will save 20 per cent of his earnings and that a tightwad will save 60 per cent. In the pursuit of wealth men have endured hardships, exile, hunger and even death and very often, when it seems almost within their grasp, or even after it is accumulated, it takes wings and flies away. Money, which is by no means the greatest thing in the world, is the power which moves most men to their best endeavors. After it is accumulated, it should be carefully guarded and scientifically invested.

DRILL REPORT
