State Health Department officials say susceptible persons
should be vaccinated early for
maximum protection. Generally the most troblesome time for flu in Texas is toward the latter part of December.

To reduce the hazards to persons in high risk categories, it is recommended they be immunized with a multiple-virus vaccine - a product which will protect against more than one form of the disease - well before the beginning of the flu season.

Protective antibodies usually

develop within two weeks after inoculation, so it is important that the vaccine be administered

Then—head for the open highway. ■ That sittin'-on-satin feeling you get is Chevrolet's famous Jet-smooth ride at work—with a pliant Full Coil spring cushioning at each wheel. Oh yes, two kinds of salad. We all had a good time, and wish lots more birthdays for Mr. Marvin. Sunday morning at church, Marvin put one dollar in the birthday jar.
