HOUSE PASSES REPEAL VOTE BILL

More Than \$325,000,000 in Gold Returned to Banks

VERY LITTLE NEW CURRENCY IS REQUIRED

WASHINGTON, March 17. — A \$327,238,000 stream of gold flowed back into the federal reserve banks during the past week, the federal reserve board reported today.

The influx of the precious metal, much of it coming from hoarders, made up more than half of the gold which the 12 reserve banks lost in the six weeks preceding the banking holiday.

The returned gold further fortified the gold backing of the United States money system.

The nation's reviving confidence in its banks was reflected in the fact that only \$3,301,000 of the new emergency currency has been put into circulation.

\$2,550 IN GOLD

Alex Spears, cashier of the First National bank, this morning brought a weighty canvas coin sack from the bank's vault. Uprighting it, a stream of gold coin, much of it musty and dirty, gushed over the glass surface of his desk. A stack of smelly, yellow-backed bills completed the exhibit.

"This is the gold and gold certificates collected by the bank since I told you last," he said to the newspaperman.

Counted, the amount totaled \$2,550 which, added to the slightly more than \$2,500 previously sent to the federal reserve bank at Dallas, brings the sum of the precious metal re-deposited here since the moratorium was declared, to above \$5,000. The last collection has already been sent to the Dallas reserve.

Incidentally, the bank gained \$16,000 in deposits yesterday, the second day of business since the reopening.

The government is printing two billion dollars of the new federal reserve bank notes. The mere fact that plenty of money was available appeared to have been sufficient assurance to offset the demand.

A bill making this new currency available to state banks on the same terms as to federal banks was considered in the house today.

SHAW REVOKES PART OF MORATORIUM

AUSTIN, March 17. — State Banking Comm'r James Shaw today revoked a portion of his proclamation issued last Monday, placing a financial moratorium on all financial institutions other than banks.

The portions of the moratorium dealing with building and loan associations, automobile loan companies engaged in ordinary loan making were revoked.

WEATHERED WINTER

NAMPA, Idaho, March 17. — Despite a severe winter, Idaho livestock appeared to be getting through in good shape, according to Julius Jacobson, federal agricultural statistician. He said that because of deep snow, all cattle and sheep are now being fed.

THREE GUESSES

ANSWERS ON PAGE THREE

Here's How the New Money Will Get Into Circulation

New money printed in Washington is shipped to Federal Reserve Banks throughout United States.

Business man makes loan at his bank, posting security eligible for re-discount by Federal Reserve.

Banks deposit commercial paper and other "sound assets" with Federal Reserve Banks and receive paper money.

New money thus acquired by banks is paid out by making loans and by cashing checks of depositors.

Business firms make purchases, employees meet payrolls and thus new money gets into circulation.

As expanded currency is re-deposited, it can be withdrawn from circulation, thus controlling inflation.

RANDOLPH CAMPUS UNDERGOES TRANSFORMATION

By FRANK LANGSTON

Cisco visitors soon will have Randolph college pointed out to them not only as an aspiration toward higher learning but also as a beauty spot of the town. For Randolph is undergoing a process of beautification that is designed to make the college attractive to prospective student, alumnus, and casual visitor alike.

"We don't want people to come here to enroll, look around, and then say, 'Well, I'll see you later, and leave,'" said Dean E. B. Isaacks. "We want them to stay."

The improvement program began with the changing of the gas pipes and the repairing of the roof of the girls' dormitory last week. Now it is spreading to take in the entire hill.

"I started to say it was largely plans so far," said Dean Isaacks, glancing about and seeing boys and men working all over the campus, "but a good deal of it is past that stage."

From town there is visible a rock bordered path walk going up the hill. It forms a striking picture at this time of the year—a glistening white ribbon cutting the dull background that winter left.

What is not visible from town, though, is the double line of cedars set out along the walk. There are 100 of the little trees, recently brought in and transplanted. In future springs they will make the path to the college more pleasant for the student who remembers that the birds are singing and the fish are biting. In winter they will be a double streak of green on a white canvas.

At the foot of the hill, where the walk and the cedars leave the automobile road, there is a tiny creek, usually dry, which the walk crosses. There is a culvert there now, but a rustic bridge across it has been planned to add another picturesque touch to the scene.

On the campus, the most striking things that meet the eye and provoke wonderment are the holes in the ground. There is a double row of them in front of the three main buildings. Others dot the campus at various places. Dean Isaacks explained that they are being dug for the planting of pecan trees.

Twenty Pecan Trees

Twenty of the young trees were recently given to the college by Wolf's Nursery in Stephenville. Others have added to the original gift until now it is expected that 125 pecan trees will be set out this spring. Some of the holes are being dug by R. F. C. labor. Many of the students are setting out trees.

"A student sets out a tree and it will be known as his," the dean said. "Not that he will come and gather the pecans, but he can come back

HIGH SCHOOL NET TOURNAMENT TO BE HELD

The high school tennis tournament, a part of the Eastland county meet, will be run off in Cisco tomorrow, according to E. H. Varnell, in charge. It is scheduled to start at 9 o'clock.

There will be 20 teams entered, Varnell said this morning, in singles and doubles for both boys and girls. He estimated that with such a large entry list it would probably be necessary to make 30 pairings.

Although the county meet proper is to be held in Olden, Cisco was chosen for the tennis tournament because Cisco affords a number of good courts. It was at first intended that all the matches should be played on the Humbleton concrete courts, but when such a large entrance list was turned in, Director Varnell found it necessary to play some of the matches on other courts.

Cisco entrants in the tournament, as announced by Miss Elizabeth Dial, girls' coach, will include Merrill Goldberg, girls' singles; Maxine Fowler and Betty Fee Spears, girls' doubles; L. A. Harrison and Bayard McMahon, boys' doubles; and either Harrison or McMahon in boys' singles.

ODD HEART OPERATION

STOCKHOLM, Sweden, March 17.—A remarkable heart operation said to be the eighth one of its kind in the world, during which the patient's heart was stopped for four minutes, was performed recently at the hospital of Sabbatsberg, in Stockholm. The heart was laid bare and its beating was stopped during the four breathless and critical minutes needed for the operation, the patient thus being practically in a state of death. The operation was successful and the patient has now regained full health.

Cisco Kids Play Stewart Tonight

The Cisco Kids will play the Stewart Independent team from Ft. Worth tonight in the high school gym, according to Coach Pop Garrett. The Stewarts boast one of the best teams in Fort Worth. Last year winning the city championship.

This will be the last game of the season for the Cisco club, and promises to be a good one, Coach Garrett said today.

STOCK MARKET BEHAVES WELL IN REACTION

NEW YORK, March 17. — Stocks, bonds and commodities ran into a technical reaction today after two days of sharp advances.

Profit taking had been anticipated in view of the recent rise. Brokers and traders were pleased with the performance of the stock market in the face of selling. Trading quieted down and pressure was resisted.

Some disappointment was expressed when actual trading in grains failed to bring sharp advances. Wheat, however, opened one and seven-eighths to three cents a bushel higher.

Cotton which scored gains of \$3 and more a bale today lost part of that gain today. Other commodities behaved similarly. Bonds were irregularly lower except United States governments which were firmer in response to easier money.

YOUTH MISSES DEATH UNDER TRAIN WHEELS

Attempting to board a moving Texas and Pacific freight in the Cisco yards last night, William Hanford, 23, of Maryland, narrowly escaped death under the wheels of the train when his grasp upon a "grab-iron" slipped and he was dragged several hundred feet along the rails until his foot caught in a switch and threw him off. Two toes were severed from his left foot and he sustained a minor scalp gash when his head struck the ground.

Two companions of Hanford, Charles Laitley, of Baltimore, and Al Silverman, of New York City, already on the train, left it at Baird and caught another freight back to Cisco. They were with him here today.

California Bound

The three youths, riding the freight westward to California, left the cars when it paused here. Attempting to reboard it, Hanford said he waited for a "burn" to climb up the "grab-irons" ahead of him. Half-way up the car, he said, the man stepped on his hand causing him to lose his grasp and drop down. He held to the last of the ties, however, his feet dragging the ties and stripping off his shoes, until his left foot locked in the vice of the switch, tearing him from the side of the moving car and severing the great and fourth toes.

Attempted Rescue

Laitley, who had boarded three cars before, saw his companion's plight and ran over the cars and down the grab-irons to pull him up. He was a second too late, he said, his outstretched hand missed Hanford by an inch as the switch dragged the injured youth off. Silverman was five cars away and unable to render assistance. They saw Hanford gain his feet and run wild to the platform of the freight station where a passerby found the youth and assisted him to the police station. Dr. W. P. Lee, city health officer, dressed the wounds.

At Baird Hanford's two companions, thinking the fall had been fatal, left the train and caught another back to Cisco.

Hanford said he has no family or relatives to whom he can appeal. Arrangements were being made by police to place him in the Graham sanitarium for treatment.

Special Services For Presbyterians

Two special services will mark the Sunday program at the First Presbyterian church, the pastor, Rev. J. Stuart Pearce, announced today.

The pastor's subject for Sunday evening will be "Shall We Support the Entire Program of President Roosevelt?" he said.

DEER KILLERS ARRESTED

CORVALLIS, Ore., March 17.—At least there are deer in Benton county. Game wardens have arrested 21 men in this county in the month of January for killing deer out of season. Most of them assert they are unemployed and have to eat.

Cisco Business Men Declare Support Of Chamber of Commerce Amendments

R. H. Boon, Cisco grocery and feed merchant, today expressed himself in favor of continuing the Cisco Chamber of Commerce as a municipally supported institution.

"I was once opposed to the chamber of commerce," he said, "but an understanding of what it has done during the past two years has caused me to change my mind. I am in favor of continuing it as a municipal institution on an economical basis."

"The most reasonable way to support it is through taxes. Before we had a municipal chamber I contributed five to ten dollars every month to keep it going. That was when times were flush, and I cannot do that now."

"I have a great deal of confidence in its present leadership and I know it will be run economically as it ought to be run."

J. D. HALL SAYS MONEY WELL SPENT

"I am heartily in favor of a municipal chamber of commerce the band and the zoo," said J. D. Hall, of the Cisco post office. "I think that it has done a good work during the past two years and I believe that every town should have one."

"The money that is spent to support it and to maintain the zoo and the band is public money well spent."

"I am heartily in favor of continuing them."

LEE OWEN FAVORS CONTINUANCE

"I favor continuing the municipal chamber of commerce on an economical basis," said Lee Owen, Cisco real estate and insurance dealer today.

"I am not in favor of continuing it on the extravagant basis on which I think it has been run in past years, but I do support it as it is now being operated. A chamber of commerce is a necessary institution for the promotion of Cisco's welfare and it should be maintained on a basis that makes the distribution of its costs equitable."

"In the same manner I am in favor of the band and the zoo. They are worthwhile things and Cisco needs them." He declared that the zoo is a wonderful place for recreation.

"WOULDN'T GO BACK," SAYS WM. REAGAN

"I am very much in favor of a municipally supported and operated chamber of commerce," said William Reagan, Cisco agent, this morning. "I wouldn't go back to the old assessment plan at all if it can be avoided, and that is what would happen if this amendment is not carried. I consider the chamber of commerce as about the only medium through which we can work for the development and best interest of our civic life."

BILL REQUIRES LICENSES FOR AUTO DRIVERS

AUSTIN, March 17. — A bill requiring every driver of an automobile in Texas to obtain a driver's license was passed by the senate today by a vote of 26 to 2.

No fee or examination is required for obtaining a license but the bill provides also that habitual drunkards and violators of traffic rules shall have their licenses revoked and not be permitted to drive. That is the main purpose of the bill, its author, Sen. W. R. Poage, of Waco, said.

Every member of the family or any other person who drives an automobile must obtain a license. If a license is lost a duplicate will be issued for a charge of 50 cents. Licenses are to be issued by county tax collectors.

Sen. Tom DeBerry amended the measure to allow issuance of licenses to children above 12 years old. The present minimum age for driving provided in other statutes is 15 years.

The measure now goes to the house.

Two Pilots Recover From Painful Burns

FORT WORTH, March 17. — Two of three American Airways pilots painfully burned when a flaming plane streaked down onto the airport here, remained under the care of physicians today.

M. T. Salter, Dallas aviator and the most seriously injured in last night's accident, was improved today. Merle Brock, 30, of Dallas, probably will be released from the hospital tonight.

PROVIDES FOR CONVENTION DURING 1934

AUSTIN, March 17.—A convention to ratify or reject the 21st amendment repealing national prohibition was approved by the Texas house of representatives today 120 to 5. The bill calling the convention now goes to the senate.

The bill was sponsored by both wets and dries. Under it there will be separate conventions in Austin, September 7, 1934, at which the wets and the dries will each nominate a ticket of 23 delegates.

These delegates will be elected by state-wide vote on November 6, 1934. The delegates elected will meet in Austin on December 21st to ratify or reject repeal. The December 21st convention will be merely a formal declaration of the results of the November 6 election.

No serious opposition met the bill today. Rep. H. H. Ray made a lone fight with much vehemence. He declared that it is not necessary for Texas to have any ratification convention. "You can't have the liquor traffic without the saloon," he shouted. "We do not have to submit the question at all."

LEADERS AGREE ON BEER-WINE BILL

WASHINGTON, March 17.—Congressional leaders agreed today on a beer-wine bill program calculated to put the Volstead modification act before the president Monday and to place a legal bottle in the consumer's hands by April 4.

"You can rest assured," said Chairman Harrison of the senate finance committee, "that the beer bill will be signed Monday."

The bill would become operative 15 days later. House democratic leaders planned to send it to conference today in an attempt to restore the original provision for 3.2 per cent beer.

The senate, in passing the measure last night, reduced the alcoholic content to 3.05 per cent and added wine.

Three issues are in dispute between the senate and the house. The house bill was for 3.2 per cent beer and nothing else.

The senate lowered the percentage and included two other amendments, one legalizing wine and fruit juices and the other prohibiting sale or gift of the legalized beverages to persons under 16 years of age.

Speaker of the House, Rainey said he had no particular objection to the senate amendment legalizing wine. "It will do no harm and no good," he said. "It is an impossible thing. You can't make wine of that alcoholic percentage."

COMMITTEES STUDY FARM RELIEF BILL

WASHINGTON, March 17.—The agriculture committees of both the senate and the house today began a study of President Roosevelt's sweeping farm relief program with a view to bringing it to the floor for action as quickly as possible.

Chairman Smith, of the senate committee, stressed the need of speed. He said the farm aid bill would be passed in the senate as early as possible next week.

70 CHURCHES TO TAKE PART IN B. T. S. REVIVAL

The B. T. S. revival in District 17 of the Baptist churches of Texas will be held next week, according to Rev. E. S. James, pastor of the First Baptist church here. This district includes about 20 counties and 70 churches, he said.

The revival will be under the direction of T. C. Gardner and Grace Conn, of Dallas.

Three general rallies for the Cisco association, including Eastland, Stephens and Shackelford counties, will be held at the First Baptist church here. They will be Sunday at 2:30, Thursday and the following Sunday, the last to include the graduation exercises.

Four books will be taught in the Cisco training school, Rev. James announced. Professor T. R. Havins, Howard Payne college, will teach "Modern Methods," Rev. James "Books of the Bible," Miss Louise Karkalits "Intermediate Manual," and Miss Mary Beth Langston, Howard Payne college, "Trial Makers in Other Lands" for juniors.

PLATE BANISHED

LEWISTON, Idaho, March 17. — To avoid embarrassment, the church board of the First Methodist Episcopal church here banished the traditional collection plate, the collection plates will be replaced by a box in the vestibule.

SIGNALS SHUT OFF

WARSAW, Ind., March 17. — The city council has abandoned operation of Warsaw's two electric traffic signals as an economy move, at a monthly saving of \$15.

WEATHER

West Texas—Partly cloudy tonight and Saturday. Cooler Saturday.

East Texas—Mostly cloudy. Probably thundershowers northeast portion tonight and Saturday.

BETTER TIMES AHEAD.

Cotton and wheat prices made sharp advances yesterday in the first day of trading on the large exchanges since the financial moratorium brought a halt to activity two weeks ago. Bond prices likewise moved upward. On the stock exchanges, where trading was in its second day since the banking holiday, prices bulged up and then reacted to levels comparable with the closing quotations of the previous session. These closing prices, however, were considerably above those of March 3, the last day of business before the presidential proclamation which brought all banking and financial activity to an abrupt halt.

A genuine public confidence was the stimulus behind these aggressive movements. American business men and the rank and file of the nation are confident that the lowest point of the depression has been reached and that there is destined to be an upward move all along the line. One should not expect to read every day of price increases. There will be a slow, progressive movement forward if the signs as they exist now are being read aright, but all along the line of march to a new prosperity there will be set-backs and reactions which have the healthful function of keeping the movement within sane bounds and checking the wild enthusiasm and overt speculation that arise when no restraint is present.

Misfortune teaches forbearance and patience. The misfortunes with which we have been visited during the past two years should have left an indelible lesson in the mind of America. It should have taught us that there is no prosperity but what is wrested by the hands of man from the bosom of mother earth. The day of one hundred per cent profits is gone. Speculators' figures mean nothing. Sooner or later, as in 1929, they must come back for a check with facts and usually, as in 1929, a vast amount of paper must be written off to balance the economic ledger. We have all suffered in the drastic audit that was made of the pre-Hoover era of prosperity. Most of us were loath to surrender our shares of the figurative profits of that period. But whether we wished or not we had to do it, and the sooner done the sooner the way was opened for a saner conduct of our national business. The proud fact that stands unshaken amid the catastrophe is that the solid foundations, the financial integrity of the nation and the rock ribs of American citizenship are still intact, ready to be clothed with a new grandeur.

Times are getting better.

UNCLE ANDY ON HIS WAY HOME.

Andrew W. Mellon, ambassador to the Court of St. James, sails for America today. The grandfather of Uncle Andy sailed from Queenstown in the long ago and made his way to the small village of Pittsburgh on the banks of the Ohio river. He had an eye to business. He had vision. He became one of the largest of land owners and embarked in the banking business and all the sidelines. He laid the foundation and it was a solid foundation for the Mellon millions of 1933.

Judge George W. Bingham, publisher of the Louisville Courier-Journal and the Louisville Times, a very wealthy son of North Carolina and an adopted son of Kentucky, will be the successor of Uncle Andy "at the Court of St. James." Bingham has millions. He is very ambitious. He is said to be very able, to know the ins and outs of court life in the European field of diplomacy and, like Uncle Andy, regardless of the cost, the Louisville publisher and leader will hold up the financial end of the diplomatic game and make life interesting for royalty and for those who bask before the throne of royalty and the near-thrones under English skies.

THIS CURIOUS WORLD

THE LION IS NOT THE KING OF THE JUNGLE!

A BLIND INSECT, THE DRIVER ANT, IS THE REAL KING OF THE AFRICAN JUNGLE. EVERY CREATURE FLEES IN TERROR BEFORE AN ARMY OF THESE INSECTS.

AN OBOE PLAYER MUST HAVE FREQUENT PAUSES IN THE MUSIC... NOT FOR THE PURPOSE OF INHALING... BUT TO EXHALE!

IF AN EARTHWORM IS CUT IN TWO, THE HIND PORTION WILL DEVELOP A NEW HEAD AND THE FORE PART A NEW TAIL.

THE DRIVER ANT, when considered as a lone individual, seems quite unworthy of the reputation it bears. But this little insect is an excellent illustration of the proverb, "In union there is strength." No one knows how many individuals there are in a traveling army of driver ants, but they have been observed to march past a certain point in unbroken lines for two weeks. Natives say the insects can clean every particle of flesh from an elephant carcass in three days.

The Problem of Squaring the Circle

HERBLOCK

Through the Editor's Spectacles

By GEORGE

The county commissioners court has resolute a resolution in which it calls upon all civic groups and other public welfare intended organizations of the county to cooperate in keeping chickens and cows from eating up the neighbor's garden.

Taking its cue from the purported intention of the Civic League of Eastland to convert vacant lots into vegetable gardens the court goes to some length to remind the public that a serious need exists in the matter of food for moneyless families, that certain local laws and sanctions prohibit the free roaming of livestock and chickens over the urban premises and that both urban and rural families in many instances will not be able to grow gardens without assistance. It asks that those with more seed than they need devote a share of them to the aid of these less fortunate.

I am glad to see the commissioners court taking this attitude. One or two of these "snoo-cows"—is that the way you spell what you call a cow when you want to milk her?—cut several wide swaths through my own humble efforts last year. Being without the necessary funds to build a wall about my diggings I stand in dread of similar raids this year. The Johnson grass field whereof I detached a portion to serve the purposes of table economy, is a veritable paradise for dairy animals and sometimes they slip the cable.

Since Wally Wallace has started a farm on his lots in my neighborhood I feel better. With more garden investment Wally is certain to prove an ably ally and when a republican joins a democrat it is a safe bet that a condition of imperative public necessity exists.

A message from San Antonio says that Victor B. Gilbert, erstwhile state representative from the 107th district, in which this county is located, and now an official in the motorbus division of the Texas Railroad commission, has undergone a serious operation in the San Houston hospital there. The message was optimistic about his condition. Mrs. J. A. Clements, Mrs. Joe Shackelford, sisters, and Scott Gilbert a brother, left Cisco yesterday to be with him. Mrs. Clements and Mrs. Shackelford live here and Scott Gilbert at Woodson.

Randolph college students and faculty will sponsor a bake sale at Norvell and Millers tomorrow, proceeds to be used for beautifying the college campus. Dean Isaacs will be the official candy-maker for this sale, he said. Eating pedagogical candy should prove a novelty for many of you folk. Specs cannot afford to make any promises.

Elsewhere in today's Daily News the beautification program now under way at the college is ably described by Frank Langston, of the Daily News staff. You are invited to read that article for a picture of what the Cisco school, under the present splendid administration, is doing in the way of making itself as attractive externally as it is attractive in the field of educational advantage.

Randolph college during the past two years of economic hardships has done more toward making itself self-supporting than it accomplished in all previous years when funds were flush and conditions ideal for its development. Previously Cisco was aware of its existence because of its appeals for support. We have heard little of this during the administration of Dr. Lee Clark, and it begins to look now that we are going to be aware of it for what it has done and what it is. Such a spirit as is being shown by the

school and the splendid manner in which it has weathered the slump testify to the certainty of its becoming a strong, independent institution of inestimable value to Cisco and the surrounding country. A school that has helped itself as Randolph has helped itself is entitled to our support, even our sacrifices.

RIVER BED IS HIGHWAY.
MILES CITY, Mont., March 17.—The frozen stream bed of the Powder River has formed an excellent highway for ranchers of this district. Roads have been blocked by deep snow for months. The farmers were compelled to resort to the river route, many of them driving 20 and 30 miles over the thick ice.

CHESS MATCH STARTED.
CAMBRIDGE, Mass., March 17.—It's Harvard vs. Powell, and a year hence you may learn who won the battle. The Harvard freshman chess team has started a postcard match with the Powell High School chess team of Wyoming. It is expected it will take a year to complete the long-distance match.

COOLIDGE PASTOR INTERNE.
BOSTON, March 17.—Rolf Lium, 25, the Minnesota boy who served as pastor to Calvin Coolidge during the presidential vacation of 1927 in the Black Hills, has been appointed an interne at Massachusetts General Hospital, Lium, who obtained his medical education at Harvard, will enter the hospital next October.

DON'T QUOTE ME

WASHINGTON, March 17.—A deep rumble came through the cracks in the office door of Senator William Edgar Borah. It sounded somewhat like an airplane motor, something like a locomotive going up hill. It called for investigation.

It was revealed that the senator himself was doing the rumbering. When Borah makes a speech, it developed, he first writes it on a piece of paper.

Then he memorizes it. And to do that the senator has found he must lock himself in his office, take a sip of water and then in stentorian tones read the speech aloud, loudly, and in machine gun fashion.

All of which accounts for the strange noises coming from the dignified office of Senator Borah of Idaho.

Now that the government has gone democratic, elephants in Washington are not wanted. Even President Hoover refused to pose beside an elephant on the white house lawn during the last days of the republican administration. Vice president Curtis, usually so obliging about picture taking, also turned down the same elephant posing request.

The elephant pen holders of bronze and marble, which used to decorate many desks on Capitol Hill, all have disappeared. A collection of Siamese teakwood elephants, sent here to David Kaufman, minister to Siam, are causing no end of worry.

They were placed in the archives of the state department, but they are not expected to remain there long.

Don't Smother Body Odor End It!

No telltale M. S. to offend (MEDICINE SMELL)

New deep-pore cleansing now reaches and instantly removes stale perspiration curds. Good-bye, strong-smelling soaps!

CRUEL and unusual punishment is forbidden by the Constitution. And yet—millions of people still punish their friends by smothering body odor with an equally offensive medicine smell!

Now happily the cause of body odor—stale perspiration curds—has been discovered. And research chemists have developed a quick and odorless way to end it instantly.

Stale perspiration contains calcium, salt and particles of fat. The thick and sticky lather of most ordinary toilet soaps is unsuited chemically to mix with this waste material and disperse it. Instead, it hardens into clogging curds!

That's why deep-pore cleansing is needed to remove the objectionable curds—and it is a scientific fact that there is only one way to accomplish this. Kirk's Coco Castile—being a 100% pure vegetable oil

soap—mixes with the particles of perspiration curds, loosens them, then rinses out completely.

Try Kirk's Coco Castile today. Feel the invigorating effect of its deep-pore cleansing action. Experience the thrill of a clean, odorless body. The cake is half again larger, half again heavier than average toilet soaps—an exceptional bargain. It is made by the largest soap makers in America. Be sure to ask for Kirk's by name.

You'll Enjoy the Superiorities of Modern Electric Refrigeration

Foods wholesomely fresh... greens refreshingly crisp... delicious frozen desserts and salads at a moment's notice... a plentiful supply of pure, sparkling ice cubes... constant refrigeration at all times, whether you are in your home or miles away. These are but a few of the superiorities of Electric Refrigeration!

Electric Refrigeration also offers another valuable superiority... Convenience. Frequent shopping trips are eliminated, for the dependable, automatic cold keeps perishables pure and fresh from week to week. This important feature saves money for you in enabling you to buy all your groceries on week-ends—at bargain prices.

And, too, the new Frigidaire offers you priceless health-protection. Foods must be kept at a constant temperature of less than fifty degrees or bacterial action, producing even the slightest food spoilage, makes perishables dangerous to health. The automatic dependability of the new Frigidaire assures this safe temperature at all times.

You need modern Electric Refrigeration in your home. RIGHT NOW prices are low and terms especially convenient. Ask for a demonstration... TODAY!

See the New FRIGIDAIRE Now on Display in Our Showroom Priced as Low as \$160

Do you know that your increased use of Electric Service is billed on a surprisingly low rate schedule... and adds only a small amount to your total bill?

FRENCH PUZZLE OVER NEW TYPE OF BATTLESHIP

By RALPH HEINZEN
United Press Staff Correspondent
PARIS, March 17.—The work on the new French super-cruiser Dunckerque, 26,500 tons, barely started in the Brest arsenal shipyards before Parliament divided over the problem of whether to rush to completion a second such ship, or to build four cruisers of 7,500 tons each as designed by the Navy Department.

Back of it all is a three-cornered cruiser building race with France, Germany and Italy jockeying for position. Germany got away to a good start by laying down three of four cruisers of the "pocket battleship" type, the first of which, the Deutschland, now is ready and the second and third under way.

Germany's fourth cruiser will be laid down in 1934, but it may not be 10,000 tons like the other three. If Germany's claims of "equal rights" are pushed, many French observers would not be surprised to see Germany break the restrictions of the Versailles Treaty and build up to 20,000 or 25,000 tons, with correspondingly heavier armaments.

Italy is concentrating on a building program of speedy, light cruisers of 5,000 to 7,500 tons. France is in a quandary and wonders whether to build big ships to equal Germany, or small ships to maintain an advantage over Italy.

Navy officials point out that there is no shipyard available to build the second Dunckerque. The only yard capable of holding it is at the Brest arsenal, already occupied by the material for the Dunckerque.

It takes nearly four years to build a cruiser of that size, so that until late 1937, France will have nothing to put against the German cruisers. During that time, Italy will be building small cruisers in every available shipyard, always keeping within the Washington Treaty restrictions.

SHIPMENT OF VEGETABLES IN FEBRUARY LOW

AUSTIN, March 17.—Partly because of the February freeze and partly because of low prices, car-load shipments of fruits and vegetables in Texas during the month of February were the smallest for any February since 1928, according to the University of Texas Bureau of Business Research. Only 3,946 cars were shipped during February, as compared with 6,805 cars in February a year ago, according to daily reports from the United States Department of Agriculture compiled by the University Bureau.

Grapefruit loadings made the largest declines in terms of actual cars loaded, only 357 cars having been shipped during February as compared with 1,211 cars in February a year ago. Mixed vegetables accounted for 1,164 cars, as compared with 1,683 cars a year ago; spinach loadings numbered 1,047 cars, against 1,590 cars last year; and only 995 cars of cabbage were shipped, as compared with 1,431 cars in February a year ago.

No string beans were shipped in car-lots in February this year as compared with 55 cars a year ago, and sweet potato loadings declined from 75 in February last year to only 30 cars during the month just past. Carrots accounted for 149 cars this year as compared with 278 cars in February, 1932; only 86 cars of beets were shipped, whereas in February last year 158 cars were loaded; and greens totaled only 11 cars as against 147 in February, 1932. Potato loadings dropped from 25 cars in February last year to only 1 this year.

Oranges alone increased as compared with a year ago; 46 carloads were shipped during February as against 27 in the corresponding month a year ago.

According to the United States Department of Agriculture, the condition of fruits and vegetable crops in Texas on March 1 was not so good as it was a month earlier, and was considerably poorer than on March 1 a year ago. Fruit and vegetable prices dropped slightly during February, the index of the United States Department of Agriculture having declined from 59 in January to only 57 in February. Last year in February, this index stood at 68. This index is based on the average from 1909 to 1914 as equal to 100.

BABY IS TOUGH BOY

SEASIDE, Ore., March 17.—The 18-months old son of Mr. and Mrs. M. B. Rudd is a candidate for toughness honors. He fell out of a second story window onto a frozen ground, got up and toddled back into the house again.

So Fagged Out, Drowsy She Could Hardly Work

"I seemed to be so weak. I would feel so fagged out and drowsy I could hardly do my work," writes Mrs. Lela Adams, of Goveville, Ill. "I was in this condition for some time, till I felt nervous and out of sorts. A friend told me to take Cardui. I did and began to improve. I felt much stronger and gained in weight. Cardui seemed to help me in every way. I have nothing but praise for Cardui."

If you are run-down, nervous, or suffer every month, take Cardui, a medicine used by women over 50 years. As your health improves, you will share the enthusiasm of thousands of women who have praised Cardui for the benefits they have felt after taking it. Cardui is sold at drug stores here.

WILLIAM JENNINGS BRYAN was known as the Great Commoner. Only FOUR STATES in the Union are larger than the Philippine Islands. CORONADO sought the fabled cities of Cibola.

TEXAS TOPICS

By RAYMOND BROOKS

AUSTIN, March 17.—The dramatic creation of the emergency banking law, now a piece of the history of Texas government, showed that no political factionalism is so deep that it cannot be laid aside in critical times.

Leaders in both the main political groups of the state abnegated their partisanship and joined in earnest work to meet a crisis. Import of the crisis could only have been felt in failure of the efforts to meet it. So far as in the power of the executive and legislative authorities of Texas it was met.

One cannot attempt to enumerate all those to whom credit properly is due. But it is fair to say that the youthful Sen. W. K. Hopkins of Gonzales county added permanently to the high reputation he already held. The emergency of the occasion happened to call him especially to leadership in the work; and as odds, and ends of the factional bitterness otherwise well submerged crept out, there was a sharp challenge to his coolness, breadth of vision and constancy of purpose. He met this challenge.

Others labored unselfishly and effectively. Sen. Woodward, for instance, was co-author with Hopkins and Sen. Gus Rusek of the banking bill. Leader of the other forces opposing those with whom Hopkins has been aligned, he brought the full force of his leadership to the emergency bill, and he contributed in high degree to keeping the task above and beyond the quarrels of politics.

Another of the high points was when Rep. McGregor of the house stepped into the breach when the law was seriously threatened with failure not easy to take the emergency vote to make it effective now. Mr. McGregor, always on the other side of the political fence from the man in whom he as a co-author of the bill proposed to confer the extreme and unusual powers, pleaded with house members to forget their own views and manfully meet the crisis. His plea won.

Messrs. Kayton and Patterson, who with McGregor piloted the bill in the house, carried on a consistent and effective parliamentary battle. It was not easy to take the emergency bill, at a time of near-hysteria and to carry it through to the quick enactment necessary if it were to serve at all. Friends and foes alike in other matters did not hesitate to praise the governor for wise and courageous action in dealing with the critical situation that suddenly threatened the whole financial fabric of Texas.

In big things like these, the petty squabbles over petty matters are brushed aside.

WOODEN WEDDING GOWN HOQUIAM, Wash., March 17.—Wedding gowns of wood. A Grays Harbor couple, Alice Geissler and Orville Rayl, were bride and groom in a mock wedding here at the Harbor plywood plant before a newsreel camera. Miss Geissler and her bridesmaid wore plywood gowns while Rayl and his best man used wooden cylinders for suits.

DeMille Gives First Epic to Talkies

The first Cecil B. DeMille spectacle-drama since the advent of sound, "The Sign of the Cross," opens Sunday at the Palace theatre for 2 days only.

He made the greatest spectacle of silent pictures, the memorable "Ten Commandments," and entered the Hollywood lists anew determined to surpass even that achievement. When Mr. DeMille looked at the "rushes" of the new picture, he seemed content.

Fredric March, as the heroic pre-

fect of old Rome sacrificing wealth, position, even life for love of a Christian martyr-maid, is said to have the most virile role of his career. Elissa Landi, Claudette Colbert and Charles Laughton have the other principal roles.

The story was adapted to the screen from the famous play by Wilson Barrett. Its principals are supported by an ensemble of 7,500 extra players, the greatest number used in any production since the days of the silent drama.

CONFEDERATE MONEY FOUND. PEKIN, Ill., March 17.—Henry Splittgerber, Pekin, recently had visions of a "nice wad" to help him

through the depression when he found \$112 in a purse hidden in a long forgotten trunk. His visions were shattered, however, when he found the notes were Confederate money.

LIQUOR DISAPPEARED

MEDFORD, Ore., March 17.—What happened to the 143 gallons of alcohol, 50 bottles of gin, 10 gallons of wine and 27 bottles of wine that were stored in the county jail here, is what the grand jury wants to know. Some of the alcohol tins were found to contain water. The rest of the liquor was missing.

BOBCAT CAPTURED

NYSSA, Ore., March 17.—Catching a bobcat while unarmed was the unusual feat accomplished by two youthful Tarzans, Kenneth Carey Elwood Glenn. The youths saw the animal crawl into a rock crevice. Glenn grabbed it by the tail and hauled it into the open while Carey threw his coat over the enraged cat.

Eastland County Rabbits Winners

That Eastland county rabbits are able to hold their own in fast company is evidenced by the fact that three breeders entered 19 rabbits and placed 10 in competition with over 1,000 of the best rabbits ever assembled in the south. This rabbit show held as a part of the Southwestern Exposition and Fat Stock show attracts entries from all over the United States and it takes really good rabbits to win a placing. There were over 40 entries in some of the classes in which Eastland rabbits won high honors.

Hilcrest Rabbitry, of which George Parack is owner, won places as follows: First gray and white Dutch senior buck; third Standard Chin buck; third Standard Chin doe.

R. M. Heron placed: First heavyweight Chin senior buck; third standard 3 to 5 class buck; fifth Standard Chin senior doe.

L. V. Simmons was awarded: second N. Z. red Jr. doe; 3rd N. Z. white 3 to 5 buck; second black and white Dutch senior doe; third blue and white senior buck.

Eastland county breeders also plan to have entries at the Dallas Rabbit show March 24, 25 and 26.

Four New Members For Colored Club

Four new members were present at the meeting of the Thursday Study club yesterday afternoon. The club, which is for colored women, was organized last week under the direction of Mrs. G. B. Kelly, Mrs. J. D. Barker, and Mrs. Wm. Reagan, who were representatives from the City Federation. "Giving the Child the Best Possible Chance" was the topic for yesterday's program led by Mrs. Rachel Haynes. A constitution and by laws will be adopted at the next meeting, it was reported.

The eleven members present pledged themselves to work for the improvement of the community.

2.3 Per Cent Drop In Lumber Output

AUSTIN, March 17. — Lumber production at Southern pine mills averaged 169,981 feet per unit during the month of February, according to reports to the University of Texas Bureau of Business Research by the Southern Pine association. This average output represents a decline of 2.3 per cent as compared with that for January but is 8.3 per cent greater than production by the same units in February a year ago.

Shipments, however, increased during February to an average per week of 167,316 feet per unit, as compared with 161,569 feet per unit during the preceding month. Last year in February, shipments averaged 197,048 feet per unit each week. Average weekly shipments exceeded output by 6,335 feet per unit, or 3.9 per cent during February.

Unfilled orders at the close of February amounted to only 450,561 feet per unit, less than three weeks' run at current operating schedules. At the corresponding time last year, unfilled orders reached 543,449 feet per unit.

Commissioners Court Asks Citizens to Assist in Protection of Home Gardens

In view of the fact that home raising of vegetables to supply food with the largest possible economy during these bare times has gained wide proportions over the county, particularly among the destitute, the county commissioners court has issued a resolution calling upon the county in general to assist in the protection of these gardens. By such cooperation, the resolution points out, the public will help to provide a relief that cannot be adequately sustained from other sources due to restricted finances.

It is called to attention that county laws and civic ordinances prohibit the running at large of poultry and livestock, and citizens owning such stock are requested to keep them securely penned. Those with surplus seed are asked to divide with the fortunate families. Civic organizations are requested to exert influence to aid the movement, and public officials to see that the laws and ordinances are strictly enforced.

The resolution reads:

WHEREAS, it has been called to the attention of the Commissioners' court that the Civic League of Eastland has arranged for the use of vacant lots which are to be plowed and provided along with a limited amount of garden seed to needy families for use in growing gardens for home use.

Recognizing the real merit of this movement, we most heartily commend it to other civic organizations throughout the county to the end that every needy family may have an opportunity of growing a portion of its food supply; and

WHEREAS, it is now evident, due to financial condition of the county, the Commissioners' Court will not be able to co-operate during this year to the extent it did in 1932 in the way of assisting its citizens in securing cans and foodstuff for canning purposes; and

WHEREAS, the running at large of livestock and poultry which is prohibited by law as well as civic ordinances, would be very detrimental, if not altogether ruinous, to growing gardens; and

WHEREAS, there are both rural and urban families who will not be

able to plant said gardens and crops without some help; being convinced that many of our more fortunate families have a surplus of seed of some kind which they would be more than glad to supply some family who has none if only some way was provided for them to do so.

THEREFORE, BE IT RESOLVED that the Commissioners' Court most respectfully request and earnestly urge the following: the careful consideration of the above movement by all civic or other organizations of the county; the fullest co-operation on the part of our entire citizenship in keeping their livestock and poultry enclosed on their own premises; that all county, precinct and municipal officers take such steps as are necessary to the end that the above mentioned laws and ordinances be strictly enforced; that a generous well known and ever practiced by our citizens be manifested in the dividing of such surplus seeds with the needy and to further this end, we urge that in towns and rural communities places be designated for the receipt and disbursement of such seed supplies.
