DAILY BIBLE THOUGHT

THE FIRST AND THE LAST:—I am the first, and I am the last; and besides me there is no God. . . . Is there a God besides me? yea, there is no God: I know not any.—Isa. 44: 6, 8.

COSTLY EVIL DOERS.

The lawabiding citizen pays a pretty high rate for his crime.

As ambiguous as that statement appears it is nevertheless true. For instance one character whose stripe has been pretty well established by the attention the county has been required to devote to his activities, has cost the county in fees and costs incident to arrest, arraignment and so forth in excess of \$1,000. This does not include costs of the institutions which the public must maintain to preserve the peace and dignity of the commonwealth and to punish violators of that peace and dignity.

Since the character mentioned has just recently further established his career by whittling upon the body of a good and inoffensive citizen, it can be inferred that all the expense and trouble that the county has been put to has been so much money and effort wasted.

The man in question was under sentence to the state penitentiary at the time for robbery. His case had been affirmed by the high court, but meanwhile, in the protection afforded by the due process of law in this good and fair land of ours, he was running about as free as the most honest citizen, with the privilege of filling his skin with rotten liquor and almost murdering another man who was going about his business in the peaceable way that it is the right and privilege of every honest citizen to do.

The officers who enforce the law, the courts that interpret it, and the state's attorneys who prosecute violators cannot be blamed for the loop holes in the law. The constitution and the legal codes based upon it can work in two directions at once—sometimes they seem to work in a dozen ways at once. But it seems that there should be some way of dealing firmly and conclusively in cases where an incorrigible threat to the public safety and peace has been established.

HOW MORE INDUSTRY.

A new and thought-provoking slant upon the agitation for more industry in Texas is supplied by Peter Molyneux in a recent issue of the Texas Weekly—a slant that the Cisco chamber of commerce in common with its sister organizations can contemplate with profit. Texans, says the Weekly, are accustomed to think of new industry in terms of raw materials. For instance Cisco thinks of new industry in terms of natural gas, oil, cotton or other agricultural crops with practically little relation to how the manufactured products are to be disposed of.

But industrial development, points out the Weekly, should be approached from the standpoint of what we ourselves, the market immediate to the contemplated development, buy and use and consume. That is the factor upon which actual development is being in a large measure based.

Raw materials are a very small part of the cost of a manufactured article. It is the labor that enters into the making of goods that industry sells—the service, in other words, that it performs in providing the goods for the market.

"What we need in Texas is to produce more of the manufactured goods which we use and thus increase our industrial population to consume farm products other than cotton. Fabrication of raw materials is all right. But fabrication is not consumption. And it is consumption of products that makes the market.

In the light of this fact Cisco is in a strategic situation. It not only has a large market adjacent to its doors but it has other factors that are more important than the availability of raw materials, namely, fuel, water and transportation. If a program of industrial development which takes into consideration the factor mentioned by the Weekly can be prosecuted here there is no reason that a small beginning cannot be developed into a great asset, supplying payrolls and population, if—

We have that other essential of such prime importance, mentioned by Mr. Molyneux.

That essential is enterprise.

Industrial development invariably has small beginnings. Big factories are the result of the establishment of small shops by forward-looking, courageous and energetic men who see a need and undertake to supply it. "It is a great deal more important," says the Weekly, "to have an enterprising man in your community than to have raw materials of any kind."

The Weekly does not attempt to disparage the fact that Texas industry should endeavor to give the utmost consideration to the raw materials of its own land. What it contends is that Texas should not place the cart before the horse by thinking first of the fabrication of its farm products and other products. The demand for the manufactured articles is what determines industrial success and ultimately the success of the grower of the raw materials. Hence, wisdom dictates a policy that will first consider demands and later the means of supplying those demands. The home market and the constant improvement of the home market should be foremost considerations in the minds of the budding industrialist.

"The chief reason we should have cotton factories in Texas," says the Weekly, "is not that we are large producers of cotton. It is the same reason that we should have silk hosiery factories in Texas."

And Then Came the Storm!

In the Political Arena

By HUGH NUGENT FITZGERALD

And it has come to pass for the first time in many years that rough riders of the house of representatives, regardless of party, bolted the leadership of the majority as well as the minority and by an overwhelming vote smashed the manufacturing sale tax proposal of the revenue measure reported by the democratic ways and means committee. As insurgents following independent leaders these rough riders made history when they assumed control defied the constituted authority as well as Herbert Hoover, president; Ogden Mills, secretary of the treasury, and all concerned, from the White House down. They tossed aside the speaker of the house; they tossed aside the majority leader, Rainey of Illinois; they tossed aside Acting Chairman Crisp of the house ways and means committee who was in charge of the bill. The measure was slashed unmercifully and emasculated until it was a skeleton of its original self. From president to the democratic house leadership the positive assurance was given that the sales tax would place in the treasury \$650,000,000. It was gutted from fore-line to finish line by the rebels who swept everything before them, and voted down the bill with an enthusiastic frame of mind and roar of applause that rang from the American world.

Well, another bill must be drafted. It must yield \$1,096,000,000. Mind you the bill tossed aside originated with the ways and means committee. It originates revenue measures and that committee spent three months in its formation and watched it in the final turn into scraps of paper. It is said only 30 democrats voted for the house bill in the final showdown. Majority Leader Rainey begged like a Trojan warrior leading a forlorn hope. This was the conclusion of his appeal for support of the bill. "Every business in the country, is depressed because this government has not been able to sell its securities at the price

they should bring." It is a matter of record that the rebel rough riders of politics won four inserted into the bill amendments boosting income taxes and surtaxes and exempting many articles of merchandise and food and farm machinery and tools to which Acting Chairman Crisp agreed in order to save the face of the ways and means committee. He sought an amended bill which would carry the stamp of approval of the democratic majority.

When defeat overwhelmed the democratic house organization Crisp offered in turn control and responsibility over the democrats who rebelled and sent a so-called democratic measure through the slaughter house to a bloody grave. In their hour of victory the rough riders declined to accept leadership for the future or the responsibility and labor involved in the drafting of another revenue measure. Now the acting chairman of the ways and means committee, Crisp of Georgia, the brilliant son of a brilliant father, is on record as having said he would urge the committee to follow the original Hoover-Mills-Mellon program calling for an increase from 2 to 3 cents in first class postage to bring in \$135,000,000; a 1 cent gasoline tax to yield \$165,000,000; a 2 cent stamp tax on bank checks and drafts to net \$97,000,000; a five per cent levy on automobiles; a three per cent levy on trucks and 2 1/2 on motor parts, to bring in \$100,000,000; an increase of one-sixth in the excise tax on tobacco to net \$58,000,000. He announced other proposals to be considered are seven per cent levy on domestic electricity and gas, a stamp tax on real estate deals, and a five per cent tax on radios and phonographs.

Well, political hell broke loose under the big Washington dome and the democratic measure was consigned to the grave. Now it is possible that the democrats of the house in their new bill will insert the program of Uncle Andy, now ambassador to the Court of St. James and at 77 very active, very powerful, very keen, and very wise. He is a billionaire and it appears that the voices of billionaires are whispers only by the time they reach the ears of the house rough riders who have been the smashers

democratic leaders. Speaking of democrats, he said, "It is their bill and the next move is up to them. They have been criticizing the way in which we have run the house for years. Now this is their baby. I am in favor of sitting back and waiting for their next move."

A prediction: Presidential nominations may be made in the city on the banks of Lake Michigan long before the congress now sitting will force through a compromise measure of revenue raising and pass it on to the white house.

NEW FORD V-8 WILL BE SHOWN IN 200 CITIES ON MARCH 31

DETROIT, March 29. — The new Ford V-8 will be shown to the public of 200 cities in the United States and Canada Thursday, March 31. Announcement of the date, made today by Edsel B. Ford, president of the Ford Motor company, brought to a culmination months of preparation on the part of the Ford organization, which is giving employment to 100,000 Ford workmen.

Ford manufacturing and assembly plants are supplied by 5,300 other manufacturing plants throughout the country.

One of the chief factors in the Ford announcement is the confidence shown by Henry and Edsel Ford that a measure of business revival is possible to the country at this time.

"We know exactly what the car will do," Mr. Ford said. "One of our objectives has been to develop an eight cylinder engine with plenty of horsepower and yet so simply designed that its simplicity will be as much a feature as its speed and power. That enables us to build and sell it at a price to fit the average present American pocket-book. I'll say candidly we have quit figuring costs on the car. The more you figure costs the higher the price goes, and this is no time for high prices. Time and money have not entered into our calculations. We have believed it our duty to do everything necessary to start employment again. Now we are ready to go ahead. Next Thursday the country may judge our work."

New Four Cylinder

"In addition to our eight cylinder car of 65 horsepower, we are offering a new four cylinder car of 50 horsepower. Either may be had in 14 different body types. Except for the engines, there is but little difference between the two cars. Bodies and chassis are practically the same. There will be, however, a difference in price. For while the V-8 will sell at low-price field figures, the '4' will sell for still less. That is our conception of expanding service to the motoring public, particularly in the face of present economic conditions."

Simultaneously with the announcement of the presentation date the Ford Motor company made public the following details:

The new Ford is large, long, roomy, fast, powerful and alert. Its V-8 engine develops 65 brake horsepower. The new Ford V-8 is capable of 75 miles an hour.

Fourteen body types of modern streamline design are offered. The four cylinder engine, developing 50 horsepower and capable of 65 miles an hour, also can be supplied with any of these body types at a lower price.

The new car embodies a number of outstanding features including a silent synchronized gear shift and bent gear, engine rubber mounted down draft carburetor and carburetor silencer, automatic spark control, and a diaphragm type pump which drives fuel from a tank in the rear. There are also soft, flexible transverse cantilever springs and a newly designed rear spring; self-adjusting Houdaille double-acting hydraulic shock absorbers, large four wheel brakes, newly designed electrically welded steel-spoke wheels with large hubs and hub caps and large tires. The chassis and running gear are cushioned by rubber insulators in the spring shackles and shock absorber links. The body is insulated from the frame by rubber pads.

Graceful Bodies

The bodies are fresh and modern from the gracefully rounded V-type radiator to rear bumper. The streamlines are carried out by the low hood, with its rustless steel steel center strip, the slanting safety glass windshield, and rounded roof line. The convex lamps, full crowned fenders and long, low running board harmonize with the balance of the design.

Body interiors are roomy and

richly furnished. Seats are of new style, designed for the utmost comfort. Driver's seats in all closed cars are adjustable. A large ventilator is provided in the top of the cowl. The instrument panel is oval and has a rustless steel mounting strip. Inside sun visors, which fold out of the way when not in use, are provided in all closed cars.

The new Ford V-8 engine is compact and remarkably free from vibration. Overlapping impulses deliver the power in a smooth constant flow.

The engine is of the 90-degree V-type, having an S. A. E. rating of 30 horsepower and developing 65 brake horsepower at 3400 r. p. m. The 65 pound crankshaft, if of the 90-degree type with its four cranks at right angles to each other. The counter weighted crankshaft is statically and dynamically balanced. The crankshaft, connecting rods and pistons also are in balance so that the engine operate with remarkable smoothness at all speeds. Pistons are of aluminum alloy and have three rings, the lower acting as an oil-control ring.

Cylinder blocks and crankcase are cast in one unit, giving exceedingly rigid engine construction. New type valves, with mushroom ends, operate from the camshaft.

Connecting rods from opposite pistons are placed side by side on each crankshaft throw. These are mounted on new floating steel bushings, babbitted inside and out which serve to give the benefit of the full crankpin bearing area to each connecting rod, thus affording longer wear.

The cast aluminum cover embracing the intake manifold forms the top of the engine, giving it an unusually finished appearance. The down draft carburetor and the fuel pump are mounted on this cover.

The gas is pre-heated in the intake manifold by a hot spot created by hot exhaust gases surging back and forth through a small passage in the manifold cover plate. Exhaust ports are on the outside of the engine blocks, the left exhaust pipe being carried around the front of the engine.

The distributor operates directly from the front end of the camshaft, eliminating the use of interposed gears. Spark control is automatic. Crankshaft and crankpin bearings are lubricated by pressure as are the main bearings of the camshaft. Pistons and valves are oiled by spray and splash.

Flying Hunters Kill Off Coyotes

CHADRON, Neb., March 29. — Western Nebraska's ranchmen are taking an interest in a new sport—coyote hunting from airplanes.

The sport interests them for two reasons. It provides a thrilling hunt and at the same time eliminates one of the west's worst remaining threats to cattle herds.

Chief exponents of the new sport are Dallas Skiles and A. H. Watson, who, in a month's hunting during last winter, killed 50 coyotes. The bounty on coyote heads and the sale of the pelts brought the two flying huntsmen \$350.

The two have utilized a small pusher-type airplane. Skiles, the gunner, rides in the front cockpit. He faces the raw winter wind and keeps watch for game. When a coy-

666

666 Liquid or Tablets used internally and 666 Salve externally, make a complete and effective treatment for Colds.

Most Speedy Remedies Known.

ote is sighted, he stands as a signal for Watson, the pilot to level off to an altitude within range of the animal.

Both men have become proficient in their type of hunting. Watson maneuvers the plane at about 75 to 100 feet elevation following the fast running coyotes. Skiles standing in the speeding plane, has learned to fire accurately at the game.

The two have hunted over the northwest Nebraska badlands, the wild sandhills region and the plains of this section.

Offer of Gun Halted Plans for Suicide

PITTSBURGH, March 29. — Re-cruits in the French Foreign Legion driven to despair by the hardship of the rigorous lives they lead, usually cancelled their threats of suicide when their captain proffered his pistol for the act.

That was his experience, Captain Edgar Hamilton, the only American officer of the famous corps, told students of the Carnegie Institute of Technology here. Once, however, that method did not work, Captain Hamilton said.

"When a recruit tells me he is going to commit suicide, I agree 'Suicide? Fine, use my revolver,' I answer. I take the revolver from my desk, load it and hand it to the man. One man did not refuse it.

"He took the gun and saluted. 'Oui mon Capitaine,' he answered.

and left my tent. I heard the shot almost immediately. 'Usually, however, the offer has the desired effect and the recruit decides to live.'

Life in the Legion is neither romantic nor even adventurous as a rule, the Captain said. Most of the

Legionnaire's time is spent with picks and shovels working on roads bridges or other construction.

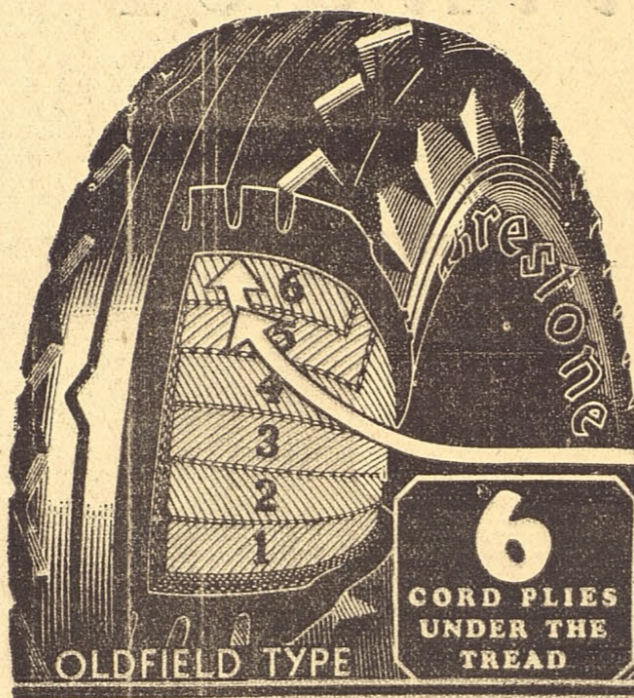

There are about 50 Americans in the Legion at present, Hamilton said and about 30 of them wish they had not joined. It is impossible to leave the Legion, however, until the five-year enlistment is over, he said.

At the Cooking School Miss Allen will stress the importance of keeping the hands soft and smooth. She recommends for this purpose

CALENDAR

Wednesday
The Humble Bridge club will meet Wednesday afternoon with Mrs. Pere Booth at her home in Humboldt.

Mrs. Ralph Smith will entertain the Happy Thimble Sewing club Wednesday afternoon at her home, 401 West Third street.

The White-Away bridge club will meet Wednesday afternoon with Mrs. R. C. Fain.

Mr. and Mrs. Henry Wilson of Wichita Falls spent Sunday with Mr. and Mrs. George Winston.

Mrs. O. W. Ford, Ernest Elliott, and Cecil Elliott left yesterday on a trip to Dallas.

Mr. and Mrs. F. A. Herndon of Longview spent the weekend with Mr. and Mrs. S. R. Herndon.

Mayor and Mrs. J. T. Berry left this morning on a trip to Stanton.

Mr. and Mrs. E. O. Hendricks are spending today in Cross Plains.

Mr. and Mrs. Marvin Osburn spent Sunday in Mineral Wells.

Mr. and Mrs. Scott Noble of Carbon visited relatives in the city Sunday.

Oliver Thomas spent yesterday in Anson.

Miss Martha Graves left this morning for Fort Worth, where she attends T. W. C.

LeRoy Kennedy of Arlington was a Cisco visitor yesterday.

Mr. and Mrs. Fielding Lee have returned to Midland after a short visit here.

Mr. and Mrs. E. J. Kinard of McCamey are in Cisco to attend the funeral of J. H. Martin.

Miss Ova Brown has returned to Fort Worth after a weekend visit here.

Mr. and Mrs. B. W. Patterson of Eastland visited relatives and friends here Sunday.

Mrs. Leonard Meadows of El Paso is visiting in the city.

Mr. and Mrs. H. L. Kunkel and daughter, Mattie Lea, visited Mr. and Mrs. Chas. Murphy in Eastland Sunday.

Miss Jimmie Yarbrough of McCamey is visiting relatives in Cisco.

Mr. and Mrs. Tom Bruce of Cross Plains were visitors here Sunday.

Mrs. L. C. Moore has returned from a visit with relatives in Roman.

Mrs. Jack Phippen and Mrs. R. B. Gustafson were visitors in Abilene yesterday.

Misses Marie Russell and Mazelle have returned from a visit in San Antonio.

Mrs. R. L. Clinton of Putnam was a visitor in the city today.

Miss Frances Cotton of Eastland was in Cisco yesterday.

Miss Mary A. Phipney of Fort

Worth spent the weekend with Mrs. Don Andrews.

Miss Sybil Sochran has returned from a visit in Waco.

W. E. Tyler, W. Kuntz, and Bill Shultz were visitors here last evening.

Maurice Mancill of Abilene was in Cisco on business yesterday.

Mrs. E. Wagstaff has returned from a visit in Roman.

Mrs. Mary E. Townsend, Mrs. B. Elliott, and Mrs. J. Terry of Moran were Cisco visitors yesterday.

EGG HUNT ENJOYED AT STORY HOUR.
An Easter egg hunt was an enjoyable feature of the Mother's club story hour Saturday afternoon which was directed by Mrs. H. V. Price and Mrs. S. W. Coplin. Violet Elliott and Leonard Bean won prizes in the hunt which was conducted at the Electric Park. Preceding the hunt stories were told at the clubhouse on West Seventh street.

Those attending were J. V. Heyser, Mary Beth Heyser, Mary Caldwell, Delwyn Dill, Violet Elliott, Betty Sue Witten, Leonard and Juanita Bean, Bobby Price, and Sandra Jean Coplin.

MRS. CROWNOVER HOSTESS TO Y. W. A.
Mrs. Allan Crowover was hostess last evening at a meeting of the Y. W. A. at her home in Humboldt.

A short business session was conducted by the president, Miss Mattie Lea Kunkel. The devotional was led by Miss Mattie Lea McIntosh, and the study on "Glimpses of Missionary Life" was given by the counselor, Mrs. Crowover. During the evening, "Pals" were revealed, and new names were drawn. A delicious salad course was served at the refreshment hour.

There were two new members present, Misses Lorene Hicks and LeClaire Harrison. Others attending were Misses Louise Karkalits, Laura Jo Ashbury, Iris Renfro, Mary Beth Langston, Lucille Hicks, Frances Caldwell, DeAlva Graves, Jennie Lee Mathews, Mattie Lea McIntosh, Blanch Mathews, Marie Kennedy, Lois Richardson, Mattie Lea Kunkel, Fern Warren, Yonnie Ray, Dalia Sures, Beatrice Stewart, and Mrs. A. Crowover.

Board of Stewards Will Meet Tonight

The board of stewards of the First Methodist church will meet this evening at 7:30 at the church in an important called session. All members are urged to be present for this meeting.

Karkalits Home Damaged by Fire

Damage to the extent of about \$1,000 was done to the home of C. S. Karkalits, 808 West Ninth street Sunday afternoon when it caught fire, probably from defective wiring. The blaze originated in the roof and was not discovered until passers-by notified members of the family, who were in the sitting room, that the roof was blazing.

An alarm was received at the city fire station at 2 and the firemen quickly extinguished the flames. Most of the furniture was carried from the house and sustained little damage. The roof was practically destroyed, however.

The building is owned by Mr. Karkalits and was covered by insurance.

CANDIDATE
MEXIA, March 29.—George W. Whittingham has announced as a candidate for the legislature on a program opposing "military autocracy" and favoring equalized taxation.

INCREASES AREA
HARRISBURG, Pa., March 29.—Pennsylvania added 116,400 acres to its state forest area during 1931 at an average cost of \$2.97 per acre. The purchases brought the state forest total to 1,500,000 acres.

IS ASSISTANT
BUTTE, Mont., March 29.—If names mean anything, the peace should envelope the headquarters of the Deer Lodge National Forest. The assistant to the supervisor is Miss Olive Leaf.

FOUND 27 NUGGETS
GRANTS PASS, Ore., March 29.—Twenty-seven gold nuggets, totaling in value about \$100 were found by Mr. and Mrs. Robert Burns of Lenand during a week's prospecting along Grave Creek.

KITTENS WIN CONSOLATION TOURNAMENT

The Randolph Kittens, hounded by fate that removed three of its best players from the lineup just as the national A. U. tournament opened at Shreveport, last week came out of the annual melee with a beautiful silver cup in spite of that fate.

The cup reported championship of the consolation tournament won by the Kittens when they defeated the Lyns Business college, of Shreveport 51 to 37.

Regulars who were not able to play in the game with the Cyclones—the game in which the Kittens were eliminated—were Marie Russell, D. Fulford, all-American forward, and Bess Farleigh.

The defeat by the Cyclones was the only loss sustained by the Kittens out of five games played en route to and at the tournament. Saturday preceding the opening of the contests the Kittens defeated the strong Bowder Ice company team at Fort Worth by seven and

were in good spirits. Loss of two other star players, however, crippled them so seriously that they were not even a threat when they took the floor against the champions.

Tommie Swindle, of the Kittens captured second place in the national free throw contest by looping 39 out of 50 tries. A Lyns player set a new girl's record and tied the national boy's record by sinking 47 of her 50 shots.

FIFTEENTH SEIZED
SAUGUS, Mass., March 29.—A million dollars worth of property—1-16th of the town's entire valuation—was seized by town authorities during 1931 to force the payment of overdue taxes.

PLAN MUSEUM.

MAY ORGANIZE
CHARDON, O., March 29.—Maple syrup producers are thinking of organizing like the fruit growers in California and Florida. Need of an organization to exploit the profitable maple syrup industry is seen in the numerous letters received from all parts of the United States requesting shipments.

here, a section of narrow gage railway track, and an old logging camp complete with bunks and cooking utensils will be included.

IS AUCTIONEER.
HONEY CREEK, Wis., March 29.—The best known citizen of this village is an auctioneer, painter and decorator, but he'll stop work any time to talk baseball. He is Gerald (Ginger) Beaumont, for eight years a star outfielder with the Pittsburgh Pirates. Beaumont went to the Pirates in 1898 after a season with Connie Mack's Milwaukee club of the Western association. After playing with the Boston Braves, the Chicago Cubs and St. Paul, Beaumont retired to his "Centerfield" farm, near here, in 1911.

Orange—Russell Coleman opened cleaning and pressing shop at Green Avenue and Ninth street.

American Beauty Flour

BEST FLOUR --- MOST ECONOMICAL

Demonstrated at the Cooking School

The flour that for forty years has been accepted and approved by the best Texas housekeepers as the highest quality and the most economical for Bread, Rolls, Biscuit, Pastry, Cakes and for all home baking.

When you have used it you will readily understand why the housekeepers who used AMERICAN BEAUTY FLOUR won all of the 154 prizes offered by the State Fair of Texas in the Baking Contest in 1931—144 prizes at the Texas State Fair in 1930, and 66 prizes at the All West Texas Exposition in San Angelo in 1930.

AMERICAN BEAUTY FLOUR is distributed by J. M. Radford Grocery Company and sold by all leading Grocers.

Ask the demonstrator at the Cooking School why AMERICAN BEAUTY FLOUR is not only the best but the most economical flour to use in the home.
