ost of living. It has been climbng steadily. Department of Labor statistics show that it has gone up 1% since 1939.

But wait a minute! National iverage figures show that the cost of electricity has actually been coming downward. Since 1939brough years of war and shortages, rising prices and higher taxes the cost of electricity has decreased 14%!

Actually, the average American family is now getting twice as much electricity for its money as it did 20 years ago. Never has electricity done so much for so little.

Your friends and neighbors in this company-under sound business management - made this possible.
