f Isabella had ice cubes ...

Chistopher Columbus would never have discovered

Isabella, Queen of Spain, had caskets full of jewels. She had velvet robes and silken gowns and handsome hand-made shoes. But she had no electric refrigerator! So the jewels were pawned. Three little ships set out against the sea. And Columbus happened on America back in 1492.

Fantastic? Not really. In Isabella's day, they tried to keep food from spoiling by spices brought overland at great expense from India. Columbus believed he could reach the Indies by sailing westward on the unknown Atlantic. The rest is in history books. Poor Isabella, with all her clumsy luxuries, never dreamed of ice cubes - nor any of the miracles of modern electric living!

Though electricity plays such a great part in today's comforts and conveniences - you're scarcely conscious of electric service. That's because it's always on hand - ail you want - at little cost.
