to have touch call, or push button, Cashion explained that touch call service allows customers to tap in the number they're calling, instead of the slower, rotary dialing method used in the past. "Touch calling is the easiest way to place your calls," Cashion said, "and most customers say it's much quicker and they get fewer wrong numbers."

> Cashion also announced that during the period from June 20 through August 19, customer orders for Touch Call service will be worked for no connection charge. This is a savings of at least \$35. When customers connect their line to Touch Call, they will need to purchase a Touch Call or push button telephone. This purchase can be a savings also, as owning your own telephone will reduce your monthly rental charges. Cashion advises interested customers to call for details and ordering information by dialing 1-854-1555 (no charge).

### HINTS FOR ADVERTISERS

When you next call The Review, 725-6111, to place a classified ad, remember that words are your business. Words properly put together in an ad mean more phone calls and more sales for you. Follow the rules below and get more and faster results.

1. Put in the address

Many out-of-town readers will write you, but will not spend money for a long distance call.

2. Put in the phone number

Many readers will call you but will not find it convenient to come to your home or business.

3. Avoid use of blind boxes

Avoid them if possible. They are difficult to answer and people prefer to deal directly.

4. Put in the price, by all means Surveys show that many people will not answer

an ad unless the price is given. 5. Keep the readers from guessing

On important details it is better to include them if they are relevant to a sale.

6. Be available

If you advertise your phone and address, be sure you are not absent when the ad appears so as to accommodate the reader.
