Ladies Honored At Valentine Banquet Of Lions Thursday

Carrying out the Valentine theme, members of Cross Plains Lions Club honored their ladies at the second annual ladies night celebration Thursday night of last week with a banquet in the American Legion Hall here.

Present at the function was the largest crowd to attend a Lions party since the first ladies night a year ago. Food was prepared and served by members of the American Legion Auxillary.

Dave C. Lee, chairman of the program committee, presented an entertainment calendar which included trombone solos by Gene Greenwood, high school bandsman, and vocal numbers by Pat McNallen, director of the local band.

A highlight of the evening was an unscheduled feature, in which wives and husbands were called upon to tell the gathering incidents surrounding their first meeting with their spouse. Among those who responded to Toastmaster James Alexander's challenge to relate such experiences were: Mrs. Frank Rundell, Mrs. O. B. Edmondson, Mrs. Don L. Purdy, Mrs. A. C. Evans, Mrs. Travis Foster, Claude Foster, Paul Huntington, Jack Scott and Newell H. O'Dell.

Methodist Young People Bring DP Couple To Farm Near Here

Leon Kakulia and his wife Helen of Salzburg, Austria, arrived in Cisco, Thursday noon, February 15 and went immediately to their new home near Rising Star. They came under the sponsorship of the Methodist Young people of the Cisco district who provided their transportation from New York City and secured the home and job on the farm of Ray Agnew at Rising Star, according to the Rev. Leslie Seymour, district superintendent.

Leon, a native Ukrainian and Helen, a Czechoslovakian, were victims of political persecution and fled their native land to take up temporary residence in Austria. From there the Methodist Church through special offerings taken during their week of Dedication brought them to America and the Cisco District youth assumed responsibility for them at the port of entry. In their new home they will have full opportunity to become naturalized American citizens and to make a place for themselves in this land of freedom.

Patch Tests For TB Will Be Given School Kiddos Tuesday

Tuberculin tests for Cross Plains school children will be given here Tuesday of next week, it was announced by authorities yesterday. It is necessary that written consent of parents be secured before the test can be given, and necessary blanks have been provided children to take home for parent's signature. Blanks should be returned to the school by Friday of this week, the Review was told yesterday by Mrs. J. L. Ault, county nurse.

The tuberculin test is approved by the American Medical Association and has the endorsement of Callahan county physicians, reported Mrs. W. P. Brightwell, director of the Callahan County Tuberculosis Association, sponsors of the movement.

The tuberculin test is a simple skin test (no skin is broken or no needle used) that shows

whether or not the child has come in contact with the tuberculosis germ. A positive test does not mean that the child is afflicted with the disease. It does mean, however, that the child has the tuberculosis germ in his body and that he should have a chest X-ray to determine whether or not he has active tuberculosis. Follow-up examinations will be paid for by the county TB Association in cases where parents of afflicted children are unable to provide this service.

Parents are advised that the patches must be left on the children's arm for 48 hours, during which time they must not be wet. The cooperation of parents in seeing that this is observed is urgently requested. The patches will be removed by local school authorities and should not be disturbed by parents or guardians. Results of the tests will be made known on Friday of next week.

The federal government has asked for 16 million bales of cotton this year, and if the goal is met acreage will necessarily be much greater than at any time in recent years.

Funeral services were conducted from the First Baptist Church in Cisco Saturday afternoon at two o'clock with Rev. Ralph T. Wootton, pastor, officiating, assisted by Rev. J. W. Chapman, pastor of the First Baptist Church in Cross Plains.

Drouth Weakened Monday Night As Rain Covers Area

One of the longest drouths in memory of oldest citizens received a sickening lick to the jaw Monday night as rains covered the Cross Plains area, bringing welcomed relief to farmers and ranchmen.

In Cross Plains the precipitation gauged only a quarter of an inch, however, north of town it was reported much heavier. The moisture came on the heels of a recent snow, which came early last week, it had been more than 130 days since Cross Plains had received a measurable amount of moisture.

While the drouth is by no means broken, there is now some possibility of spring oat crops maturing. The moisture is believed sufficient to sprout seed which has been in the ground more than three months. Too, prospects were considerably brightened for grazing, lessening expensive costs of livestock feeding.

Monday night's rainfall was not sufficient to replenish supplies of stock water to any appreciable extent, however, this problem had not become generally acute.

() 2. I favor a two day picnic with carnival attractions, concessions and rides.

() 3. I favor holding no picnic at all this year.

It is requested that everyone who has not yet had a voice in this matter to make known their preference immediately. It is not necessary that "ballot" be signed.

Letters Written 50 Years Ago By Early Settler At Atwell Tell Interesting Story

People who came westward to settle in this section of Texas in the first years of the present century were deeply impressed with the fertility of soil and possibilities of agriculture.

One of the earlier settlers in the Atwell area was Emit Foster, father of D. C. Foster, who still resides in that com-

munity. The Fosters moved here from Limestone county, in East Texas, in 1900. The elder Foster was so impressed with the possibilities of this section that he wrote numerous letters to kinsmen in East Texas, seeking to locate them in this country.

Hereunder are excerpts taken from his letters written about the turn of the century.

"I am well pleased with my place here. I bought a cotton crop for \$40 and expect to make four big bales, if I can get it gathered. I will make about \$100 on it. Pickers get 80 cents per hundred. You would like this country very much."

"I wish you people had the wood that is in my front yard. It would do you all winter. If anyone asks you how I'm satisfied out here, tell them I sure like this country and don't ever expect to make to make old Limestone my home again."

"Tell Pa if he comes out here to bring a wagon and good team. They are after me for wood on every side and the gin man offers \$3.50 per cord. I can get it cut for 75 cents per cord."

"David wants to come back to Limestone and buy a harp and see grandma and grandpa. He says he will let them blow his harp."

"Got cotton picked and made six bales, netting \$135.60. I bought my plows Monday. I got three heel sweeps, two shovels, a steel beam blackland turning plow, a two horse Georgia stock, one double tree, two single trees and lap rings for \$17."

"My smokehouse I am putting up will cost me about \$8 but I wouldn't take \$25 for it."

"If you move to this country bring some good mules; you can get a big price for them in a land trade. You can make a payment on a good place with a team and wagon, often getting as much as \$250 or \$300 for the rig."

"I recently sold my brown filly for \$20 in cash. You said that you could not get over \$20 for a Jersey milk cow. I have been offered \$25 for mine here but won't take that."

The old letters, now yellowed with age, are becoming difficult to read, but all through them are to be found descriptions of this section of the state written in glowing terms. The country was young and the people seemed mighty proud of it.

CARD OF THANKS

We wish to thank Cross Plains firemen for their promptness in removing the threat of fire at our home Thursday morning. We are deeply appreciative of the quick response to our call and the splendid work done by volunteer firemen.

Mrs. Quille Moore Laid To Last Rest Friday Afternoon

Mrs. Quille Moore, 78, who died Wednesday night at 11:15 at the home of her daughter, five miles southeast of town, was buried Friday afternoon in the Midway cemetery, near San Angelo. Interment was made beside the grave of her husband, who died in 1941.

Funeral services were held from the Johnson Funeral Home in San Angelo with minister W. M. Williamson, of the Church of Christ, officiating.

Mrs. Moore had been in failing health for more than two years. She had been at the home of her daughter, Mrs. Emil Ringhoffer, here the past two weeks. Mrs. Ringhoffer is the only one of seven children who survives.

The deceased was born in Alabama November 15, 1872, and moved with her parents to Mississippi at the age of three. When she was 12 years old the family moved to Texas, coming in a covered wagon. The trip from Mississippi to Texas required 52 days of constant travel. She often recalled the hardships of that trip and remembered that livestock had to be hidden at night to prevent raids from Indians.

Other than her daughter, Mrs. Moore is survived by two grandsons and three granddaughters, as well as a host of friends.

Arrangements for the funeral were carefully made by Mrs. Moore several years ago, the plan having been written and left with family papers. Her desires were carried out in every detail.

Pearson Tells People Of Callahan And Eastland Counties New Districts Aired

L. R. Pearson, state representative from the 107th district, comprising Callahan and Eastland counties, has explained the proposals now before the legislature as concern this area in the redistricting which is to be settled at the present session. Pearson's explanation appears hereunder.

Under the 1950 Federal Census it will require a population of about 43,000 to be entitled to a representative in the House. This excludes the big cities because they come under a different provision in the Constitution.

Based on a population of 43,000 for a representative, the over-all picture is about as follows: Deep East Texas, due to a loss in population, will lose in representation. Dallas, Houston and the other big cities will gain materially. Also the area around Lubbock, due to an increase in population, will gain. Likewise, the area around Odessa will gain. The strictly farming area of Texas generally will lose. Our section of Texas, the West-Central area, due to a loss in population, is due to lose in representation.

The preliminary figures on the 1950 census for the several counties in our area are as follows:

Eastland	23,793
Callahan	9,060
Stephens	10,574
Shackelford	4,986
Taylor	63,079
Brown	28,464
Erath	18,376

It looks like District 106 (Eastland county alone) will be abolished and District 107 (Eastland and Callahan counties) will either be abolished or materially changed. There is a bare chance that District 107 will be held intact but the chances are remote.

The following possibilities have been suggested for a representative district in our area. In fact the committee on redistricting is considering the following combination:

Eastland, Callahan and Stephens counties	43,427
Eastland, Callahan and Shackelford counties	37,839
Eastland and Brown counties	52,257
Eastland and Callahan counties	32,853
Eastland and Erath counties	42,169
Callahan and Taylor counties, two representatives. (Callahan would be attached to Taylor)	72,139

It will be impossible, of course, to give every district a population of exactly 43,000. A margin of 10,000 will probably be allowed. In other words, some representative districts will contain as low as 33,000 and others as high as 53,000, adhering to an average of 43,000 as nearly as possible.

That Senatorial redistricting bill originated in the Senate. It was

voted out of the Senate last week. It places Eastland and Callahan counties in Senatorial District number 22 as follows: Clay, Montague, Jack, Wise, Denton, Stephens, Palo Pinto, Parker, Callahan and Eastland. Personally I do not like the arrangement. It ties Eastland and Callahan to counties on the east instead of the west. However, I do not know what can be done about it.

AIR FILLED TRACTOR TIRES PULL BEST IN SAND

A report from the U. S. Department of Agriculture Division of Farm Machinery shows that air filled tractor tires operated more efficiently and economically in sand and loam than tires filled, either partly or fully with water.

In the tests that were run three identical tires were tested under 12 drawbar loads on the two types of soils. All tires carried equal weight, but the method of applying the weight differed.

One tire was filled to capacity with water, another was filled to the top of the rim with water and the third was fully inflated with air. Wheel weights were then used to equalize the total weight of each tire.

Test in sandy soil showed that a 1000 pound drawbar pull there was little difference in the performance of the tires that were filled partly and fully with water. Both were considerably less effective than the air filled tire.

Maximum drawbar pull for the air inflated tire was 1133 pounds as compared to 1085 pounds for the partially filled tire and 1050 pounds for the water filled tire. In loam soil, the air inflated tire proved to be equally superior.

Leave Water Out Of Tractor Tires For Best Results

College Station—Air filled tractor tires operate more efficiently and economically in sand and loam than tires filled either partially or fully with water. This was the conclusion of a report made by the Division of Farm Machinery, U. S. Department of Agriculture and a tire manufacturing company, says W. L. Ulich, extension agricultural engineers of Texas A&M College.

He says three identical tires were tested under 12 drawbar loads on the two types of soils. All tires carried equal weight, but the method of applying weight differed.

One tire was filled to capacity with water, another was filled to the top of the rim with water and the third tire was fully inflated with air. Wheel weights were then used to equalize the total weight of each tire.

Tests in sandy soil showed that at 1,000 pounds drawbar pull there was little difference in the performance of the tires that were filled partly and fully with water. Both were considerably less effective than the air filled tire.

Milk Cows Should Yield 200 Pounds Butterfat Yearly

College Station, Feb. 1—Regardless of the price of dairy products, profit from a milk cow is closely related to her level of production. The truth in this statement is verified by the yearly analysis of Dairy Herd Improvement Association records.

A study of Texas DHIA records for 1949 shows that, if a cow is to pay for her keep, she must produce approximately 200 pounds of butterfat per year. As the level of production increases above 200 pounds the profit per pound of butterfat increases.

A. M. Meekma, assistant dairy husbandman for the Texas A&M Extension Service, says that this greater profit at higher levels of production is due to the wider spread between feed costs and the value of the product. Feed costs increase as production increases, but at a slower rate.

Cows which produced 224 pounds butterfat and less returned an average of \$2.17 worth of milk for each dollar's worth of feed they consumed. Since feed costs make up 50 per cent of the cost of producing milk, the dairyman barely broke even on these low producers. An average of 71 cents worth of feed was required for each pound of butterfat produced by these cows.

At the other extreme of production in Texas DHIA herds, 475 pounds and over, butterfat was produced at a feed cost of only 39 cents per pound. These high producers returned 03.58 worth of milk for each dollar's worth of feed consumed.

Cows producing at the 224 pound level returned \$164 above the cost of feed, while those producing 475 pounds returned \$497 above feed costs.

Although some of the lower producers may not possess the ability to produce at a high level, Meekma says that many dairy cows probably could have done better if they had received better feeding and management.

Each cow has a limit beyond which she cannot efficiently produce, and Meekma reminds dairymen that DHIA records can be used as the basis for removing the inefficient producers from the herd.

WHATEVER CROP GROWS HERE

THE FARMALL C WILL BE THERE, ALL THE WAY!

Grains, grasses, field row crops, vegetables—whatever is planted in this mellow, weed-free seed bed, the new Farmall C Tractor with Touch-Control will be on the job all the way. The Farmall C is shown here with the McCormick No. 10-A Disk Harrow.

For the Farmall C delivers practical 5-way power: (1) at the drawbar, for pulling trail-behind machines; (2) at its mounting pads, for pushing forward-mounted implements; (3) at the belt pulley; (4) at the power take-off; (5) at the Touch-Control power arms for raising, lowering and regulating mounted implements by hydraulic power. All at surprisingly low operating cost!

Available for the Farmall C is a full line of matched, quick-change implement units. New and simple in design, each low-cost implement mounts on the tractor to form a compact operating unit. Rear-mounted implements, likewise, are quick-change.

Implements for the Farmall C are under the complete, 2-way hydraulic control of the Farmall Touch-Control. The Farmall C pulls one 16-inch or two 12-inch bottoms; cultivates two rows of wide-planted crops. Ask for full information.

Parents Asked To Visit Schools During Special Week, March 4-11

In keeping with Public School Week to be observed throughout Texas, March fourth through the eleventh, Cross Plains schools will place special emphasis on the occasion, and invite friends and patrons to visit the local system during that week.

Governor Allen Shivers has issued an official memorandum regarding Public School Week asking all Texans to take inventory of their educational blessings.

"The little red school house which was the symbol of public education a century ago has expanded a network of elementary and high schools, junior and senior colleges which are today a credit to our American way of life," he said.

Superintendent Newell H. O'Dell of the Cross Plains school system has ordered teachers to stress the progress of education in Texas during the past several generations as

a means of familiarizing students with the privileges they now enjoy. "It is my sincere hope that a number of parents, guardians and friends will visit our school and sit in on classes during Public School Week," O'Dell said.

Hundreds of Public Schools Week committees, named in nearly every city and town in Texas, are promoting interest in the programs as outlined by the Governor and in a joint resolution adopted by the Texas House and Senate.

Theme of the program is "The Public School - - Democracy in Action." Objective is to acquaint all the people with the programs and accomplishments of the public educational system.

A special proclamation regarding Public School Week is expected to be issued for Cross Plains next week by Mayor S. N. Foster, and will appear in the next edition of the Review.

The story of a faith that paid off

**YOU KNOW IT'S TRUE BECAUSE IT'S HAPPENED TO YOU
AND YOUR FRIENDS AND NEIGHBORS**

PROBABLY YOU'VE never thought of yourself as a maker of history. But you are. And here is how you, as a citizen of the United States, are creating the greatest success in all history.

Remember back in 1941 when the Defense Bonds you were buying suddenly had to become War Bonds? How you and your neighbors pitched in to buy them in ever-increasing numbers, to back our fighting men and to help achieve the victory of World War II? After V-J Day, when those bonds became Savings Bonds, you continued to buy them because you had learned how regular saving could build security and contentment for yourself and those you love.

The face of the land has undergone some dramatic changes in those years since V-J Day. Now the landscape is dotted with new homes that Savings Bonds built. Thousands upon thousands of new automobiles travel the highways—Savings Bonds cars, bought with the product of individual thrift. On the farms, Bond-purchased equip-

ment has helped produce bumper crops and prosperous years. Everywhere in America, man's urge to get into business for himself has become a bright reality. So has the ambition of loving parents to send their children through college. Time and time again, Savings Bonds have made those dreams and many others come true.

You KNOW they've come true, because it's happened to you or to some of your own friends.

And this is only the beginning of the story. Even after accomplishing so much, millions of American families still enjoy the financial security of owning more than fifty billion dollars—fifty thousand million dollars in Savings Bonds. More than at the peak of war-time Bond holdings!

How much money is that? It's enough to build a new \$10,000 mortgage-free home for every family in San Francisco—and Sacramento—and Salt Lake City—and Denver—and Kansas City—and St. Louis—and Indianapolis—and Cincinnati—and Pittsburgh—and New York City—and the whole state of Texas!

And every week, everywhere in America, new millions of dollars are added to the total—as crisp new Savings Bonds are typed up with your name on them.

Kind of a king-size success story, isn't it? *Your* success story because you and the millions of your neighbors are living it right now. Your own faith in America—your own desire for the warmth of family security and independence—have made the story of United States Savings Bonds the thrift miracle of all time.

For your security, and your country's too, save now - through regular purchase of U.S. Savings Bonds

Louisiana Mother Says Housework is Much Easier

HADACOL Supplied Vitamins B₁, B₂, Niacin And Iron Which Her System Lacked

Mrs. Leo Picard, Church Point, Louisiana, is mighty proud of her two daughters. Wilma Jean, 5 years old, and Juanita Marie, 4. She says it's a full-time job just keeping track of them. It wasn't too long ago when it was all Mrs. Picard could do to just barely get her work done. Now all that is changed . . . now that she has been taking HADACOL. Mrs. Picard found HADACOL helped her system to overcome deficiencies of Vitamins B₁, B₂, Niacin and Iron.

Why HADACOL Gives Such Fine Results
HADACOL does not bring just symptomatic relief. HADACOL now makes it possible to actually relieve the cause of vague aches and pains certain nervous disturbances, and a general run-down, weakened condition when they are due to deficiencies of Vitamins B₁, B₂, Niacin and Iron in your system.

HADACOL not only supplies deficient systems with extra quantities of Vitamins B₁, B₂, Iron and Niacin but also helpful amounts of important Calcium and Phosphorus—elements so vital to help maintain good health and physical fitness.

Why These Vitamins and Minerals Come in Liquid Form
There's a very good reason why HADACOL comes in special liquid form. These precious Vitamins and Minerals are easily and quickly absorbed into the blood stream this way—ready to go right to work. A big improvement is often noticed within a few days.

Don't Be a "Doubting Thomas" After reading Mrs. Picard's wonderful experience with HAD-

ACOL—how can you doubt that this great new nutritional formula will help you if your system lacks Vitamins B₁, B₂, Iron and Niacin?

What HADACOL did for Mrs. Picard it can do for you if you're troubled with vague aches and pains, certain nervous disturbances, insomnia when due to an upset stomach, stomach distress and a general run-down, weakened condition when they are due to deficiencies of Vitamins B₁, B₂, Niacin and Iron.

Slaughterers Here Must Have License To Butcher Beeves

Cross Plains slaughterers and butchers have been advised that if they are not federally inspected they will need to obtain certificates from the Office of Price Stabilization to continue in business.

John Boyle, meat specialist of the regional Price Stabilization Office at Dallas, explained that distribution order No. 1, affecting slaughter of livestock and distribution of meat requires these slaughterers to obtain OPS certificates if they expect to continue slaughtering after April 1.

Slaughterers classed as No. 2 and No. 2a in Texas, Oklahoma, Arkansas and Louisiana should write now to the Regional Office of Price Stabilization, 3306 Main Street, Dallas, for their application forms, Boyle said.

Forms must be obtained, filled out and filed with the Dallas Office of Price Stabilization. Only those slaughterers who file completed forms by March 15 can hope to obtain their certificate before the deadline due to time required to issue certificates, he stated.

Boyle pointed out that this request affects only two classes of slaughterers—Class 2, commercial slaughterers not federally inspected, and Class 2a, individuals who have such commercial slaughterers perform their slaughtering.

On the other hand, federally inspected slaughterers and persons engaging federally inspected slaughterers to do their work for them, should write Office of Price Stabilization at Washington for their applications for their certificates.

Veterans ? Box

Q—Can you tell me what type of evidence I should submit to VA in order to apply for death pension benefits? My husband, a World War I veteran, died recently, but not of service-connected causes.

A—You should submit proof of your husband's death; complete information as to your annual income, and proof of your marriage to your late husband. If either you or your husband had been married previously, you also should submit proof that the earlier marriages were legally dissolved.

Q—I started school under the GI Bill a month ago. I just learned that my school, through oversight, had not yet returned my certificate of eligibility to VA. Meanwhile, I never received subsistence and my tuition hasn't been paid. If the school sends the certificate to VA now, will I get back subsistence and will the school get back tuition?

A—So long as the school sends the certificate back to VA within 90 days of the date of receipt, VA will consider that date of receipt as the date of your entrance into training. Subsistence and tuition payments will begin as of that time.

Q—Is there any limit to the amount of money I can borrow from a private lender under the GI Bill?

A—No. The GI Bill limit is on the amount of VA's guaranty of the loan, and not on the amount of the loan itself.

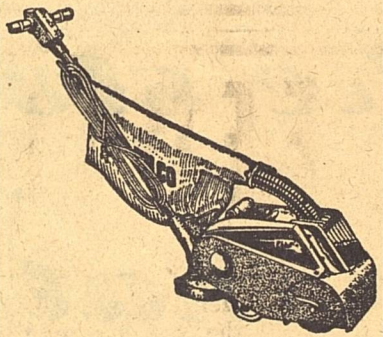

Q—I am a World War I veteran and I have a \$10,000 U. S. Government Life Insurance policy. I am thinking of turning \$5,000 of it in for cash. If I do so, and later change my mind, will I be able to reinstate the cashed-in \$5,000?

A—No. Under the law, U. S. Government Life Insurance surrendered for cash may not be reinstated. However, before you take any steps to surrender your policy, you should write to the Office of Insurance, Veterans Administration, Washington 25, D. C., and ask what courses of action are open to you under your insurance contract that would preserve your valuable reinstatement rights.

Twenty-four dependents of deceased Mexican War veterans were on VA's rolls at the end of 1950. The Mexican War ended in 1848.

By the end of 1950, more than 2,447,000 World War II veterans had obtained GI guaranteed and insured loans having a total value of nearly \$14 billion. Ninety per cent of the loans were for homes; the remainder were for farms and businesses.
