## CRYSTAL SPRINGS

Synopsis.—Idly fishing Her-manos creek, in California, Caleb Warner, civil engineer, and a New Englander, is witness of the end of a coyote pulled down by two wolfhounds, urged on by a girl rider. Admiring the hounds, he introduces himself, and learns he introduces himself, and learns her name is Clinton. With west-ern hospitality she invites him to the ranch to meet her father. At the Clinton home Warner learns his new friend's name is Betty. He is welcomed by her father, Southern Civil war veter-an and owner of Hermanos val-ley. Warner tells them some-thing of his ambitions and his thing of his ambitions and his feeling that he is destined to be a "Water-Bearer." In the town of Golden Warner shares an apartment with his old Columbia college chum, Ted Baxter, care-free and somewhat dissipated worth only splid of his widowed youth, only child of his widowed mother, who controls the family fortune. At a club luncheon Baxter introduces Caleb to Wilbur Cox, leading business man and president of the water company which supplies the needs of Golden. He gives Cox an inkling of his ambitions, and Cox, im-pressed, invites him to dinner that night. During dinner Cox asks Caleb to call at his office next day. He does no and Cox arranges a meeting between Ca-leb and Hinckley the water comleb and Hinckley, the water company's chief engineer.

## **CHAPTER IV**—Continued

-6---"Present that at the gate to the watchman," he said. "He will get you | advantage to have a man up there of his own choosing, on whose reports he In touch with Hinckley. The car is yours for the day."

He waved aside all thanks but he left Caleb pondering why he, with no other medium than Baxter's introduction and the fact that he had been in the same war with Jack Cox, and was a civil engineer with a professed leaning toward water development, should be tendered so many courtesies by this man of affairs. Western hospitality could not suffice for this. He surmised that Cox might be in special need of engineers but such a premise was only barely probable. He found Cox surveying him with shrewd eyes in which a glint of something, that might be either kindliness or humor, shone.

"Anything you'd like to ask me?" he queried. "I shan't sign anything until I come back after lunch, Harry," he said, in dismissal of the secretary. Caleb took the question as a clever method of examination. His inquiries would be apt to show his caliber in short order.

"I gathered, from what your son told me," he said, "and from what I heard of the talk at the table last night, that Golden faced, or was about to face, a water shortage that you considered prejudicial to the progress of the city. Is that so?"

Cox nodded, took a box of cigars from his desk drawer, handed it to Caleb, chose one himself, passed the matches and smoked for a few puffs before he answered.

"There is no mystery about it. It is an unpleasant fact. You are going to see the works tomorrow. I need not cigar. tell you that water is the life-blood of a city. It runs in its mains, in its flushing system, as it does through the arteries and veins of a body. Overbuild, without water, and you have atrophy, as you cannot expect the blood that is sufficient for a child to sustain the body of a full-grown man. We know today exactly how many gallous per capita we must figure on for a modern city with domestic, civic and manufacturing supply. The number of gallons in our reservoirs, divided by that ratio, marks the present limits of Golden's population, of its progress. And that limit is almost reached. "We cannot get more watershed. To dig more wells-there are many artesian wells in the city-would only diminish present flows. Distillation is not practical. Already the lower peninsula is badly off for water. We need a Moses to strike the rocks for us. Perhaps he may come out of the East," he ended, the glint in his eyes plainly a twinkle now. "Anyway, Mr. Warner, there is the situation. There is a fortune for the man who can find a solution for the present shortage. We have some schemes in view but the cost prohibits them. The water supply must be pure as well as plentiful. Filtration alone is a serious problem. "As to yourself? I should be only too glad to say we could use you in such development of Golden's water but none is forward. Would you care to connect yourself with a power company? One is now on paper-blue prints and stock, with the lafter almost subscribed. It will take you up in the mountains. The berth will be open within a few weeks. I can arrange it for you."

By J. ALLAN DUNN. the two thousand, Cal? I don't know Author of "A MAN TO HIS MATE" where else to go and I don't want to "RIMROCK TRAIL" go shouting this thing about all over © By Dodd, Mead & Co. the shop."

"I've got just eleven hundred dollars in the bank here," said Caleb slowly. "If I take up Cox's proposition I'll not "Thank you, I shall be glad to conneed more than two hundred of that sider it," he said finally. "Do you wish to carry me over till the first pay check. I have a house back East I "Make up your mind before the first can sell. The deal might take a week or so. They take their time there to There were sixteen days between pass deeds. But.

then and the first of the next month. Baxter groaned, his head in his Time enough, Caleb thought, to do hands.

"It's got to be two thousand, I'm afraid. You see if she goes away she'd be sore at me. I'd have to make her sore and she'd want the whole thing. And I won't have you selling your house. It wouldn't do any good. She'll a message to call up the apartment change her mind inside of two weeks. It isn't so d-d imminent. She won't have to quit her job for a bit. At a pinch I'll make the mater come through. For the honor of the family !' He laughed sarcastically.

"If she can chip off a hunk of the principal for herself once in a while. she can do it for me-once. The money was meant for me eventually. And, if it's put right up to her, she'll handle the girl, too, rather than hinder her own matrimonial prospects, as a scandal would. Now let's take a run down to the duck club. I'm secretary and I've got to give the shack the overlook before the season opens."

Within the hour, tramping through the marshes to the shooting shack, he seemed to have forgotten his dilemma completely but one sentence, an epitome of Baxter's character, clung to Caleb. "Oh, I can stall along." He remembered, too, the hint of sullen stubbornness that had shadowed the girl's pouting lips.

## CHAPTER V

## **Crystal Springs**

Hinckley, head engineer of the Crystal Springs company, met the car at the outer gate of the property. He was a short, stout, but active man, with gold-rimmed spectacles over shrewd blue eyes about which spread a network of fine lines that spoke for humor and long habit of puckering under sun-glare. He reminded Caleb somehow of an apple, firm and glowing and sound.

They rolled swiftly on through a strange region and a beautiful one. Sometimes they skirted a hillside where chapparal, manzanita and kindred shrubs grew in a shoulder-high tangle that seemed too thick for anything less agile than a squirrel to explore. Beneath them flourished great ferns. Through them Caleb caught glimpses of lakes lying far below, bits of blue far deeper than the sky they mirrored and intensified.

They turned abruptly to their right where the road ran beside a purling stream and boughs knitted overhead. The descent was gradual and the car slid along noiselessly.

"Here's the brick dam, a bit primiture's on my bureau. In one of the silver frames. Just put it there. Oh, days," said Hinckley. h-l!" He threw away his unsmoked

gap in the opposing slopes.

It was a beautiful sheet of water bove the dam, set in the silence of a

wooded canyon but they did not spend

much time with it. Hinckley pointed

directly across the water to a V-shaped

and neutral colors. This innovation in color, with short detachable capes that are buttoned about small, high collars, on some models, and hoods son styles.

Introducing lively d in

"You know nothing of my qualifications," said Caleb. Cox smiled.

"I'll take a chance on my own judgment," he said dryly. "You won't last long if you are incompetent. And you don't appear that. The place is at Beaver Lake, in Stanislaus county. You'll be roughing it for accommodations, of course. But it'll be good practice in western methods. I fancy you'll find them different from eastern. Different type of labor, for one thing."

Caleb did not immediately fill the pause. He had made up his mind to study the Golden proposition. It did not seem possible that he should discover something that Cox and his experts had overlooked on their own ground but that nebulous thought was still persistent.

What do you want me to do? See her? I-"

"No, that wouldn't do any good. But, we had a bit of a row. I suppose I didn't take the news gracefully. She swears I don't love her. Perhaps she doesn't altogether believe that-but she might. It's the truth, when you come right down to brass tacks. I suppose I'm a mucker but I honestly believe I'd be a worse one if I married her."

"Well?"

# CROSS CUT SUNDAY

There was a family reunion Sunday at the home of Mr. and Mrs. G. B. Gaines, of Cross Cut. It was a surprise affair, the children all arriving at the same time, with dinner already prepared. It was an occasion long to be remembered by each one present.

Those present besides Mr. and Mrs. Gaines, were their seven married children with their husbands, wives and children. They are: J. E. Gaines, San Antonia; Bob Gaines, Madison, Wis.; Major and Geo. Jr. Gaines and Mrs. Mary Conlee, Cross Cut; Anderson Gaines and Mrs. Carrie Marsh of Cross Plains. Eleven grandchildren were present.

Bob Gaines left Wednesday for his home in Madison accompanied by his father, who will visit with him.

At the Southern Baptist Convention at Houston last week, the body went on record as rejecting and opposing the theory that the creation of man was by the process of evolution in any form, :nltiat man did NOT evolute from a lower form of animal life. The resolution was emphatic and final, and all teachers and officials in the Baptist schools will be required to declare themselves in harmony with the above declared action.

island, Maria Madre. Russia has started air service between Kem and Solovetski island in the White sea to transport prisoners. The famous monastery on the island has been converted into a prison:

"These three incidents show that the practice of maintaining convict colonies in the world's loneliest places has not entirely been given up," says a bulletin of the National Geographic society from its headquarters at Washington.

Famous Penal Colonies.

stood in rock-bound courses over the "Devil's island, Maria Madre and marsh. But Joseph Schales, from Ger-Solovetski island are in very mixed company historically. Virginia, St. Helena, Funchal, Monte Christo, Siberia, the Seychelles, Australia, New Caledonia, Andaman islands, Tasmaof labor he cut the brambles and rootnia and Sakhalin have all been penal colonies for more or less distinguished prisoners.

"St. Helena, Funchal and the Seychelles are royal prison islands. The others in their time served for common criminals or unlucky politicians. When Elba failed to hold Napoleon he was placed on St. Helena, well toward the middle of the South Atlantic, out of harm and out of the shipping lanes. That was in 1815. He died in 1821.

"Funchai in the Azores and the Seychelles on the east coast of Afric: north of Madagascar are more recent prison stations. In Africa the British occasionally find it expedient to absent certain native rulers from their subjects. So, when Prempeh, king of the Ashanti on the Gold coast, spilled too much blood, they sent him to sojourn in the soothing climate of the Seychelles. Prempeh, after twenty years, returned to his people, so apparently he did not like the asylum. But the English did, so they sent Mwanga, deposed ruler of Uganda, to join him and then Kabarega of Unyoro, Sayyid Khalid of Zanzibar and Saad Zaghul of Egypt. The Seychelles detention was not nearly so effective in the case of Zaghul, who is now the leader of a popular party in Egypt. To Funchal was sent the deposed emperor of Austria-Hungary immediately following the end of the World war. He died in exile. His wife and children are now in Spain.

Tourists Visit Chateau d'If. "Chateau d'If, the castle in which the hero of Dumas' novel, "The Count of Monte Christo,' was confined for 14 years, now receives tourists from Marseilles. Curiously, Monte Christo, where Morel went after his escape, was also a penal colony island for many years. Monte Christo is owned by Italy. It lies off the coast from Leghorn and about 25 miles north of

**COLLEGE BOYS WORK** MECCA OF CURIOUS WAY AROUND WORLD

## Answer to Challenge of Their "Prexy."

Bombay. - Two young American stowaways arrived in Bombay on a liner from Port Said the other day, their only baggage being two raincoats, a camera, shaving set, sewing kit and a Bible. They were allowed to land and go free because their passports were in order and because the shipping company did not care to take the case to court. Incidentally the youths had worked wrell as deck hands and had won the friendship of the officers and crew.

Questioned in Bombay the stowaways said they were college graduates taking a year off to work their way around the world without receiving a cent from home. Their journey is an answer to a challenge made by their college president, Dr. P. R. Kolbe, who in a speech before the student body of Akron university wondered why American students no longer worked their way to and around Europe during summer vacations. He even hinted that fear of the hard knocks might be the cause of this lack of wanderlust. The two students, Adib Karam, twenty-three years old, and James W. Matz, twenty-two, in answer to the president's challenge, not only have worked their way to and around Europe, but are going around he world. Already they have been through England, France, Switzerland, Italy, Syria, Palestine and Egypt. Start on Leviathan.

In New York on June 30, 1925, two weeks after receiving their diplomas, the young men got jobs on the United States liner Leviathan, plying between New York and Southampton.

"We learned a little what Doctor Kolbe meant by hard knocks when we were put to work peeling onlons and Search for Lost Son potatoes. It wasn't easy to become scullions so soon after our graduation from college," Karam remarked remtinuance of her futile search for her only child, Harold, was made in the iniscently. Extensive tests showed that Flit spray did not stain the most delicate fabrics.

Flit is the result of exhaustive research by expert entomol-ogists and chemists. It is harmless to mankind. Flit has replaced the old methods because it kills all the insects—and does it quickly.

Get a Flit can and sprayer today. For sale everywhere.

## STANDARD OIL CO. (NEW JERSEY)

railway was built with prison labor. The chief horror of Siberian exile was the knout. By it, or by terror of it, guards kept prisoners docile. The handle of the knout is a heavy wood stick, 18 inches long. Fastened to it is a thong of rawhide. About eight feet from the handle the thong is split in three parts. These streamers are three feet long. The ends are tied into hard knots, although lead or iron hooks sometimes were used ..

"Preparatory to administering the knout the victim was tied face downward on a rough table. Close to the knout wielder stood a clerk with a book in which he checked the number of strokes as that worthy swung them and called them. For the first 25 strokes the skin was marked white by the lash as 12 a chalk mark were drawn on the flesh. After that the thongs began to cut through. When a knout sentence called for 100 strokes the last one was usually omitted as a 'token of imperial magna-nimity.'"

Georgia Refuses Pay on War-Looted Bond Atlanta, Ga .- A man in California, who holds a state bond of 1854, will find he holds a joker, State Treasurer William J. Spencer has announced. The seventy-two-year old bond was presented at the capitol with claim for payment. The treasurer will not pay, and will demand the return of the document as stolen property which, he asserted, was taken by the troops of General Sherman in the famous march through Georgia.

Also, it is not a real bond, inasmuch as it was not issued, the treasurer said. \*\*\*\*\*\*\*\*\*\*\*

Miss Mabel Cody, noted aviatrix changing from a racing speed boat to an airplane on Matanzas bay, St. Augustine, Fla. She was the first woman to perform this feat.

## Short Skirts End Use

of Teacher's High Chair New York .-- Modern short skirts may have a direct bearing upon classroom procedure. The brevity of skirts is threatening to do away with the teacher's "high chair." A number of principals readily agreed that the modernly-attired teacher, perched before the class on the high chair, bears a remarkable resemblance to a silk advertisement. The effect, these educators agreed,

while not necessarily evil, might well be regarded as a trifle disturbing. For a great many years the high chair has been standard equipment in every classroom, but the new policy here came to light when the requi

sitions of several funior high school principals for high chairs were denied. Investigation showed that the 'powers that be" decreed that high chairs, short skirts and rolled stockings cannot all remain together in the same classroom. Since the teachers demand the right to keep up to the minute in style, the high chair

## Lesson for May 30

### JACOB AT BETHEL

LESSON TEXT-Genesis 28:10-22. GOLDEN TEXT-I am with thee and will keep thee in all places whither thou goest.-Gen. 28:15. PRIMARY TOPIC-Jacob Dreams at

Bethel. JUNIOR TOPIC-Jacob's Vision at

Bethel. INTERMEDIATE AND SENIOR TOP-IC-A Young Man's Dreams and Visions.

YOUNG PEOPLE AND ADULT TOP-IC-The Place of Vision in Human

I. Jacob's Flight to Haran.

He fled from an outraged brother. His deceit and cunning got him into trouble. His long exile from home was the result of his selfish ambition. "Whatsoever a man soweth that shall he also reap." Rebekah made her plea before Isaac for sending Jacob away, stating her fear of Jacob's probable marriage with a daughter of Canaan, when in reality she feared that Esau would kill him. Isaac at once recognized the wisdom of her suggestion. He knew that the success or failure of one's life is largely determined by his marriage. It was clear that if Jacob were to continue in the line of the covenant blessing care must be exercised in his marriage. Besides, it is a parental duty to see that children are well married. Among Christians only marriage in the Lord is allowable (I Cor. 7:39). Isaac, alive to Jacob's destiny, issued his command and bestowed upon him the covenant blessing which had come from God Almighty to Abraham (Gen. 17:1). The elements embraced in this blessing are:

(1) A numerous offspring (v. 3). (2) Possession of the promised land (v. 4).

(3) And everything that is included in the Abrahamic covenant (Gen. 12: 1-3 and Gen. 15:1-8).

We should learn from the experience of Jacob.

1. Be sure your sin will find you

Jacob deceived his father. He in ann was deceived by his children. 2. That wrong home life has its perils.

Isaac knew that the blessing was to be Jacob's, yet he planned for Esau to have the place of prominence. He was willing for the sake of a little venison to give to Esau that which God had planned for Jacob.

II. Jacob at Bethel.

1. The Lord meets Jacob at Bethel (vv. 10-15).

With a spirit clouded by homesickness on the one hand and by fear on the other, he had a dream that night in which God appeared to him. In this dream Jacob beheld a ladder or stair reaching from earth to heaven. upon which angels were ascending and descending. Above the ladder stood the Lord who spoke to him. This ladder suggests a means of communica-

## THE MUD EEL

"They take pity on me, they do," said the Mud Eel. Some of the insects stopped twisting and crawling about, looking from their little homes to the little home of the Mud Eel, and said, in insect language:

"Why do they take pity on you?

"And who are 'they?' " "'They,'" said the Mud Eel, "are people."

"Children, too?" asked the insects. "Children, too," the Mud Eel

agreed. "Well, now that 'they' have been explained to us you can go on with your story.'

"But 'they' haven't been explained to you, for I don't understand them myself.

"How can I explain what I don't understand? People and children are a puzzle to me," the Mud Eel continued. "I don't understand them at all,

"They talk queerly, they walk queerly, they eat strange food.

"They talk and giggle. They have against him. The charge was to be funny ideas. Children go to places that he cursed the king; therefore called schools-where they learn to had committed treason. Further inspell and read and write. structions were given that as a pun-"How can I explain all that? ishment for his crime he was to be

"I can't. "For the life of me I don't see why

they want to know how to read and spell and write.

"What good are such things going to do them? They aren't given meals for writing things down on a slate. "I know we never, never would be."

"Well," said the insects and snakes, "we meant that we knew who you meant by 'they.'

"We can't understand people ourselves.

"Certainly their ways are beyond our understanding. We don't know why they eat the food they do, why

"I Don't Understand Them."

children go to school, why they walk instead of crawl and talk instead of hiss and whisper, and sing.

"We don't know why they wear clothes and talk as they do and walk sometimes with their arms entwined with each other as they do. "We don't understand people our-

selves. "But now tell us why the people pity you. None of us can really understand people it would seem.

lets, salts, calomel and nasty oils.

tion between earth and heaven, between man and God. Jesus Christ is the ladder which provides us a means of communication with heaven (John 1:51; 14:6; Heb. 10:19-20). Jesus became a real ladder to us, bridging the chasm between earth and heaven. He was a real man that He might identify himself with the race. He is very God, really divine, that He might lift us up to God and secure a reconciliation with Him. Earth and heaven, man and God, were separated by the introduction of sin, but through Christ u means of intercourse is re-established. This vision suggested to Jacob that the only approach to God was through a mediator. The angels ascending and descending are heavenly messengers which are sent to minister to man through the mediatory work of Christ (Heb. 1:14). God spoke to him from the top of the ladder and assured him that He is the God who entered into covenant with Abraham and renewed the same unto his father Isaac (v. 13). This assurance embraced the following:

(1) The possession of the land (v. 13).

(2) A numerous offspring (v. 14). (3) The promise of His personal presence and preservation (v. 15).

This promise was fulfilled in a marvelous way with Jacob and is still being fulfilled with his seed.

III. Jacob's Vow to the Lord (vv. 16-22).

He set up as a monument the stone which he had had for a pillow. He named the place Bethel, which means the house of God. Jacob now vowed that since God had so graciously obligated himself to perform all this for him, he would enthrone God as the ord of his life and give back to Him one-tenth of all that was given to him.

### Borrowing From God

Of all created comforts God is the lender; you are the borrower, not the owner.-Rutherford.

### His Word Alone

One monarch to obey, one creed to own: that monarch God, that creed His Word alone.

### Safety Valves

Tears are the safety valves of the neart when too much pressure is laid on it.

"So you might as well go on with your story as best you can, leaving out such things neither or none of us can understand-such as people and

their ways. "And that includes children and their ways.

"So go on with your story, Mud Eel.

"Pray continue."

"I am put near the insects," said the Mud Eel, "and yet I belong to the snake family.

"I am a younger cousin, or distant relative of the Congo Snake, but I have no hind legs.

"And that is what bothers the people.

"The keeper tells them I have gills outside my body and they smile politely but are not much interested.

"Then he tells them that I have no hind legs, only a pair of front legs. and they say to each other:

"'How very queer. Isn't that odd! How very queer ! Isn't that odd !' "Yes, they pity me and I don't want

their pity.

"No, I don't want it.

"I don't need it. I am not here to be pitied.

"Ah, how often I wish I could speak people's language instead of the language of the Mud Eel and I would say to them:

"'Oh, children and people, why do you think it is so queer, and pity me, because I only have one pair of legs? "'You only have one pair of legs yourselves-and we think yours are queer.

"I think that would quiet them all right. Yes, that would make them stop thinking we were so odd.

"At least I hope it would," the Mud Eel ended.

## Jean Would Walk

Little three-year-old Jean went out for a walk with her father one day. As they started to return her father asked, "Shall we walk back, Jean, or take the street car?" "Oh, I ruzzer walk, daddy," she re-

plied, "if ou' will tarry me."

## Funny Name for Pants

Teacher-An heirloom is something that has been handed down from faher to son. Bob Reese-That's a funny name or pants.-Exchange.

ring from his finger and threw it away.

It is an easy matter to throw away a mere ring, but it is not so easy to cast aside the warnings and convictions of conscience. Conscience, which time. George Washington called "A little spark of celestial fire," burns inside the human heart. It is a great beacon light which no one can escape and from which it is impossible for any person to run away. The inner voice of conscience will give us no rest until we have heeded its warning or made amends, to the best of our ability, for

our misdeeds. No person can forgive himself. (C. 1926, Western Newspaper Union.) Expressive Slang Not

Found in Dictionary Picture the kindly Boswell quizzing the Sage of Fleet Street in this wise:

"What sir, may a finale hopper be?'

"Sir, a finale hopper is, not may be, one of the most despised of men. He it is who arrives to partake of an entertainment after all the expenses of the entertainment have been paid."

Such is the definition taken from the vocabulary of the flapperocracy of the day. Here are a few more: Airedale, commonly known as a breed of odog, is to the sophisticated young miss of flapperdom an ugly, unprepossessing man, and an alarm clock is a chaperon; a dimbox, one who patches up quarrels or tries to remove friction; a shifter, one given to grafting; a snuggle-pup, one who frequents petting parties.

What are we to do with such "idiomatic phrases" as the cuckoo's chin. the bullfrog's beard, the butterfly's boots and the pig's wings? There are people simple enough to think that these and more should find place in the dictionary.

Well, who knows but they may some day. Yet, so far we cannot take it seriously. So, in common with hundreds of other words, terms like these are kept on file, and as the years roll on note is taken of the frequency or recurrence of use, and these notes of usage determine whether or not the word shall be admitted to the dictionary.-F. H. Vizetelly in American Speech.
