Another week has passed into combined forces of France at d America ever recorded on the pages of time. And still they haven't stop.

Several of my friends and myselt volunteer for hospital work each night; that is we work a part of the night, and give the regular attendants time to rest. The tirst night I went out I was waiting on the Surgeons, and you immagin my surprise when The first fellow I roled off of the table proved to be none other than Floyd Patterson. He had two wounds neither of which were very serious. One in the leg, just above the knee and one in face; both cause by shrapnells. If you see his people pefore they receive the word tell them he is getting along fine and will soon be able to get around again Ninety-five percent of the boys are wounded in the legs or in the arms, Seems as if the Boch was shooting low. Flovd told me he had four to his credit an expectedd to get more when he had another chance.

I received your letter today, the Review has not showed up. With much love.

Saving Sugar Saves Shipping

A MERICAN families would have less sugar than the people of war torn France, if we depended entirely on our home-grown sugar stocks.

Approximately 75 per cent. of our sugar is shipped to our shores. We produce about 1,000,000 tons of sugar a year. Our imports from abroad amount to over 3,000,-000 tons a year in normal times.

The United States Food Administration asks each family to limit its use of sugar to two pounds per month per person for household use. The military situation de-mands that every available ship be placed at the disposal of the Army or Navy. When we save sugar, we save shipping.
