Most of the parasites attacking cattle can be controlled by thorough spraying done at regular intervals.

Cattle lice are more abundant and injurious during the winter and spring months when the hair is long. Both rotenone and DDT are effective for lice control. If rotenone is used, two treatments at 14 day intervals must be given for control. A single treatment of DDT, thoroughly applied, will control lice. This will also control

hornflies also.

The spinose ear tick is common throughout most of Texas. It attacks cattle, horses, sheep, goats, deer and occasionally man. The immature stages of the tick are attached in the ears. When fully fed the nymph drops to the soil and molts to the adult stage. The adult never feeds.

Treat all salt, mineral, and feed troughs with equal parts of kerosene and lubricating oil. The outside of the trough can be sprayed

with the above material and the surrounding soil should receive the same treatment. Treating the ears of livestock with formula 1029 has proved to be very effective in combatting this pest. The best method of application is by using a one inch paint brush, completely covering the inner and outer surfaces of the ear.

The nation's scrap iron drive continues. This scrap is needed for the production of steel and we all know why we need more scrap. GET IN THE SCRAP.

Plan now for greater food production from a home grown garden. It pays in better living and eating.

Milk for 2 1/2 Cents a Gallon

This sounds like pre-inflation days, but it is the actual cost of producing a gallon of milk from good pasture grass. Dairy specialists for Texas A&M College point out that 40 cents worth of good pasture will produce 139 pounds of 4% milk.

Pastures produce the cheapest feed that dairy cows consume. To cut the cost of producing milk, graze milk cows on better pastures.

A plus value for a good pasture is that it effectively controls soil erosion.

HEALTH NOTES

State Health Officer, Geo. W. this week spelled out in one-two-three order the requirements for a city-wide sanitation drive that will "show results in fewer flies, fewer rats, and less disease."

His plan in brief: Apply the idea of a good spring cleaning outside as well as inside the house.

The long-point exponent of clean environment said the State Department of Health would, on request, send a team of sanitation experts to survey any Texas town for health hazards.

"An untrained person might fail to see the significance of horse lots, surface toilets, or stagnant water holes where flies and mosquitoes can breed. Our people, by training and experience, know how to locate and correct hazards to community health," the health officer said.

The survey would include a

check on the manner of garbage storage, collection, and disposal, and a look into foodhandling establishments to see if their foods are coming from safe sources.

The team, according to the doctor's plan, would make a study of the local water supply. Contaminated? If so, what's the reason and how can it be corrected most efficiently?

They would investigate the sewage system. Do lines extend into all areas of the city? Are all residences connected? Is the plant itself adequate to accommodate the city? How is the sewage processed?

Residential and business districts would be inspected for sanitary violations, and each property owner would be strictly accountable for cleaning up his premises, with the city hauling away accumulations of trash.

"If we all begin work right now, using tried and proved methods, we can cut down the incidence of diseases caused by insanitary environments, contaminated water, and improperly handled foods. We can stage a fight against flies and stop them from spreading disease. 'We're here to help,' the doctor said.

Mr. and Mrs. Mack Childers and Mrs. Donald Peniger and daughter visited friends and relatives at Okra Sunday afternoon.

So Others May Play ...

By Rolena Johns Graham
San Benito, Texas

I'm just a little shaver and of course folks don't pay much attention to me but, Mister, I'm just like all kids. I like baseball and football and you know what, once when our team scored I got so excited I swallowed my chewing gum.

I like marbles—gosh you ought to see my aggies. I like funnies, too, and I'd like to romp with my dog Stumpy. Daddy says he's not much of a dog but all the same I like him—he understands me. When I sit all quiet like he sneaks up close to me. Some times he sits up on his haunches and whines like he is saying he is sorry—and sometimes he just licks my hand. Yes, Stumpy understands.

I'll bet my Daddy is the best fisherman ever was. We used to go way up in the mountains to fish. Soon as we got the things unpacked we'd stick trout flies all over his hat and Mother would say, "Jim, don't you ever dare make fun of my hats." Then he'd put his hat on all crooked and say, "Come on Jimmy, this is no place for a couple he-men. Let's go fishing." He would grab my hand and away we'd go and I'd almost split my pants trying to take long steps like Daddy.

When we'd get a good looking spot—little quiet pools or ripples—Daddy would pull his waders up around his hips, step down into the stream and then wink at me and say, "Watch sharp, Jimmy, I'll show you how to catch 'em. I'm going to leave old granddaddy right here for you to catch when you get big enough to wear my waders."

I wish you could see my Daddy shoot birds, Mister. I'll bet he's the best dog-gone shooter in the country, maybe in the whole world. He was teaching me to shoot. He used to call me Jimmy Retriever because when he'd shoot a bird in a grain field I'd get it for him. Sometimes I'd pick most of the feathers off—they were so soft and pretty and I liked to see them flutter away in the wind.

We used to have a lot of fun—Mom and Dad and Sue and me. But—well—things have changed at our house. Dad and Mom keep trying awfully hard to laugh like they used to do but it doesn't sound the same—it isn't bubbly any more—leastwise not to me.

You see, Mister, I guess I won't ever romp with Stumpy any more. And I won't be able to wear Daddy's waders or catch that old granddaddy fish. I won't be able to go shooting or retrieve Daddy's birds. And I can't play marbles—or do any of the things boys like to do, like play baseball or football.

And Sue, well Sue was my sister—Sue isn't here any more. Sue and I had polio and Sue—well she died. Me?—well, they say I won't ever walk again. So you see, Mister, how things have changed.

All I can do now is read the funnies, listen to the radio, and rub old Stumpy's head. Good thing I can use my hands, isn't it? I told you Stumpy understands—he gets as close to me as he can and looks right at me as if he was saying—I know all about it, Jimmy. I miss Sue too—I know you can't play—but I'm right here by your side.

Folks won't pay much attention to what I say but they'll listen to you. So please won't you tell them not to forget to do their share! They don't mean to forget I guess. They sure wouldn't if they knew just how a guy feels when he sees

other fellows running and playing, doing all the things he'd love to do—but can't ever do again. Makes a fellow feel all shivery and cold and achey inside. Sometimes when Daddy and I went fishing or hunting and walked a long way I'd cry a little at night because my legs ached. Now sometimes I cry because they won't ever ache any more from playing or walking.

A lot of the kids who have polio run and play again. But some die—like Sue—and some won't walk again—like me. But a lot more of them will live to walk and play again if people will remember to give to the March of Dimes.

So please, Mister, won't you tell them about Sue and me and tell them not to forget? Tell them not to let the polio kids down. The next one might be theirs.

Since it was established in 1938, the National Foundation for Infantile Paralysis has allocated more than \$14,000,000 in March of Dimes funds to finance scientific research into every phase of polio.

NEW GROWER ALLOTMENT PLAN IS OPEN FOR PEANUT FARMERS

Callahan County farmers who do not have a peanut allotment for their farms may now make application for a "new grower allotment," according to the County Production and Marketing Administration.

Requirements necessary to be eligible for a new allotment were listed as follows:

1. The producer must have had experience in growing peanuts during two of the past five years.
2. The producer must be largely dependent on the farm for a living.
3. The producer must not be interested in any other farm on which there is a 1952 peanut allotment.
4. The land must be suitable for peanuts.

There is not much land acreage for new growers as the acreage used for this purpose has to be deducted from the regular peanut growers, but there will be a few acres for the eligible applicants.

All applications for a new grower allotment must be made in the county PMA office by February 1.

Mrs. Fonia Worthy and Mrs. Claude Mayes visited Mrs. W. B. Overstreet in Abilene Monday.

MR. MOTORIST...

CAN YOU COMPLY WITH THE NEW SAFETY RESPONSIBILITY LAW?

The new Texas Motor Vehicle Safety-Responsibility Law, designed to protect the public and make streets and highways SAFER, becomes . . .

EFFECTIVE JANUARY 1, 1952

In the event of an accident there are three ways to comply with the law. The easiest way is to have Automobile Liability Insurance with us. We represent only Old Line Stock Companies.

Call us, or come by our office, and we will be glad to explain the low cost to you without obligation.

For Outperforming all other American Cars...

In the Grinding Tests that Won it the Motor Trend Magazine Award, Chrysler proved itself the Best Engineered Car in America

CHRYSLER SURPASSED ALL OTHERS WHEN MOTOR TREND TESTED FOR:

- ★ Average Braking Distance in Feet
- ★ Ton Miles per Gallon
- ★ Average Acceleration in Seconds
- ★ Acceleration Over Standing 1/4 Mile in Seconds
- ★ Average Top Speed in M.P.H.
- ★ Maximum Road Horsepower
- ★ Pounds per Road Horsepower
- ★ Maximum Torque in Lbs.-Ft.
- ★ Maximum Brake Mean Effective Pressure
- ★ First in Total Points

15 different American stock automobiles—equipped as you buy them—were driven by Motor Trend Magazine as hard as steel and rubber can be driven. In these actual road tests of efficiency and performance, measured by the most accurate instruments obtainable, Chrysler proved itself superior to all others. In 13 tests Chrysler was first in 7—tied in 2, making a total of 9 out of 13 . . . and first in total points!

Only by taking an engine to the limit of its potential, only by turning the corners at high speeds, applying brakes for emergency stops, torturing body, springs and shock absorbers, can you learn just what performance you can expect from the make of car you drive. The results of the Motor Trend tests were conclusive . . . as Chrysler, again, proved itself the one best car in America.

The Motor Trend Award, like numerous other honors today's Chrysler has won, is both a proof of and a tribute to Chrysler's magnificent Fire-Power engine and master engineering. Each demonstrates why, among men and women who know automobiles . . . Chrysler is *always* the first choice.
