## LARGEST PICNIC NOW UNDERWAY HERE

### Home Town Gossip

Angton police chanced to see a man sitting on his front porch the other day with a rifle in his hands. Stopping to inquire they learned that his name was another man. The officer argued with him and the man said: "I'm gonna shoot the guy's ass."

A week from tomorrow voters go to the polls to elect public officials. There has been little talk of politics and the length of the ballot paper you. It will carry of 88 candidates seeking a number of office positions in the race for the unexpired road commission post, Jerry Saddler, where 11 are vying. Governor Coke asking his first full term, challenged by five other candidates.

Will not be a single run-off in county, with the exception of Commissioner posts, the county as a whole does. Predicts two, three and four or more candidates in the running and run-offs were likely. The Baird however, where Hub Warford as County Commissioner only one candidate in and the county seat will seal voting to do in the may.

Cross Plains Picnic is in its 61st year. This year's may possibly be some of the best. The picnic is a day of normal performances, charge the blame to far has greatly curtailed the number of all classes. Conflict is not ended by the celebration will already for the duration, already underway, how the aged celebration color as soon as the.

### Interest Is Light As First Primary Draws Near

#### LESS THAN 3,000 VOTES LIKELY IN CALLAHAN COUNTY

#### O'Daniel, Alford And Moody Making Supreme Effort To Drum Up Enthusiasm

Despite the fact that the first primary election is only eight days in the offering Texas voters refuse to become duly concerned this year. All interest is hinged on the day to day progress of the war. Only now and then do groups huddle to discuss issues of the campaign.

In Cross Plains it was expected that the Picnic and the appearance of a number of candidates here during the two days would make the citizenry more election-conscious, however, this is merely speculation. Despite the fact that Callahan county possesses its usual number of poll tax holders, the total in the county is expected to be from 300 to 500 below normal tabulations. Ordinarily 3,250 votes are counted in this county whereas 2,750 is expected to be polled Saturday of next week, July 25.

A facsimile copy of the ballot will appear in next week's issue of this newspaper.

Then the outstanding number of the entire encampment being a demonstration by Miss Hazel Phipps, of College Station, Extension Service Specialist in Food Preparation on "Spending the Food Money for the Family", correlated with a demonstration on preparation.

### Pen Put On Main Street To Collect Rubber And Metals

The Chamber of Commerce Luncheon Club has provided a pen on Main Street, in which citizens are urged to deposit contributions of scrap metal and rubber to be used in the nation's war effort.

It is pointed out that a number of people, possessing only a few pounds of these much-needed scraps, have been reluctant to take them to dealers because of their very small value, however, when they are all brought together the total poundage will be enough to materially aid national defense.

Proceeds from the sale of metals and rubber dropped in this pen will go to the Cross Plains Boy Scout troop.

The pen is located on the lot, just South of the Home Telephone Company, the site formerly occupied by the Motor Inn. Motorists may drive in and drop off their contributions without even getting out of their cars.

IRON - IRON That's The Answer

Uncle Sam has informed Scrap Iron Dealers that complacency shown by holders of scrap iron in getting it moving to war production factories is no longer a matter to be taken lightly! The time has come when the matter of patriotism is connected with the matter of selling iron, because the one burning point is: We can never hope to match the Axis in needed war equipment until every available pound of waste material is rounded up and loaded into a car bound for a war material factory!

AND LOADING IS GOING ON CONTINUOUSLY IN CROSS PLAINS! SELL YOUR IRON TODAY!

L. G. JENNINGS

Don't be too downhearted when your tires go bad. You can always bring them to us for genuine rubber welding and vulcanizing which usually mends most any break. We're equipped to do the job the factory way and you'll be pleasantly surprised with our low prices and prompt service.

Old Tires Needed For Defense

We are still buying old, junk automobile tires. Rubber is urgently needed in national defense. So bring them to us and we'll see that they reach the proper channels. Too, we'll pay you the very top price for your trouble.

We are also buyers of old automobiles. If you have a car that you wish to dispose of see us for a cash bid.

COMMUNITY SINGERS TO MEET IN CROSS PLAINS ON SUNDAY AFTERNOON

The Cross Plains Community Singing Convention will meet Sunday afternoon, July 19, at the First Baptist Church in Cross Plains. The program is scheduled to begin promptly at three o'clock.

A large number of singers from adjoining counties, and a trio from Eastland, are expected to attend.

Mr. and Mrs. James Carpenter and baby, of Abilene, visited relatives and friends in Cross Plains Sunday.

H. H. GRAVES

Judge Harry N. Graves was elected four years ago to fill the unexpired term of the late Judge O. S. Lattimore as a member of the Court of Criminal Appeals of Texas. He has actively participated in the work of the Court since that time, and has written his share of their opinions.

This Court has disposed of the cases submitted to it, and is up with its docket, and he requests a second term at the hands of the voters.

Would it be wise to change the personnel of this Court at the present time? (Pd. Pol. Adv.)

"Please send me 10¢ worth of electricity—today"

"But, Lady, you don't have to order it—just turn the switch!"

SUPPOSE, though, that you did have to order your day's supply of electric service, say, in baskets like groceries. You'd realize even more how convenient it now is. And you'd appreciate even more how little it costs... and how much it does for you.

Actually, a majority of all West Texas families have good light and operate their many appliances for about a dime a day—or less!

What's more, that dime buys just about twice or three times as much electricity as it did 10 to 15 years ago! And (are you surprised?) it's one of the few household items that hasn't "gone up" as a result of the war.

This bargain doesn't just happen. It comes from our united effort to give you better service at lower cost. It is made possible by practical, efficient business management of an institution built by Americans who invested their savings in an industry dedicated to the public service and regulated by the government.

That's the American way—and it works!

It works so well that even though our country today is pouring record-breaking amounts of electric power into the world's greatest production of planes, tanks, ships and guns—you still get low-cost current in your home... and at the flick of a switch. You don't need to order it... or secure a ration card.

Probably the few pennies a day you spend for electric service bring you more for your money than anything else you buy. For this small amount, would you clean oil lamps, beat rugs, scrub clothes, give up your radio?

Hardly! Electric

NEWS BRIEFS OF BYGONE DAYS

June 3, 1932: No better picture of the type of man and womanhood that first settled Cross Plains could probably be sketched from an artist's pen than the following editorial clipped from the Cross Plains Review, February 24, 1911. Miss Madeline McAnnally was an Abilene visitor Saturday. Bill and Joe Houser were Cisco visitors Thursday. Mrs. Harold Smith, of Brownwood visited relatives and friends here the latter part of last week.

are fifty pounds of fresh fruit, this will make 18 quarts of fruit. A bushel of plums will make 20 quarts, and you can get 30 quarts or two or three quarts of juice from a bushel of fruit.

Food preservation budget needed by the Extension Service for about 50 quarts of fruit for every member of family. This estimate is based on Texas Food Standard. This Food Standard calls for one quart of citrus or tomatoes or peaches or strawberries or melons or one serving of other fruit following this plan you assured of plenty of fruit, canned, in the diet.

queen and the young ants. When you do that, the worker ants won't live very long. Follow the trail of the ants to where they disappear. Try to fill the nest with a little carbon disulphide. — or if you can't get carbon disulphide use kerosene or gasoline. Remember though: These are inflammable materials. Don't smoke or have any fire nearby while you use them.

If you can't find the ant colony, try poisoned syrup as bait. Or sprinkle sodium flouride — powder along the edges of the kitchen floor. And of course, sweep up all crumbs promptly and keep your food supplies in tight containers. That's good ant prevention.

The best advice, after all, is: Destroy the ants home, before they invade yours.

## METHODIST NOTES CROSS CUT CIRCUIT

We began our Revival Campaign Sunday at Salem. This writing is being done Monday morning; and the meeting not sufficiently advanced to tell the prospects. No special enthusiasm manifested Sunday. Attendance better than usual; but the revival fire not well kindled. The kindlings needed for a revival are regular attendance, repentance, sacrificial spirit, faith and agonizing prayer. If these things are done today, the revival begins today; but, if these things are left off, we'll have no revival.

Our Revival at Grosvenor, will begin Wednesday night before the Fourth Sunday in this month, July. This preacher is to do the preaching and Brother J. F. Williams is to direct the services. All Christians and Non-Christians are invited.

Our Revival at Williams begins the Friday night before third Sunday in August. Rev. A. D. Armstrong is to do the preaching and this writer is to lead the song services. All are invited to attend. We need and must have a revival.

Our meeting will begin at Cross Cut Friday night before third Sunday in August. This preacher is to do the preaching. No Song Director yet, however, must have one. Don't forget to pray.

Our last meeting will be at Thrifty Fourth Sunday in August. This preacher is to do the preaching. Home talent will have charge of song services. Don't you see what a tremendous task this little preacher has before him, without your assistance and the mighty hand of the Lord we will fail; with these we will succeed. We can not bear the thought of failure.

## THAT "SOMETHING ABOUT A SOLDIER" STRONG APPEAL TO WIFE AND SONS

That "something about a soldier" which appeals to boys and girls is especially strong when the soldier is father and husband. That is shown in this family scene of Lieutenant Vernon Lemens, taken this week at Camp Hood, Temple, while his happy family were visiting him from their home in Waxahachie. Mrs. Lemens is completing her husband's campaign for Lieutenant Governor which he began before entering the army.

Vernon, Jr., age 6, shows a preference for the U. S. Army uniform of his father, while Bobby, age 3, wears the sailor suit selected by his mother.

Senator Lemens served in World War I, was an active Legionnaire and reserve officer in the peace period, and is now on duty as assistant adjutant with the tank destroyer command at Camp Hood. As Senator of the Twelfth District he will be granted leave to serve in Austin during the session of the Legislature under War Department rules governing reserve officers holding public office at the time of army induction.

He is asking a promotion to Lieutenant Governor so that he can preside over the Senate. He feels that his fourteen years of continuous legislative service and his military experience and standing especially fit him to direct the Senate in the wartime session ahead. The duties of Lieutenant Governor require no more time in Austin than those of Senator, which he now is.

LONG MAY WE REMEMBER THE PRESENT RUBBER CAMPAIGN FOR NAT'L DEFENSE

Dixon and Aldrich and Pastula. Do you remember? The three Navy fliers whose plane went down in mid-Pacific, who existed thirty-four days and journeyed a thousand miles and lived through a typhoon, on a rubber life-raft eight feet long and four feet wide—Now do you remember?

The men who, barely alive, came to shore standing up because they didn't want any Japs to find them crawling... Yes, you remember. Remember them, every time you use your car, that the rubber built into it and the rubber on its wheels would have made four of those life rafts... like that which saved Dixon and Aldrich and Pastula.

The worn-out tire in the corner of the garage, the leaky hot-water bottle, the old galoshes. They aren't of any use, but they're more precious than gold.

The Army needs every scrap of rubber the nation can dig out of its cellars and attics and garages. It takes three-quarters of a pound of reclaimed rubber to make a gas mask, thirty pounds to make a tire for a big bomber. And 45,000 pounds go into the building of a battleship.

Those old rubbers in the hall closet might help make a machine-gun mount. Dig 'em out.

The war has struck the nursery. Rubber for baby pants has been prohibited.

American mothers can ponder the fact that the rubber used on one month's manufacture of baby pants can make 2,500 rubber life-rafts for ocean-prowling U. S. war planes.

Combs have been made of gold and silver and jade, of ivory and tortoiseshell, of copper and celluloid and even of iron.

But they're not going to be made of rubber. Not now.

A single month's rubber supply of the comb factories is enough to put tires on 1,700 eight-wheeled two-and-a-half ton Army trucks.

That rubber will still get in somebody's hair.

Eighteen cars don't look like many in a parking lot.

But they've got a ton of rubber on their wheels and built into them.

That's just how much is needed for every four-engine bomber.

The kind the Japs saw over Tokyo and Yokohama and Kobe.

Junior isn't going to get any new rubber bands for his slingshots, and Sis is going to have to tie up those letters from Charlie with a piece of string.

We used to turn six million pounds of crude rubber into thirty billion rubber bands every year.

That's out, for the duration.

Six million pounds of rubber can put bullet-proof gas tanks into 300 heavy bombers and make the threads and engine-mounts and shock-absorbing cushions and machine gun insulation for 500 tanks.

Or it could be used to make 1,500,000 gas masks and 500,000 Army raincoats. Have you started carpooling in your neighborhood?

Leaky garden hoses will be in fashion this year. And next year. And until the war is won.

That precious rubber is going to put tires on the carriages for 8,500 "seventy-fives, 6,800 37mm. anti-aircraft guns and still leave enough over to make 600 pontoons for Army bridges.

The Army is going to travel a

long way on the garden hose you're not going to get.

One pair of overshoes, plus one hot-water bottle, plus a tennis ball, plus a child's playball, equal a pair of rubber knee boots for the Army.

A bathing cap or shower cap uses as much rubber as ten panoramic telescopes.
