**Nightly Rains And Weeds Causing Area Farmers Much Concern**

Rains which have fallen practically every day or night for the past ten days or so are creating quite a problem for farmers in this area and the damage from strong winds and heavy downpours in some areas have inflicted considerable damage.

The biggest concern is the fact that due to the rains, farmers are unable to get in their fields to plow and the weeds are taking over. Sandy fields have become water-logged and crops are not growing off as they should at this time of year.

The Hedley area received considerable damage last Friday night when tornadic type winds backed out of the north and swept across the east part of the county and on down across Hall County. Trees were uprooted, broken and twisted and some smaller outbuildings, windmills, TV antennas, etc., were destroyed along the east side of Hedley; also to the south and northeast.

Ashtola seems to be the most piggyish with the moisture according to a report from Ben Lovell who stated that 7.46 inches was recorded there last week and already 1.45 for this week. He reported 4.0 Monday night and another 1.05 Tuesday night. At present this gives Ashtola a total for the year of 17.38 inches.

Lelia Lake is very little behind Ashtola as far as the years total goes. Willard Knox reported a total of 17.28 to date. This past week he reported 3.38 inches with only .05 being received Tuesday night at the time Ashtola was receiving 1.05.

Here in town we were only able to get the moisture readings for Sunday thru Tuesday night as our official weather observer is out of town. Sunday night we received .51, Monday night .40 and Tuesday night .18 for a total of 1.09.

Farmers are not fussing about the moisture so much but would like to see a few dry days and more sunshine so they can try to clean up their crops.

**Revival At Hedley Methodist Church To Begin July 26th**

A revival meeting is to begin July 26 at the First Methodist Church, Hedley, Texas. The pastor, Rev. S. A. Wolfe will be in charge of each service. Rev. Carl Nunn, evangelist of Jayton, Texas, will do the preaching. Mr. Nelson Seage of Lelia Lake, Texas, will be minister of music.

Prayer services will begin at 7:15 p.m., and worship services at 8:00 p.m. Mr. Ross Springer will be in charge of the men; Mrs. Henry Moore will be in charge of the women; Mrs. John Hinds will be in charge of the youth; and Mrs. Loyd Balley will be in charge of the children.

The public is invited to come and worship in these services. Rev. Nunn will bring some old time gospel preaching which I am sure you will not want to miss, stated Rev. Wolfe.

**Little League News**

On the road Tuesday night, the Pirates were defeated by Lakeview 6-3 at Lakeview; also at Lakeview the Sox won a thrilling game 2-0 in a tight pitching duel. Here at Clarendon the Cubs downed Quail 9-7 in another close game.

Last week the Little League reporter, Waylan Newman was in Quanah and saw some of the Little League games there. He stated that people in Clarendon should be proud of their Little League Program as it is a much better organized program than in many of the larger towns.

**Smith Funeral Services Held Tuesday**

Funeral services for James Harve Smith, 79, retired painter, were held Tuesday afternoon, July 14, at the Clarendon Church of Christ. John L. Davis, minister of the church, and the Rev. Conrad M. Ryan, pastor of First Methodist Church, officiated.

Mr. Smith died at his home in Clarendon Monday afternoon. He was born October 23, 1879, in Tennessee and was a member of the Church of Christ.

Surviving are his wife, Blanche, of the home; a son, J. Boyd of McLean; a daughter, Mrs. Juanell Ford of San Francisco, Calif.; three sisters, Mrs. Elizabeth Green of Morton, Mrs. Grace Dorman of Dallas, and Mrs. Janette Worthington of Grand Salene, Texas; also two brothers, Claude of Grapevine and Bob of Bethany, Okla.

Pallbearers were Dick Chunn, C. L. McCrary, Harold Smith, Olace Hicks, Dudley Wilson, and Joe Smith. Interment was in Citizens Cemetery under the direction of Murphy Funeral Home.

**Dial Telephone System To Be In Operation September 20th**

Another operation toward dial telephone service for Clarendon has been started according to Roy L. Brewer, District Manager for General Telephone Company of the Southwest. Present telephones in Clarendon are being replaced or converted to dial type telephones which will make customer direct dialing possible. Special information will be sent to each customer to further acquaint them with the dialing procedures, said Brewer.

The change over of telephones should be completed by August 31 and the planned date for the cutover to this modern dial system is September 20, 1959.

**Services Held Monday For Brice Pioneer**

**Engineers' Report Revives Interest And Hope For Greenbelt Lake**

W. Carroll Knorpp, local director for the Greenbelt Municipal and Industrial Water Authority, handed the Leader an engineers map and other detailed information this week regarding the progress being made toward the proposed Greenbelt Lake on Salt Fork of Red River. Many people have been wondering why the delay. Knorpp explained that the government was the agent preparing the maps for the engineers use and the maps were recently completed and turned over to the engineers for detailed work.

A mapping survey by Freese, Nichols and Endress, consulting engineers of Fort Worth, which designates the best dam site and reservoir capacity estimates: 12 years of planning and paves the way for future developments of the project which must be started prior to Jan. 1, 1961.

Consultants recommend that the lake, covering 4,700 acres, be built about 7 1/2 miles north of Hedley in Donley County. The report also suggests that the originally planned 100,000 acre feet reservoir be increased in capacity to include 150,000 acre feet.

Dr. S. H. Townsend, president of the Greenbelt Authority, said he would soon call a board meeting of member cities to expedite core borings and foundation exploration of the dam site.

He said it would take engineers from six to eight weeks to complete their core studies and experts would prepare studies on land costs, outlay for a distribution system, the amount of daily water consumption and water rates.

Upon completion of additional engineering and cost studies, Dr. Townsend said, the issue will be placed before the public for a decision.

"We hope to be able to call bond issue elections in member cities sometime this fall," Dr. Townsend said. Member cities at present include Childress, Quanah, Hedley, Clarendon, Memphis, Paducah and Wellington.

If the proposed reservoir is built it will be the Panhandle's largest, 2 1/2 times as large as Buffalo lake, and impounding water from a 770-square-mile drainage area.

The State Board of Water Engineers granted the Greenbelt Authority permission to take water from the Salt Fork on Oct. 7, 1958.

Shortly after water rights were received, application for financial assistance from the Texas Board of Water Development was submitted and approved.

Dr. Townsend said the state's water development board agreed to accept secondary loans on one-third or up to five million dollars toward the cost of the project - whichever is less.

Preliminary studies indicate the dam and filtering system can be built at a cost ranging from eight million to 10 million dollars, the cost to be paid by member cities. The distribution system will be built by member cities.

A reservoir of the proposed size is sufficiently large to accommodate municipal and industrial expansion of member cities, Dr. Townsend said. At present the cities use one-thirteenth of the reservoir's potential yield.

Extensive tests show the reservoir would be capable of 25-million gallons per day output.

Water from the Salt Fork at the proposed location is superior to most of the water now being used by member towns, engineer E. W. Freese said.

The water rights permit allows the authority to take 30,000 acre feet of water per year from the Salt Fork - 18,000 acre feet for municipal use and 12,000 for industrial use.

The engineer's report this week said, "It is quite possible that the full 150,000 acre feet of reservoir capacity will be needed eventually to furnish the municipal and industrial water requirements of Greenbelt towns and other towns, including Shamrock, for which the proposed reservoir is the logical and perhaps the only feasible future source of surface water.

"However the originally contemplated 100,000 acre feet of reservoir capacity is about all that can be justified by the prospective municipal needs of the present Greenbelt cities unless some moderate industrial water need develops."

Freese's report noted active competition for Salt Fork water for irrigation use in Oklahoma.

"The Texas Board of Water Engineers is interested in having the reservoir site developed as fully as is necessary to meet the needs of the cities and industries which can be supplied logically from the project, and the board would, no doubt, be willing to amend the authority's water permit so as to increase the reservoir capacity from the present 100,000 acre feet to 150,000 acre feet," Freese said.

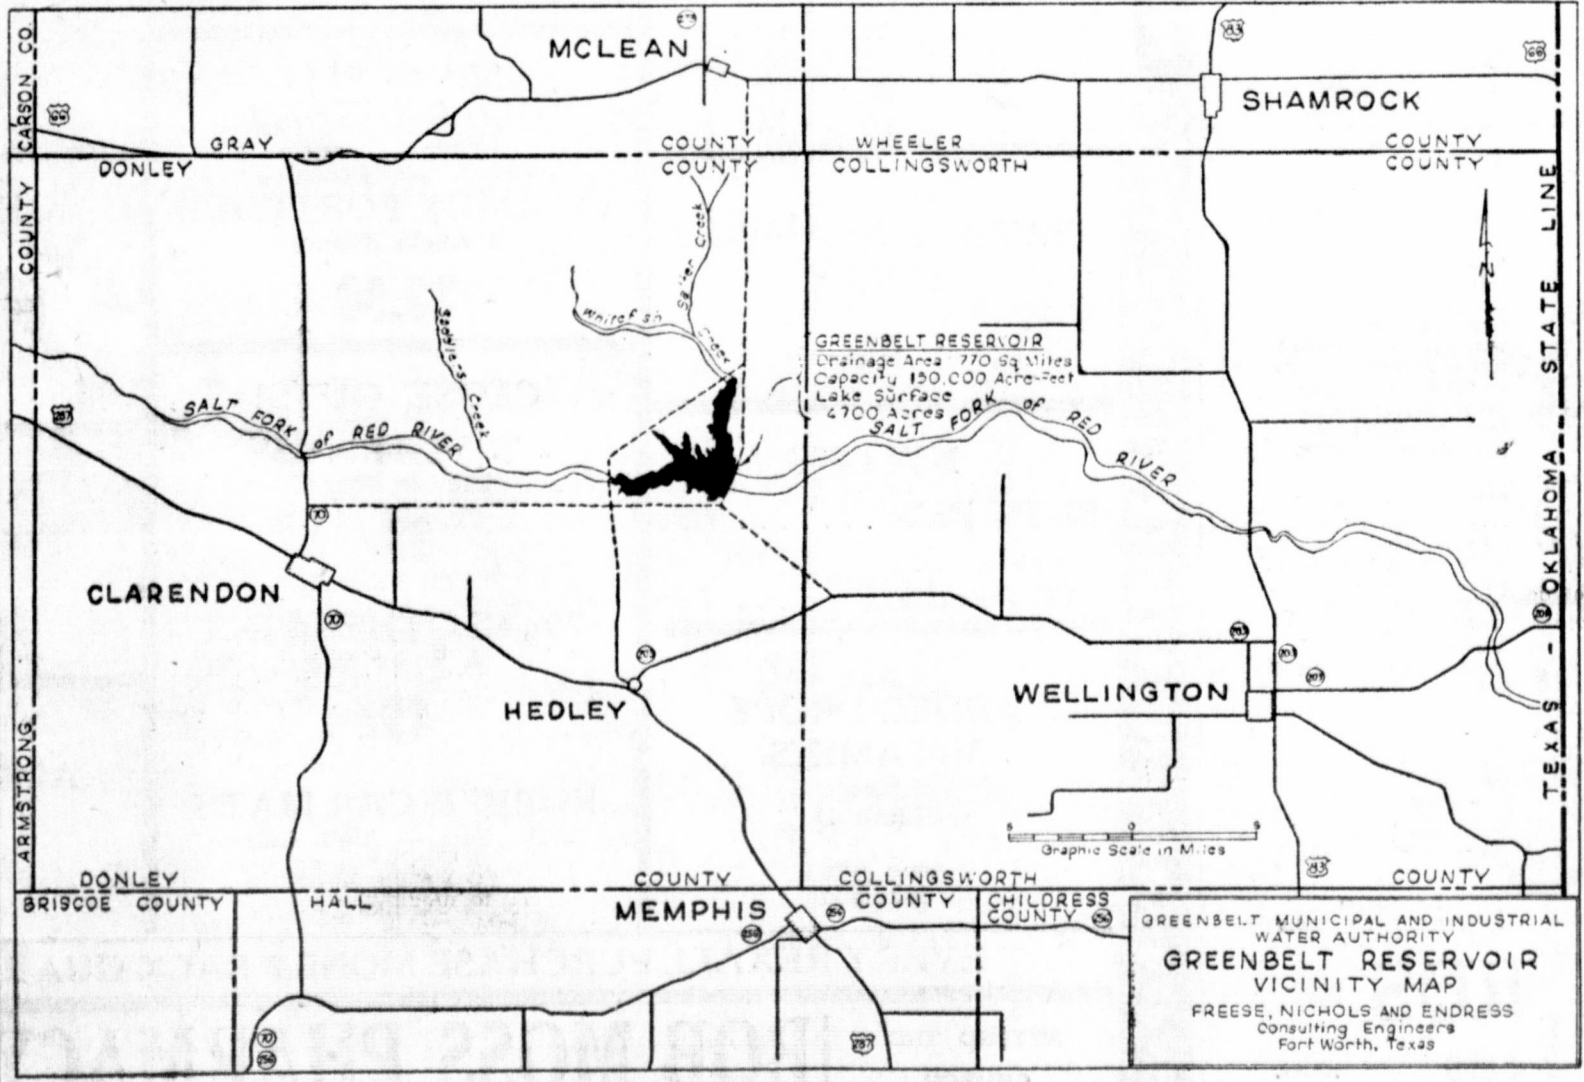

Dr. Townsend said Oklahoma has proposed a 135,000 acre feet reservoir to be built on the Salt Fork about 7 miles north of Mangum, Okla. He said the proposed dam would be built by the U. S. Bureau of Reclamation for irrigation purposes and as a supplementary water supply for Lake Lugert at Altus, Okla.

The Greenbelt Authority, however, will retain water rights on Salt Fork water in Texas as long as the present permit is valid. Oklahoma however, has already made application to the Texas Board of Water Engineers for Texas Salt Fork water, Dr. Townsend said.

"Chances are mighty good that the Greenbelt Reservoir will be built," Dr. Townsend said.

The Greenbelt Authority water right permit expires Jan. 1, 1961, and if construction is not started before that date, there is every possibility Texas water would pour into an Oklahoma reservoir for irrigating western Okla.

**PROSPECTS FOR PANHANDLE'S LARGEST LAKE LOOM BRIGHTER**

Above is a map prepared by Freese, Nichols and Endress, consulting engineers, showing the proposed Greenbelt Reservoir on Salt Fork of Red River. If the project goes through as proposed, this will be the largest lake in the Panhandle. It will encompass 5,700 acres, drain 770 square miles, and have a storage capacity of 150,000 acre feet. The lake will provide industrial and municipal water supplies for Clarendon, Hedley, Memphis, Wellington, Quanah, Childress and Paducah. In addition, it will be the foremost recreation spot in the Panhandle, measuring 2 1/2 times the size of Buffalo Lake.

**Officers Elected For Parent-Faculty Group**

The Parent-Faculty Conference met Tuesday evening in the Homemaking Department with 30 members present.

Mrs. Fred Bourland served as temporary chairman until officers were elected.

Officers elected to serve for the 1959-60 school year were: Rev. Conrad Ryan, chairman; L. L. Wallace, 1st vice president; Mrs. Dee Williams, 2nd vice president and Mrs. George Thompson, secretary.

Rev. Ryan stated the purpose of the new organization as follows: "Help draw parents and teachers closer together and aid with school problems in any way possible."

It was agreed that all meetings would be of an impromptu nature and would last only one hour. The meetings will be held the 2nd Tuesday night of each month with the next meeting scheduled for September.

The Lions Club Canteen committee met with the group Tuesday night and the main discussion of the meeting centered on the Canteen. A committee from the Parent-Teacher group was appointed to serve with the Lions Club committee and the school committee. They are Mrs. Alfred McMurtry, Mrs. Lawrence Neece and Mrs. Horace Green.

Mr. and Mrs. Luther Thompson held open house Sunday afternoon so that everyone could see their beautiful new home complete in every detail. Paul Stewart was contractor and he did a fine job. Several out-of-town friends and a large number of local people signed the guest book.

Mr. and Mrs. R. W. Alewine are leaving Hedley. They are pioneers having lived here 31 years. Mr. Alewine was rural mail carrier for 24 years. He retired several years ago. The Alewines are prominent in the Baptist Church and will certainly be missed. They are moving to Jackson, Miss. Their only son, Ralph, lives in Jackson. They are fine people, loved, and will be missed by their many Hedley friends who wish for them much happiness in their new home. We sincerely hope the move will prove beneficial to Mr. Alewine's health.

Rev. and Mrs. Truman Caldwell of Thornton have been here for several days visiting the lady's parents and helping with the moving of the Alewines. Ralph Alewine, Jr., and son came Sunday to drive the Alewines to Jackson.

### TO THE PEOPLE OF THE 18TH DISTRICT

By Congressman Walter Rogers

#### Equal Time For Political Candidates On TV And Radio

A great controversy is brewing in the Congress as to whether or not radio and television stations should be required to afford equal opportunities to all candidates seeking public office to use the facilities of the broadcasting stations. The present law provides as follows:

"Sec. 315 (a) If any licensee shall permit any person who is legally qualified candidate for any public office to use a broad-

casting station, he shall afford equal opportunities to all other such candidates for that office in the use of such broadcasting station: Provided, That such licensee shall have no power of censorship over the material broadcast under the provisions of this section. No obligation is hereby imposed upon any licensee to allow the use of its facilities by any such candidate.

"(b) The charges made for the use of any broadcasting station for any of the purposes set forth in this section shall not exceed the charges made for comparable use of such station for other purposes.

"(c) The Commission shall prescribe appropriate rules and regulations to carry out the provisions of this section."

The present controversy stemmed from a complaint filed by a man by the name of Lar Daly, who has made several races for public office. In 1959 he was a candidate for nomination for Mayor on both the Republican and Democratic Tickets in the Chicago primaries. His complaint arose from the fact that the Mayor of Chicago, Richard Daley, was portrayed in some television newscasts greeting the President of Argentina, opening the Mother's March of Dimes Drive, and filing his nominating petition for reelection as Mayor of Chicago. He complained that his Republican opponents had also appeared on news programs.

The Federal Communications Commission issued a ruling to the effect that the several broadcasts referred to in the complaint had involved uses of the station's facilities within the meaning of Section 315 of the Communications Act and that Lar Daly was entitled to equal use of the facilities. The Columbia Broadcasting System requested reconsideration of this holding. The same request was made by the National Broadcasting Company and the Westinghouse Broadcasting Company. Lar Daly, the original complainant, filed answers to these requests for consideration. On May 7, 1959, the Attorney General requested leave to file a petition in support of the petitions of the several broadcasting companies, and subsequently filed its memorandum or brief on the subject. The Federal Communications Commission considered all of these matters and then reaffirmed its previous ruling that Lar Daly was entitled to equal time on the news programs. This caused a great furor, and a number of bills have been introduced in the Congress to change the present law, in view of the ruling of the FCC. In fact, the President of the United States, in a news conference, was quoted as saying, in effect, that the decision was "ridiculous", and demanding that his Attorney General try to get the law changed.

This created additional furor, because it is the province of the Legislative Branch of the government to change the law and not the jurisdiction of the President or the Attorney General. There were charges that the President and the Attorney

General were attempting to influence the FCC and force it to reverse its previous ruling. These charges brought counter-charges that the Congress was trying to influence the FCC rather than the President. All of these discussions, arguments, furors and fustices were combined together and the entire matter is now in the lap of the Interstate and Foreign Commerce Committee of the House of Representatives. We are presently holding hearings on the subject, and they are most interesting. We invited the Attorney General to appear before the Subcommittee, but he chose to send a representative. I undertook to find out from this representative what the President was driving at when he used the term, "ridiculous". The Attorney General's representative advised that the Attorney General had not used such term, but that it had been used by Mr. Hagerty, the Press Secretary of the President, speaking on behalf of the President. He advised that the Attorney General simply took the position the decision was not founded on law, although the Attorney General did say in his memorandum the following: "Fair, yet comprehensive news coverage can best be assured, not by applying Section 315 as the Commission has done in the Lar Daly case, but by a common sense application of the Communications Act, public interest 'standard', which requires television and radio stations to make a fair presentation of public issues." I was trying to determine whether the President, Mr. Hagerty and Attorney General Rogers thought the Federal Communications Commission was ridiculous and had no common sense, or whether they thought the law, which I quoted above, was ridiculous and not according to common sense. This is very important, because if the

President, his Press Secretary and Attorney General Rogers think the FCC is ridiculous and without common sense, it would certainly do Congress no good to change the law. But if, on the other hand, these three fine gentlemen feel that the law as written is without common sense and ridiculous, then there may be some merit to the attempt to try to get Congress to change the present law. Actually, the terms, "ridiculous" and "without common sense" are, in a degree, synonymous to me. Certainly an

Act that is "ridiculous" is without common sense. Also, an Act "without common sense" should be ridiculous. It might be rare, ridiculous, medium ridiculous or well-done ridiculous.

In any event, after all this controversy, chaos and trouble is ground up in the mill, I feel sure proper steps will be taken by the Congress during this session to insure the people of this country the opportunity to have full and complete information as regards all candidates for public office under the general prin-

ciples of democracy, without surrendering to anyone a power to misuse the spectrum which belongs to the public.

### ONE OF THE 7 BIG BESTS CHEVROLET GIVES YOU OVER ANY CAR IN ITS FIELD

Take it, not from us, but from official results of this year's Mobilgas Economy Run: Chevy's pennypinching 6 delivers the most miles per gallon in its field. For a pair of these Chevrolet sixes with Powerglide walked away with the first two places in their class, getting the best mpg figure—a whopping 22.38—of any full-size car. And here are more expert, impartial opinions and on-the-record facts backing us up on Chevy's other six bests:

**BEST TRADE-IN**  
Check the figures in any N.A.D.A.\* Guide Book. Chevrolet used car prices last year averaged up to \$128 higher than comparable models of the "other two."

**BEST STYLE**  
It's the only car of the leading low-priced 3 that's unmistakably modern in every line. "In its price class," says POPULAR SCIENCE

magazine, "Chevrolet establishes a new high in daring styling."

**BEST BRAKES**  
In direct competitive tests of repeated stops from highway speeds, conducted by NASCAR†, Chevrolet out-stopped both of the other leading low-priced cars—and why not? Chevy brakes are far larger, built with bonded linings, to help lengthen brake life by as much as 66%.

**BEST ROOM**  
Official dimensions reported to A.M.A.‡ make this clear. For example, Chevy front seat hip room is up to 5.9 inches wider than comparable cars.

**BEST ENGINE**  
Every motor magazine has given Chevrolet's standard and Corvette V8's unstinted praise. As SPORTS CARS ILLUSTRATED puts it: "Indeed this device is surely the

most wonderfully responsive engine available today at any price."

**BEST RIDE**  
MOTOR TREND magazine calls Chevy " . . . the smoothest, most quiet, softest riding car in its price class." You'll be able to tell this yourself, instantly. And your Chevrolet dealer can tell you about a long list of other advantages besides these 7 big ones!

People who will "Argue with a signboard," usually don't have much else for company.

The Supreme Court decisions sometimes look bad, and the political water seem muddy but if the American Voter ever gets stirred up in the same proportion he can then settle things in a hurry. Trouble is, he may ov-

Some folks still think that Washington, D. C., is our new found Santa Claus and that all the red tape is just the gift wrapping.

We heard about the fellow who practiced literally the old saying about believing nothing one heard and only half of what he saw. While travelling with a friend who asked if he saw that white mule grazing in the pasture nearby, he replied; "Well, it's white on one side anyway."

As parents we spend about half our time wondering how our children will turn out and the other half wondering when they will turn in.

We understand that the rea-

The some three thousand friendly home-folks from the Clarendon area really go all out each year to make the 4th of July Rodeo and Free Barbecue one of the best of its kind any place. Take for instance this year when according to the Chamber of Commerce estimate, around 10,000 people were treated to all they could eat with event invitations to come back for seconds. Being a big meat eater we were kind of hankering for seconds when our friend, Miss Ruth Richerson, county school superintendent sort of half-soled our lunch with a big juicy beef sandwich. Thanks, Ruth, and the fine ladies at your serving table.

County Agent Flip Breedlove who has won statewide recognition as a specialist in the barbecue art did an especially good job again this time. Another outstanding thing about their way of serving is the speed with which this group was taken care of. In less than an hour everyone was served. 16 long lines came by 8 serving tables with a speed that was amazing.

Not only do they advertise the barbecue as being free, it was rumored that the officers stopped out of state cars at the edge of town and invited them to go by and have a free meal. This

The 1959 irrigation season is almost ready to start. Many farmers in the Donley County Soil Conservation District will be cranking up their irrigation pumps and motors. Because of the medium and coarse textured soils and the rolling topography most irrigation around Clarendon is done with sprinklers. This type of irrigation system does not require extensive land preparation as does flood methods of irrigation. However it does require a larger cash outlay for portable aluminum pipe and sprinkler heads.

Because of the initial cost and operating cost of the well, pump, motor, and pipe for a sprinkler irrigation system, it must be operated efficiently if it is to pay off. The crop must be kept watered so that it will not suffer drouth damage. In the last part of July and August the irrigation system must supply all of

is going all out with hospitality. Congratulations Folks.

We say again that if you have never made the drive down 287 to Clarendon, then south to Brice, west to Silvertown stopping off at the beautiful Burson Lakes, then back across scenic Tule and Palo Duro Canyon to intersect Highway 287 again at Claude you have missed a real treat. One can reverse the trip in order to cross the canyon at the best time of day.

**GEORGE'S WIFE**  
By "Sarah"

In Walter Roger's letter to the

this moisture since the rain cannot be depended on.

Most sprinkler irrigation systems are designed to put on a net application of 3 inches each time. That means 3 inches of moisture is in the ground for the crop to use. Cotton uses about 1/4 inch of water per day during its peak growing season so it would have to be irrigated every 12 days or suffer damage and production loss. In most cases it is more profitable to irrigate a smaller acreage according to the needs of the crop and soil than it is to stretch the system to cover a larger acreage less efficiently and hope it rains.

A good rule of the thumb to use in determining the amount of land a well can cover is to divide the well output by 10. For example a 500 gallons per minute well can be expected to cover 50 acres efficiently.

If you are planning on installing a new sprinkler irrigation system, change your old system, or just want to check your present system, you are urged to contact the supervisors of the Donley Soil Conservation District or the local Soil Conservation Service office. A Soil Conservation Service technician will be glad to check the design of your irrigation system to see if it is adequate to supply the moisture your crop needs.

people of the 18th District of Texas recently, he told us to be on the alert for a new word originating in Washington. The word is "Expenditious." Mr. Rogers couldn't find it in his dictionary, but gave a pretty good account of his interpretation of same. I can't find it in mine either; some of the kids got off with our good one, left it at College or at someone's house one night while studying. This Dollar dictionary I use now might not carry words being used now anyway since the National debt is so high.

He told us about the first encroachment on our Constitution way back in 1954, and has continued to do so. Now I'd try to find out what this new word means and tell my neighbors, but what with this wet weather and weeds from these Benson farms, George has really kept me on my toes.

Thank you Uncle Zeb, for those kind words in your July 9 column.

AUSTIN, Tex. — About the only cheerful remark heard around Texas Legislative halls of late is, "Think how bad it would be if it weren't air conditioned!" (House and Senate chambers are cooled this year for the first time, though most of the rest of the Capitol is not as yet.) Many remember summer sessions in pre-air conditioned days. Scorching extraordinary was the one in 1949 which ran to July 6, longest regular session in Texas history.

Lawmakers and reporters complained that the huge granite blocks in the Capitol walls collected heat like a dutch oven. Coat and tie rules in the legislative chambers added to the misery.

Some observers said that the 1949 Legislature (which also had a tax problem) didn't really quit. It just sort of melted down. A special session was called the next winter to clear up money problems.

For all its comforts, air conditioning hasn't taken the sweat out of passing a tax bill.

Both House and Senate have passed tax bills, and a new conference committee was put to work to try to piece them together. But the floor action preceding passage gave no indication that any of the conflicting groups is ready to give an inch.

House membership is split three ways into (1) those who don't want the majority of new taxes to fall on business, (2) those who don't want a majority to be sales taxes and (3) those who apparently don't want any new taxes.

Each of the first two groups has been able to defeat the other's proposals with the help of the "no-taxers." Hence, despite

public impatience and their own weariness, lawmakers have been ensnared in a one-step-forward-and-two-backward pattern.

**SOMETHING OLD, SOMETHING NEW** — Given to the conference committee on taxes were a new bottled bill from the House and an old, nearly full-size bill from the Senate.

House bill would raise about \$106,000,000 over two years—about \$70,000,000 less than is needed. Senate bill, designed to raise about \$160,000,000, is the same one passed by the Senate in the first special session. It contains more sales taxes than business taxes which the House refused to accept on the last round.

Cut from the House bill before passage were the \$50 deductible sales tax (a 2 per cent levy on costs over \$50) and the natural gas severance beneficiary tax.

Both fell by the wayside in one of the "if you kill my tax, I'll kill yours" sessions.

Remaining in the bill were lections on which the House has been able to agree all along — on cigarettes, liquor, auto sales and corporation franchises.

"New wrinkles" added were (1) a licensing fee for private clubs that sell liquor and a 10 per cent tax on mixing drinks and (2) a 1.5 per cent sales tax on boats, motors and airplanes.

Bill also contains a provision to cut the sulphur tax from \$1.40 to \$1.03 a ton.

House conferees, none of whom served on the committee last session, are Reps. Menton J. Murray of Harlingen, Frates Seeligson of San Antonio, Wesley Roberts of Lamesa, Joe Ed Winfree of Houston and John Allen of Longview.

Senate conferees include four who served before, Seps. Rudolph Weibert, Dorsey Hardeman, Bruce Reagan and Jimmy Phillips, plus one new member, Sen. Wardlow Lane.

**SENATE OKAYS BEACH BILL** — After considerable haggling and several close votes, the Senate passed a bill to guarantee public access to public beaches.

Mustang and Padre Islands are exempted from the provisions of the bill. Sen. Bruce Reagan of

Corpus Christi, who sponsored the amendment, said that the islands were being developed with a systematic plan for public parks, beaches and recreation areas.

Opponents to the exemption said it would allow allow at least one-third of the beaches on the islands to be under private control.

As passed by the Senate, the bill does not try to define boundary between state and private land, but simply affirms the public's right to come and go from state beaches by way of roads.

**FEE BILL ADDED TO CALL** — A bill to let state colleges charge a \$30 a semester activity fee got a new lease on life when Gov. Price Daniel submitted it to the Legislature.

Bill had been introduced twice, but fizzled out in the Senate when Sen. Henry Gonzales challenged it on two points: (1) it was not "within the governor's call" for the session and (2) in order to be considered "within the call," it would have to be regarded as a revenue-raising measure which must originate in the House.

Governor Daniel's action changed this, and the Senate went back to work on the bill. A similar bill was passed by the House last session.

**NO DEADLOCK HERE** — Easiest agreement of the session was on a bill appropriating money to pay legislative expenses.

Both House and Senate gave final passage to a bill transferring \$400,000 from the cigarette tax fund to pay costs of the second special session.

This brings legislative expenses thus far to about \$2,700,000.

**LAND SALE APPROVED** — House passed a bill that would allow the state to sell a tract of about 40 acres just north of the State Hospital in Austin.

State Hospital Board has declared the system does not need the land. Austin city officials would like to see it privately owned so property taxes could be collected on it. Location is such that it could be used for a shopping center.

Bill sets the minimum price at \$1,500,000.

**TEC TO MOVE** — Texas Employment Commission will be the first state agency to move into one of the new buildings being built north of the Capitol.

Beginning July 16, TEC will cart some 686 employees and 11,000 items of furniture and equipment from 11 rented buildings to its new headquarters.

Operation is to continue around the clock and be complete on July 20. Unemployment checks

will not be issued July 17, but delay is expected to be made up by end of the next week.

## Dusters To Meet Nazareth Sunday

The Clarendon Dusters will meet the tough Nazareth nine at Duster Park here Sunday. Game time has been set for 2:30 p.m. The local team is waging a rough battle for fourth place in the Caprock league at this time.

The Dusters were idle Sunday due to the All-Star game played in Amarillo. Three representatives from the Dusters, team played for the South squad: Jerry Hawkins, Robert Mills, and Manager Waylan Neyman. All made good showings, although the North bested the South by a score of 10-6.

Norwalk, Connecticut, Hour: "Trying to infiltrate the subtle

fuge employed by government spokesmen to cover up important scientific and cultural achievements until they decide the opportune moment for the best propaganda effect has arrived can be a trying chore for representatives of a free press . . .

"There are of course advantages to withholding important announcements for the correct psychological moment, but this license does not extend over a period of months nor does it excuse deliberate untruths to protect superficial secrecy. These techniques are successful in totalitarian countries where the public has lost its right to know — and where reporters play the game the way bureaucrats want it played — but they are totally out of place in the U.S."

NEW GUIDE FOR BUYING SPORT SHIRTS

Make every penny count when you buy sport shirts. You can, if you will keep some important buying guides in mind, according to extension clothing specialists.

Take fabrics, for instance. They come in many fibers, new blends and with new finishes. Do you know what to expect from dacron, nylon, orlon, or even cotton that has been treated with a special finish? Unless you ask for a label that gives this information, or depend upon a sales person you know well, you may be disappointed by the wearing qualities of the shirt.

Quality is not always a matter of price alone. It pays to check construction features, such as pleats or gathers over shoulder blades to give ease buttonholes, cuff finish and stitching along the front panel.

Color makes a difference, too. Colors appropriate for the individual, the occasion, and the other parts of the ensemble, make for a better appearance.

"Buyin a Sport Shirt," a new leaflet, written by extension clothing specialists elaborates on these and other suggestions that will help you make a better choice.

Get a copy from your county home demonstration agent's office.

### GABIE BETTS BURTON LIBRARY NOTES

EDITH BARNES

A memorial has been given in memory of Mr. Simmons Powell. "Florence Nightingale" by Jeannette Noland has been given in memory of Mrs. L. T. Alexander, mother of Mrs. Charlie Bairfield.

A memorial fund was given to be dedicated to Mrs. Anna B. Ballew.

Some of the children's books ordered in April are just now getting here. They are: "Mrs. Piggie Wiggle's Magic," by Betty MacDonald, "Little Wiener" by Sally Scott and "Turtles" by Wilfred Bronson. The Library has books by Scott and Bronson, but this is the first by Betty MacDonald, this is the "Egg and I" etc., MacDonald. In fact until one of the mothers told me I did not even know that Betty MacDonald ever wrote children's books.

We have two new books. James Thurber's "The Years With Ross," and Hank Searl's "The Big X." Thurber is one of those rare writers who can make fact or fiction good reading.

The "Bone Picker," Al Dewlin, is still number one by a big count on our library's most read and requested book, with Alexander King's "Mine Enemy Grows Older" second. Which only proves that Jack Parr and your neighbor plugging a book will get a lot more readers than all the book reviews and other devices invented to interest potential readers. Did you all know that Al Dewlin use to live in Memphis?

The library is indeed fortunate to have so many good friends. Mrs. Geraldine Pratt Harbinson, from California sent us a box of twenty-five books all of them just like new and late editions. Geraldine does this often. She even pays the postage which is no small item.

### FARM TRACTOR CAN BE A KILLER

Ignorance and carelessness in using farm machinery are sure ways to make the headlines. Records show that more than 1,100 fatalities in the United States each year are caused by tractor accidents. Extension Agricultural Engineer Willie L. Ulich offers suggestions for preventing such accidents.

A child's safety is a parent's responsibility, he says. Teach children the importance of safety and point out dangers involved in the use of machinery. Emphasize that operating a tractor is a job for a mature person.

Tractors are involved in 35 per

cent of all farm accidents making it the Number 1 farm killer. Forty per cent of all tractor accidents are fatal to the operator.

Chances of an upset, points out the engineer, increase four times when speed is doubled. If possible, lock brake pedals together when driving on the open highway. Use brakes cautiously and keep them evenly adjusted.

Other safety suggestions by Ulich are: throttle down before

making turns, do not carry extra riders on either the tractor or on trailed implements, and avoid climbing steep banks with the tractor since overturns are one of the chief causes of tractor accidents.

Be careful where you work. Often ditches, rocks and stumps are hidden by tall grass or brush and the tractor may overturn with little warning.

## 1960 Wheat Referendum Nears

Wheat growers of Donley County will soon be making their annual decision on marketing quotas. Remember, the date is July 23rd. The polls will open from 8:00 A.M. to 6:00 P.M. Farmers who are eligible to vote in the wheat quota referendum are all those who in 1960 will have more than 15 acres of wheat for harvest on a farm. The choices for which farmers will be voting for are as follows:

1. Marketing quotas will be in effect for the 1960 wheat crop in all commercial wheat states;
2. Farmers subject to the wheat quota who exceed their wheat acreage allotments will be subject to quota penalties on

their "excess" wheat;

3. Growers who comply with their wheat allotments will be eligible for price support on the crop at least 75 per cent of parity.

If more than one-third of the vote favor no quotas then:

1. Marketing quotas and penalties will not be in effect for the 1960 wheat crop;
2. Growers who comply with their wheat allotments will be eligible for price support at 50 per cent of parity.

**Conservation Reserve - Soil Bank**  
This is just a reminder that you must control noxious weeds on your conservation reserve land. If you have lots of sunflowers, Russian thistles, or cockleburs on your Conservation Reserve land at the present time you must control these weeds as soon as possible and notify this office as soon as you have completed this performance.

**"C" Community**  
"C" Community is in the Southwest part of the county. The community committee serving this year in "C" community are:

1. Charlie C. Hearn
2. John C. Heatington
3. Steve M. Fedric

There are 226 farms in "C" community.

With ACP cost-share assistance the following farmers have planted perennial grasses this year:

Theo D. Evans, Alvin Pittman, Dennis R. Lindley, Alton Webb, Roy H. Ferris, John M. Bass, Burk F. DeBord, Curtis Moffitt, L. M. Pittman, Jr., Henry H. Mann, Clarence Reynolds, and Forrest E. Sawyer.

Five farmers have done some deep plowing this year with cost-share assistance: Marva Lee Mays, E. W. Anglin, Curtis Moffitt, Troy Guy, and Lloyd Hahn. Cost-share assistance was earned on 74 farms for listing and chiseling cropland:

Melvin C. Rampy carried application of Cotton burs; Rudolph F. Wiedman has some new terraces on his farm; Benny C. Benton has a new diversion terrace; Walter I. Lowe and Mrs. Lois Robinson have restored some old terraces; Charles E. Bairfield and Joe Robinson

have constructed livestock dams for their farms; and John C. Knorpp has reorganized the farm irrigation system on his farm.

There are 47 farms in "C" Community with all or part of the cropland in the Soil Bank program.

Dennis R. Lindley regular member of the county committee lives in "C" community.

## FFA Members To Attend State Meet

Members of the Clarendon F. F. A. will attend the State F. F. A. Convention July 15-17. The members attending the convention are Bobby Longan, Carl Talley, Don Hudgins and advisor Jerry Hawkins.

Several members of the local chapter will receive recognition. Bobby Longan, James McAnear, Sammy Wells, and Dennis Bradshaw will receive the Lone Star Farmer degrees. Longan was recently chosen second to the Star Lone Star Farmer of the state. He was the area candidate for the Wildlife Conservation Scholarship and received one of the Area Santa Fe Educational Awards which will pay all expenses to the National F. F. A. Convention. Longan is the son of Mr. and Mrs. P. C. Longan.

Carl Talley son of Mr. and Mrs. Edgar Talley, will receive two scholarships. He received a Santa Fe Scholarship and an Anderson Clayton Cotton Scholarship.

Harold Lindley, son of Mr. and Mrs. Dennis Lindley, will be one of the candidates for the American Farmer Degree. His application was recently approved by the state committee.

Benny Edens, who underwent surgery on his arms and fingers at St. Anthony's hospital in Amarillo Tuesday, was reported getting along satisfactorily. This was one of a series of operations to help correct damage inflicted by severe burns which he received October 16th of last year.

Mr. and Mrs. Virgil Smith and children of Bethany, Okla., visited Sunday with his uncle and aunt, Mr. and Mrs. D. S. Smith.

## Rains Make Conditions Ideal For Insects

This is the year to keep a very close watch on your cotton for insects says county agent H. M. Breedlove. Rains and moisture over the entire county with heavy weed growth makes for ideal conditions for cotton insects. Breedlove says that he has been in cotton fields over the entire county this past few days and has found infestations of flea hoppers and some cotton aphids. The aphids were in spotted areas but flea hoppers were

of the medium infestation over most fields.

Keep a close watch on your cotton and if at any time you think you need any help, Breedlove urges you to contact him and he will look over your cotton field and help you with your cotton insect problems.

Several farmers have poisoned for grasshopper control along fence rows and turn rows and several have sprayed for aphid control and all have reported good results. The same has been reported for those controlling cotton flea hoppers.

## Brucellosis Law Goes Into Effect In Sept.

The newly enacted brucellosis law passed by the Legislature will go into effect in September says county agent H. M. Breedlove. The provisions of the law as drawn up by the Livestock Sanitary Commission are posted in the court house in Clarendon and all livestock raisers are urged to read the provisions of this law and how it will affect them in cattle shipments.

W. J. Lewis, Jr., a director in the Texas Southwestern Cattle

Raisers Association, posted the provisions of the new law so that all cattle raisers might see how it affects them and if they want changes they can make requests to the commission. Mr. Lewis plans to attend a hearing of the commission on the twentieth of this month at Fort Worth, Texas. Breedlove says that he plans to hold an educational meeting on the new brucellosis law as soon as additional information is received.
