Two Blocks Of City Paving Completed

Two more blocks of City paving were completed last week in the west part of town which should help the situation when the big rains come. Several blocks of paving to help prevent washing of soil onto the highway were completed in the east part of town last year.

The two blocks paved last week are between 3rd and 4th streets on Elberbe and east of Broncho Stadium. The paving of these two streets will save considerable time and labor in clean-up work after C. J. Lohoefer stated.

The mayor reported also that work should start soon on a new six inch water main south and west of the water tower to help the water pressure situation in this section where numerous new homes have been constructed. Check valves and new fire hydrants will be installed also, he added.

Political Pot Beginning To Perk With Election Date Drawing Near

The political pot, both state and local levels, is beginning to perk up a bit this week with only a few days left until election time which is May 2nd, a week from Saturday.

A few of the state races are drawing considerable attention but more interest is centered locally with several hotly contested races and too, the Alderman race for the City of Clarendon is beginning to take on more spice. This election will be held Tuesday, May 12.

In the race for State Representative, 82nd District, W. S. (Bill) Healy seems to be drawing very little opposition from Jams E. Thomas but the District Judge race between Charles L. Reynolds and Allen Harp is beginning to stir up more comment. John R. Gillham, local attorney, is unopposed for District Attorney.

Here in Donley County, we have four hotly contested races. There are four candidates in the race for Sheriff, Tax Assessor-Collector and all candidates are out beating the bushes. They are: Bill Cornell, Vergil T. McPherson, Truett Behrens and L. E. (Dock) Yankee. There are only two candidates for County Attorney but interest is high and campaigning is gaining momentum each day. These men are Bill Lowe, incumbent, and Clyde Carter.

SENIOR PERSONALITY

Frances Clydean Gilbreth was born October 26, 1945, at Paducah, Texas. She is an attractive young girl who now stands 5'2" and has brown hair and green eyes. Her favorite color is pastel green. Her favorite foods are shrimp and foreign dishes. As a pastime pleasure Clydean spends her time reading books and listening to records. Of all the books she has read, she considers Exo-

lus as best. She also enjoys playing and taking part in any kind of sports. Clydean rates "Charade" as one of the greatest movies ever, but enjoys any movie starring Doris Day and James Garner. Clydean also states that her dream car would be a Tempest, and her ideal boy or dream date would be a happy-go-lucky boys who likes to have a good time. Clydean's little brother seems to be at the top of her pet peeve list. The happiest moment in Clydean's life was the day she received her state degree. As her most embarrassing moment Clydean recalls the night she fell down the stairs during her graduation from Jr. High. In the future Clydean plans to attend Clarendon Junior College and then go to some Home Economics College to major. As with most teenage girls Elvis Presley rates tops with Clydean. She likes best his song, "Follow That Dream."

SENIOR PERSONALITY

George Addison Graves was born on August 4, 1946, in Chickasha, Oklahoma. He is a handsome young man who stands about 5'11" and weighs 190 pounds. He has blonde hair and blue eyes. His favorite foods are Italian dishes. George loves dark green as a color. His main dislike or pet peeve is girls who wear gobs of make up. George believes that the day he fell flat at a dance is at the top of his list concerning embarrassing moments. As his most exciting moment George considers graduating will be a real thrill! Among the shows he has seen recently "Charade" was tops. He also enjoys pictures starring Patty Duke or Paul Newman. As a dream date George states he would like to date Mrs. Grady, and at the present a dream car to George would just have to be any car. In the future — after George graduates he would just like to become a success, because his main goal in life is to be better than average. His favorite singer is the late, great Buddy Holly.

LIBRARY NOTES:

EDITH BARNES

Don't think of books, your library and reading occasionally or only at National Library Week time but remember and I am quoting from "The Packet": Reading is one of the most vital forces in our lives. It can open up a hundred new horizons. It can tilt the balance in the struggle for men's minds. It can give us hope, and courage, and sustenance and make us weep, and laugh, and think, and pray. Reading is the mainstream of the world we live in." When we know that every word of that statement is true why are there so many adults who have not read a book since they were in school. It is impossible to do much maturing emotionally, spiritually, or intellectually if you do not read. As a doctor once said when he started his private practice he had just begun to learn. For a for instance how many of you have ever been in a doctor's or lawyer's office without noticing the number of books they have? They can't all be there just for show.

Even though some of the book critics have been less than enthused about Fletcher Knebel

and Charles W. Baily's latest book, "Convention" those who watched the 1956 and 1960 conventions on television won't want to miss reading it.

However we may rationalize or try to gloss it over there are horse-trades, manipulations, compromises and even blackmailing going on between the big boys in the smoke filled back rooms, during a convention be it Republican or Democratic.

"Convention" is not the book to read if you want to hang on to the belief that all of the business is conducted from the floor of the convention hall or in the caucus rooms, that the demonstrations for the various candidates are spontaneous, etc. It points up again that if you want to have any personal say in your party's business more of you should go to the precinct meeting where the individual voter has his only say and have that say instead of letting some one or a very few have all the say.

The writers come up with some thing that we might well remember and could get all kind of results without too much effort or expense on any one's part. That chain calling or telegraphing. In the book they have ten people starting it then of course it doesn't take long for just about every one in the United States to be in on it. They wire the delegates at the convention but think of the possibilities when we want to get the ear of our state or national legislature. I mean have it on the level not pressure groups sending mail or wires, as they do, by the basket fulls.

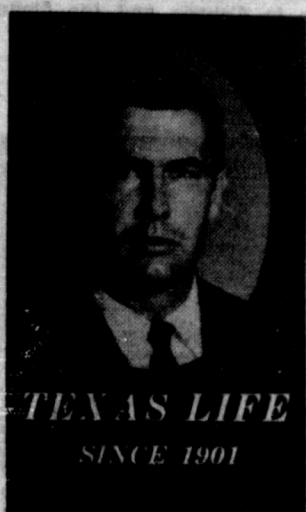

Authors Knebel and Baily are internationally known political writers. They know their politics.

HILLSBORO, ORE., ARGUS:

"... the United Nations membership is now at 113. This includes 77 'underdeveloped' or 'new' nations, which it is now generally recognized were not ready for independence. Each has as big a vote in the UN as does the United States. It was the US idea to rush the creation of these new nations. End result can and most likely will be that the US will be outvoted on many world issues, adding immeasurably to world problems and headaches for us."

ODESSA, WASH., RECORD: "Taxwise the nation (federal government) avoids realities. It demands its heavy income tax from the people at large, then supports many tax exempt business lines at the expense of the taxpayer."

"The voter who asks or accepts special favors at the expense of all the other taxpayers destroys decent government; he sets the tone that leads to double-dealing, knavery and immorality in high places." —President Edwin P. Neilan, Chamber of Commerce of the U.S.

Mr. Lyle Lacy accompanied him.

Those to enjoy refreshments were Gay Cole, Patsy Hill, Jaquetta Owens, Betty Baker, Pearl Hermesmeier, Janie Crump, Peggy Maxcey, Eulonda Jones, Pat Reed, Cherrye Shadle, Wilma Lindley, and Velma Bourland.

There's no need for monotony in meals. According to the U.S. Department of Agriculture, you could serve a different cut of meat every day for four and one-half months without repeating. That's the number of choices in kinds and cuts of meat you have in your neighborhood stores.

Pine oil, liquid chlorine bleach and quaternary and phenolic compounds are effective laundry disinfectants for use against disease-causing bacteria which survive usual home laundering. Extension Service home management specialists point out. All four of these disinfectants have been laboratory tested by bacteriologists of USDA's Agricultural Research Service and in household laundering by cooperating homemakers.

AUSTIN — Only the upper 15 percent of Texas high school graduates ought to be taken in the state's top universities, the Governor's Committee on Education Beyond the High School has been told.

A sub-committee also informed the panel that some type of higher education must be made available to all and that there is an urgent need for general upgrading of the college system. Enrollments must be built up, dropouts reduced and standards steadily improved, the study group heard at a meeting last week.

COURT SPEAKS — State Supreme Court upheld lower court decisions that approval of \$65,000,000 Millican Dam on the Navasota River is final.

Grimes and Brazos County landowners challenged feasibility of the big federal project. Cities of Bryan, College Station and Navasota asked dismissal of the suit.

High Court also held an East Texas oilman, Austin Stewart, can keep on operating two slanted oil wells that bottom under his own property. Decision overturned a district court order which had knocked out a Railroad Commission order permitting Stewart to produce from the wells.

Supreme Court upheld the right of an irrigation district to levy flat-rate assessments against land — regardless of the exact benefit it will obtain from irrigation — when it affirmed a San Antonio appeals court decision on a Maverick County case.

A resident of that county sued the Maverick County Water Control and Improvement District No. 1 contending that a \$5.25-per-acre assessment on irrigable lands and a \$2 per acre assessment on lands which could be irrigated by gravity was illegal.

He said his land is rolling and did not benefit as much as level land owned by others in the district, but the trial court, appellate court and the Supreme Court ruled in favor of the water district's right to flat-rate assessment.

JUVENILE PROGRAM IMPROVING — Texas Youth Council reports that there has been a sharp and welcome drop in the number of repeaters among juvenile offenders sent to Gates-

ville, Gainesville and Crockett correctional schools.

In the fall of 1961, the rate of returnees was 45 percent. Then the 1961 Legislature appropriated funds for expansion and improvement of school facilities and for five council parole officers. By August, 1963, the return rate was down to 29 percent and youth council spokesmen say they hope to hold this since the parole personnel was increased to 20 last month.

The Rev. Clint Kersey, council parole supervisor, said, "We believe that by an increased stay, we can keep them in school. Then when they are paroled, they are better able to adjust and hold a job, and that cuts the chance of return."

SCREWORM APPROPRIATION ASKED — Gov. Connally has requested a \$5,500,000 congressional appropriation for continued protection against the screwworm menace.

A two-year program has eradicated the screwworm from Texas, Connally told congressional leaders, and feasibility of a barrier along the Mexican border to prevent re-infestation is proved.

While southwestern states, livestock producers and sportsmen have financed over half the \$12,000,000 program to date, Connally said, it now is an international matter and should be financed by the U.S. without local matching requirements.

The state, producers and sportsmen would continue to provide inspection, survey and other services in the U.S.

OIL FIELD BRINE — The Texas Water Pollution Control Board scheduled a hearing for July 1 at 9 a.m. on its order prohibiting the surface disposal of oil field brine in Area II of the Ogallala formation — the Middle High Plains. All area II permit holders are to appear at the hearing and show cause why their permits should not be amended to conform to the no-pit order.

A May 27 hearing has been set for Ogallala area I — the Panhandle area — and a hearing on area IV will be held on August 5.

THE JUDICIARY — All gubernatorial candidates have been asked by a State Bar committee to pledge that, if elected, each will consult the bar committee on judicial appointees.

Vernon B. Hill of Mission wrote all candidates that his

committee would propose no nominees, but would rate each considered for judicial appointments either exceptionally well qualified, well qualified, qualified, or not qualified.

He said a similar procedure is followed by the President of the U.S. and the Attorney General and the American Bar in appointments to the federal judiciary.

State Bar also has named a committee to consult with newspapermen and law officers about the problem of publicity on lawsuits and trials.

Talbot Rain of Dallas is chairman, with former District Judge Joe Frazier Brown of San Antonio and Joe H. Reynolds of Houston members.

Apparently, the group will seek to work out some sort of joint code for policing publicity.

"AIRPORT" OFF-LIMITS — The airstrip at the LBJ Ranch, a single, 6,300-foot runway located 12 miles west of Johnson City, has been declared off-limits to all civil and military aircraft, "except those on official business with prior permission to use the airport."

An order published by the Texas Aeronautics Commission for the Federal Aeronautics Agency said aircraft must avoid flying within one nautical mile of the presidential residence.

LEASE CALL — The State is offering 369,786 acres of public lands for lease to oil and gas producers. Land Commissioner Jerry Sadler has called for sealed bids on 608 tracts to be submitted by 10 a.m. on May 5.

Sadler predicted the leases will increase the Permanent School Fund by several million dollars.

SLANT-WELL SUITS — Atty. Gen. Waggoner Carr announced that nine new civil penalty suits have been filed against 14 alleged slant-well oil operators in East Texas, making the suit total 106.

First suit to be filed outside of East Texas, as well as the first against an out-of-state defendant, was filed in Jackson County against John Wrather of Fort Lauderdale, Florida.

Carr also filed another "first" suit, claiming a Rusk County gas well was slanted.

APPOINTMENTS — Gov. Connally appointed Lewis R. Timberlake of Austin to the Texas State Historical Survey Committee. He succeeds the late Mildred Cope, executive of the San Angelo Standard-Times. Timberlake is a past president of the Texas Junior Chamber of Commerce.

He named Charles H. King, Jr., of Dallas Commissioner of Bureau of Labor Statistics. King resigned as president of the Dallas AFL-CIO Council to accept the appointment.

Connally picked Judge W. T. McDonald of the Texas Court of Criminal Appeals to serve as

chairman of the Texas Judiciary Advisory Committee to the U.S. Olympics.

OPINIONS — Attorney General Carr held in opinions:

Be County Commissioners are not required to name a board of managers for a county hospital at Beeville which has been leased to Seventh Day Adventists;

A Bexar County man is entitled to credit on his prison sentence for six months held in county jail;

Term of Titus County Justice of Peace Precinct 1, Place 1, began Jan. 1, 1963, and extends through 1966, while the Titus County J.P., Precinct 1, Place 2 (Unexpired term) serves only through this year.

WATER COMMISSION — South Texas Electric Cooperative, Victoria, received Texas Water Commission approval of application to take 23,400 acre feet of water a year from Guadalupe River in Victoria County to cool steam-powered generators of its new electric plant.

Commission has published a bulletin, "Research on Evaporation Retardation in Small Reservoirs, 1958-63," for the benefit of farmers and ranchers concerned with losing water through evaporation. Bulletin is available free from the commission's office, Austin, Texas.

SHORT SNORTS — Gov. Connally issued an executive order in support of the Texas Education Agency's bid to get the Federal vocational education school contract for abandoned Gary Army Airfield at San Marcos.

Water Pollution Control Board approved three applications allowing City of Orange to continue sewage disposal in Sabine River on condition it improves its plant facilities promptly. Texas May draft quota is only 258 men, compared to 449 for April. University of Texas Board of regents placed law school professor Hubert Winston Smith on leave of absence without pay during the time he is serving as Jack Ruby's attorney.

Texas Industrial Commission's program of coordinating existing development activities may provide "the future pattern in industrial development for other states to follow," according to a University of Texas Bureau of Business Research staffer.

SOMERSET, KY., JOURNAL: "It may be difficult to predict the exact direction of the power hungry bureaucrats' next move but you can safely bet that it will involve expansion of the federal government's control over the affairs of states and communities. Just when you think that the limit has been reached, that the bureaucrats could not possibly find any new areas for encroachment, they spring up with a barrage of new regulatory moves."

THE FOOD OUTLOOK FOR '64

COLLEGE STATION — The food news is good for 1964, says an Agricultural Extension Service consumer marketing specialist with Texas A&M University.

Mrs. Gwendolyn Clyatt reminds that protein foods — including meat, dairy products and eggs — will all be in ample supply. Production of domestic beef, coupled with large supplies of imported beef, point to an increased supply over 1964. Pork supplies also will be greater this year.

Broilers and turkeys will continue plentiful. Dairy products will be greater to some degree — just about enough to keep pace with the increase in population, the specialist says. Egg supplies will remain plentiful.

Pricewise, homemakers can look forward to many special features on beef and pork during the winter and spring months. Reports indicate that summer months will be a high-price period for red meats, dropping again in the fall. Broilers and fryers will continue to be a regular feature at meat counters, with prices averaging about the same as in 1963.

Indications are that protein foods will be bargain during much of 1964. Careful shopping may be necessary to find these good buys, but the practice can help stretch the family food dollar, Mrs. Clyatt reminds.

There's a new disease going around which might be termed "TV medicitis," according to Dr. A. M. Aibinder, New York City. He says: "Certain television viewers watching medical dramas, by identifying with the actors, tend to 'catch' the disease being portrayed. Convinced they have the disease, they visit their doctor and even request three treatments they saw administered on TV."

Mesquite, which is becoming a problem in parts of Texas where it was previously unknown, is sometimes spread by animals. Animals transported from infested areas carry the mesquite beans in their digestive systems. Confinement of animals to a drylot for three to five days after they arrive in a new area will allow mesquite seed to be eliminated from their systems.

We can never repay our many friends for their deep sympathy, gifts and money given us since our home was destroyed by fire. We wish to thank each one of you. May God reward and bless you as our sincere prayer.
Mr. and Mrs. Elmer Howell and Family

Thuran Sensing of the Southern States Industrial Council writes: "Poverty has existed since the beginning of history. In the United States, it has been alleviated as nowhere else. Charity has been carried to incredible lengths, in the private as well as in the public realm. All good citizens want to continue such good works of charity. But this doesn't mean that the productive citizen, whether farmer, industrial worker, white-collar employee or professional man is responsible for such poverty as exists in the nation. It is a fact of human nature that some people are shiftless and prefer to live as drones."

JUDGE A

CANDIDATE

BY HIS

OPPOSITION!

W. S. (BILL) HEATLY

During my 10 years as a member of the Legislature I have earned the opposition of certain special interest groups. The list includes those who want:

- LEGALIZED GAMBLING
-SALE OF LIQUOR BY THE DRINK
-TAX FAVORS FOR THE BEER INDUSTRY

There may be others from time to time, but these are always trying to defeat me, and anybody who runs against me automatically has their support, financially and through paid campaign workers.

I urge voters of the 82nd Legislative District to check the source of organized opposition to re-election of Bill Heatly. Most of it comes from outside the district. Without exception my active opponents represent (sometimes innocently) those who belong in one of three categories:

- (1) They want to get their hands a little deeper in the taxpayer's pocket.
(2) They want tax concessions; or
(3) They want the right to engage in business now prohibited by law.

Based on 10 years of experience none of these ever supports legislation which does not benefit them financially.

I have a constructive voting record in the Legislature and have sponsored or actively supported such legislation as: (1) Exemption of farm implements from State sales tax; (2) Veterans Land Purchase Program, which is self-liquidating and doesn't cost taxpayers a single dollar; (3) Better care of indigent seniles and mentally and physically handicapped persons; (4) Hospitalization for recipients of Old Age Assistance; (5) Constructive legislation on education, such as sponsorship of appropriations in last session \$167.8 million above previous biennium; (6) Continued operation of Rural Electrification and other measures of interest to people of my district.

IT IS EASY TO AVOID OPPOSITION OF SPECIAL INTEREST GROUPS. ALL A MEMBER NEEDS TO DO IS VOTE FOR THEIR PET MEASURES!

In a job of this kind there is no substitute for experience. Lobbyists are never happier than when they can replace a veteran legislator with an inexperienced member who has only one thing in mind: getting special favors for his active supporters.

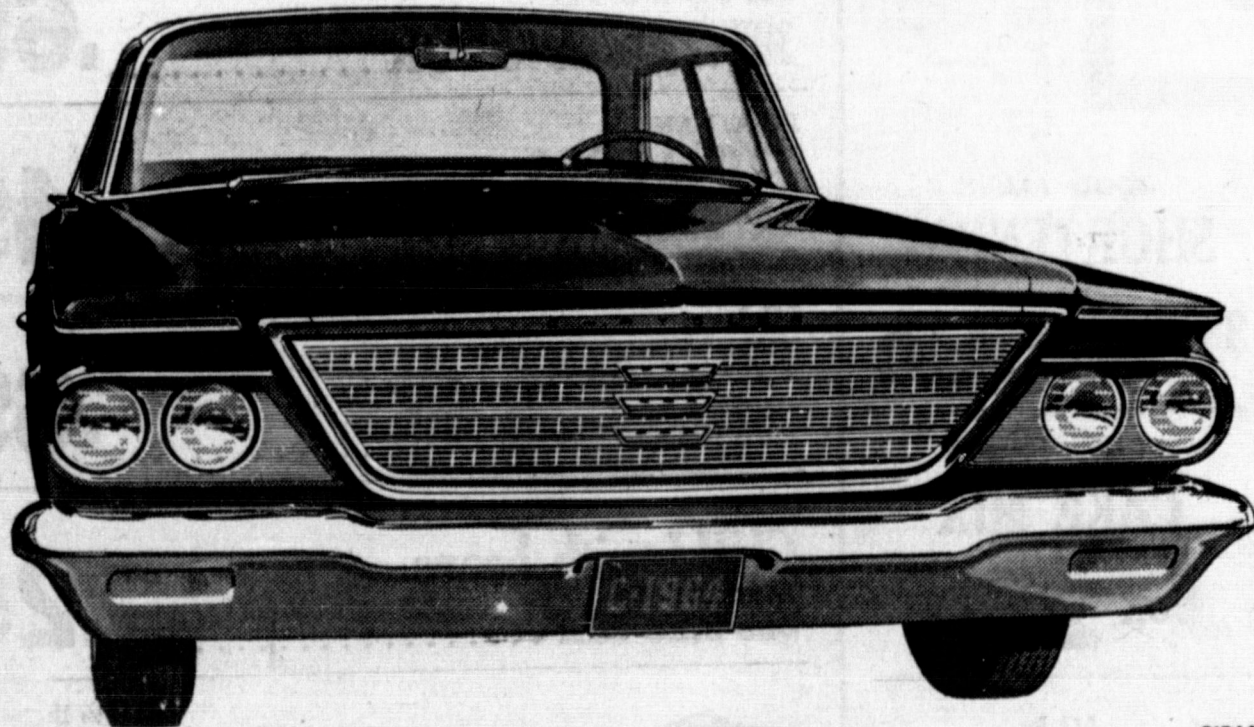

IF YOU WANT A REPRESENTATIVE WHOSE ONLY OBLIGATION IS TO AVERAGE CITIZENS WHO WANT NO FAVORS,

Notes From City Hall

by Mayor C. J. Lohoefer

About the people running for office. Know who you vote for and what he stands for.

First step — Are his taxes paid up to date? Does he want delinquent taxes collected? Does he accept big gasoline allowance each month for 1½ to 2 hours work a month as in the past?

Second step — If he is a member of the Fire Department, will he resign or will he want his water bill from the city and the Fire Department paid as in the past? Go read the law or come up to the City Hall and I will show it to you. No holding of two city jobs at the same time.

Third — Does he want City improvements such as more paving, better parks, better run City affairs, promote projects so as to be ready for our Greenbelt Dam which is in the making right now?

We need something else — Promote Golf Course and Country Club for all of us and not just a few "privileged"; Small radio station, 40 mile area; Build new City Hall and Fire Station.

Fourth — Will he promote salesmen or anyone to come here and build a good home... say we give one or two years free taxes; merchants give \$200 in trade coupons or something like that. We have good schools. We have a good Junior College and good teachers. We have good ministers, the best. I hear a new church will be built soon. We are going to build storm sewers and pave some streets around it and to it.

Five — If you want things done, elect the best 5 you know.

Six — I hope the City Hall will be the place where things are decided. It hasn't been done in the past.

Seven — I hope the Mayor will be able to do in the future rather than be told. The Mayor was just

supposed to sign checks. Help me and I will help the most with the best. More next week.

Karnes To Be Awarded Commendation Medal

NEW ORLEANS, La., April 21 —Cloyce W. Karnes of Box 444, Clarendon, Texas, will be awarded the U.S. Coast Guard Commendation Medal on April 28, 1964.

The medal will be presented to Mr. Karnes by LTJG Edward J. Storey, USCGR, representing Rear Adm. James D. Craik, Commander of the 8th Coast Guard District. The ceremonies will take place in the offices of the Honorable C. J. Lohoefer, Mayor of Clarendon.

Karnes was recommended for the Commendation Medal while serving on active duty with the U.S. Coast Guard on November 8, 1963. While serving as coxswain of the CG-36434, engaged in removing two crew members from the sinking fishing vessel "Princess," disabled on Sabine Pass West Jetty he was cited for meritorious performance of duty. The CG-36434 departed Sabine, Texas, passing through the jetty, to answer a distress call from another fishing vessel. However, when information was received that seas had carried the "Princess" over the west jetty, tearing out the bottom of the vessel, the CG-36434 was diverted to proceed and assist. Upon arrival at the scene, Karnes found two crew members clinging to the stern of the boat, which was the only part still above water. Despite extremely hazardous conditions, poor visibility and 15 foot seas, Karnes skillfully maneuvered the CG36434 between the "Princess" and the west jetty and removed the two crew members just as the boat sank. The survivors were subsequently brought safely ashore. Karnes displayed outstanding courage and initiative throughout this rescue mission.

Karnes has recently been discharged into the Coast Guard Reserve and is now serving on inactive duty.

Highway Patrol Reports Accidents

The Highway Patrol investigated three rural accidents in Donley County during the month of March, according to Sergeant J. W. Wilson, Patrol Supervisor of this area.

These wrecks accounted for two deaths, one person injured and an estimated property damage of \$5,374.00.

The rural traffic accident summary for Donley County from January through March of 1964 shows a total of five crashes resulting in two persons killed, six persons injured and an estimated property damage of \$8,529.00.

All of the rhapsody of spring is in the air. Thousands of motorists will be breaking away from the restraints of winter to take week end drives and trips. Children will also bring forth bicycles, roller skates, scooters, and little red wagons. All of these things spell added danger on our streets and highways.

Many of these motorists will lessen their attention to their job of driving in order to concentrate on the rhapsodies of spring, thereby leading them into traffic violations. These motorists may possibly forget that increased violations of traffic laws lead to accidents and deaths.

We are told that there are nearly 18 million people in the United States who are over 65 years of age. Here are just a few facts gleaned from a report of the council appointed by the president to study the situation; one and a half million live on farms. Almost two million work full-time, and many more part time. Two and one-third million are veterans, twelve and one-half million get social security benefits, more than three million came from other countries, and more than ten thousand are over one hundred years old. This is a great tribute to good doctors, modern medicines, and our wonderful standard of living here in America...

YOUR PLYMOUTH DEALER IS HAVING A RED HOT SUCCESS SALE NOW

ON THE TEST TRACK CHAMP

Recently a showroom Plymouth, equipped with a standard V-8, beat Ford and Chevrolet in ten out of ten tests at Sebring, Florida. Tests of performance, handling, braking and gas economy. Tests of the "things you buy a car for."

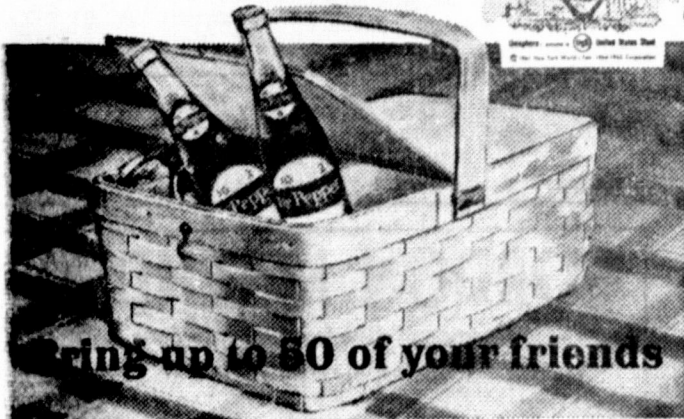

Now your Plymouth Dealer is having a "success sale" on the same model Plymouth (and other models, of course). He's dealing like it was midsummer. And right now trade-ins are worth more too. Get up and go see your Plymouth Dealer.

At Plymouth's request, Nationwide Consumer Testing Institute bought the comparably equipped V-8s directly from dealer showrooms, hired the drivers, supplied the officials, made the rules and supervised the entire competition. See your Plymouth Dealer for details of "Test Track, U.S.A."

PATTERNS FOR PROGRESS

WTU is proud to be a part of your community

PAYROLLS

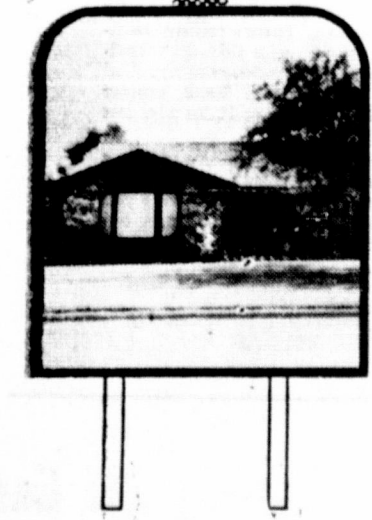

... sparkplug for economic growth

Payrolls pay off when new manufacturing industry begins operation in a town. Memphis, population 3500, is a good example. Pictured above is the Hall Plant, a unit of Burlington Industries, famous textile manufacturers. It brought a payroll to this Texas Panhandle town for more than 100 employees, mostly women, and has become an important addition to the local economy.

National studies show that payrolls, which come from 100 basic new jobs in a community, add 100 more homes such as the total electric Gold Medallion home pictured left... increase retail sales by \$331,000 annually... create three new retail establishments... bring 359 new people including 91 school children... and add 97 more car registrations.

This is another PATTERN FOR PROGRESS.

American industry is on the move... expanding, relocating, and establishing new product facilities all over the Nation. Here is another opportunity for communities to seek new manufacturing payrolls. WTU suggests that every community give serious consideration to this opportunity, since payrolls are, as we have seen, a sparkplug for economic development and growth.
