## Broncs Lose To Groom 28-16

By Tom Higley

A wayward deep punt snapback, which was a little high, may have been the difference in the Clarendon-Groom homecoming game last Friday.

Faced with a fourth and six, Clarendon was forced to punt with only 43 seconds left in the half and the game tied at 8-8.

The snapback was high and to the right of punter Richard Thornberry. Thornberry gained control of the ball and attempted to kick but it was blocked by three charging Tiger linemen and Groom had new life on the Clarendon six yard line with time for three plays. They needed only one as Larry Lamberson circled right end for the go-ahead touchdown with 23 left.

Groom scored first when Lamberson caught a 20 yard pass from end-halfback Jerry Roberts after Roberts had received a pass-pitch-out from quarterback Terry Cornett.

The touchdown play caught the Broncho defenders completely off guard and Lamberson had an easy time crossing the goal line. Roberts was the key to the touchdown. The 6-7 end was being keyed on by the defensive team and when he moved into the backfield, the Broncho secondary loosened up. Midway in the third period Groom attempted the same play and Clarendon handed the Tigers a four-yard loss.

Mighty Mac McClellan, the finest 130-pound halfback in the Panhandle, brought Clarendon back into the game and capped a 58-yard scoring drive when he jumped over the goal line in the second period with two men on him after lugging the ball eight yards. Quarterback David Mooring, a key man in the Broncho drive, added the conversion and the game was tied.

Following the intermission, Groom tacked on two more touchdowns in the third period before Clarendon could mount another scoring drive in the final stanza.

Lamberson plunged over for one yard and Cornett carried over from the one.

The Broncho score came on a 12-yard pass-run from Mooring to McClellan.

If the two teams had gone into the dressing rooms at halftime with the game tied, it might have resulted in a different outcome, but the quick events prior to the intermission took some of the starch out of the Bronchos.

Playing their usual fine game on offense and defense were McClellan, Thornberry, Mike Horton, Larnce Gardner, Mooring and Odell Louis.

The Bronchos will be idle this week and will begin the District 2-A battles next week against the Canadian Wildcats at Canadian. Clarendon 0 8 0 8-16 Groom 8 6 14 0-28

## CHS Homecoming Highlights Week End Activities

Homecoming at Clarendon High School got off to a good start Friday when the Broncho football squad presented their 1965 queen, Miss Sue Hill, and her attendants, Miss Janny Robinson and Miss Linda Palmer, at assembly, and festivities continued at a fast pace until music for the last dance was played Saturday night.

The Broncho football team played in a stadium filled with enthusiastic spectators and with the outcome of the game was not all that they desired, their loyalty was undoubted. The 1965 football queen and her attendants were seated on the sidelines in a short ceremony prior to the game. Following the game visitation was enjoyed at the Canteen. Refreshments of sandwiches, Cokes and coffee were served. As an added surprise, the children of Bert and Arvazene Smith of Amarillo entertained with their combo. All present reported a most enjoyable time.

Registration got off to a slow start Saturday and remained under that of last year. Coffee and doughnuts were served throughout the registration period. Registration of visitors exceeded that of local residents. The Kappa Brunch and Style Show Saturday morning was well attended.

Attendance at the business meeting Saturday afternoon was under expectation. Officers are elected on a two year basis. Cherrye Shadie, president, and Bill Bradshaw, vice-president were carried over. Roberta Pittman was elected to replace Betty Bell; Jeanie Johnson, assistant secretary to replace Sandra Mooring; and Evelyn Mann, historian.

Some 130 persons attended the banquet in the Cafeteria Saturday evening. Dr. Richard Gilkey was MC for the occasion. The dining room was gaily decorated in maroon and white with white chrysanthemums. Mrs. Norma Selvide, a Clarendon College instructor, presented a clever program recalling classmates of several years. Each honor class with the exception of 1911 was represented by their respective queen candidates. Mrs. Doris Louise Smith Hays of Amarillo was presented Ex-Student Queen.

The evening was climaxed with a dance at the gymnasium in the Old Red School building. Music was furnished by Phil Phillips and his orchestra from Amarillo. Plans already are underway for the next annual Homecoming. Officers would appreciate hearing any comments or suggestions to increase the interest of local residents in Homecoming and help build a bigger and better ex-student association.

## Colts Blackout McLean 20-0 Thursday Night

The Clarendon Junior High Colts added another victory to their season's record when they defeated the McLean Junior High team by a score of 20-0 in a tilt at Broncho Field Thursday night.

The boys played good ball for the most part with James Hall, Bennie Reece, and Steve Merchant standouts on defense. The first score came in the first quarter with Charles Louis carrying in the ball from 60 yards out. The run for extra point failed. In the second quarter Charles Louis took a pass from James Hall from about 40 yards to rack up the second score. Jim Moore ran the extra point. The half ended with McLean threatening at the goal line.

The last tally of the game came in the third quarter when Charles Louis again scored from 40 yards out. The run for extra point failed.

A film of the game was made and studied on Monday. The film was good and showed some good plays.

A pep rally was held Thursday morning preceding the game and the cheerleader presented a short skit. Lots of enthusiasm has been shown by school students and fans. Team members and Coach Pete Bromley and Jack Hall appreciate all of the support they have received. Attendance has been good at the games.

Fans should see some good ball Thursday night when the Colts play the Junior High group from Skellytown. Each team is undefeated. Game time will be 7 p.m. at Broncho Stadium. Let's see a good crowd out!

Local citizens are invited to inspect the fire station this week or any time at their own convenience.

The Fall season is a bad time for fires, especially grass and trash fires and we hope everyone will make a concerted effort to clean up around their premises and help in the prevention of costly fires. Inspection of electric wiring etc. should be made also, stated Billy Jack Land, local Fire Chief.

**WATER POLLUTION KILLS MILLIONS OF FISH IN 1964**

More fish were killed by pollution in 1964 than in any previous year reported, according to a recent report from the U. S. Department of Health.

Industrial pollution accounted for the largest number killed. Municipal waste and toxic substances from agricultural operations followed in second and third place.

Fish kills are doubly significant in water pollution control. Fish themselves are a unique and valuable recreation and economic resource. Possibly more important, the occurrence of a kill often signals a hazard affecting other users of the water and endangering public health.

Although the 1964 total, an estimated 18,387,000, was larger than ever before reported, it is highly unlikely that it represents more than a sampling of the kills that actually occurred.

This is due to differing reporting procedures followed by various states and to obvious difficulties involved in monitoring the country's thousands of miles of fresh water streams and millions of acres of lakes and marine

waters. Kills may occur from a sudden and deadly change in an aquatic environment. With time, the stream will usually recover and the fish population return.

Water pollution exerts its greatest tool on a fish population, not by causing individual kills, but by destroying the natural habitat. Serious fish kills seldom occur in badly polluted water, simply because there are usually few, or no fish in the stream or lake to die.

One hand-operated mill was provided for each group of five to ten men in the Roman army and the soldiers ground their own corn.

Andrew Jackson, seventh president, seldom held cabinet meetings, but rather relied on a small group of advisors whom the newspaper dubbed the "Kitchen Cabinet."

*Light Leads Our People*

Each day a new door opens. What it reveals on the other side, for the people who must pass over its threshold, depends upon the conditions under which they lived their yesterdays.

Those in some countries look through the door upon a new day shadowed with oppressions, where there are few freedoms, tyrannies abound and living is hard and cold.

Those of us in America are more fortunate. Opening the door each day, we are met by the light of freedom which has led our destiny for many years. Protecting that freedom

has been — and always will be — a Press that will not succumb to dictation or overpowering despotism.

For the light that leads to all freedoms is Freedom of the Press: Education . . . information of all kinds . . . news of all that transpires . . . and the open discussion of opinions and ideas that sharpens understanding.

Complete freedom of speech and of the press is the light that builds understanding, helping all mankind to advance onward and upward through the opening door of each tomorrow.

### 1966 Belvedere Has Completely New Appearance and New 426 Hemi Engine

Plymouth has a completely new series of Belvedere intermediate size cars in six body types and eighteen models for 1966.

They have a wholly new appearance, major chassis improvements and a wide range of new optional equipment. A production version of the famous 426-cubic inch hemispherical head V-8 engine used in racing will be offered in 1966.

The Belvedere series, with a 116-in. wheelbase for sedans, hardtops and convertibles and a 117-in. wheelbase for station wagons, is one of 4 series of 1966 Plymouth cars, providing complete coverage of the low price field.

"In 1965, we made Plymouth fully competitive, model for model, with other volume producers in the low price field," said P. N. Buckminster, general manager of the Chrysler-Plymouth Division. "In 1966, we are making major changes in the intermediate Belvedere series. Their new styling, new safety features and the new optional hemi engine are among the attractions that will widen Plymouth's appeal in the volume segment of the market."

#### LONGER AND LOWER LOOK

Belvedere cars have fully unitized bodies with curved glass windows and new body lines which make them look longer and lower than 1965 Belvedere cars.

One of the 1966 safety features is a new type of inside door handle shaped like the familiar buckle of a seat safety belt. It is integrated with the arm rest and lies flat on the door panel. The handle is exceptionally easy to operate and at the same time reduces the possibility of accidental door opening.

Other safety features include new, more efficient parallel windshield wipers, new windshields with less curvature at the outer extremities, new power brake boosters providing an improved pedal "feel," and new, thicker secondary brake shoe linings.

#### INTERIOR FEATURES

Outstanding interior features include new instrument panels for all models and new shell-type

design bucket seats for Plymouth Satellite two-door hardtops and convertibles. The new seats have wider seat cushions and higher seat backs than in 1965.

A new floor console for Satellite cars accommodates selector levers for either the automatic or four-speed manual transmission. There is a storage compartment with a side opening as an integral part of the new console.

#### NEW HEMI ENGINE

A new 426 cubic inch hemispherical combustion chamber V-8 engine will be available in Plymouth Belvedere cars with manual 4-speed transmission in mid-November, and in automatic transmission cars in January.

The production hemi engine has a 10.25:1 compression ratio, two tandem mounted four-barrel carburetors, provision for carburetor heat in the warm-up period, dual exhausts with mufflers and valve timing suitable for normal driving.

The standard V-8 engine in Plymouth Belvedere series cars has 273-cubic inches displacement with a two-barrel carburetor. Other options are 318 and 361-cubic inch V-8s using regular fuel and a high performance version of the 383-cubic inch V-8 with a four-barrel carburetor and dual exhausts, using premium fuel.

#### SIX BODY STYLES

The six body types in the Belvedere series are a two-door sedan, two-door hardtop, convertible, four-door sedan, two-seat station wagon and three-seat station wagon. All body types are available with six-cylinder or V-8 engines. The Satellite two-door hardtop and convertible deluxe cars of the series are available only with V-8 engines.

### 1966 Chrysler Is New Front To Rear

The Chrysler cars for 1966 are new from front to rear with more powerful engine options, new interior seating arrangements and equipment options. There is a stronger separate styling identity for the four series which make up the Chrysler line — the luxury New Yorker, the sporty 300s, the economical Newports and the new Town and Country series of station wagons. Most changed in appearance for 1966 is the distinctive 300 series. The 300 two-door hardtop shown

above has a new roof line with a restyled rear window, a new hood, new front bumper and wrap-around taillights. Standard engines range from the 383-cubic inch V-8 using regular fuel in the Newport and Town and Country cars to the 440 cubic inch V-8 with a four-barrel carburetor in the New Yorker. New equipment options and features include power front wheel disc brakes, an adjustable tilting and telescoping steering wheel, and safety-type inside door handles.

**TOURISTS CONFERENCE CALLED**—Some 500 Texans are expected to attend a tourist development conference in Austin on October 14. Purpose is to insure better cooperation between state and community efforts to promote travel.

Governor Connally will keynote the sessions. Other speakers will include Jon McCarty, chairman of Texas Tourist Development Agency advisory board; pollster Joe Belden; Kern Tips, TTDA advertising account executive; Tom Taylor, State Highway Department travel and information division head; J. Weldon Watson, Parks and Wildlife Department director; John Ben Shepperd, president of Texas State Historical Survey Committee; and Don Epperson, Texas Tourist Council executive director.

Meetings are open to the public, says TTDA Director Frank Hildebrand.

**AG OPINIONS**—Attorney General Carr has ruled that either parent may consent to the marriage of a minor, and a County Clerk may issue a marriage license.

However, if both parents are alive, the mother's consent is sufficient upon a written affidavit subscribed and sworn to by her that she and the minor have lived in the county more than a year, and the father has been out of the county for more than six months, or that the mother and father are divorced and she has had custody of the minor more than six months.

In other official opinions, he ruled that:

- A college student who takes and passes an advanced standing examination in the field of American History, or Texas History, does not fulfill specified requirements by merely passing the examination.
- Commissioners Court of Jefferson County is not authorized to grant salary increases of the Criminal District Attorney, the Judge of the County Court at Law, or the Judge of the County Court at Law, Number 2.

**JOINT HEARING PROPOSED**—Legislative budget writers are considering joint hearings by

House and Senate committees as a method of abolishing controversial riders to spending bills.

Budget Board staff reviewed for members a long list of governmental studies it has been called on to undertake.

**APPOINTMENTS**—Thomas E. Riggs, Certified Public Accountant in Austin, has been appointed executive director of the Texas Hospital Association, replacing Bob Burkhardt who joined the staff of the State Department of Health.

Governor Connally has appointed Benjamin Orland Sims of Paint Rock and reappointed M. L. Schultz of Eola and Curtis L. Stevens of Millersview to the Concho River Water and Soil Conservation Authority.

House Speaker Ben Barnes named to key committee to study adequacy of faculty compensation in state colleges and universities Amarillo attorney Wales Madden and Reps. Tom Bass of Houston, W. Reed Quilliam Jr. of Lubbock and W. C. (Bud) Sherman of Fort Worth. Lt. Gov. Smith earlier named Sens. D. Roy Harrington of Port Arthur, Andy Rogers of Childress and Pete Snelsen of Midland to panel. Barnes emphasized need for more "fringe benefits" to faculty members.

**PLAN NOW FOR EDUCATION BEYOND HIGH SCHOOL**

The class of 1966 is entering the final year of secondary school work. Many of these high school seniors are so busy they have given little thought to what will happen after graduation.

Now's the time to take a thorough, realistic look ahead to the fall of 1966 says Patsy Reynolds, specialist in family life with the Texas A&M University Extension Service.

"Parents and school counselors should help students take a look at their education or career plans early this fall. They need to complete their plans for college, business school, or other advanced preparation to earning a living. Applications should be submitted by November or December—yet many families do not realize this when their first child prepares to enter college," Miss Reynolds says.

Students who plan to apply for scholarships should keep this early deadline in mind, too. Many scholarships have a February 1 deadline for application.

"This means that the young person must be admitted to the college and then file the application by February," the specialist adds.

She advises young people to talk to school counselors and write to the colleges or business schools in which they are interested.

A decision on higher education should be reached soon, and it may require some serious thinking before final plans can be made Miss Reynolds says.

**PLASTIC PROTECTS LURES**—If you carefully spray new artificial baits with clear plastic they'll stay brighter longer and catch more fish as a consequence.

**POWDER REMOVES RUST**—A way to remove rust spots from guns is to dip a rag in oil, then in cement powder. Cement provides just enough mild abrasive to polish without scratching.

**KEEP BOOTS DRY**—If insulated or wading boots get damp inside, you can remedy this by cutting a piece of cardboard and inserting it in the bottom of the boots. Absorbent qualities of the cardboard will soak up the moisture.

Mrs. C. E. Beach and Mrs. Lee Wenz of Loveland, Colorado visited Mrs. Edith Longan Sunday afternoon.

## STATE CAPITAL

# Highlights AND Sidelights

by Vern Sanford

TEXAS PRESS ASSOCIATION

Battle lines are forming! In the political arena, that is.

Big gloves already have been laced on the champ vote getter—Gov. John Connally. He's in the ring and squared away—ready to battle any challenger. Question now is—will he win by default? It's possible. He has a record few will challenge.

Very likely there will be a free-for-all in most other races. Texas' second highest state office could be an exception. There Preston Smith holds forth in rather firm command as Lt. Governor.

Popular young Waggoner Carr already has proclaimed his interest in becoming U. S. Senator and is agilely dancing around the ring for the first sign of Democratic opposition to Republican John Tower's post. This may come from Jim Wright who is skipping rope to get in shape for something bigger. But so far he hasn't entered any ring.

Secretary of State Crawford Martin has set up his training camp for Carr's to-be-vacated post as Attorney General of Texas. Most likely he will have Connally's blessing, since he was

the Governor's appointee as Secretary.

State Sen. Franklin Spears of San Antonio is trying to decide whether he wants to take on Martin. Other possible candidates for Attorney General are Former Sen. Frank Owen of El Paso, Sen. Galloway Calhoun of Tyler, and Harris County District Atty. Frank Briscoe.

U. S. Sen. John Tower told Austin reporters that Texas Republicans will concentrate their statewide efforts on the senate race in 1966, and will field no active candidate for governor. In reference to his own race and local legislative and congressional contests, Tower predicted a good year for the GOP.

Announcements this early could mean one of two things: a burned out field by 66—or several Battles of the Century.

As opponents warm up, only time will tell. From the Capitol Dome and the focal point of all races—Austin—it looks right interesting.

Meanwhile, better buy yourself a ticket while still available at the box office—er...poll tax headquarters.

**DEATH PENALTY OUT?**—Some attorneys contend that the new code of criminal procedure abolishes the death penalty for crimes in Texas.

They believe that absence of procedures for assessing punishment—where the state asks for execution of a criminal—makes it impossible for a death penalty to stand up in appellate court even if assessed by a jury.

A member of the State Legislature, Rep. Bob Armstrong of Austin, is asking Governor Connally to submit proposed revisions in the controversial code to a special session of the Legislature. Complains Armstrong: the revision goes too far in requiring accused persons to be warned of their rights against giving statements to police.

**SEEK FEDERAL FUNDS**—Twenty-five Texas school districts filed early applications for a share of the \$81,000,000 provided under a federal act aimed mainly at helping underprivileged children. Aid will be dispersed at the rate of about \$195 a pupil for those from families with incomes of less than \$2,000 a year. First districts applying were Houston, San Antonio, San Angelo, Poette, Lipan, Fannindale, Paducah, Longview, Dimmitt, Del Valle, Crystal City, Taft, Gonzales, Rochester County line, Dickinson, St. Jo., East Lamar, Cunningham Rural High School, Deport, Laneville, Graham, Jasper, Bandera, Giddings and Witharrall.

**REDISTRICTING ROW GOES ON**—Attorney General Carr and the Republicans still are swapping legal broadsides over congressional redistricting.

Carr, in a new brief filed with the Houston federal court, urged

judges to give lawmakers another chance at reapportionment in 1967 if the 1965 redistricting act is invalidated. He repeated his earlier opinion that the law adopted this year meets the court's specifications, however, since population variance among the 23 districts is below 15 per cent.

A new GOP brief chides that the redistricting act borders on "sheer lunacy" and demands that it be redone by electrical com-

FALL SCREWORM INCREASE FEARED

Texas farmers and ranchers may be in for the most severe upswing in screwworm infestations in two years during the upcoming months.

All ingredients for another fall buildup are present in the state, screwworm eradication leaders announced: a native fly population, favorable weather and an abundance of animal wounds.

Increases in screwworm cases during the fall are part of an age-old pattern established by the insect. General rains over much of the state, moderate temperatures and an increase in animal husbandry activities comprise favorable conditions for screwworms to develop and move cross-country. Before the eradication program began, tens of thousands of cases were experienced during fall months, and even last year more than half of the infestations detected in Texas were reported in September, October and November.

This year's buildup could be the worst since 1963, eradication officials fear, because, unlike last year when no cases were found in late summer, screwworms are already present in Texas and could spread quickly into the interior of the state when weather conditions become right. Zavala County, southwest of San Antonio, has experienced screwworm problems all summer. Eradicators last month initiated an intensified spray campaign in the county in an attempt to wipe out the native fly population there.

The success of their efforts may determine if Texas has a fall buildup or not. Eradication forces are prepared to treat with sterile flies all infestations reported to them. Larvae from suspected infestations should be sent to the eradication laboratory at Mission, or

Newest member of the stylish 1966 Chevelle models is this Super Sport 396 Coupe with its distinctive roof treatment featuring a recessed rear window. A new radiator grille, simulated hood scoops and the 'SS 396' identification on grille and rear cove area distinguish this model and the Super Sport 396 Convertible from ten other Chevelle models for 1966. Strato bucket seats are standard equipment for the SS 396's. Dealers will display the new cars on October 7.

to the local county agent, for positive identification.

Stockmen are also urged to be extremely cautious in working their livestock and should apply smears or sprays to all wounds. It has been estimated each screwworm case cost approximately \$62 in labor and medicines and loss of animal weight and market value. Pre-

ventive treatment is obviously a much cheaper alternative, livestock industry leaders point out.

## FARM NEWS

from County ASCS Committee

### DIVERTED ACRES GRAZING

Several producers have asked about grazing or haying diverted acres. As of this date, Donley County has not been approved for the drought emergency program. No grazing will be allowed on diverted acres until after November 1, 1965. Any grazing before this date will be a violation of the feed grain agreement.

### FARMING OPERATION CHANGES

Because of the ASCS definition of a farm, it is very important that this office is promptly notified of any changes in the opera-

tion of your farm. This includes sale of land, purchase of land, changes of operators, etc.

### COTTON MARKETING CARDS

Cotton marketing cards for the year of 1965 are now available for eligible producers. These may be picked up in the ASCS office at your convenience or we will mail them to you if requested to do so.

### DEFERRING PAYMENTS

We have received several requests from producers to defer payments due them until after the first of the year. This is permissible as far as our office is concerned. However, we would suggest that you check with your tax consultant. It is our understanding that a tax ruling has determined that his payments will be considered income in the year in which they are made

available to the producer or when received by him which ever is earlier.

All of us at the office were saddened by the death of Mrs. Mary McCuan, mother of Molly Ritter. Our heartfelt sympathy goes out to all the family.

Out-of-town guests visiting in the home of Mrs. F. A. White and attending a family reunion over the week end were Mr. and Mrs. M. A. Wolfe of Los Angeles, Calif., Mrs. S. A. McCarroll of Sweetwater, Mr. and Mrs. T. D. Hall of Wichita Falls, and Mr. and Mrs. Rufus White and Harold White of Ft. Worth.

While in McAllen, they heard Atty. Gen. Waggoner Carr address the 600 delegates present. San Angelo edged out Amarillo in the bid to host the 1966 Fall Board Meeting. A proposed state project by the Clarendon Jaycees concerning the Roadrunner program, did not get out of committee.

News From Clarendon College

## THIS AND THAT

Campus Chatter  
by Jimmy Blackerby

Wow! Things have been moving fast on the Hill this week. There has been so much activity that one could hardly keep up with everything. It was not unusual for students to sit halfway thru a meeting, only to discover that they were not in one in which they intended to be. Oh, well, that's what makes college fun.

This has been the week for politics, and Clarendon College may be the springboard for some future politicians. Class elections, student government elections, and club elections were the cause for all of the chaos. It looked good to see so many students taking an active part. The prediction that this will be a real swinging year is already coming true.

Bad news travels like wildfire, and rumor has it that the freshmen are next on the list. Initiation plans are in the making and some of the rumors sound as if those poor little frosh are in for some traumatic experiences.

Defynitions  
by the Nitwit

Mr. Reed came up with a good definition of education the other day: forcing abstract ideas into concrete heads.

You know what an efficiency expert is, don't you? He's a man smart enough to tell you how to run your business and too smart to start his own.

Mr. Neece asked his Economics

class the other day what an economic depression was. One bright freshman who's evidently been here answered, "When the tenth letter of a telegram is 'please' instead of 'love'."

Mrs. Weaver asked Judy Walls to define a good speech. Judy's reply: "A beginning and a conclusion placed not too far apart." I like this one: "Habits are trait jackets."

Steve Lindsey says that honesty is the fear of getting caught. This lament overheard in the lounge: "Ignorance is when you don't know something and somebody finds it out."

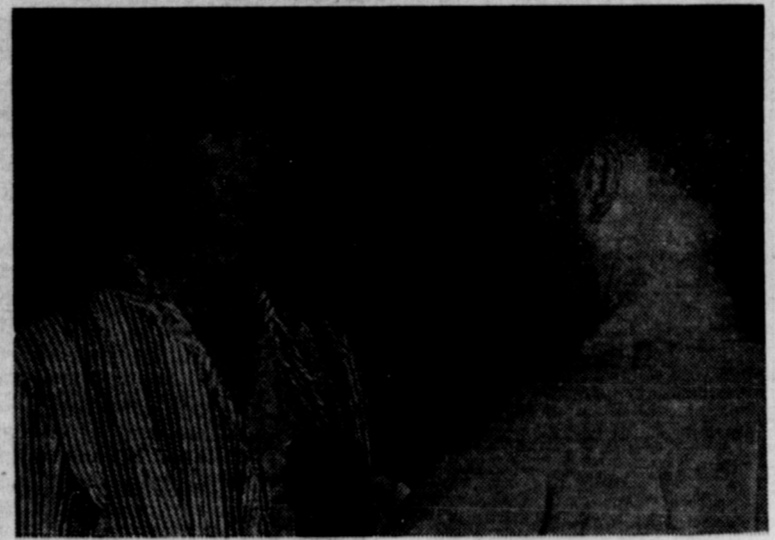

Mr. Williams gave us a good definition of a typewriter: "A machine used by stenographers, and it can't spell, either."

## HERE AND THERE

College "Get-Acquainted" Party  
by Maudena Self

A large per cent of the college gang, including the faculty, gathered at the City Park Tuesday, September 28, at 6:45 p. m. for a watermelon feast. Appropriately enough, after everyone had already eaten his fill, there was a "Melon-Eating Contest." Five boys volunteered to compete. Gerald Welch from Clarendon was the winner, despite his size. Five girls tried their luck, with Brenda Winn from Hedley coming out the victor.

Several of the freshman students competed in an Identification Contest. The winners were determined by the number of students whom they could name. Charlene Gray and Richard Bell, both of Clarendon, were the champs. We found out which students in Clarendon College use their heads the most. Glenn Judd and Buster Branum, both of Clarendon, came out first in a Watermelon Rolling Contest. As we said they used their heads.

Avery Island, near New Iberia Louisiana has a salt mine underground and raises peppers without charge above ground for Tabasco sauce—hence is called the "salt and pepper island."

Happy days are just ordinary days made wonderful either by the pleasant folks we meet or the pleasing things we do. Even our work becomes a happy part of our day when we are busy doing the things we love to do. Happiness doesn't just happen. On the other hand it's a direct by-product of a mixture containing our attitude, our work, and our surroundings.

We were talking with someone the other day, and they brought up the day of the week. For a brief moment we seemed lost between Monday and Saturday. Afterwards we thought how times have changed in the last 25 years. We live so fast and so many new

and different things happen that we can not fit any certain pattern to our life for a week.  
It used to be that we always went into town on Saturday afternoon except during harvest time. One could almost tell by the amount of gasoline in the family car how near it was till time to go into town. Then, there was the egg case — it would be half full by a certain day, and in like manner the cream can. Nowadays most of our ranchers and farmers buy milk, eggs, and even fancy colored bathroom tissue.  
There used to be a basketball game at the school house on Friday, and the children would mention this all week. Now, there is a game each night and most of

the afternoons within driving distances of any ball fan. Folks went to the show or played 42 on Saturday night only and were too tired all through the week. My, My, if things keep on this way for another 25 years we won't know one day from another... even Sunday.

Inscription on an old sun dial: "Time is too slow for those who wait, too swift for those who fear, too long for those who grieve, too short for those who rejoice, but for those who love—time is eternity"

The small town gossip would be terribly unhappy if they should find themselves living in a neighborhood so nearly perfect that one couldn't find anything to repeat about them.

This week we read of a touching experience about a 15 year old over-fat and handicapped young lady who was greatly distressed about her name. Her parents had chosen to name her "Pixie". Now that she was different from the other young folks in already too many ways it seemed extra cruel to be so different even in a name. It is something to think about when anyone thinks about a name for a new baby. The name that would be so cute for the diaper girl or boy could prove to be humiliating to the young person trying to grow up 15 years later.

Most everyone will hit bottom now and then, but if we have our head pointed in the other direction we can at least hope to land on our feet.

**The Bulldog Kennel**

The Clarendon College Bulldogs traveled to Plainview Thursday to scrimmage the Wayland College varsity team. Coach Overcast was wearing a broad smile on his return from the highly-successful work-out, saying that he was well pleased with the outcome. The Bulldogs showed much early progress, particularly on defense and in board play. These were areas in which the Clarendon club had been quite weak in the first few weeks of practice. "The contest proved that my

boys can handle the boards against people older and larger than they. They showed a spirited defense at least six weeks ahead of schedule," stated Coach Overcast.

A rematch is slated against the Pioneers next Friday, October 8th, in the high school gym. The night session, which begins at 7:30, will be open to the public.

EDITH BARNES

A memorial gift has been given to the library to be dedicated to the memory of Mr. Rex Jones, husband of Mrs. Penelope Blocker Jones.

"Is Paris Burning" by Larry

Collins and Dominique Lapiere is worth reams of the anti-communistic propaganda that is being printed or spouted by some of the fanatics. Why? Because the writers give you an unforgettable and nightmarish picture of what life under a dictator can be like.

The book is not even trying to be propaganda. But such is the genius of the authors that after reading it you wonder how any one with even half a mind could ever embrace any kind of dictatorship be it nazi, fascist, or communistic. This is instilled in the reader by having only a few lines here and there in the text about the treatment of the captive French at the hands of their captors, Hitler's henchmen.

Even though you know that Paris miraculously escaped Hit-

ler's sentence of death for it in August 1944 as you read you are afraid someone will set off one of those charges of dynamite and destroy even one of Paris' irreplaceable treasures. You also find yourself sharing in a small measure the pure joy of the people of Paris when they are liberated. We might take time out to be thankful for the freedom we enjoy and resolve that we will take thirty or so minutes a month seeing if there is something we can do to help preserve that freedom.

To get back to "Is Paris Burning" by Collins and Lapiere and I quote: "Few days in history have witnessed an emotional outpouring as overwhelming as that which accompanied the liberation of Paris. Yet few men then realized, or even now comprehend,

the miracle that had occurred; how narrowly all Paris had escaped being reduced to rubble and ashes."

The whole story of that miracle is told for the first time in "Is Paris Burning?" It encompasses the explosion of events, large and small, that involved Prussian generals and schoolboy of the resistance, General de Gaulle impatiently forcing the hand of his reluctant American allies while he himself was desperately maneuvering to gain control of the French underground, and the ordinary people of Paris rising to throw off the Nazi occupation as an enraged Hitler vowed to leave the city "nothing but a city of ruins."

Alfalfa, native to Asia, did not reach this country until 1850.
