## McGuire and Weatherton place in state meet

Two of the finest individual track careers in Clarendon High School history came to a close Saturday afternoon in Austin. Brad McGuire and David Weatherton, the only two seniors on this year's Broncho track team, competed against the finest in the State and once again represented the maroon and white in their usually outstanding way. Brad placed fifth in the discus on Friday with a throw of 152'. Brad also placed 5th in the shot put on Saturday with a toss of 52'2 1/4". This was the second year for Brad to compete in the State Meet and to place in the top five in the state in two events is an accomplishment anyone can be proud of. David also placed fifth in the 400 meter dash with a time of 49.7. This was the first time this season for David not to win his event in a meet but his time Saturday was still a great effort and once again to place in the top five in the state is tremendous. David and Brad have made great contributions in all phases of the C.H.S. athletic program during their high school careers. They have won countless numbers of medals and set standards for future C.H.S. athletes to aim for such as David's school record of 48.8 in the 400 meter dash. Even more importantly they will be missed for their outstanding leadership, work attitude and competitive spirit. They were and will always remain an inspiration for all of those who were fortunate enough to be able to work with them. Thanks men for a tremendous year, a tremendous career and especially for exemplifying what a true Clarendon Broncho is!

## Firemen demonstrate rescue equipment

A group of Clarendon Fire Department members traveled to Memphis Friday May 13th and put on a demonstration with their new rescue equipment. The Memphis Fire Department is in the process of selecting similar equipment and Chief Jerry Smith stated the Memphis group really appreciated the Clarendon Department taking the time to demonstrate this equipment since it was very helpful in determining the type of equipment the Memphis Department would purchase.

In addition to members of the Memphis Fire Department, several hundred other people witnessed the demonstration as it was conducted in the Memphis City Park as an added attraction to the Memphis Lions Club annual "Park Opener", a fund raising event in which that club sold tickets for barbecued hamburgers and beans. Most of the profits from this event will be added to the "Jaws of Life" fund for the purchase of the rescue equipment for use by the Memphis Fire Department.

The Memphis Department added that the Clarendon Department will be invited to their next "feed" as a further expression of their appreciation of the neighborly cooperation by the Clarendon Department.

### Letter to the Editor

Immediately following broadcast of the ABC network's television program, 20/20, on March 25, concerning the Clark Ranch and FmHA. Administrator Charles W. Shuman sent the following letter to the show's producer, Craig Rivera. Dear Mr. Rivera, 20/20's March 25 feature on the Clark ranch and Farmers Home Administration slanted or ignored a number of facts available to you from your access to the loan file. Had you chosen to present them your viewers

would have received a balanced account of how and why one Montana rancher went out of business.

For instance: \*During the same winter Mr. Clark alleges Farmers Home had denied him money to heat his house, fuel for his tractors, repair his machines and feed his family, Farmers Home had in fact made available \$40,000 in loan funds for these purposes. The amount Mr. Clark reported expending for these purposes—a matter of record—was \$20,506.

\*Far from suffering from a lack of loan counseling, Rick Hall, the county supervisor, had contacts with Mr. Clark either by phone, letter, or face-to-face in the Circle, Montana, Farmers Home office (which is over 100 miles from the Clark ranch) 16 times. These contacts began when Mr. Hall became a supervisor in late 1980 and continued over the next 13 months when it became apparent the loans were in trouble. Before that, farm visits were made by a previous county supervisor, an assistant district director and a senior loan officer for a total of four times between 1979 and 1981.

Advice, to be effective, must be followed. There is ample evidence that much of Farmers Home's advice went unheeded and that this, in part, led to Mr. Clark's present financial straits.

\*It was during these coun-

seling sessions that the county supervisor learned that (1) a \$21,049 check from an insurance company covering hail loss was not properly accounted for and that the money was used improperly to buy new equipment and (2) that grain crops covered by FmHA's security security instruments had been sold. Together, these failures to account for secured property totaled some \$50,000.

\*Failure to account for secured property is a serious matter. You can't sell your mortgaged car of home without your lender's permission. The same is true with property securing a government loan. When this happened, the county supervisor very properly took action to protect the taxpayer's interest.

The taxpayers' interest in the Clark place is considerable. As of March 1, 1983, unpaid principal was \$1.3 million and principal and interest delinquent was \$820,693. The daily interest load was \$372. No plan devised by the Clarks or by Farmers Home could blueprinting a method to eventually pay off this debt and interest load, given the ranch's resources and Mr. Clark's track record in the past. Liquidating the loan was the only answer to both protecting the taxpayers' interest and preventing a further descent by the Clarks into a lake of unpayable debt.

20/20 made much of the fact that County Supervisor Hall did not grow up on a farm. In fact he has had

extensive experience working on farms and ranches in Montana—even to the extent of putting in a crop on his own time for an injured borrower. There is nothing in law or regulation—nor should there be—requiring a county supervisor to be the son or daughter of a farmer. Mr. Hall has a university degree in agriculture and is fully qualified by education and experience for his job.

\*Mr. Hall did not refuse an interview with 20/20, as you know. He had been instructed by his boss, the state director, to refer 20/20 to the state office for the interview, because the file was not available at the county office and because of the necessity for having an attorney present to advise on Privacy Act matters.

Finally, it should be noted that over a 9-year period the Clarks received more than \$1 million in federal loans at much lower interest rates than most other farmers could obtain. From 1976 through 1980, with this assistance, they increased their assets from \$180,000 to \$1,222,000 with a concomitant increase in debt. This included a half-million dollar purchase of land from an individual, on which the Clarks made annual payments from FmHA loan funds, not their own funds, his individual lender's fore-

closure action on the Clarks was yet another preceptitating factor in the FmHA loan acceleration, a fact that went unreported by ABC.

In 1982, when the Clarks' loan was accelerated, they were one of 3,027 Farmers Home borrowers in Montana. All suffered from the same low prices and many suffered from the same natural disasters afflicting the Clarks. However, of these 3,027 borrowers, only 27 went in such dire straits as to require acceleration of their loans. The others remained in farming, thanks to the kind of Farmers Home loan counseling exemplified by Rick Hall and other county supervisors, but most of all,

thanks to the self-sacrifice and good management ability of the individual farmers and ranchers themselves.

I believe that you should be aware in addition that Geraldo Rivera violated an agreement with the state director, made in advance, to turn off cameras when Mr. Lund felt it necessary to consult with Farmers Home's attorney. Using one of these sequences on the air, as he did, to make it appear that Mr. Lund was unwilling to answer a question—when in fact he was seeking counsel from the attorney—is at the very best a violation of trust. Such tactics may provide drama but

they also serve to further weaken whatever credibility may remain for magazine television programs.

Sincerely,  
Charles W. Shuman  
National FmHA  
Administrator

We know not why things happen,  
nor why we have to go.  
Our days on earth are numbered,  
but how long we do not know.  
Our hearts are heavy burdened,  
When our loved ones leave us here.  
Especially when it is our children,  
The ones we hold most dear.  
There is heartache, sadness and loneliness,  
In parting of this sweet and lovely one.  
Her life on earth was shortened,  
but her memories will linger on.  
Now if we were to go to Heaven,  
I know she would be singing too,  
On that Golden throne with Jesus,  
Singing, "Golden Rings", and "Sixteenth Avenue".  
Please, loved ones take heed and listen,  
to what an accident did today,  
Giving this message of pleading,  
"In Memory of Tambra Renee".

## Pathfinder Luncheon ends 1982-83 year

The Pathfinder Club held their annual end-of-the-club-year luncheon at the Patching Club House on Friday, May 13. Members and guests enjoyed a festive meal catered by Mrs. Bernie Green. Spring flowers decorated the hallway and meeting rooms and small vases of mixed flowers graced the center of each table-for-four.

Chicken divan, colorful fruit salad, wild rice, and hot rolls, were served with tea and coffee. Dessert was

lemon mousse served in orange cups. Mrs. Jerry Green assisted in serving. After the meal, the president, Mrs. Horace Green, thanked the outgoing slate of officers and presented each with a gift of appreciation. The club will participate in the garage sale planned to benefit the Patching Club House. Members were asked to keep this in mind and start collecting items for this sale.

The president ended this club year with a program,

"Foods-Yesterday, Today, and Tomorrow". She told of rice fields of ancient Egypt; probably the first cultivated crop of mankind. Evidence of an early type of chick pea has also been discovered. For an example of today's food, the meal just enjoyed was used. Tomorrow's food will probably be geared to long storage and quick preparation. Radiation will be used extensively for preservation of many types of foodstuff.

A very successful club year is now ended, and members will have a summer vacation before starting a new year in September.

Members attending the luncheon were: Mrs. Horace Green, Mrs. Bascom Timmons, Mrs. Tommie Saye, Mrs. Frank White, Mrs. Redell Henson, Mrs. Paul Cook, Mrs. Clarence Hamilton, Mrs. C.J. VanZandt, Miss Mabel Mongole, Mrs. Royce Williams, Mrs. Heckle Stark, Mrs. Blaine Butts, Mrs. Dick Shelton, Mrs. Dick Delaney, Mrs. Rolle Brumley, Mrs. D. Goodwin Bray, Mrs. Raleigh Adams, Mrs. Joe Robinson, Mrs. Joe Wells.

Guests were: Mrs. Mike Butts, Mrs. Mary K. Blanton of Amarillo, Mrs. Helen Oakes of Amarillo, Mrs. Forrest Sawyer, and Mrs. Joanne Bray of San Antonio.

## Fight Against Poor T-V Programming

"You wouldn't want a guest in your home who said and did vulgar things," said ABC TV Vice President Tom Kersey.

"Writers and producers are working nudity, permissiveness, irresponsibility, profanity, scenes of semi-explicit sex, provocative dialogue, smutty innuendoes and situations into their shows...I fear they are depicting life as it is going to be if they are not diverted," said Bing Crosby just before his death.

"Now they say this doesn't affect your mind...but if you can subliminally sell a product in 30 seconds, what does one hour of filth and violence do to your brain?" said Red Skelton warning about the influence of TV.

And as Lucille Ball notes, "Television treatment of sex has gone too far."

These entertainers have given us years of fine family entertainment on TV. And now, they too are angry about the trash being shown on TV these days.

Martha Roundtree, president of the Clean Up Television Leadership Foundation asks this question: "Let me ask you, are we the kind of people who would, in an average two month period in our lives...engage in extra-marital sex, 426 times! \*be involved in public sexual activity, 1126 times! \*or commit acts of violence, 2,087 times!"

"Few people would lead so immoral a life. But one recent study of prime-time TV programs recorded that many incidents like those shown on TV between March and May 1981!"

Another study by Harvard University showed that 70% of TV's references to intercourse occurred between unmarried people or involved prostitutes. Is this the type of people you'd want your children or grandchildren to become?

Take action today. Write a note stating that you are tired of excessive sex, violence and profanity on TV and find them offensive and would like them cleaned up. Send a letter to Grant T.

Tinker, Chairman, NBC TV; Leonard H. Goldenson, Chairman, ABC TV; and Thomas Wyman, President, CBS TV in care of Martha Roundtree, Dulles Road, POB 17418, Washington D.C. 20041 and she will forward them as part of her program against these influences on public television.

## WTU cracks Down on Current Theft

Electric utilities in Texas, including West Texas Utilities Co., are taking a tougher stance these days on theft of electricity.

Reasons for the crackdown are a change in the State Penal Code making meter tampering a penitentiary offense and the fact that the cost of producing electric energy has gone up.

"We view any form of stealing electric power as a serious crime," said Don Welch of Abilene, WTU vice president and director of customer services, "because we feel a strong responsibility to protect the interest of our good paying customers."

"It costs money to produce electricity," Welch said. "If one customer manages to get some of it free, the other customers have to make up the difference."

The State Legislature amended the criminal mischief statute in 1981 to make diversion of any utility service a third degree felony with a possible punishment of a maximum fine of \$5,000 and from two to ten years in prison. The law also allows authorities to make the assumption that the person in whose name the service was last billed is the responsible party.

Convictions have been obtained in several Texas cities since the law was passed, and STU recently filed charges which resulted in a felony indictment being issued against a customer.

Welch said that meter tampering not only is a serious crime which is becoming more easy to detect, but that it is extremely dangerous.

"Many people do not understand the danger involved," he said. "Property damage, serious injury, or even death can result."

## Fish Tales

by KATIE DVOARK

If the winds would slow down to 50 mph or so, Herman Mooring says, the fishing might be OK at the lake. The water temperature has warmed up to 60 degrees so the fish should be biting good.

There was a bass tournament Sunday, May 15 and they caught and turned loose 65 black bass. Last week, between wind storms and cold, nasty weather, some good walleye were caught.

The little yellow perch have spawned and had a good hatch. They will be introduced into the lake as soon as they get up to a "safe" size to release into the lake to grow and increase and bite at the hook.

## TIPS FOR FISHERFOLK

1983 TMEN

This is the time of year when fishing fever casts its spell across the land... and so that your "gone fishing" day won't be totally wasted, Randy Kidd, noted veterinarian and avid outdoorsman—working with Chuck Bever, fisheries biologist of the Kansas Fish and Game Commission—has compiled this list of the hows, wheres, and whats of catching some of North America's more common fish.

**Bluegills** [1] How-to: most any sort of reasonably light rod and line. Cast or still-fish with a floating bobber. [2] Bait: small worms, very small minnows (an inch or so long), crickets, jigs (small lures bounced up and down on the bottom of the lake or pond), and tiny spinners. [3] Times and places: throughout the late spring and summer. The spawning season (which will occur within this period) is best. Mating areas are usually located in shallow water... either within bare spots in weed beds or upon carefully prepared circles of pebbles.

**Channel Catfish** [1] How-to: spinning, spin-casting, or casting rod and line. Fish on the bottom of rivers, etc. Thread your line through a slip sinker and add a swivel or head below the weight to keep the sinker from sliding onto the hook. Attach one or two hooks to the end of a 12" to 18" length of line fastened below the sinker. [2] Bait: worms, minnows, shad, small fish, prepared bait, frogs, and crawdads. Use large hooks (from 4 to 00, depending on the size of catfish present). [3] Times and places: spring... in rivers, creeks, and shallows, summer... in creeks, lake channels, and mud flats.

**Crappie** [1] How-to: a light line (two- to six-pound-test) and an ultralight pole. Jig, cast, or use bobbers. [2] Bait: jigs, worms, crickets, minnows, and small spinners. [3] Times and places: usually best in the springtime. Crappie spawn along rocky shorelines and around underwater structures.

**Largemouth Bass** [1] How-to: spinning, spin-casting, or casting rod and line. Cast, troll (that is, pull a baited lure behind a slowly moving boat), or use a bobber. A heavy line (six-pound test or better) and a stout pole (with a stiff action) are best. [2] Bait: jigs, spinners, other artificial lures, worms, minnows, frogs, crawdads, salamanders, or other natural bait. [3] Times and places: around standing timber and brush piles and along weed patches during sunny days. Farm ponds sometimes provide excellent bass fishing. Most largemouths spawn in the spring on beds similar to those prepared by bluegills, but many seem to keep at it throughout the summer. They generally don't feed and shouldn't be molested while spawning.

**Rainbow Trout** [1] How-to: spinners, spin-casting, casting, or fly rod and line. In small, clear streams, a quiet approach to the water and a gentle lure presentation are needed. Try casting or still-fishing with a very small slip sinker. [2] Bait: worms, minnows, packaged salmon eggs, or grasshoppers on tiny No. 12 to No. 14 hooks, or small spinners artificial flies. Most stocked trout are less than 12 inches long. If you have larger fish in your area, use larger hooks. Trolling is a good technique to catch the bigger specimens in lakes and reservoirs. [3] Times and places: spring, early summer, fall, and winter (through the ice). Fish the edge of moving water, under stream banks, and near rocks or brush.

## Brush Arbor Service

The Church of the Nazarene has planned an old fashioned Brush Arbor Service for this Sunday, May 22, 1983 to celebrate Pentecost Sunday. Because this will be Pentecost Sunday, the church felt special services were in order to help commemorate this very important event when the Holy Spirit fell on

the First Century Church. The celebration will begin at the Circle C Trailer Park Camp Ground around noon after the regular services at the church. Everyone bring your lunch and come out and join us there. There will be lots of singing, testimonies and good preaching.

### FTA goes to dinner theatre

On Thursday evening, May 5, the Clarendon Chapter of F.T.A. traveled to Amarillo to attend the production of "Angel On My Shoulder" at the Country Squire Dinner Theatre. It starred Patrick Wayne, Johnny Crawford and Mary McDonough. The F.T.A.'ers met the cast after the play. It was quite an experience for all.

Attending were Dyanne Johnston, Darcy Youngblood, Annette Watson, Tim Cole, Lynn Alderson, Kim Form-

way, Toni Michaels, Tami Deen, Wendy McCombs, Mrs. Janice Johnston and Miss Betty Veach, Advisor.

Miss Veach wants to thank her F.T.A.'ers for the lovely carnation corsage and gift they presented to her. This year has been very successful for our chapter. They have put a lot of hard work into the chapter projects and goals. We look forward to another successful year next year.

### FTA Student Teachers

F.T.A. just recently finished a project we called "Student Teaching" in the Jr. High and Elementary Schools.

Each F.T.A.'er who participated observed and worked with a cooperating teacher in Jr. High and Elementary. They counseled with the cooperating teacher, helped with lesson plans and got a touch of what teaching is like. We did this on April 19 and 20. The project was very successful.

Participating were: Lynn Alderson with Jack Hall, Dyanne Johnston with Mrs. Nelson, Darcy Youngblood with Mr. Leathers, Annette Watson with Coach L. Wiley, Wayne Chambliss with Mrs. Guinn, Kim Formway with Mrs. Thornberry, Toni Michaels with Mrs. Heil, Tami Deen with Mrs. Gooch, Tim Cole with Mrs. Estlack.

### FAN TASTIC gift from Students to Future

Members of the 1983 graduating class and members of the Spanish Club have worked long and hard to accumulate monies to make a special purchase for the Clarendon High School. They bought six ceiling fans to help cool the hot days in September and May, as well as to help circulate the warm air.

The kids had treat days, sold carnations, held the Mr. Ugly contest, and worked

hard on a variety of projects throughout several years to help accumulate enough money to make this gift to their alma mater.

The fans, NuTone reversible fans, were purchased at cost from the Stavenhagen Furniture Store. Students in the future will have reason to give a hearty "Gracias" to both the Senior Class of '83 and the Spanish Club AND to Stavenhagen's for making such a FAN...tastic gift!

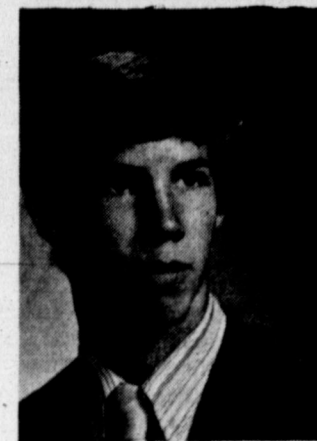

### Cornell Graduates from SOKSU

Bill was a 1980 graduate of Clarendon High School and will be employed with Brown & Graham Accounting Firm in Shamrock, Texas.

Mr. and Mrs. Dude Cornell attended the graduation.
