**HEAD COLLEGE REGENTS** — In the reorganization of the Clarendon College Regents Tuesday night, Frank Phelan Jr., left, was elected president; R. E. Drennan, center, vice-president and Bill Todd was re-elected secretary-treasurer.

## Light Vote Cast In School Election

A reasonably light vote was cast in the School Trustee and College Regent election held Saturday considering the fact that the regent election was county-wide and the trustee election covered a larger territory than the immediate city area.

Percentage-wise, a larger vote was cast in the Public School trustee election at which time 319 votes were cast with 290 going to Warren Hardin and 291 to Fred Chamberlain in the form of votes of confidence as both men were uncontested.

A total of 355 votes were cast in the College Regent election which was county-wide. The three top candidates elected were W. R. Christal 273, Bright Newhouse 242 and Ross Springer 237. Other candidates in the race received the following: Virginia Browder 133, Earl Wheatley 81, and Earl Shields 87.

The new college regents were installed Tuesday night at the regular meeting of the board.

## JAYCEES SPONSOR EASTER EGG HUNT FOR YOUNGSTERS SUNDAY

Jaycees will sponsor an Easter Egg hunt at the City Park Sunday afternoon, April 10, at 2 p.m. and all youngsters of the area are invited to participate.

Young people will be divided into three age groups: 2-4 years, 5-7 years, and 8-10 years. Two prizes will be awarded in each age group.

Lloyd Leeper, project chairman this year, reports that a number even larger than the estimated 140 children attending last year is expected to participate this year. The number of eggs to be found each year number over 1000 and are donated by merchants and individuals.

Remember to have your youngsters at the City Park by 2 p.m. Sunday.

## Frank Phelan Jr. Named President College Regents

The three newly elected members of the regents were installed. They are Billy Christal, Bright Newhouse and Ross Springer. These men replace Knorpp, Rich and Tunnell and George Thompson, old members who chose not to run for re-election this year.

## City Election Over — Big Job Ahead

(editorial)

The City election is over and we are sure looking forward to a better understanding of the desires of the rank and file of the citizens of Clarendon in the sound operation of our city. Their thinking was expressed in the vote that was cast Tuesday. This would have been even more evident had there been fewer candidates in the race.

In my observation of city operation, I found that, after the resignation of the city administrator, the city had a Legislative department (the council) but no executive head with delegated authority. A weak mayor form of government has been used whereby the mayor has no other authority than to call elections.

Our Mayor has been compelled to function under this act. Since we do not have an administrator or manager, it appears that the council should vote the strong mayor type of government...make their rules, regulations and state their desires in official session in the city hall, and then it would be up to the mayor to carry them out and he would have power to do so.

In talking with Mayor Gilkey Wednesday morning, he stated that, even though he was already giving considerable time to the office, that he would spend whatever additional time was necessary to fulfill his job is the change were made.

We think this change should be made right away so there would be ONE person in charge of executing the affairs of the city until such time as other arrangements can be made in the form of an administrator, clerk or otherwise. All action of the council should appear in the official minutes and the mayor could back up his actions by the minutes which are open for the inspection of the public.

When the council minutes are kept in an informative manner, it is our plan to publish those minutes as a public service. We feel that an awakened, interested and informed public will assure progress on a sound basis.

I am interested in our city and our people and that interest will continue for the betterment of all concerned. There may be peace and quite..... and again there may be turmoil.

Plans for an Agriculture Clinic were made last week at a meeting of the Donley County Program Building Committee, according to County Agent, Ronald Gooch. The Clinic will be held April 20, at 1:00 p.m. in the Clarendon High School Ag Building in Clarendon.

Speakers for the Clinic are some of the noted authorities in their fields and will include the following people: James Valentine, area soil chemist with the extension service, who will discuss the latest information on fertility and kinds and amounts of fertilizers. Dr. Kenneth Porter, agronomist with Southwestern Great Plains Research Center at Bushland, who will discuss crop varieties, planting methods and dates. ## New Officers Elected For Little League Monday Night

A meeting was held at the City Hall Monday night, April 4, to elect new officers for the Little League to serve during the coming season. K. D. Vaughan was elected to head the group as president. Billy Jack Land who served as president the past season, was elected vice-president. Other officers elected to guide the organization were Kenneth Sams, secretary; and Phebe Ann Buntin, re-elected treasurer. John Richey will serve as chief umpire.

There will be another meeting this coming Monday night, April 11, for all adults interested in the Little League program, and especially umpires. Jack Powell of Dumas, Consultant Umpire of this district, will be here to discuss new rules and regulations and answer any questions in regard to the coming of the Little League season. The meeting will be held in the Hospitality Room of the Farmers State Bank at 7:30 p.m.

All boys are reminded to get their uniforms in at Hicks and Phelps Barber Shop as soon as possible.

Anyone interested in working with Little League this summer is asked to contact Kenneth Vaughan, Billy Jack Land, or any officers. Coaches and workers are needed badly. With the two playing fields now in use, games work off faster and workers are not tied up for the entire summer as has sometimes been the case. This is a most worthwhile project with more and more young people of the town taking part each summer. Please give this some thought and consideration and help out if possible.

**SOIL CONSERVATION DISTRICT NEWS**

**SEEDING CROPLAND BACK TO GRASS**

As most of us know, there is plenty of cropland in Donley County that should be seeded back to grass. Some of the locally adapted methods for seeding cropland back to grass are; seeding into existing dead litter cover of johnsongrass or sorghum stubble (drilled), or overseeding native rangeland where conditions are feasible.

In preparing a seedbed for native grasses, we first have to analyze the area to be seeded. In preparing a seedbed for an old field that is composed mostly of johnson grass or sorghum alum. It should first be controlled by mowing during the growing season. Two mowings are generally enough with the last mowing in August. This retards development of the plant and roots and weakens it for the following growing season. The next spring following mowing you can seed into the cover of johnson grass or sorghum alum and the native grass will have more chance of making a stand since there is less competition from the johnson grass or sorghum alum. It may be necessary to mow after grass is seeded to keep down weeds or other noxious plants so the grass will have less competition.

Where there is inadequate cover for seeding grass, the best adapted measure for this area is to drill a cover of sorghum late during the growing season so the sorghum stubble will not mature out and make a volunteer growth the next year. It can be harvested or

grazed as long as an 8-10" stubble is left. Grass can be seeded directly into this stubble in the spring. Mow or spray any competition that may interfere with the grass the first year. Never graze the seeded grass the first year.

Overseeding native rangeland may be done by sweeping the undesirable grass, preferably after the blow season and overseeding into it the next spring. Again competition may have to be controlled by mowing or spraying.

Your local Soil Conservation Service is available to plan with you on the best methods to meet your needs.

**INSECT CONTROL FOR FRUIT TREES**

A good set of peaches and plums from the trees which are beginning to bloom isn't assured. For, points out County Agent Ronald Gooch, insects can damage the fruit or even "wipe-out" the crop if they are not controlled.

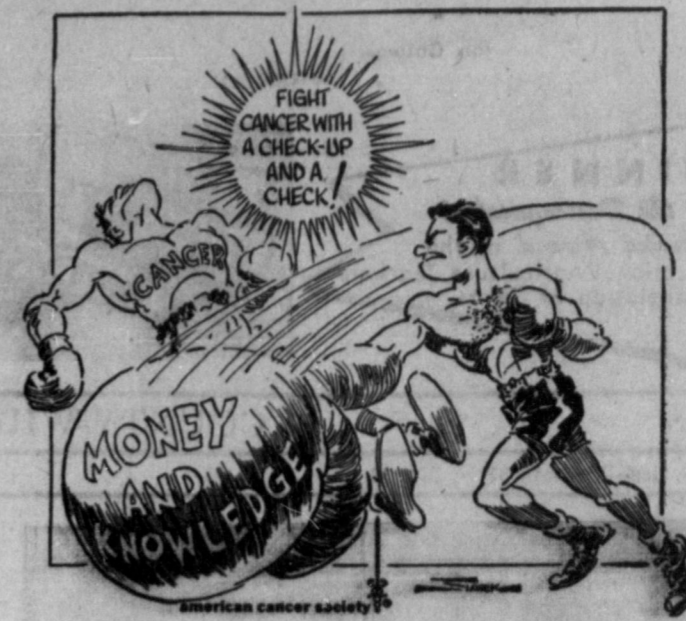

Insect control on fruit trees, he adds, is largely a preventive program. Once the insects begin to cause damage, little can be done to rid the fruit of the pests and prevent further damage. Most of the common fruit damaging insects begin their activity and reproduction during the first 30-45 days after the trees begin to bloom, points out Gooch. Therefore, insecticides applied during this early period will control the insects which damage fruit later in the season.

Homeowners with a few trees are advised to follow a preventive spray program. Malathion or methoxychlor, either in the wettable powder or emulsifiable concentrate forms, are effective for controlling insects. They are not hazardous when used as directed and will not leave residues in the fruit. Both are available in numerous commercial formulations and directions for mixing and applying are given on the container label.

The county agent recommends four spray applications, timed to coincide with bloom and fruit formation. The first or petal fall spray should be applied when about three-fourths of the blossom

**AOUDADS ENLARGE HIDEOUT**

Post season tallies of aoudad sheep in the Palo Duro Canyon indicate Texas' rate exotics are distributing themselves throughout the canyon from Claude to Quitaque, according to the Texas Parks and Wildlife Department.

Cowboys and landowners, who frequently enter the wide canyon to feed and salt cattle, report regularly seeing numerous sheep and that they are taking advantage of the spacious area to become well dispersed.

The wary sheep, started by the Department with the release of 44 animals in 1957, are steadily expanding their range and claiming for their own the most rugged and inaccessible portions of the Palo Duro.

The annual aoudad hunts, begun in 1963, thus have become a test of man versus nature. Yet the Department noted, 16 of the 70 permits issued last fall were filled. At least one ram sported a rack that may become internationally rated.

## THIS AND THAT

Campus Chatter  
by Jim Blackerby

What a delightful week this has been??? Warm sunshine poured its health-giving rays in abundance on the Hill this week. The lazy feeling brought about by the nice weather was certainly not inspirational for school work. On days like these last few, most students would rather be enjoying fun and games in the sun than being confined in stuffy classrooms permeated with the odor of old textbooks and chalk. Oh well—guess that's life.

Everyone is eagerly awaiting the Easter break. It will be a welcome relief after the pressure of English themes and last-minute assignments. Good luck to all the students travelling during the holidays.

"Unfold wealth," says Mr. Williams, "is that which does not appear on income tax returns."

## WHEN AND WHERE

Phi Beta Lambda  
by Betty Dever

Eight members of Phi Beta Lambda and their sponsor, Mr. Doyle Williams, enjoyed a trip to Amarillo Tuesday, March 29.

The purpose of the trip was to observe various types of businesses in operation. The establishments visited were S. I. C., the Globe-News Publishing Company and the Bank of the Southwest.

The group was warmly received at every establishment and we hope to make this kind of trip again next year.

## WHO AND WHAT

Dean's Honor Roll

Congratulations to those intellectual souls who made the Dean's Honor Roll. They include Gayle Cleveland, Betty Dever, Catherine Ivy, Joseph Koetting, Conny Moore, Betty Overcast, and Troy Sublett.

To be on the Dean's Honor Roll is more than just an honor. It represents superior effort and achievement on the part of each student.

## Phi Theta Kappa Installation

Eleven new members were initiated Tuesday night into the Clarendon College Iota Phi Chapter of Phi Theta Kappa, a national junior college honorary scholastic society. The initiates were Gayle Cleveland, Catherine Ivy, Nancy Hill, Charlene Gray, Betty Dever, Brenda Moore, Gwendolyn King, Kenneth Price, Freddie Mc-

Anear, Danny Holland, and Jackie Beavers. To be eligible for membership, the initiates were required to be in the upper ten per cent of the student body.

Phi Theta Kappa President Bobby Colson led the initiation ceremony and was assisted by Vice-President Conny Moore, Secretary Maudena Self, and Treasurer Jimmy Blackerby.

Following the impressive ceremony in the Farmers State Bank community room, refreshments were served by the sponsor, Mrs. Hamilton and by officers of Phi Theta Kappa.

Guests present at the initiation were Mrs. Jean Moore, Mrs. Vance Gray, Mrs. J. G. McAnear, and Jerry Moore.

## BULLDOG KENNEL

Clarendon College has landed one of the big basketball catches in the state in the person of Rob Holloway of Coleman. Rob, a Negro, is a small boy, standing 5'8", but he is one of the most sought after graduating ball-players this spring. He can jump with 6'5" people and averaged 22.5 in thirty-three games this year. He hit 58% of his field goal tries and averaged 78% at the free-throw line. This helps to explain why Rob was named to the All-State AAA first team. He is an

above-average student scholastically, and was chosen "Citizen of the Month" twice this year in the Coleman Public Schools.

The Coleman basketball team ended its season with a 30-3 record. They defeated in overtime in the AAA division of the Regional finals by Andrews.

We are very fortunate that Rob has chosen to cast his lot with Clarendon College and the Bulldogs. He should entertain our fans for the next two seasons with exceptional speed, ball handling, and shooting ability.

Additional releases will be made during the next two weeks as our sign-up is completed. We think that people will be very pleasantly surprised at the new look in Bulldog Land this coming year.

## WORD MEMORIAL

A six-volume set of books, *The Saga of Texas*, has been placed in the Clarendon College Library by Mrs. Clarence Pipes and Mr. Boyd W. Pipes of Amarillo. The contribution was a memorial to Lt. Commander Millard Word, a former student at Clarendon College, who died recently in Japan. A living memorial such as this is greatly appreciated and will be of benefit to countless people who avail themselves of the services offered by the library.

Students and faculty members at Clarendon College extend sincere sympathy to Mrs. Joan Hamilton, Head of the English Department, who received word Thursday that her father, Mr. F. C. Whistler of Levelland, had died suddenly.

## TO THE PEOPLE OF THE 18TH DISTRICT

By Congressman Walter Rogers

**OUR GROWING AMERICA**  
Some people in the Government are contending that areas of the United States primarily rural in character are not developing as rapidly as are metropolitan areas where, it is alleged, standards are continually rising. On the face of it, there are grounds to challenge any contention that metropolitan standards are rising. Some of the same people who make the above comparison say, in the next breath, that cities are falling apart at the seams and that the quality of urban life has never been so low. The attitudes of American citizens would

seem to support the latter view. A recent national opinion poll showed that while only a third of Americans live in rural areas, nearly half of all Americans would prefer to live in small towns or on farms.

At any rate, it is recognized by everyone that the years ahead are to bring a rapid increase in U. S. population, and that by 1975 this country will have some 225 million citizens. It is obvious that crowding more millions into the already congested cities, which now face very serious problems of transportation, education, and air pollution, among others, is not a desirable solution for the future.

Broader opportunities need to be developed in every corner of America, in small towns and large, in rural areas as in urban. Business leaders and men in public life at all levels recognize this, and policies public and private are being developed to encourage more diversified growth. Several bills are before the 89th Congress aimed at promoting rural development. Among them is the proposal entitled "The Development District Act of 1966." Deliberations have not yet begun on this measure by the Agriculture Committees of the House and Senate but are expected to begin shortly. The measure would provide for "Community Development Districts" to be established to plan and coordinate area-wide development of facilities and services. Whether this legislation will be generally supported in Congress and the country remains to be seen, but it points up the fact that thought is being given to the future.

We in the Panhandle have a story to tell about area development — and the pattern we can show could be well studied and imitated elsewhere. Blessed with abundant resources and excellent soils and climate, the people of the Panhandle have been able to put together in a relatively short period of time a unified economic base offering a broad range of opportunities in agriculture and industry. As further strides are

made in developing the Panhandle's agricultural potential as well as its mineral resources, we are going to witness a steady upward curve in population in our towns and on the land and an increasingly larger choice of vocations to attract Panhandle young people who wish, after graduation from high school or college, to make their permanent homes in their native area.

I have "talked up" the Panhandle to business and industrial leaders for years, as have many of you. I'm convinced that American business is becoming more and more aware of the advantages of diversifying operations. We have seen some of this in the Panhandle and we will see more as the men—men in private enterprise—who make these decisions

recognize the reserve of skilled, willing, enthusiastic men and women. Business and industry have a stake in halting the trend to crowd the already crowded urban centers of the country and are looking for opportunities to move out. Areas like our Panhandle will be the beneficiaries.

Meanwhile, we must continue our efforts to see that the agricultural economy is strengthened and that opportunities on the farm are not neglected. The root strength of America is still in the soil.

We can not see how anyone could live close to nature and doubt that God is real. How that even the flowers and grasses who know when it is time to burst forth. Think of the little baby birds who know enough to stay in the tiny nests until time for the mother bird to teach them to fly.

Something that happened just this week set us to thinking of the mighty miracles of God as shown to us in His creation wh-

ever we are inclined to look. We were helping some mother cows with the problems that came from giving birth to their very first baby calf. Even though it was her first experience the mother cow would soon afterward respond to her new born calf and start caring for it in the traditional way. I guess the thing that most of all reminded me of God's wonderful care was how that in such a little while the baby calf would think about dinner time. Even though it was a newcomer to this world it didn't take long for him to find the handles to the container that was to mean life for the next few months. Results of sorghum grain performance tests grown at 14 locations in Texas in 1965 have been released by Texas A&M University. Medium-late hybrids generally had the highest yields, but in some areas, hybrids of medium maturity performed well. Local county agents have received a copy of Progress Report 2403 from the Texas Agricultural Experiment Station which carries the listing of all hybrids tested.

Trudan 2, Northrup King's new true hybrid sudangrass, is an exciting forage. Unlike sorghum-sudangrass hybrids, Trudan 2 produces fast growth without coarseness... the fine-stemmed, highly palatable plant yields high TDN. Trudan 2 grows back fast with lower prussic acid content. Great for grazing, hay or haylage. Trudan 2 can mean more beef or milk per acre. In tonnage trials, Trudan 2 has out-yielded sorghum-sudangrass hybrids.

**GUIDE DUE FOR PROGRAM ON PLAY**

The Texas Parks and Wildlife Department advises governmental agencies and other political subdivisions eligible to share in the new Federal Land and Water Conservation Fund for recreational purposes that an information manual is being prepared for their benefit.

The document will outline the requirements and procedures for submitting applications for Federal grants-in-aid and will present other pertinent data about the matching program.

It will be forwarded to agencies and authorities who have been contacted during the preparation of the Statewide Comprehensive Outdoor Recreation Plan and expressed an interest in the program.

It will also go to those who have asked about the broad movement which is designated to help finance acquisition and development of state and local outdoor recreational areas.

Acknowledging receipt of hundreds of inquiries, the Department requested that private individuals and groups interested in promoting recreation projects, do so through their local-level government since only qualified political subdivisions are eligible for the Federal funds.

Will E. Odom, Chairman of the Texas Parks and Wildlife Commission was named by Governor John Connally as Texas' liaison officer for the statewide project. Odom said he believed Texas "is well in the van of states qualifying for the cash assistance."

He said \$3,544,969 has been allocated to Texas for the fiscal years 1965 and 1966 with the state setting aside sixty percent for the state level and the other

forty percent for distribution to county and municipal level agencies plus water improvement districts and river authorities.

The top level processing agency, the Department of Interior, Bureau of Outdoor Recreation, earlier approved a \$27,074 planning grant to the Texas Parks and Wildlife Department which prepared the original Statewide Comprehensive Outdoor Recreation Plan.

Odom said the impact on Texas facilities "should be tremendous since the program calls for updating, revising and refining to strengthen the overall plan on a

continuing basis."

**O'DONNELL LITTLE BRITCHES RODEO SET FOR APRIL 15-16**

**FEED GRAIN OUTLOOK**

The production of feed grains in the nation set a new record in 1964. Yields were 18 percent higher than in '64 and 11 percent above the previous record set in 1963. The record yields increased the supply for 1965-66 by 10 million tons, says John McHaney, Extension economist. Sorghum grain production in Texas helped push the record for the nation to 655 million bushels, up 34 percent from 1964. This disappearance of feed grain is expected to increase during the 1965-66 year and may reach 157 million tons, McHaney says.

**NEWS FROM CITY HALL**

by R. L. Gilkey, Mayor

The following editorial appeared in various parts of the nation.

I think that it will be of interest to all in our area also.  
**"I AM A TIRED AMERICAN"**  
 By Alan McIntosh  
 Publisher, The Rock County Herald, Luverne, Minn.  
 I am a tired American.  
 I'm tired of being called the ugly American.

I'm tired of having the world panhandlers use my country as a whipping boy 365 days a year.  
 I am a tired American—weary of having American embassies and information centers stoned, burned, and sacked by mobs operating under orders from dictators who preach peace and breed conflict.

I am a tired American—choked up to here on this business of trying to intimidate our Government by placard, picket line, and sit-ins by the hordes of dirty unwashed who rush to man the barricades against the forces of law, order, and decency.

I am a tired American—weary of the beatniks who say they should have the right to determine what laws of the land they are willing to obey.  
 I am a tired American—fed up with the mobs of scabby-faced, long haired youths and short-haired girls who claim they represent the "new wave" of America and who sneer at the old-fashioned virtues of honesty, integrity, and morality on which America grew to greatness.

I am a tired American—weary unto death of having my tax dollar go to dictators who play both sides against the middle with threats of what will happen if we cut off the golden stream of dollars.  
 I am a tired American—nauseated by the lazy-do-nothings who wouldn't take a job if you drove them to and from work in a Rolls Royce.

I am a tired American—who is getting madder by the minute at the filth peddlers who have launched Americans in an obscenity race, who try to foist on us the belief that filth is an integral part of culture.  
 I am a tired American—weary of the bearded bums who tramp the picket lines and sit-ins—who prefer Chinese Communism to capitalism—who see no evil in Castro, but sneer at President Johnson as a threat to peace.

I am a tired American—who has lost all patience with that civil rights group which is showing propaganda movies on college campuses from coast to coast—movies denouncing the United States, movies made in Communist China.  
 I am a tired American—who is angered by the self-righteous breastbeater critics of America, at home and abroad, who set impossible yardsticks for the United States, but who never apply the same standards to the French, the British, the Russians, the Chinese.

I am a tired American—who represents the pimply-faced beatniks who try to represent Americans as the "bad guys on the black horses."  
 I am a tired American—who is weary of some Negro leaders who, for shock purposes, scream four-letter words in church meetings.  
 I am a tired American—sickened by the slack jawed bigots who wrap themselves in bedsheets in the dead of night and roam the countryside looking for innocent victims.

I am a tired American—who dislikes clergymen who have made a career out of integration causes, yet send their own children to private schools.  
 I am a tired American—who resents those who try to peddle the belief in schools and colleges that capitalism is a dirty word and that free enterprise and private initiative are only synonyms for greed. They say they hate capitalism, but they are always right at the head of the line demanding their share of the American way of life.  
 I am a tired American—who gets more than a little bit weary of the clique in our State Department which chooses to regard a policy of timidity as prudent—the same group which subscribes to a "no-win" policy in Vietnam.  
 I am a tired American—real tired of those who are trying to sell me the belief that America is not the greatest nation in all the world—a generous hearted nation—a nation dedicated to the policy of trying to help the "have nots" achieve some of the good things that our system of free enterprise brought about.  
 I am an American—who gets a lump in his throat when he hears the "Star Spangled Banner" and who holds back tears when he hears those chilling high notes of the brassy trumpet when Old Glory reaches the top of the flag pole.  
 I am a tired American—who wants to start snapping at those phony "high priests" who want us to bow down and worship their false idols and who seek to destroy the belief that America is the land of the free and the home of the brave.  
 I am a tired American—who thanks a merciful Lord that he was lucky to be born an American citizen—a nation under God, with truly mercy and justice for all.

Anyone having property that they would like to rent to workers on the dam, roads, etc. may list what property they have available with him at no charge as this is a public service offered by the Chamber of Commerce. He now has such units as trailer space, houses, and apartments.

This is of course a separate listing from that carried in the paper. The usual For Rent is a part of the regular classified page and listing there is considered advertising. New residents are checking the newspaper office daily now so if you would like us to refer them to you, it would be well to carry a notice on that page of the paper.
