Petitions Being Circulated Calling For Airport Bond Election

Editor's Note: The following article was sanctioned by the Chamber of Commerce Board. The action required at this time is to provide the required \$35,000 of local funds. The petition will be circulated with a definite goal of raising the money. Dr. George W. Smith and Richard Tammell, co-chairmen, and I have been published by the Leader as a public service. The Board of Directors of the Chamber of Commerce met on Tuesday, December 3, 1968, to discuss the possibility of circulating a petition for a bond election to raise the money for a new airport. AIRPORT BOND ISSUE

Following on the heels of a Referendum Election, petitions are being circulated to ask the City to call a Bond Issue Election to raise the City's portion needed (\$35,000) to go along with Federal & State grants to construct a new airport for Clarendon. The referendum election was defeated by 12 votes and it has been the contention of some residents that the issue failed due to the issuing of warrants with no definite outline for repaying the money other than to come out of the City General Fund. The Bond will definitely raise taxes to retire a 20 year bonded indebtedness. It will be the policy of the Leader as in the past to print all true facts available so the Tax-Payer may have a clear picture of the value of an airport to this community and whether you want it or not.

A drastic plan to overcome the state's shortage of physicians will be presented to the 1969 Legislative Council in Houston, today.

The new state medical school would be established in the Texas Medical Center in Houston, also.

Texas Tech would be authorized to start planning for a West Texas medical school, which is re-organized, under and graduate students is proposed in Dallas; at the University of North Texas, Center for Advanced Studies — to be formed by the University of Texas at Dallas; and Texas State University, San Marcos, and the University of Texas at Austin.

Should the need for the establishment of another additional medical school develop in the future, the Coordinating Board will consider putting one or more state medical schools in Galveston, Dallas and San Antonio—to a minimum of 565 freshmen by 1980 — and giving the University of Medicine in Houston so that to the Baylor University College of Medicine in Houston as many doctors are well being prepared for the state as it does privately.

Then, if the Legislature agrees, it can educate as many doctors
