

A Newspaper DEDICATED To The Development Of Community Growth, Clarendon College & Greenbelt Dam Project

THE DONLEY COUNTY

LEADER

CLARENDON NEWS

Roy Hunter, Security Officer for Greenbelt, has just finished a round of the Lake with your photographer. Fishermen kept him busy Tuesday night moving in to start fishing at midnight. He was on the job early Wednesday morning checking permits and reminding all in boats that it was mandatory to wear Coast Guard approved life preservers at all times.

Rates At Lake Not Out Of Line

A number of individuals have questioned the rates charged for various types of recreation at Greenbelt Lake. From information gathered, rates are about in keeping with other Lakes which have been built without federal grants.

Lake Greenbelt was built on a financial structure by which construction will eventually pay for itself through use of water by member cities of the Authority. Fees charged go back into lake funds to help construct recreation areas as picnic sites, sanitation and health units, etc. Cleanliness and sanitation must be maintained.

This is a new lake and while many, many facilities are needed, all cannot come at one time, certainly not within a few weeks or a month or two. Given time to construct these facilities Greenbelt Lake will be one of the finest and safest lakes in the state.

Regardless of where you go or what you do, all recreation costs money. Divide your fees on a 12 month basis and you can find little that the entire family can enjoy for this amount. In this area, there is only a comparatively few weeks when the weather prevents all activities at Greenbelt Lake.

Activities Are Set At Greenbelt Lake For Week End of Festivities

- MAY 29—Fishing Opened
MAY 30-JUNE 1—Fishing Tournament
MAY 31—Dancing at Electric Theatre 9 p.m. to 1 a.m.

Little League Fund Raising Drive June 5

The Little League fund raising campaign is underway again. A house to house contact will be made Wednesday evening, June 5. Little Leaguers will be calling on you. All boys will be in uniform. Please do not donate to anyone out of uniform. If you are not contacted and wish to donate to the Little League, send your money to any one of these three...

Services Held Wed. For W. F. Walser

Funeral services for William Floyd Walser, 69, who lived 2 miles northeast of Lelia Lake, were held at 2 p.m. Wednesday, May 29 in the First Baptist Church of Chillicothe with Rev. Don Rhoads, pastor, and Rev. W. D. (Ted) Brian of Plainview, officiating. Interment was in East View Cemetery with Murphy Funeral Home in charge of the arrangements.

WILLIAM M. SOWERS HEADS LOCAL SCS

William M. (Monty) Sowers has been appointed Work Unit Conservationist with the U. S. Soil Conservation Service here replacing Dorman Bush, who resigned to enter private business at San Saba. Mr. Sowers is a graduate of East Texas State and has been in soil conservation work for six years. He has worked at Big Spring, Snyder, and comes to Clarendon from Pampa. He plans to move his family consisting of his wife, Frankie, and 10-month-old daughter, Rebecca to Clarendon in early June. The Sowers are members of the Baptist Church. Monty was reared in Young County at Newcastle. His parents reside at Graham, Texas. Mrs. Sowers is a native of Forson, south of Big Spring. Her parents now live at...

Farm News

from County ASCS Com.

COTTON ALLOTMENT TRANSFERS

Cotton growers in Donley County have failed to approve transfer of 1969 upland cotton allotments out of the county. 116 voted in favor of and 227 voted against transfer. This means that the transfer of 1969 upland cotton allotments in the county — by sale or lease — may be made from one farm to another only within the county. This does not affect transfers of allotments from one farm to another owned by the same person, which can be made across county lines within the state. This is already authorized by law.

STATISTICAL REPORTING SERVICE SURVEY

Producers in Donley County will be receiving Acreage Survey Forms from Austin within the next few days. Yield data for determining county yields for ASCS programs is obtained from these surveys. It is very important that you cooperate with SRS in completing and returning these forms. If we in the county office can help you in completing this form, feel free to call on us.

CERTIFICATION

Producers are urged to be extra careful in measuring and reporting crop acreages this year. Regulations have changed and overstatement, as well as...

Second Dem. Run-off Primary This Saturday, June 1st

Rules for Trophy Fishing Tournament Released This Week

- 1. Contestant must possess a lake permit and a Texas fishing license.
2. Tournament days are May 30, May 31st and June 1st from 6:00 a.m. to 2:00 p.m.
3. Contestants must qualify on either May 30th or May 31st to fish in the finals to be held on Saturday, June 1st.
4. Contestant must specify which day he wishes to attempt to qualify.
5. The top 40 per cent of each day will fish in the finals June 1st.
6. Contestants will be classified in either men's singles, women's singles or junior's singles. Contestants must be age 17 or under to fish in the junior division.
7. Entry fees for Men's singles and Women's singles will be \$3.00, and the entry fee for juniors is \$1.00.
8. All contestants will use artificial lures only.

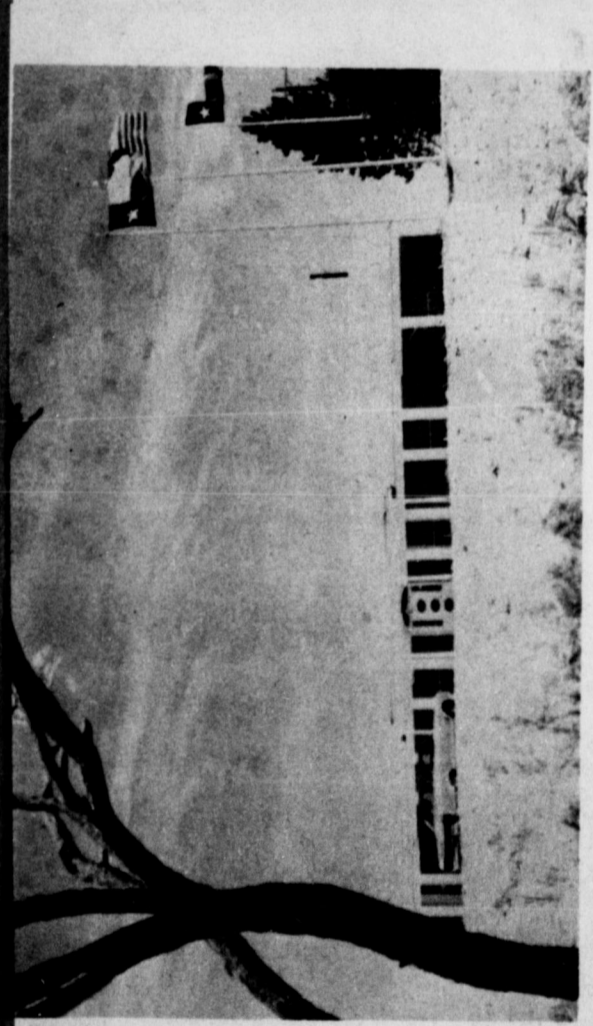

It's election time again and it looks like there will be a good turnout Saturday for voting in the run-off primary if absentee voting is an indication. Up thru Tuesday a total of 45 absentee ballots had been cast. This heavier absentee balloting was probably brought about by the Memorial Day week end but it is a strong indication that a majority of voters will go to the polls Saturday.

Here in Donley County there will be three races listed on the ballot in Precinct 1 and two for the rest of the county. On the state level, it is likely to be a heated race between Preston Smith and Don Yarborough. The other race is between James A. Joy and Jack Haglewood for Judge, Court of Civil Appeals.

On the county level, it looks like another close race between Hubert Rhoades and Clarence Reynolds for Commissioner of Precinct 1. Rhoades led Reynolds by 1 vote in the first primary and Vance Gray received 9 votes. It will be a race to see which picks the majority of the 9 votes and gets his supporters to the polls.

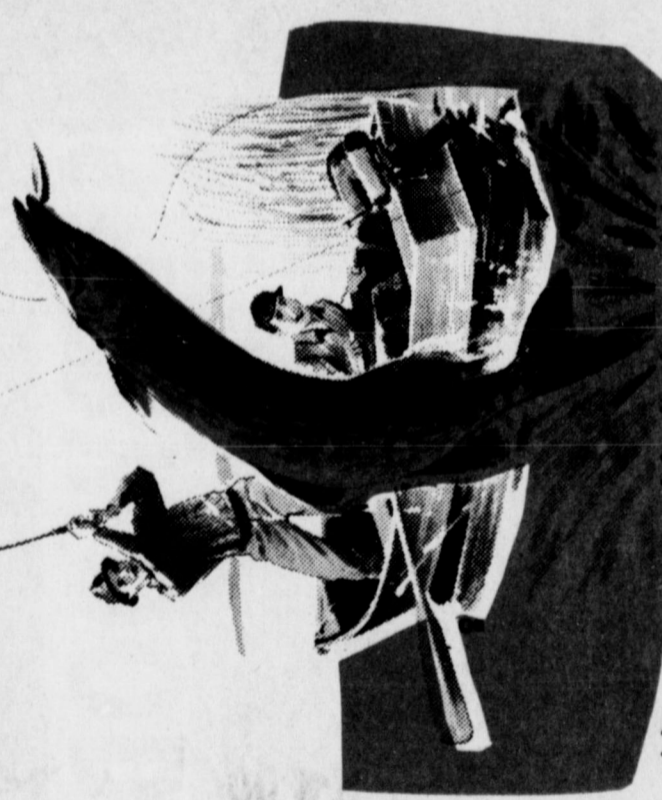

Here in town all voters will cast their ballot at the Lions Club Hall. All boxes will be open in Precinct 1 and as near as we could learn at press time, all other boxes in the county will be open. Polls will be open...

**GRADUATES FROM NURSING SCHOOL**

Miss Melissa McCully is one of 24 seniors graduating from St. Paul Hospital School of Nursing in Dallas. Graduation will be held at 3 p.m. Saturday, May 25, in the hospital's Chapel of St. Catherine Laboure.

Miss McCully is a member of the Professional Committee and was a Member of the House Council for 1966-67. She is the daughter of Mr. and Mrs. Mike M. McCully of Clarendon.

**WRIGHTS RECEIVE NOTICE FROM STATE SCHOOL**

Mr. and Mrs. C. A. Wright have received a letter from the State School at Abilene asking permission to use their daughter's name, Susan, and allow her to make movies and take part in TV programs.

Susan will be thirteen years of age in August and has been at the State School for the past six years. She has made marked progress since entering the school. She was unable to walk or care for herself in any way when she first entered school. She is now walking, feeding, and caring for herself, an example of the fine training program offered by the school.

**THE BRONZE STAR IS AWARDED DAVID PITTS**

David Pitts, son of Mr. and Mrs. C. A. Pitts has been awarded the Bronze Star and promoted to the rank of Captain. Capt. Pitts has been assigned to Fort Sill, Oklahoma for a 6 to 9 month period where he will work in the Missile School. Pitts reported for duty at Fort Sill Monday of this week. He had been assigned to Fort Hood while recuperating from injuries received in the Vietnam combat area.

**WEST TEXAS UTILITIES SETS LIGHTING FOR LAKE OPENING**

A West Texas Utilities Work Crew has been busy the past week putting up temporary lighting facilities at Greenbelt Lake in preparation for the big opening event of the Lake. Part of the lighting will be permanent but otherwise additional facilities will be to accommodate the public and the loud speaker system, etc. on June 2 which is the day of the boat races and the dedication.

Mr. S. H. Condon of Canyon visited Mrs. H. T. Burton Saturday.

**BOB BELL JAYCEE OF THE MONTH**

The executive committee of the Jaycees has selected Bob Bell as Jaycee of the Month for the month of April. Bob is the immediate past president of the Jaycees and an employee of Emmett O. Simmons Insurance. He was selected for the many Jaycee Man Hours he worked and his Jaycee miles traveled to other regional and area Jaycee functions. Bob has been a member of the Jaycee organization since 1963 and has been one of the most faithful and enthusiastic members the organization has had.

**ATTEND GRADUATION AT WTSU SUNDAY**

Mr. and Mrs. Bill Allen, Mr. and Mrs. Homer Estlack of Clarendon, Mr. and Mrs. Allen H. Estlack of Hedley, and Mrs. Jerry Allen and Kyle of Hart were among those attending spring convocation at West Texas State University at Canyon Sunday.

Jerry Allen, son of Mr. and Mrs. Bill Allen, received his Bachelor of Business Administration degree.

**TRUDAN 4 IS HERE!**

Trudan 4, Northrup King's true hybrid sudangrass, is an exciting forage. Unlike sorghum-sudangrass hybrids, Trudan 4 produces fast growth without coarseness... the fine-stemmed, highly palatable plant yields high TDN. Trudan 4 grows back fast with lower prussic acid content. Great for grazing, hay or haylage. Trudan 4 can mean more beef or milk per acre. In tonnage trials, Trudan 4 has out-yielded sorghum-sudangrass hybrids.

Order your supply of Trudan 4 now.

This is one of the big Northern Pike netted by State Fish Hatchery Biologists at Greenbelt Lake last week, at which time tags were being placed on the fish for the Fishing Trophy tourney.

### STATE Capital NEWS By VERN SANFORD

Presently there art two major topics of speculation in capital corridors:  
1. When will Gov. John Connally call the legislature into special session?  
2. Who will win the gubernatorial runoff... Conservative Preston Smith or Liberal Don Yarbrough?  
As for Item No. 1, Governor Connally must call the lawmakers back to the capitol by mid-June at the latest to pass a 1969 budget and a new tax bill ranging in the \$125,000,000 a year bracket, Congressional approval of the 10 per cent federal income tax surcharge may drive the state tax requirement even higher. This because a reduction in income will affect the sales tax revenue in Texas.  
Legislators mention June 4, June 10 and June 11 as probable starting dates. Rumors were widespread at last week's Legislative Budget Board meeting that Connally was considering calling the session before the June 1 runoff election.  
Lt. Gov. Preston Smith told reporters that he feels it will be "difficult" for the legislature to pass a major tax bill in a 20-day session, starting cold.  
House appropriations Committee Chairman W. S. Healy of Paducah noted that never before have lawmakers been called to pass a complete general appropriations bill in a bottailed session. He said he would like to start his committee to work unofficially on budget proposals even before the session begins, in hope of meeting the deadline.  
As if the legislature did not have its hands full with financial matters, liquor - by - the drink advocates are urging Connally to submit that red hot issue to the special session. Passage of a May 4 referendum favoring mixed - drink - sales by a narrow margin added impetus for early consideration by legislators.  
Smith and key lawmakers feel that the referendum was not conclusive enough numerically to be of any great benefit in winning legislative approval of mixed drink sales.  
As for Item No. 2, Smith and Yarbrough now are engaged in a runoff battle to determine who will be the Democratic candidate for governor of Texas.  
Yarbrough led by 36,000 votes in the first primary. But Smith quickly picked up the wholehearted endorsement of third place candidate Waggoner Carr and fifth place runner Eugene Locke.  
Classic liberal - conservative lines are drawn in the Yarbrough - Smith clash. Researchers contend that continuing disinterest and a light turnout on June 1 could prove disastrous to Smith.  
Republican gubernatorial nominee Paul Eggers, who won hands down in a light-vote GOP primary, plans a serious, well-financed general election campaign against the winner of the Yarbrough - Smith runoff.

Ben Barnes won the Democratic nomination for lieutenant governor over two opponents, State Rep. Don Gladden and former Rep. Gene Smith, both of Fort Worth. Barnes' near - record majority (exceeding 76 per cent) means that he will be a key figure in the state government during the next two years.  
District Judges Tom Reavley of Austin and Sears McGee of Houston are new justices-elect of the State Supreme Court. They won Democratic nomination and are unopposed by Republicans.  
VETERAN DPS CHIEF DIES - Col. Homer Garrison, Jr., Texas' top police officer and head of the vast Department of Public Safety for 30 years, died of cancer.  
All of the state's highest officials joined in mourning his loss.  
"He was one of the most capable and effective law enforcement administrators in America," said Governor Connally. "Under his leadership the Texas Department of Public Safety has become recognized throughout the nation as a symbol of law and order. His reputation will live as a personal tribute to Colonel Garrison."  
Wilson E. Speir is serving as acting director of DPS.  
COURTS SPEAK - U. S. Supreme Court has postponed a suit which would require the State of Colorado to meet the obligations of downstream discharges from the Rio Grande as long as the state meets compact requirements for supplying water to Texas and New Mexico. Suit can be resumed any time Colorado fails to comply.  
State Supreme Court upheld a \$44,000 damage verdict favoring a Jefferson County woman who claimed she suffered back injuries when a 200 - pound bill collector fwoar a loan company pushed her against a wall by forcing open a door. Over-zealous collector came to collect a car note.  
High Court set June 12 for review of an insurance company's claims that it is not obligated to pay on its bond covering a building contractor for concrete sold directly to the owner of a new apartment complex that's under construction.  
Travis County 126th District Court continued its temporary injunction against the Liquor Control Board enforcing the ban on cash sales in private bottle clubs. Case will be heard in July.  
NEW BAR OFFICES - State Bar Association reports that Josiah Wheat, 39-year-old Woodville attorney, is the new president - elect of the State Bar of Texas. He defeated Bar Vice-president R. E. Schneider, Jr., of George West in mail balloting among state lawyers. He will assume the presidency July 1, 1969.  
Elected to the Bar Board were Ralph Elliott of Sherman, Ed Fleming of Dallas, W. A. Keils, Jr., of Toague, Louis R. Renfrow of Lufkin, George E. Plet-

cher of Houston, Jim Bowmer of Temple, Carl Cayton of Lamesa and John D. Logan of San Angelo. A vice - presidential runoff will be held between Morris Harrell of Dallas and C. M. Hudspheth of Houston.  
Ralph Brite of San Antonio takes over the presidency at the Bar convention in Houston on July 3-6.  
OIL - GAS LEASES SOLD - Sale of 34,368 acres of state oil and gas leases the first week in May brought \$1,400,000 in new revenue to the state's coffers. So reports Land Commissioner Jerry Sadler.  
Biggest single bid was \$211,235 for 640 acres in Ward County by Humble Oil and Refining Company. Bids on 1,590 acres of Sulphur leases brought \$155,267. Highest of these bids was Duval Corporation for \$76,918 on 40 acres in Culberson County.  
KINDERGARTEN STANDARDS - For the first time, the State Board of Education has adopted professional standards for Texas kindergarten teachers. This step could be in the direction of recent suggestions of public, state - supported kindergartens.  
Board also took note of the state's desegregation problems by approving the appointment of two more staff members to the Texas Education Agency to work solely with local school districts in complying with federal law and court decisions on the subject.  
Also getting the Board's endorsement was a preliminary plan to study how best to make use of Texas' educational manpower and to assess pupil needs. Study is being made in conjunction with the U. S. Office of Education to help TEA coordinate programs supported by some \$129,000,000 in federal funds.

Attorney General Martin has ruled that it is illegal for commercial airliners to serve liquor or beer on flights over Texas.  
Also Attorney General Martin reports that his office won 261 lawsuits out of 263 cases tried in April. During the fiscal year 2,297 cases were won by the state and 54 lost. A total of 3,132 cases still are pending.

### JAYCEE NEWS

The regular meeting of the Jaycees was held at 9 a.m. Wednesday, May 22 in the Jaycee Room of Community Building, with Jaycee President Delbert Robertson presiding. Eight members were present. The invocation was given by Bob Bell and the Creed was led by Chauncey Hommel. The minutes were read and financial report was given. Under committee reports, Dave Croslin, chairman of Lake Concession Stand, gave a report on the progress to date. Gary Gerdes, State Director, gave a report on inter - club dates to remember.  
Under New Business it was voted to order and sell fireworks before the 4th of July, and it was voted to offer sustaining membership and flag service agreement to merchants for \$15 per year. Committees were appointed for the fireworks sales and to work out the sustaining membership - flag service details.  
It was brought to the attention of the membership that the City had been granted \$42,000 for airport facilities and this money would have to be turned back if details of plans and specifications were not complete before the deadline. A committee was appointed to contact city officials and offer assistance in working out details. The meeting adjourned at 10:15 a.m.

U. S. COAST GUARD APPROVED LIFE JACKET A MUST  
A life saving device not Coast Guard approved is not in compliance with the Texas Water Safety Act, says enforcement officials of the Texas Parks and Wildlife Department.  
"Our game management officers are continually issuing tickets to boaters who are totally unaware of what the law specifies, and carry unapproved devices in the boat, thinking they are in compliance with the law."  
There are many types of vests, cushions, and belts for sale that may be termed "life preservers," but not all of them meet the requirements of the Act.  
A life preserver, stamped and labeled "Coast Guard Approved" and affixed with an approval number must be carried for each occupant in the boat.  
Some illegal flotation devices have been found with the words "Coast Guard Approved," stamped on the plastic sales bag; but this alone is not enough.  
Boaters should use care in buying their preservers, and they should obtain information concerning the law to be sure their equipment meets all the requirements.

Legislative Budget Board has recommended a \$657,000 appropriation to build and equip a veterinary diagnostic laboratory on the Texas A&M University campus.  
Democratic and Republican executive committees met her Tuesday, May 14, to canvass statewide primary election returns.  
Kyle Thompson, UPI newsmen who broke in on the Wichita Falls Record-News, is new press secretary to Governor Connally.  
During the month of March, 1,873 criminal complaints were filed by the Liquor Control Board, with 1,688 convictions, nine jail sentences and fines totalling \$61,236.  
State Auditor George N. McNeil named Lee H. Ashmore of Fort Worth as First Assistant State Auditor.

HEDLEY NEWS

Mrs. Mabel Bridges

Rev. Billy Wilson of Wellington is the new Methodist pastor for Hedley...

Tom Tate suffered a heart attack Saturday. He is quite ill in Hall County Hospital.

Walter Pierce was carried from Panhandle Nursing Home Monday to Pampa Hospital.

Bob Lester of Memphis underwent open heart surgery Monday in Houston.

Mrs. Myrtle Kirkpatrick and Mrs. Mabel Bridges visited Miss Bonnie Willis in Wellington Wednesday evening.

Mr. and Mrs. Sam Owens visited the T. E. Taylor family in Dumas over the week end and attended baccalaureate services Sunday night.

Mr. and Mrs. T. H. Gilcrest were in Plainview Wednesday for funeral services of a relative.

Rev. Cecil Guthrie, pastor of Methodist Church, and Dale are moving to his new pastorate.

wish them much happiness in their new field.

Mr. and Mrs. Lewis Drum and Mr. and Mrs. A. G. Alexander attended graduation at Lubbock Christian College Friday, May 24 at 8 p.m.

Mrs. Marjorie Bailey and Neta visited the Stanley Baileys and Gene Stavenhagen families in Amarillo over the week end.

Mr. and Mrs. Frank Hargrove of Little Rock, Ark., were recent visitors in the home of the lady's parents, the Bill Wiggins, and brother, the W. B. Wiggins family.

Mrs. Mabel Bridges visited the Bill Bridges family in Amarillo Friday and attended graduation of the Christ Lutheran Kindergarten class.

Mr. and Mrs. Kenneth Mills of Long Beach, Calif., returned home Monday. They attended funeral services for the lady's brother, Alva Simmons.

Walter McCracken and Mr. and Mrs. Raymond Mitchell of Amarillo have moved to Hedley to make their home.

Relatives here for the Alva Simmons funeral services were Mr. and Mrs. Kenneth Mills of Long Beach, Calif., Mr. and Mrs. J. R. Adamson, Sr., and Mr. and Mrs. J. R. Adamson, Jr., and family of Turkey; Mr. and Mrs. Dave Kistner and family of Levelland; Mr. and Mrs. Othel Simmons, Mrs. Maureen Henderson and Miss Mildred Simmons of Dimmitt; Mr. and Mrs. Parker and son, and Mrs. Eva Fisher of Texarkana; also

Mrs. Grady Arnold of Dallas.

Others attending the Alva Simmons funeral service included Harry Burden and Mr. and Mrs. Jerald Sims of Pampa; Mr. and Mrs. John Auliff, Mr. and Mrs. Bob Adamson, Mr. and Mrs. Orby Adamson, all of Lubbock; Mr. and Mrs. Roscoe Land of Wellington; Mr. and Mrs. Bert Ayers, Fred Bourland, and Mr. and Mrs. Edwin Eanes of Clarendon.

Mrs. Dorothy Hopson of Dimmitt; Mrs. Lola Duvall and Mrs. Davenport of Lakeview, and Mrs. Minnie Kinslow and Mrs. Emma Deavers of Memphis; Mr. and Mrs. U. J. Boston of Amarillo; and Mr. and Mrs. Carlton Messer of Quail were among others attending the Simmons funeral.

Ready cash is one thing that is a lot handier than a credit card.

The high price of beef can keep a lot of families in a perpetual stew.

A lot of folks take pretty good aim in life, but never do get

around to pulling the trigger.

Now would be a good time for someone to come to the aid of both political parties... Really, and no joking, wouldn't it be a wonderful time for a person of the caliber of a Lincoln or the like to come forward.

I guess one reason so many of us are over-weight, every time we see a table full of goodies we just go starch raving mad.

It's not so bad to live within your income--now and then, that is.

Silence is golden, providing it's not because of guilt.

The only way to save on this daylight saving time is to have a good alarm clock. If not we just sleep even more.

Looks like a good nickel cigar is a goner... Now we might start looking for a good nickel quarter.

The older we get the farther we had to walk to school in our youth.

A bore is a person that is here today and here tomorrow.

GOODNIGHT NEWS

LEE ANN PALMER

Mrs. Bertha Latimer and Miss Ethel Bond visited Mrs. G. A. Blankenship and Miss Inez Blankenship Thursday.

Mrs. W. M. Boston is looking forward to a visit from her granddaughter, Debbie Kollmar. Miss Kollmar is the daughter of Dr. and Mrs. Kollmar of Amarillo.

Mr. and Mrs. Roy McDowell of Phillips enjoyed the Wednesday noon meal with Mr. and Mrs. W. R. Clack.

After attending Sunday church services, the Steve Donalds took a pleasant tour of the Panhandle

last Sunday.

Rev. O. C. Edwards attended the Giles picnic Saturday.

A special thanks goes to Mr. and Mrs. D. C. Peden and C. N. Sutton for helping the Clarendon school bus get back to town. After the bus broke down, Mr. and Mrs. Peden welcomed the passengers in their home while Mr. Sutton helped tow the bus back to Clarendon.

Mrs. Horschler visited Mrs. Newberry Saturday.

The Willard Cooks of Meade, Kansas were guests in the home of Mr. and Mrs. Ben Lovell Friday.

Congratulations to graduate Shelia McAnear Wednesday Shelia participated in the 8th grade promotion exercises.

Mrs. John Crain of Austin visited the W. R. Clacks this past week.

The grandchildren of the Chet Roehrs visited them this past week.

Gene Sunderman, Kelly and Kyle visited the Lee Palmers Sunday.

W. M. Crain visited the Horschlers Saturday.

Thursday, Miss Edgar Mae Mongole, Miss Mable Mongole, Mrs. G. A. Blankenship, and Miss Inez Blankenship enjoyed an evening ride in the Mongole's new car. Before ending the evening the four dined in Claude.

Mr. and Mrs. McAnear, Debe and Shelia attended graduation exercises Thursday.

Members of Little League Teams Announced

Members of the various Little League teams which will participate in the summer program are listed below:

ANGELS - Wesley Gardner, John Mitchell Holland, Mike Leeper, Scotty Lindley, Ricky Littlefield, John Moore, Rickey Page, Pat Robertson, Jerry Smith, Larry Wayne Taylor, Mack Tomlinson, Ted Tyler and Steve Vaughan.

PIRATES - Calvin Burrow, Lloyd Burrow, Dan Hall, Sam Lowe, Marcos Rango, Larry Gene Shields, Rickey Truett and Tony Wallace.

CUBS - Jimmy Floyd, Lynn Floyd, Clay Kidd, El Ray King, Kenneth King, Danny Monroe, Tim Nunn, Kenneth Ray Odum, Walter Riggs, James Thomas, Mac Thornberry, Robert Truett.

DODGERS - Jack Lynn Bell, Billy Bob Flair, Paul Hernemeyer, Farrell McAfee, Bright Newhouse III, Mark Phillips, Dennis Wayne, Swinney, Michael Wianechi.

WHITE SOX - Eddie Eads, Michael Gardner, Alan Harper, Rodney Hicks, Johnny Moreland, Mike Newsouse, Jim Owens, Stan Shelton, William Smith, Billy Thomas, Kenneth Tyler, Eddie Vinson.

GIANTS - John Franklin Gerner, Tommy Hill, George Don Hillis, Jr., Terry Hopkins, Keith Bobbie Kidd, Doug Kidd, William Richard Maxey, Danny Rice, Gary Shields, Russell Sparks and Greg Tolleson.

YANKEES - Roger Dale Bass, James Chilton, Randy Croslin, Alan Hamilton, Scott Hamilton, Jerry Holland, Frankie Just, Ronny W. Lockwood, Ricky Mooring, Freddy Reece, Kenneth Reese and Gary West.

INDIANS - Robert Ellerbrook, Rickey Lee Gerner, Rex Johnson, Jack Leeper, Mark Mann, Wayne Reynolds, Irvin Thomas, John Tucker.

BRAVES - Byrd Adkins, Ewayne Barbee, Johnny Floyd, Johnny Gillean, Mickey Grady, Michael Hunter, James King, David Owens, Mike Owens, Calvin Reece, Jimmy Carl Reece, Gary Vinson.

COLTS - Danny Hill, Randy Hill, Greg Hurst, Jay Lamberth, Lonny Carl Lockbey, William Huey Lockbey, Rickey Rattan, James Shadle, Joe Shadle, Thomas Shields, Jim Thomas, Larry Weatherton and Roy Williams.

The home is a lucrative target for the burglar. Stolen property value in each home burglary averages \$263, compared to \$227 taken in the average commercial theft.

Veterans' insurance policies must be paid to last beneficiary designated by the veteran.

Tips By Gooch on Use of Pesticides

There are four points of pesticide safety to remember each time you consider the use of a pesticide - chemical on your farm or ranch, says Ronald Gooch, county agricultural agent. Just as you are responsible for the decisions on the use of pesticides in your agricultural enterprises, you also assume the responsibility of their safe use.

You can "practice pesticide safety" by remembering the following points: (1) take appropriate protective measures, as called for on the label, each time you use the product, (2) always strive for accurate application, to hit the right pest in the right place at the right time, (3) remember to protect those around you with locked proper storage, and (4) never neglect correct disposal of the left-over chemical or empty pesticide containers.

Pertinent information about the first three points of safety will be found on the label of the pesticide you buy, reminds Gooch. This points out the importance of reading and re-reading labels on the products you buy.

Don't rely on your memory when you buy or use pesticides, comments the agent. New pesticides in different chemical strengths are constantly coming on the market. The correct disposal of the left-over chemical, or empty container, is not always covered in the label information. Different types of containers also call for different kinds of disposal, says Gooch.

Here are tips to remember when the time comes to safely and effectively dispose of unwanted pesticide containers. To safely break glass containers, roll them first in old newspapers, then break them. Metal and plastic containers should be punched full of holes to make them unusable. Crush all containers, for this same reason, and bury the remains. The best

practice to follow in the disposal of paper containers is to bury them. Paper containers can be burned, but do so only on a windless day and stay out of the smoke. Some of the pesticide residue in the "empty bags" will remain in the ashes after burning; so, it is always a good idea to bury the ashes.

Do not punch or burn aerosol (pressurized) bug-bombs. When dealing with bug-bombs, bury them, or take them to a sanitary land-fill dump. For further information on pesticides and their safe use, contact the county agent's office.

Brush Is Increasing Problem In Texas

Brush is becoming an increasing problem in Texas, and it has several bad effects upon our local economy in Donley County. The average annual rainfall in Texas is about 27 inches. The Agricultural Research Service estimates that 10 inches of this moisture is used by worthless plants each year. This amounts to 38 per cent of our annual precipitation being used by brush and weeds.

While brush is robbing us of valuable moisture that is needed for economic uses, it also is using this water very inefficiently. The amount of water needed to produce 740 pounds of mesquite or 1200 pounds of sagebrush would produce one ton of a valuable forage grass such as blue grama.

This problem is worsened by the fact that once brush infests grassland, it makes the area even more droughty because brush provides little protection from water runoff and erosion and restricts grass growth.

Brush is harmful to urban people as well as farmers and ranchers. The tremendous amount of water used by brush on the upper reaches of watersheds never can be used for municipal and industrial purposes downstream.

A brush control program on the Texas portion of the Red River watershed alone could save over 85,000 acre-feet of water annually.

The key to preventing home burglaries: "Inconvenience." "It simply must be inconvenient and even difficult for the burglar to enter and leave the home undetected."

### Special Activities At Electric Theatre Through Week End

Martin Hendrix, manager of the Electric Theatre, has planned a special program of outstanding entertainment for all visitors and local residents, teens and adults alike, for the coming week end and opening of Greenbelt Lake. Three special dance bands have been engaged.

Friday night, May 31, Mrs. Melvin Howard of Amarillo will provide music for dancing. Mrs. Howard has entertained here before and is being returned by popular request. She performs at an organ equipped with instrumentations. Her music appeals principally to adults. Dancing is for the public and all are invited to attend from 9:30 p.m. to 1 a.m.

Saturday night Hendrix has engaged the "Vicounts," a group of musicians who formed their band while attending West Texas State University. This group is one of the most popular in Texas, Oklahoma, Nebraska and in the leading Teen Clubs in New York, California, San Francisco, and Las Vegas. Dancing will be from 9:30 p.m. to 1 a.m.

Saturday night, June 8, will be the last big dance connected with the Greenbelt Lake opening. The "Chanters" of Amarillo will provide music for dancing from 8:30 to 12 p.m. This group has been voted the Number One Teenage Entertainment Band in the Southwest by disc jockeys and leading Teen Clubs.

Hendrix has added more sound and lighting equipment making the Electric Theatre comparable to clubs found in large cities and invites everyone to attend these special attractions throughout the week end.

In addition to securing these special bands for entertainment each evening, Hendrix will provide the P.A. system for the lake ceremonies Sunday afternoon and has given Queen Contestants tickets to the Vicount dance following the Queen contest.

The Electric Theatre may be rented for private functions.

Sam King of New Orleans, La., and Mr. and Mrs. H. R. King and Steve of Amarillo spent Friday night and Saturday with Mrs. J. R. Batson and Mack. Mrs. Batson accompanied them back to Amarillo for Steve's baseball game Saturday evening, returning Sunday.

### NEWS FROM CITY HALL

By Mayor R. L. Gilkey

Who wants an airport? Not any of the pilots that live in Clarendon. They have all the facilities that they want. If Clarendon has a new airport it will cost these men money, time and effort to move their hangars and other facilities. So if we get a new airport, it is because we want it. It will be because the businessman can utilize it, tourists can utilize it, and industry can see a method of transporting management. Even friends can fly in for a week end.

What will it cost? We don't know, but under \$100,000, of which we presently have a federal grant for \$42,414. With a state grant we might be able to have a new airport for 20,000 to 25,000 dollars. We don't know where it will be, or how much it will cost, but when we do have this information, it will be presented to you for your approval or disapproval.

Did you know that we have been retiring our city debt at approximately \$20,000 per year the past several years? That

would build an airport, pave streets or other public improvements with no increase in taxes. Of course, our indebtedness with the Greenbelt will take all our surplus and more for many months (or years) to come. When I use the word Greenbelt, I am talking about us. We are one-fifth of the Greenbelt. We are one of the five cities and we use a fraction more than 20 percent of the water produced. So we have few choices. We have to pay our obligations to the Greenbelt and we can best do this by selling water, both to ourselves and more important, to others. So sell the Greenbelt as much as you can. Every penny the Greenbelt earns, is that much less we have to pay. It is a business and we own 20 percent of it. Let's be good businessmen and sell that water. Forty years from now, when the obligations are paid, those water sales will be profit, our profit.

Next Wednesday evening the Clarendon Little League will have its annual fund drive. Please make a special effort this year. Give twice the amount you had planned. This is a marvelous program for our young boys. Maybe you don't have a boy playing, but come and watch a game. You'll get a dime's

This area was quite congested with campers at Greenbelt Lake early Wednesday morning.

worth of pleasure and satisfaction for every penny you gave. For your Little League—Give Twice — It's worth it.

Mr. and Mrs. Douglas Bradshaw of Irving, Texas are the proud parents of an 8 pound, 8 ounce girl born May 21. She was named Kimberly Gaye. The grandparents are Mr. and Mrs. G. W. Bradshaw of Clarendon and Mr. and Mrs. Cecil Mills of Lella Lake.

Mrs. Carl Pittman and Miss Judy Pittman attended graduation at Canyon Friday night, May 24. Mrs. Pittman's granddaughter and Miss Pittman's niece, Karla Jordan, was a member of the High School graduating class.

Mrs. Carl Pittman, Judy Pittman and Bill Burlin of Houston visited Mr. and Mrs. Roy Johnson and family in Dimmitt Sunday.

### WORK TO BEGIN ON SAINT'S ROOST SAGA

With 90 percent of the cast selected and committees functioning, actual work on the historical drama "Saint's Roost Saga" gets underway. Work will begin immediately on additional sets and plans for more music and dancing are being formulated. Bumper stickers have been ordered to boost advertising of the production.

The program committee will begin selling ads this week and businesses are urged to again support the pageant with a \$3.00 ad. Individuals wishing to contribute will be listed as before.

The following girls will be selling ads: Cathy Craft, Lee Ann Palmer, Kathy Autry, Cindy Lowe, Becky Deyhle, and Pam Perkins. Please contact one of these girls for an add or contribution.

### JUNE SOCIAL SECURITY SCHEDULE RELEASED

Gerald Millard, Social Security Representative for the area, will be in Clarendon June 13 and June 27. Donley County residents having business to transact with him may meet with him at the county Courthouse on the above dates.

### AREA DIABETES LAY SOCIETY MEETS JUNE 4

The Amarillo Area Diabetes Lay Society will meet Tuesday, June 4, at 6 p.m. in Sanborn Municipal Park located between 14th and 15th Streets on South Taylor in Amarillo for a picnic. Each family is to bring their own supper. This will be a get acquainted party.

The business session will get underway at 8 p.m. in the Social Hall of Polk Street Methodist Church. Officers will be elected and committees appointed.

Present membership in this newly organized group totals 102. Membership is open to Diabetics of all ages, their families and friends, and anyone else who is interested for any reason in learning more about "diabetes."

Mrs. Bobby Seago and Laurie of Turkey and Mrs. Nelson Seago of Abilene visited Mr. and Mrs. Lee Bell and friends here Friday.

Dave Britt of Wheeler arrived Friday to visit Mr. and Mrs. T. M. Caldwell, Jr., and friends here.

## GREENBELT GRAND OPENING SUNDAY

LAKE GREENBELT, Texas newest virgin lake, located in the eastern Panhandle four miles north of Clarendon along Highway 70, will be the scene for a gala celebration this week end climaxing with the Grand Opening boat races and formal dedication Sunday. Greenbelt, with its deep blue protected waters, is slated to become one of the most popular outdoor sports lakes in northwest Texas.

### Boat Races, Fishing Contest, Beauty Pageant Highlight Celebration

The stage is set and the blue waters of Lake Greenbelt -- Texas' newest outdoor sports and resort lake -- will become the mecca this week end for a Grand Opening celebration in the heart of the colorful rolling plains of the eastern Panhandle.

The five-day celebration, which got underway Wednesday with the official opening of lake fishing, will climax Sunday when some 25,000 outdoor fans from a 100-mile radius are expected for National Outboard Association boat races and formal dedication of the lake.

Located four miles north of Clarendon above Highway 70 on the Red River, Lake Greenbelt is owned and operated by the Greenbelt Municipal and Industrial Water Authority which serves member towns of Clarendon, Memphis, Childress, Quanah, Crowell and Hedley.

The lake, well over half full, is expected to be one of the prime resort attractions in the Panhandle for all types of outdoor sports, boating, fishing, water skiing, skin diving as well as picnicing and even hunting in season.

Festivities get underway in earnest Thursday morning at 6 o'clock with the kick-off of the three-day fishing contest. Prizes and awards will be presented after the final weigh-up Saturday at 2 p.m.

Saturday night the celebration will turn into a Greenbelt Beauty Pageant with contestants from five Greenbelt towns vying at the Clarendon Junior College auditorium gymnasium. An exhibit of art from the Greenbelt area will also be shown during the pageant.

Dedication of the lake has been scheduled for Sunday June 2 at 1 p.m. Judge Otho Dent of Austin, a member of the Texas Water Rights Commission and one of the state officials who worked with the Greenbelt project since its inception, will be the principal speaker. The Rev. Carl Nunn, minister of the First Methodist Church in Clarendon, will serve as master of ceremonies.

Welcome and introduction of guests will be by Dr. S. H. Townsend of Childress, chairman of the Greenbelt Authority.

The National Outboard Association boat races will get underway shortly before 2 p.m. at the close of the brief dedication ceremonies.

Mike McCully, Clarendon postmaster, heads a special Greenbelt Celebration committee which is sponsoring the five-day affair in cooperation with other Greenbelt towns. The celebration is being underwritten by the Clarendon Chamber of Commerce.

The lake, already more than half of its total 60,000 acre feet capacity, is now ready to handle in excess of 25,000 people for the weekend.

Information booths, designated camping areas, boat ramps, concession stands, plus

many other public facilities have been arranged for the week end. The lake, with more than 25 miles of shoreline, will offer plenty of room for celebration week end visitors.

"Even with big crowds, the lake will certainly not be crowded," McCully pointed out. "And for the boat races, we'll have room to spare, because fans can watch from both sides of the lake and from the dam, a real vantage point for this thrilling regatta", he added.

The Texas Parks and Wildlife Department has already authorized an expenditure of \$30,000 for improvements and facilities and more is expected to come later.

A special invitation has been issued to lake visitors to tour the new Greenbelt Lake resort, Sherwood Shores IX. The lake-side resort, located on the north side of Greenbelt adjacent to the new Clarendon Country Club, was opened last September and hundreds of lots have already been sold with home construction underway. George DeArmond, developer of Sherwood Shores IX said plans call for several swimming pools, parks, and paved streets, water and utilities over the some 700-acre estates.

The estates may be entered from Highway 70 just north of the dam and will be open for inspection all weekend.

More than \$1,000 in "door" prizes will be awarded visitors during the grand opening Sunday. Concession stands around the lake will be operated by civic clubs and organizations in the Greenbelt area.

Members of the celebration committee include McCully, chairman; Dr. Keith Hudson, fishing contest; J. E. Kidd, boat races; Mrs. Norma Selvidge, beauty pageant; Mrs. Sandra Mooring, Beryl Clinton, Tommie Saye, Bob Bell, J. G. McAnear, Richard Tunnell, Dr. George Smith, H. M. Breedlove, Mrs. Beth Walker and Tex Selvidge.

### Beauty Pageant Saturday Night At CC Gym

### 64 Boats Enter Greenbelt Regatta

A Beauty Pageant, featuring young ladies from several of the Greenbelt area cities, will be held in Clarendon Saturday night to select "Miss Lake Greenbelt" to reign over the opening celebration of the eastern Panhandle's newest outdoor sports lake.

The pageant will be held in the gymnasium of Clarendon Junior College beginning at 8 p.m. Saturday with 14 contestants entered from four towns.

Contestants include: Clarendon -- Adele Barnhill, Elaine Tolleson and Nelda Stepp.

Quanah -- Alyce Faye Gorley, Lana Raye Gorley and Carolyn Chapman.

Childress -- Beverly Finley, last year's winner in the Childress "Miss Texas" contest, Barbara Clements, Evelyn Holland, Debbie Bird and Carla Carmack.

Crowell -- Jo Nell Bradford, Rebecca Ann Russell and Cynthia Erwin.

Judges for the contest will be Royce Bodiford of KGNC-TV, Amarillo; John Mahaffey, of KFDA, Amarillo; and John Patric of KVII, Amarillo.

The beauties will be judged in bathing suits and formal gowns during the evening. Mrs. Norma Selvedge of Clarendon is director of the pageant. A queen, first runner-up and second runner-up will be chosen. No admission charge is made for the pageant.

An exhibit of art from the various Greenbelt cities will be displayed at the gymnasium an hour before and an hour after the pageant. All artists are invited to attend and display their paintings.

The high-pitched whine sounds like the buzzing of ten thousand angry bees.

Down the straightaway barrel the hydroplanes and runabouts, kicking up in their wake sprays of water that resemble rooster tails. Around the turn the crafts furiously wheel as the drivers try to outmaneuver each other and gain an inch, a foot or a yard.

This is part of the excitement, drama and suspense in store of thousands of Panhandle outdoor fans and other visitors to the Lake Greenbelt Celebration boat races Sunday afternoon.

The Lake Greenbelt Celebration Regatta, planned to become an annual affair, will get underway Sunday afternoon shortly before 2 p.m. before an estimated 25,000 fans near the lake's mile-long dam.

Some 64 boats will compete in 16 heats, about four to a heat, over a half mile area with quarter mile turns well in view of fans watching from the vantage point on top the dam and from both sides of the lake.

A thousand dollar purse has been posted by the Clarendon Chamber of Commerce in addition to a handsome two-foot traveling trophy for the grand champion. The driver to hit the water first will receive a "Hell Divers" trophy.

Class A, B and C boats will take part in the three-hour races. The classes are established on the basis of engine size and the length and type of boats.

Persons unfamiliar with boat racing are impressed by the way drivers and mechanics toil over their boats.

The most skilled surgeons do not display a more delicate touch or a deeper tenderness than the men in the pits give

to their engines.

Sportsmanship among the drivers and pit crews is unbelievable. In boat racing the drivers want to win badly but not at the cost of hurting someone. When there's a collision (and there usually is), the races are stopped until drivers in the water are hauled out.

You can sense a camaraderie among boat racing enthusiasts, quite likely stemming from the danger that continually exists as well as the love they share for speed and engines.

The handsome traveling trophy and cash prizes will be presented at the conclusion of the races. Any driver who wins it three years in a row is entitled to keep the trophy.

GREENBELT REGATTA Trophy--Mike McCully, Clarendon postmaster and chairman of the Greenbelt Celebration Committee, holds the handsome championship trophy to be awarded in the boat races Sunday.

### Greenbelt Edition

A total of 30,000 copies of this special edition of the Lake Greenbelt Celebration have been published this week.

This edition has been produced as a joint effort on the part of six newspapers serving the Greenbelt towns -- The Donley County Leader, Clarendon; the Memphis Democrat, the Childress Reporter and the Childress Index, the Quanah Tribune-Chief and the Foard County News, Crowell.

Additional copies are being distributed in neighboring Pampa and to visitors at the lake while others will be made available to Chambers of Commerce and Industrial Foundations for mailing to industrial prospects.

Extra copies of this edition may be obtained by writing the Chambers of Commerce or newspapers of any of those

# Crowell--End Of Greenbelt Line

BY BILL KLEPPER  
CROWELL, TEXAS -- Crowell was the last city to vote to join the Greenbelt Municipal and Industrial Water Authority, and the new source of water has been in the local water lines for only about two months.

Residents of the City of Crowell voted to join the Greenbelt Authority after engineering surveys and tests showed that the city was using more water than the underground system could replace, and that the water table in the field was being gradually lowered and would eventually be exhausted, leaving the town without adequate water.

This very thing happened here in 1936, when the water supply was completely exhausted, and water was brought in by tank cars on the railroad. A majority of Crowell residents evidently felt that they did not want a repetition of this as they voted to join with the other cities of the area in Greenbelt water project.

Crowell is a small town of about 1,500 residents and is the county seat of Foard County. The local court house, the center of county activities, has recently undergone a "face lifting" inside, and a beautiful lawn, trees and shrubs add to the looks of the court house square.

## Industry Sought By Four Winds

"FOUR WINDS Industrial Foundation, Inc." is a name that will soon be familiar to all citizens in the four-county area comprised of Foard, Cottle, Hardeman and Childress Counties.

"The Four Winds Industrial Foundation, Inc. is a working partner of each of the 20,000 citizens in our four county area, as we try to find ways of strengthening our economy", says Bill Neal, president of the Foundation.

"It is a bootstrap operation composed of and financed by individuals and businesses within this area", he stated. "Our people have chosen to make rural America our home, but if we are to stay here and survive financially, we have to find ways to bolster our sagging economy. We believe that only a unified effort on the part of all the people of this area can get the job done."

"For many years we have watched as family after family has left this area to find jobs and opportunities in large cities. Somehow we need to provide the economic opportunities that will keep our citizens especially our young people--in this area", adds Ross Smith of Childress, vice-president of the organization.

How do the people of Hardeman, Cottle, Foard and Childress counties plan to fight to stay in rural America? The first goal is to provide jobs an economic base from which can spring hope for a better life in America and to provide educational and cultural facilities to enrich living in a rural America.

WITH THESE GOALS TO attain, the Four Winds Industrial Foundation, Inc. was organized.

The Crowell School System offers students a well-rounded curriculum for both college-bound students and also those who plan to go directly to work from high school graduation. A beautiful new gymnasium has been built within the last 1 1/2 years on the campus, and in addition to the gym, the building houses the band hall and several classrooms. Just across the street from the school campus is a beautiful concrete swimming pool, which is enjoyed by area residents during the summer months.

In addition to the principal crops of wheat, cattle and cotton, oil plays an important part in the local economy. Although drilling activity is slow, pumping from producing wells provides incomes for several families here. Just last week, construction of a new "refrigeration" plant was started in the Raspberry Field in the west part of the county. This plant, when completed, will cool gas coming from the wells, and in the cooling process, propane, butane and gasoline will be formed. This liquid will then be shipped by truck to another plant for further refining.

Foard County residents are optimistic about the future of the Four Winds Industrial Foundation, and the many benefits it will bring to this area.

THE FOUNDATION'S FIRST project has gotten off to a fast start. At one of the first informal meetings of interested citizens of the four-county area, it was suggested that the Foundation try to induce industries which are now located in or near large cities which have problems of needing space to relocate in a sparsely populated rural industrial site located within the four counties. Many industries are also experiencing labor problems in the big cities as well as high ad valorem taxes and other problems.

"We felt we had something to offer these industries which might be very attractive to them," said Cecil Davis of Crowell, secretary of the Foundation. "We've got plenty of open spaces out here, as well as air, rail, highway transportation facilities, utilities and reasonable tax rates. And now that the Greenbelt dam is completed we have the water industry must have."

But, according to Jack Powell of Paducah, the Foundation's treasurer, the group feels that the biggest asset this area can offer is the type of people we have. "We think that industry will find our kind of people make a lot better type employees", he said.

Officers are Bill Neal of Quanah, president; Ross Smith of Childress, vice president; Cecil Davis of Crowell, secretary; and Jack Powell of Paducah, treasurer.

Directors of the Four Winds Industrial Foundation, Inc., are Bill Neal, Amos Page, and Mrs. J. A. Koch, Hardeman; Ross Smith, J. E. Gruetzner and Sam Carmack, Childress; Jack L. Powell, Ewell Walker and Bill Smith, Cottle; Robert Kincaid, Henry Black and Cecil Davis, Foard.

WORK ON THE LAKE GREENBELT reservoir is being inspected here during the stages of construction by directors of the greenbelt Municipal and Industrial Authority. Left to right are Merl Kincaid of Crowell, Wendall Harrison of Memphis, Bill Lowe of Clarendon, the job engineer, Mr. Alexander, and Carroll Knorpp of Clarendon.

## History Of Greenbelt

A lot of water has flowed down the Salt Fork of the Red River in the 18 years and 3 months from the first Water Compact among Donley, Armstrong and Collingsworth counties to dedication of the Greenbelt Reservoir Dam.

Actually, groundwork on preserving Texas' water rights in general and the Panhandle's water rights in particular of the Salt Fork was given impetus when several Donley County residents heard that Oklahoma wanted first call on the river's water rights. Oklahoma already had water rights of the North Fork of the Red River.

Laying the groundwork for the initial meeting of the Water Compact, which eventually evolved into the Greenbelt Municipal and Industrial Water Authority, were the late C. B. (Cap) Morris and J. R. Porter, Ray J. Noblitt, W. Carroll Knorpp and W. S. Whaley.

A partial timetable of events showing the progress made follows:

March 4, 1950

Water compact formed with Donley, Armstrong and Collingsworth counties participating.

April 25, 1950

Second meeting of the Water Compact held, with the organization electing Joe Jones, mayor Clarendon, president, and Mike McCully, secretary. The name Water Compact was changed to "Donley County Upper Red River Development Association."

May 10, 1950

A tri-county meeting was held and the group formed the "Upper Basins of Salt Fork, Elm Creek and Buck Creek of Red River Association." Ray J. Noblitt was chairman and W. S. Whaley, secretary.

Clifford Johnson of Hedley was added as a director.

August 30, 1950

Armstrong County dropped out of the association, and directors of Donley, Collingsworth and Hall counties voted to file application for prior rights with the State Board of Water Engineers on the Salt Fork of the Red River only. The application cost \$250.

The Clarendon Chamber of Commerce, merchants and individuals paid the annual fee and increased their efforts to convince the State Board of Water Engineers that the claim to water rights should be extended until some action was taken by the Texas Legislature.

The efforts were successful in warding off the pressure Oklahoma put on the politicians to make a swap deal so that state could get the Red River rights.

A. H. Woolverton was paid \$1,500, money paid by Clarendon merchants and individuals, to determine the feasibility of building a dam on the Salt Fork of the Red River.

The name of the association, in the meantime, was changed to "Upper Basin of the Salt Fork of Red River Water Association," with C. B. Morrison, president, and Rayburn Smith, secretary. Smith resigned and Clifford Johnson took his place.

In 1953, R.A. Underwood, Sr. of Fort Worth, the association's financial advisor, suggested the name be changed to "Green Belt Municipal and Industrial Water Association," as the term "Salt Fork" was undesirable in describing the good water of the river.

Representatives and state senators were contacted to work in behalf of the association. Cooperating were Rep. Elbert Reeves of Matador, Rep. Graininger McIlhany of Wheeler, Rep. Jack Hightower of Vernon, Sen. George Moffitt of Chilli-cothe and Sen. Andy Rogers of Childress.

April 14, 1954

A bill was introduced before the 53rd Legislature, and Gov. Allen Shivers signed the Act creating the Greenbelt Municipal and Industrial Water Authority, made up of Clarendon, Hedley, Memphis, Childress, Quanah, Wellington and Paducah.

May 8, 1956

Confirmation elections were held and Clarendon, Hedley, Childress, Memphis, Quanah, Paducah and Wellington approved the Authority. An election authorizing the city councils of each city to enter into a water contract with the Green Belt Municipal and Industrial Water Authority was held in all towns but Wellington, who withdrew from the Authority. Paducah turned down the issue a week later.

October 14, 1956

Crowell voted to join the Authority and approved the water contract.

Following the confirmation elections, Morris resigned as president, and Dr. S. H. Townsend, appointed Childress representative in 1955, was

chosen for the post. Other officers were Sam Breedlove of Quanah, vice president, and Clifford Johnson, secretary-treasurer.

Other board members were W. Carroll Knorpp of Clarendon, Wendell Harrison of Memphis, Kenneth Tooley of Paducah and George Shadid of Wellington.

Breedlove resigned in 1957 and Knorpp was elected vice president. Roland Walden was named the new director from Quanah. In 1959 Johnson was replaced by Kenneth Tooley of Paducah as secretary-treasurer. When Tooley moved out of the water district, William J. Lowe, a Clarendon attorney, took his place. Clifford Johnson became mayor of Hedley and Ross Springer was named a director. Springer was followed by A. W. Anderson.

Johnson resigned as mayor in 1962 and became Hedley's director again. Howard Stanley succeeded Roland Walden as Quanah director and Merle Kincaid was named director from Crowell.

Sept. 28, 1963

Five cities in the authority voted as follows on water purchase contracts:

Hedley--188 For, 0 Against; Childress -- 1,379 For, 13 Against; Clarendon--570 For, 27 Against; Quanah--680 For, 27 Against.

Crowell voters went to the polls on Oct. 15, 1963 and voted 186 for and 127 against.

Memphis, still a member city, does not own the municipal distribution system, and did not vote for or against purchasing water from the Authority. Memphis does have a director, but he has no voting power. The city's water system is owned by the Donley County Water Control and Improvement District No. 1. The Control has contracted for a supply of water from the Greenbelt Authority.

March 29, 1966

Contracts for the dam, filtration plant and pipeline were let. Construction price was \$3,685,635.96, broken down into \$1,795,514.06 for the dam; \$624,941, filtration plant, and \$1,230,180.90, pipeline.

April 30, 1966

Groundbreaking ceremonies were held. Cap Morris was to be honored as one of the first promoters of the Authority, however; he died suddenly at home the previous day.

# Greenbelt Opening Industrial Milestone

Opening of Greenbelt Lake, May 29 through June 2, celebrates an historical milestone in industrial development in West Texas. The story of Greenbelt Lake and the Thirsty Water System is a story of cooperation between civic and industrial leaders in a six-county area. It is also a story of planning and persistent leadership.

West Texans in Foard, Cottle, Childress, Hardeman, Donley and Hall Counties have long felt the need to encourage industry to locate in the area, and for years have been preparing to meet the requirements to attract industry. According to the hard-working citizens in the six counties, it's been a long haul and a hard fight. All agree that the results of their team-work effort are gratifying.

Residents of the six counties are now assured an ample water supply, and the towns of Clarendon, Hedley, Memphis, Childress, Quanah and Crowell have another vital ingredient to offer industries they seek to attract.

If a beginning can be pinpointed, perhaps the year 1956 is it. That's the year Sears sent an inquiry to the West Texas Chamber of Commerce for information in regard to locating an apparel supplier in the West Texas area.

Memphis was very interested in having the new industry locate there, and supplied the necessary information. The plant-Marie Foundations was located at McClean, Texas.

Although disappointed, Memphis citizens didn't give up the fight for location of industry in their city. A bout a year later, Memphis made a bid for another industrial plant. This time they called on the Area Development Department of West Texas Utilities to assist them.

A detailed community audit was worked up, a \$25,000 Industrial Foundation formed, and a 23 acre industrial site obtained from the county on a 99-year lease.

Memphis didn't get that one either.

Undaunted, business leaders of Memphis in cooperation with WTU and other industrial leaders in the area, continued to call on and work with a

number of industrial prospects. Their efforts met with no success.

Mention of water supply continued to crop up in conversation with Management of expanding industries.

Water supply became a topic of conversation and concern among civic leaders in the four West Texas counties. They began to plan.

In 1961, Postex Cotton Mills, Post, Texas decided to expand. A prior employee of Marie Foundations was working with Postex and advised Management that they should look at Memphis. They did, and based on previous work, planning and programs for industrial growth that Memphis had undertaken, Memphis was able to satisfy all Postex requirements and obtain the new industry.

The Industrial Foundation was able to purchase land and work with Postex from a financial standpoint; however, as things turned out, little financial assistance was needed.

New industry began to look with favor upon the West Texas area. In 1961, Murry Sussman, President of Spartans Industries Inc., advised that within two or three years his company would probably be looking for manufacturing facilities in the Southwest.

Energetic leaders in the six counties planned and worked with renewed vigor. The Four Winds Industrial Foundation and the Southwestern Mesquite and Brush Eradication Association worked and planned as a team. West Texas Utilities' Area Development Department and other industrial leaders in the six counties continued to support the area projects.

In March, 1965, representatives of Spartan Industries met with Chamber of Commerce representatives from Childress and Quanah. In July, 1965 Childress signed a contract with Spartans for establishment of a new plant, and soon after a similar arrangement was worked out with Spartans Industries for location of a plant in Quanah.

In 1965, Secretary of Agriculture Orville Freeman visited the area by invitation to inspect the mesquite plots at Lazare near Quanah and to talk with civic leaders about plans to establish a research center in the area.

In 1968, Assistant Secretary of Agriculture John Baker made a return visit to evaluate the progress of the project. He also visited the Thirsty Water system, Greenbelt Lake and industrial plots in the area.

Impressed by the progress, Baker expressed his admiration for the persistent leadership and cooperative team-work which had prepared the six-county area to meet the demands of expanding industry in American today. He made particular mention of Greenbelt Lake and the Thirsty Water system and the vital role an adequate water supply played in attracting new industry.

The Greenbelt Lake, Thirsty Water system and other projects in the six-county area are excellent examples of how persistent leadership and team-work help towns prepare to attract new industry.

WILLIAM J. LOWE

## Lowe Attorney For Greenbelt

William J. Lowe of Clarendon, serves as the attorney for the board of directors of the Greenbelt Municipal and Industrial Water Authority.

The son of Mr. and Mrs. S.W. Lowe of Clarendon, he attended schools there, graduated from Clarendon Junior College and received a BBA degree and LLB degree from the University of Texas School of Law in 1949.

He has practiced law in Clarendon for 19 years and served as city attorney there for 17 years and was previously county attorney for Donley County for eight years.

He has served as general counsel for the Greenbelt Authority since 1963 and is also serving as secretary and treasurer of the Authority.

He is a member of the State Bar Association of Texas and the 100th Judicial District Bar Association, having served as president of the latter on two occasions. He has also served on the grievance committee of the state Bar Association for the past three years.

An active member of the First Baptist Church of Clarendon, he is chairman of the building committee for the new church sanctuary and other facilities now under construction. He serves as a deacon, and for the past 18 years has been either general superintendent of the Sunday School, or adult department or teacher of adult classes.

He serves as a director of the Donley County State Bank in Clarendon and has been active in civic affairs. He is past president of the Lions Club, been an appeal agent for the Draft Board since 1957 and has served as chairman of the Savings bond program for Donley County since 1956. He previously served on the executive committees of the Salvation Army and Boy Scouts for Donley County.

# Tournament Opens For Pike, Bass

A week end of great fishing along with hundreds of dollars in prizes awaits anglers from a two-state area who take part in the gala Lake Greenbelt Celebration Fishing Contest which opens Thursday.

Thanks to the Clarendon Chamber of Commerce and to representatives of other Greenbelt cities, the contest boasts an impressive collection of prizes and even more important, the promise of some great fishing.

The three-day tournament opens Memorial Day, Thursday, May 30 at 6 a.m. and closes at weigh-up time Saturday, June 1. Contestants will be classified in either men's singles, women's singles or junior's singles (17 or under).

Entry fees are \$3 and \$1 and contestants must use artificial lures only.

Winner of the men's division will receive a 357 magnum single action Hawes Marshall pistol compliments of Sherwood Shores IX.

Winners in all divisions will receive individual trophies and the overall winner will receive a big "traveling trophy". The tournament will be an annual event and the winner of the traveling trophy must win the meet three years in succession before it is his to keep.

Fishing will open each day at 6 a.m. with weigh-up time at 2 p.m. at the official station on the north side of the dam. Contestants must qualify either Thursday or Friday to be eligible to enter the finals Saturday. Contestants must specify which day they wish to attempt to qualify.

And fishing is slated to be excellent in Texas newest virgin lake. While bass won't be much over the two-pound mark they'll be plentiful and there's the chance to tie into a young northern pike.

Jack Sutton, superintendent at the state fish hatchery at Dundee, knows just about every fish in the Panhandle reservoir personally, according to Carroll Copelin, outdoor editor of the Wichita Falls Record News. He was in charge of the stocking of Lake Greenbelt last year.

Looking over his records, it's easy to see why fishing should

be good there this week. Sutton's crews dumped 240,000 black bass fry in April and May of last year and for good measure, tossed in 30,000 channel catfish fingerlings, 110,000 bullhead minnows and 20,000 hybrid sunfish.

Then the Feds moved in with about a million northern pike raised in a Kansas hatchery.

Sutton says conditions in the new lake were perfect for fish growth and tests have shown some northerns already around the three-pound mark. Using bass put in Lake Arrowhead last year as a comparison to the Greenbelt battlers, it's safe to assume last year fry will be as much as two pounds now. The same can be said for the new lake's channelcat.

Lake Greenbelt is the only public lake in Texas that has northern pike stocked. The lake limit on pike is three per day with 15 allowed on bass. No limits have been established on the other fish. Trophies, including 15 Zebco reels, will be awarded for the largest strings of fish.

## Big Boat FOR A Little Price

# MFG NIAGARA

This sporty, roomy runabout combines speed and maneuverability in one compact package. Famous MFG lapstrake hull gives it agility with stability. Easy to trailer, fun to run. Get our special price on the MFG Niagara.

## Quanah Sets Pace For Area Industry

A rolling plains frontier town that has fostered agriculture and industry for more than half a century, is on the move today as one of the brightest spots in a trio of Texas trags--

HOWARD L. STANLEY

### Howard Stanley Quanah Director

HOWARD L. STANLEY, Quanah Certified Public Accountant, joined the official director roster of the Greenbelt Water Municipal and Industrial Water Authority in November 1965. He replaced Sam Breedlove on the board to represent the city of Quanah.

A native of Henrietta, Stanley attended Chillicothe schools and received a Bachelor of Business Administration degree in accounting and was commissioned as 2nd Lieutenant in the U.S. Army Reserve from Texas A&M University in May, 1952. He served in the Army Quartermaster Corp from 1952 until 1954 and was released from active duty with the rank of First Lieutenant.

He moved to Quanah from Midland in November 1961.

His professional affiliations include American Institute of Certified Public Accountants, Texas Society of Certified Public Accountants, and Wichita Falls Chapter of Texas Society of C.P.A.'s.

He is a member of the First Baptist Church, Masonic Lodge and is past Worthy Patron of the Order of Eastern Star chapter in Quanah. He is a director and second vice-president of the Quanah Chamber of Commerce.

He is married to the former Doris Berry. The couple has four children and reside at 1101 West 13th Street.

oil, agriculture and industry.

Quanah, the county seat of Hardeman County and dubbed by its citizens as "the Gem of the Greenbelt," is romantically tied to the past through its famous namesake, Chief Quanah Parker, last of the Comanche chiefs, but rolling ahead in a bootstrap lifting operation that has impressed leaders in government, business and industry.

Ranking toward the top in per capita industrial payroll in Texas, Quanah is ushering in new industrial growth this year.

Construction is well underway on two new manufacturing facilities. The Bestwall Division plant for the nationally corporate giant, Georgia-Pacific, is building a new wall-board plant here and by fall is expecting to add some 50 more employees to its work force of almost 200 today.

The Quanah Manufacturing Company, a garment plant and subsidiary of Spartan Industries, will complete its \$330,000 plant here this fall and when in full operation will employ more than 300 persons.

A new industry for Quanah, the Delitter Corp., began operations here last fall in the manufacture of the "Can Gobbler", a machine designed to clear highway right-of-ways and promises to be another fast-growing industry.

Also calling Quanah home are the Quanah Cotton Oil Co., Panhandle Compress, Anderson Sheet Metal Works, power plant for West Texas Utilities Co., Shell's Conley Gasoline plant, the R. M. Wells Co., and Barker Construction Co., Swindell Sausage plant, and the Quanah Tribune-Chief, whose central offset printing plant produces newspapers and circulars for a wide area of Texas and Oklahoma.

Quanah's active Industrial Foundation, joining forces with the Chamber of Commerce, has worked with the Four Winds Industrial Foundation in attracting additional industrial prospects to this area.

Located at a crossroads of inter-state highway US 287, Quanah is served by three railroads, the Frisco, Fort Worth & Denver and its own, the Quanah, Acme, and Pacific Railway.

Agriculture still plays an important part in the economy of the area with cotton, wheat, beef cattle and grains shipped to the nation's markets each year.

Hardeman county produces some \$5.5 million in farm products each year with mineral values in excess of \$5 million. Sales from retail and wholesale products amount to more than \$20 million annually.

For leisure time, Quanah offers a modern country club with a nine-hole golf course and swimming pool, an olympic size public pool, city park with playground and picnic areas, youth center and summer baseball program. Nearby Lake Pauline, owned by West Texas Utilities, is open to the public for fishing, boating, swimming and picnicing.

Quanah has its own "master city plan" for municipal improvements including a new sewer system, paved streets and a new city auditorium.

## Red River Authority Getting Greenbelt Water To Rural Areas

The Red River Authority of Texas, headquartered in Wichita Falls, will buy approximately 12 million gallons of water a year from the Greenbelt Municipal and Industrial Water Authority to service rural customers who for years have been hauling their water or depending upon rain to fill their cisterns.

"Twelve million gallons is just a drop in the reservoir," James Kuhn, Greenbelt general manager, said. "The six Greenbelt member towns are using about 3 million gallons a day right now, so you can see that 12 million gallons a year isn't going to do much to the water supply."

The Red River Authority, of which Fred Parkey is general manager, has been building lines and setting meters in several small communities where there has been no community water supply. Towns, such as, Kirkland, Goodlett, Lazare, Newlin.

William Lowe, Greenbelt Authority attorney, said that one of the questions asked most when he was seeking easements for the pipeline was "can we tie onto the water line?"

He added that "getting water off the pipeline was important to them. Not having to depend upon water being hauled in or hoping it will rain to fill their cisterns will mean a whole new way of life for many of these people."

Lowe added that "this is the whole purpose of the Greenbelt Reservoir -- to get water to those who need it. We're not trying to ration our water, and we don't need to."

Kuhn said the Greenbelt Lake will have a surface area of 1,990 acres when full, with 60,000 acre feet of water available.

"We can pump as much as 9.6 million gallons of water a day out of the lake, and still have plenty for the member cities and rural customers of the Red River Authority. Right now we're only pumping about 3 million gallons a day out of the lake, and even with city growth and population explosion, we'll only be using about 6 million gallons by the year 2003."

Kuhn pointed out that the Greenbelt Authority only needs 64 per cent of the water in the reservoir.

"This left 36 per cent which is owned by the State of Texas. If we ever do need more water, we have the right to purchase any portion of the 36 per cent from the state."

Lowe said that the contract with the Red River Authority is for 10 years.

"Our primary responsibility is to the Greenbelt members, and all we're doing right now is selling surplus water to the Red River Authority for use by its rural customers. Of course, if

the time ever comes where we need the surplus -- and we can't even visualize this possibility right now -- we'll divert the surplus to the Greenbelt cities."

On the whole, rural lines are located in Childress and Hardeman counties, with some located in Foard, Donley and Hall counties.

## Greenbelt Has Good Record Of Soft Water

"Good soft water" is flowing from the Greenbelt Reservoir to the participating cities in the Greenbelt Municipal and Industrial Water Authority, according to Frank Drummond, plant superintendent.

According to tests run by the Texas State Department of Health the total hardness of the water measures 177, considerably less than the 500 total solids limit recommended by the department for drinking water.

"This is about as good drinking water as anyone would want," Drummond said.

The health department has set the following recommended limits for drinking water: iron 0.3; manganese 0.05; sulphate 250; chloride 250; fluoride 0.6-1.0; nitrate 45, and solids 500.

"The tests, measured in milligrams per liter, at the lake show; iron 0.04; manganese 0.05; sulphate 73; chloride 34; fluoride 0.8; nitrate 0.4; and total solids 177," Drummond said. "We measure up quite well."

The six cities have been drawing about 2 1/2 - 3 million gallons a day from the lake. The highest amount was during initial tests of the plant and pipeline when about 6 million gallons flowed from the lake.

"Our normal flow will be about 3 million gallons a day", Drummond said.

Quanah and Childress were the first to receive water. They started getting Greenbelt Lake water in September, 1967. On Jan. 1, 1968, water flowed to Hedley and Clarendon, and on Feb. 1, 1968, water went to Crowell.

Greenbelt Lake is fed from a 400 square mile watershed.

"Actually, 288 square miles of that are considered yieldable," Drummond added. "Right now we have about 7,500 acre-feet of water in the reservoir, covering 490 acres. When the lake is full, we'll have 60,000 acre-feet of water with a surface area of 1,990 acres."

Depth at the dam is about 37 feet, and when full the depth of the water at the dam will be 84 feet.

T.W. HARRISON

## Harrison Memphis Board Member

T.W. Harrison, farm implement dealer from Memphis, is the Memphis director on the board of the Greenbelt Municipal and Industrial Water Authority.

A life-long resident of Memphis, Harrison graduated from high school there in 1929, attended Georgia Tech for three and a half years then took his degree from Hardin-Simmons University at Abilene in 1937.

After spending four years in the Navy during World War II, he entered the family business, Harrison Hardware which had been established in 1905, and is currently the owner and manager.

He has been active in the chamber of commerce, Memphis city government and assumed other civic duties there.

He has represented Memphis on the Greenbelt board since the first meeting he attended there in 1947 when he was serving as president of the Chamber of Commerce.

"Memphis is still very much interested in the Greenbelt and we appreciate having a part in the organization of the Authority and all the work that has taken place since that time, he said. "Until we can actually become a purchasing part or active participating part in the Greenbelt we want to do all in our power to make a success of the Authority."

## Texas Firm Project Engineers

Freese, Nichols, and Endress consulting engineers for the Greenbelt Municipal and Industrial Water Authority, is one of the leading engineering firms in the United States.

The firm is staffed by a team of 70 persons, including registered professional engineers, surveyors, draftsmen, technicians, inspectors and administrators, and performs services ranging from feasibility studies through planning and surveying, preparation of working drawing specifications & construction inspection.

In addition to the Greenbelt project, Freese, Nichols, and Endress has served as consulting engineers for the Colorado River Municipal Water District, the White River Municipal Water District, the West Central Texas Municipal Water District, and the Georgia-Pacific Corporation project in Arkansas.

Present partners in the firm are Simon W. Freese, Marvin

The four filters at the Greenbelt Municipal and Industrial Water Authority plant, 3 miles north of Clarendon on Highway 70, will filter 6 million gallons of water every 24 hours, according to James Kuhn, general manager.

"It takes from 6-8 hours to process raw water from the Lake to the time it goes into the pipeline for the member cities," he said.

The raw water, about 3 million gallons a day, flows from the lake through a 36-inch conduit located at the bottom of the 110-foot high dirt and clay dam to a nearby pumping station. From the pumping station, water flows through a 27-inch concrete pipe to a Rapid-Mixer at the filtering plant.

"We use three chemicals, aluminum sulfate, chlorine and lime, in the water. Solids and bacteria adhere to the aluminum sulfate; chlorine kills bacteria, and lime controls the acidity in the water," Kuhn said.

From the Rapid-Mixer, the water moves to the Flocculators, where the chemicals form the floc, a fine, fluffy mass of suspended particles. Sweeps in the tanks agitate the water, continually mixing the chemicals. Then the water flows into the Clarifiers, where the heavy floc settles out and is flushed through pipes into the river.

"Once through the Clarifiers, the water enters the filters. The filters handle 3 gallons per square foot or about 1 1/2 million gallons of water every 24 hours."

There are four filters. Each has 2 feet, 3 inches of filter media sand, a special graded sand for filters, and 12 inches of a special gravel designed for filters, at the bottom. There is nothing in the gravel that will dissolve.

"We're filtering spring water on the whole and also fairly pure water from the 288 miles of yieldable watershed feeding the river and streams," Kuhn said. "The lake water is relatively pure, and it doesn't take much to chemically purify it."

Four employees work 24 hours a day at the plant. Frank Drummond is plant manager.

The filter plant's supervisory panel, metering and other instruments were installed by the AMCO Electric Co. of Lubbock. The firm moved the panel from Hedley, where it had been housed in the pumping station there until the filter plant was completed, in September, 1965. Work was completed in May, 1966, in Clarendon.

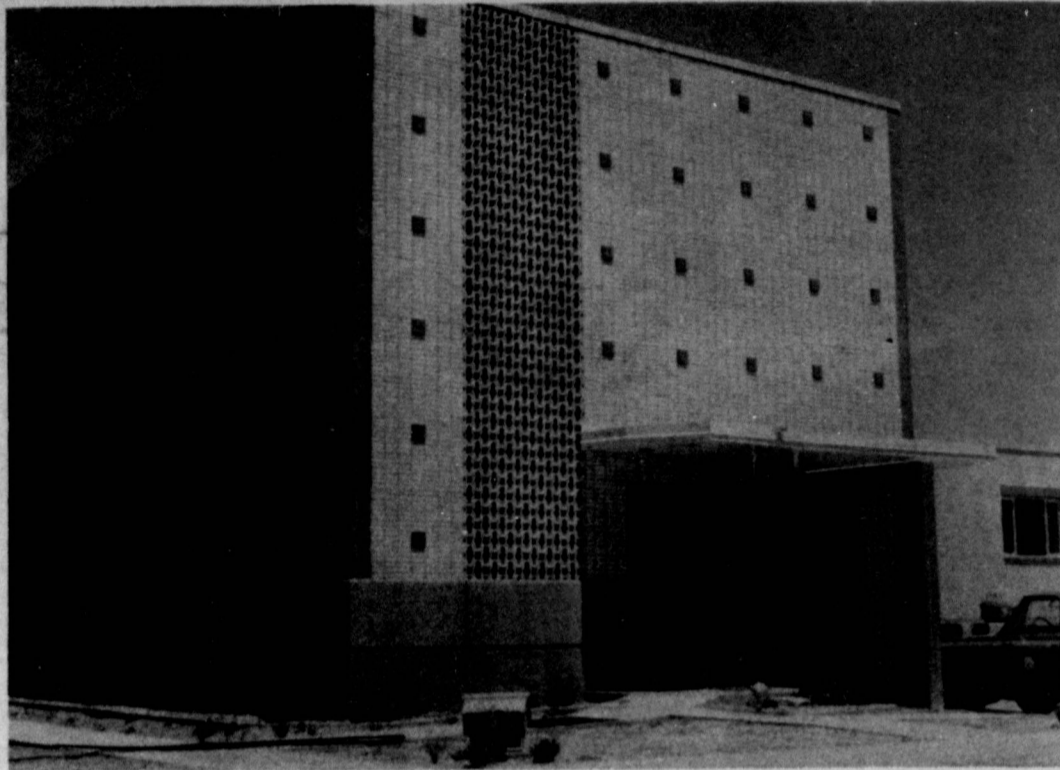

Brown-McKee Inc. of Lubbock built the filter plant itself, a modern brick building located on 10 acres of land.

C. Nichols, S. Gardner Endress, James R. Nichols, Robert L. Nichols and Lee B. Freese.

Working with the Greenbelt project have been Simon W. (Si) Freese and James R. (Jim) Nichols.

Another firm associated with the Greenbelt Authority is McCall Parkhurst, Crowe, McCall and Horton of Dallas legal counsel and bond advisors for the Authority.

# Filtration Plant Has Six Million Gallon Capacity

FILTRATION PLANT--About 3 million gallons of water a day is handled by this filtration plant located near Lake Greenbelt north of Clarendon. Four employees operate the plant 24 hours a day. Frank Drummond is plant manager.

DISCUSS FILTRATION PLANT OPERATION--James Kuhn, general manager for the Greenbelt Municipal and Industrial Water Authority, discusses filtration plant procedure with Plant Manager Frank Drummond.

## Completed Ahead Of Schedule Greenbelt Construction

Construction on the Greenbelt reservoir, filtration plant and pipeline to the six member cities was completed several months ahead of schedule, according to James L. Kuhn, general manager of the Greenbelt Municipal and Industrial Water Authority.

"Work should be finishing up about now instead of way back in August, 1967," he said.

Work on the initial 74 miles of pipeline from Lelia Lake Creek to Quanah began during November, 1964, and was completed during May, 1965. The contractor, R. H. Fulton of Lubbock, laid 24 inch, 21 inch and 18 inch concrete cylinder pipe.

The pipe was purchased from United Concrete Pipe Co. of Dallas.

The second phase of construction began during July, 1965, when Gilvin-Terrell Inc. of Amarillo started on the in-

filtration and pump station at Lelia Lake Creek.

"This was used as a temporary water supply for Childress and Quanah until Sept. 1, 1967," Kuhn said.

A 2 million gallon storage tank at Hedley, built by Gorbett Bros. Steel Co. of Fort Worth, was put into use in July, 1965. Thaten Brothers of Childress laid the foundation.

AMCO Electric Co., of Lubbock installed the filter plant's supervisory panel, metering and related instruments beginning in September, 1965, and finishing the work in May, 1966.

"This panel was moved from Hedley to Clarendon," Kuhn added.

During April, 1966, contracts were let for the dam, filtration plant and remaining pipeline. R. N. Adams of Kaufman was awarded the contract for the dam, and completed the work during June, 1967.

Brown-McKee Inc. of Lubbock was awarded the contract on the plant, and work was finished there during August, 1967.

J. T. Brodie Construction Co. of Amarillo laid 46 miles of 14-27 inch pipe from the dam, filtration plant and from Quanah to Crowell.

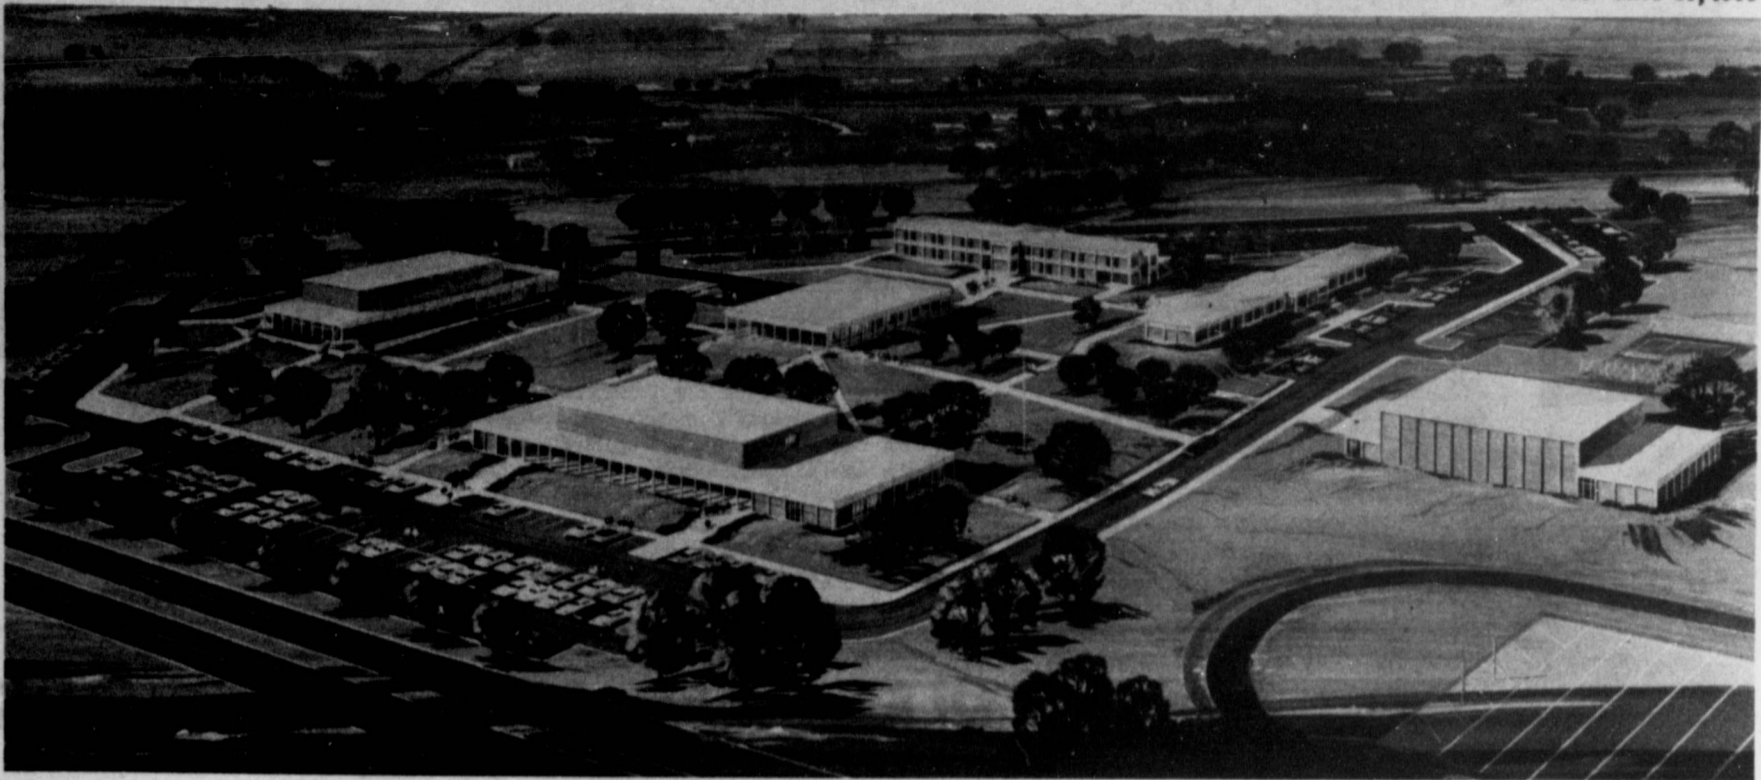

"Brodie tied into the pipe at Lelia Lake Creek, then laid pipe from Quanah to the storage tank at Crowell," Kuhn said.

"He laid 27 inch pipe from the lake to the filter plant, 27 inch pipe from the plant to the Clarendon take-off, 24 inch pipe from there to Lelia Lake Creek, 18 inch pipe from Quanah halfway to Crowell and 14 inch pipe the remainder of the way."

There are no pumps from the filter plant to Crowell.

"This is a gravity flow system. We do have booster pumps at Clarendon and Hedley, but those are the only ones," Kuhn said.

Clarendon College Future

## CLARENDON COLLEGE Athens Of Panhandle

### "THE ATHENS OF THE PANHANDLE"

A Saga of Its Birth and Growth  
BACK IN THE DAYS OF THE late 1800's, institutions of higher learning were relatively few and far between the still-young West. A number of colleges had sprung up in Texas, but most of them were in the southern and central parts of the state.

The Panhandle---a vast and rich expanse comprising more area than the entire state of Mississippi---was attracting settlers by the thousands. As the population increased at a rapid pace, the need for a college in the area increased just as steadily.

The citizens of Clarendon, a small town in the southeastern part of the Panhandle, saw the need for such an institution. They decided something should be done. The perseverance and determination of the early-day citizens of the city resulted in the founding of the first college in the Panhandle.

A committee of town-folk started a subscription campaign in the summer of 1897 to build the college. This list was presented by a special committee to the District Conference of the Methodist Church, South, which met in Memphis, Texas, in November of that year. The group offered to erect a two-story brick building on a four-acre campus which would in turn be deeded to the church.

The Conference received a similar offer for a college at Goodnight, a small town located 20 miles to the west of Clarendon. Rev. W.B. McKeown, a member of the Conference Board of Education, was assigned to investigate the proposals.

Rev. McKeown recommended that the Clarendon project be placed on the list of Methodist schools. Rev. J.W. Adkisson was elected its first president and classes scheduled for the fall of 1898.

The promised building was not complete when Fall arrived, but classes opened as scheduled on September 5 in the Methodist Church. Harwood Beville was credited with being the "first student" at Clarendon College and University Training School when he allegedly won a foot race for the honor.

All 75 students who enrolled

the first year were grade school pupils. Each was eligible to enter public school, but their parents preferred to send them to Clarendon College because "there can't be a college without students." They had contributed to the construction of the college and were making sure it would be a success. It was the same Rev. McKeown who recommended that the college be built in Clarendon who inspired the following editorial in the Clarendon Press:

"His bishop assigned him to the Panhandle territory where rattlesnakes and sinners outnumbered Christians 15 to 1. But the story of his ministry was one of the sagas of the Old West. McKeown supplemented his Bible with a pair of six-shooters and tackled the West on its own terms and won the respect of its citizens. He preached in barrooms, railroad stations or in the open---wherever there was an audience to listen."

It was this indomitable spirit which prompted the continued growth of the college. The enrollment increased steadily and today the Panhandle boasts many who proudly proclaim Clarendon College as their alma mater.

Clarendon College was 27 years old when its first real trouble began to brew. It became a four-year college in 1925, but after two years in this status, it soon became apparent that something must change.

The school's indebtedness had been paid, but the material improvements requested by the Methodist Conference had not been completed. Only part of the endowment for the college had been promised and not enough funds were available to complete the gymnasium for which the corner stone had been laid. There had been rumors from the beginning of the school term that the college might be moved from Clarendon.

It was at this juncture that Dr. R.E.L. Morgan, president, requested the Northwest Texas Conference of the Methodist Church to name a committee to settle the question once and for all. Despite the pledges of the citizens of Clarendon to endow the college with the needed funds if it would re-

main in Clarendon, the Committee announced on March 1, 1927.

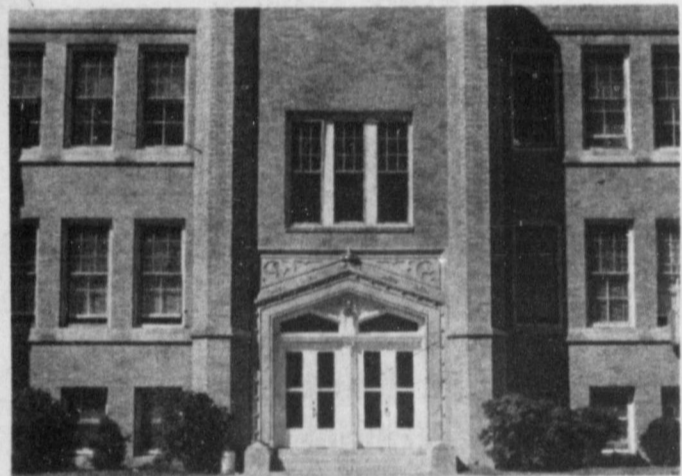

The proposal hit a snag, however, when suitable finances could not be arranged in Amarillo and the Conference voted to give the original endowment for Clarendon College to McMurry College in Abilene.

Thus came the end of one era--- and the beginning of another.

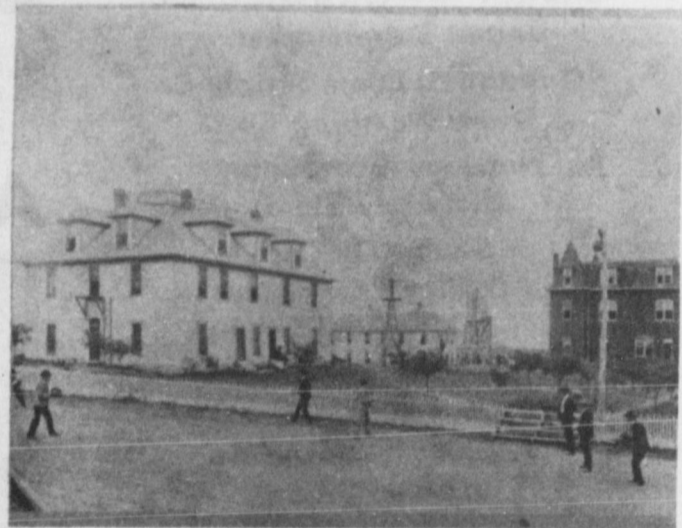

The citizens of Clarendon, sticking by their determination for a college of their own, proposed and carried by a margin of 343 to 2 a bond issue for \$42,000.00 to purchase the physical assets of defunct Clarendon College. The Clarendon Independent School District now owned a college and Clarendon Municipal Junior College opened its doors in September, 1928. It took up where its predecessor left off and has fulfilled the educational needs of the area for thirty-four years.

Athletics have played a large part in the life of Clarendon College and its junior college successor. The original college was credited with bringing the first intercollegiate football game to the Panhandle in 1903 when it fielded a "team" (which had never played a game) against a team from Goodnight College. The Clarendon squad pulled an upset and won the skirmish to the tune of 16 to 10. The grid sport has long since made it demise, but other activities such as basketball, tennis, track, and volleyball have gained eminence among the college's athletes. The Clarendon College Bulldogs are rated as one of the better small school teams in the area and placed second in conference competition in 1967.

It has been a long and uphill climb for the college which was founded in a virgin territory for higher education. But, based on the premise that education can best be offered in the familiar and home-like atmosphere of a small institution where "the individual is a name---not a number," the college has continued to grow and prosper. Today, Clarendon College, a fully-accredited class A institution, is keeping pace with the times by offering a complete, up-to-date curriculum. Enrollment has grown

Clarendon College--Present

Clarendon College--Past

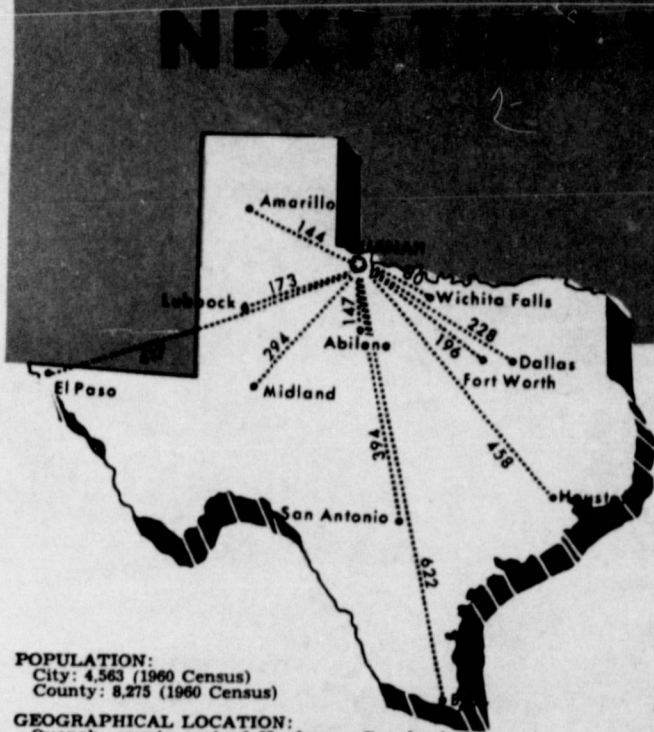

steadily from 190 students in the fall of 1964 to 244 in the fall of 1967. The predicted enrollment for the fall of 1968 ranges from 350 to 400 students.

In 1965, Clarendon College was the recipient of an endowment from the estate of Etta and Ida Harned in the amount of \$336,341.55. The Harned Sisters, pioneer residents of Clarendon, were always strong supporters of the college and were particularly interested in the furtherance of music education. \*\*\*

AS A RESULT of the Harned Sisters Endowment, the college was able to purchase some thirty acres of land for the site of a new campus. Construction of a \$1,480,000.00 plant is currently underway and will be ready for occupancy in the fall of 1968. The new campus will boast completely modern

facilities, including a housing complex with dormitories, a student union building, bookstore and cafeteria. The new academic plant will include class rooms and laboratories, administrative offices, library, auditorium, and gymnasium.

Clarendon is proud of its college and thousands of alumni scattered throughout the land are quick to proclaim the merits of the small school. The complete story can not be told in a few pages. But Ethel Harvey, a former resident of Clarendon, ably recorded many of the glorious memories of the oldest college in the Panhandle in a book, *The Athens of the Panhandle*. Those memories, as is Miss Harvey's book can well be dedicated to those doughty pioneers of education "whose lives were devoted to guiding youth in the search for knowledge."

# CONSIDER QUANAH THE GREENBELT

QUANAH, located on the rolling plains of northwest Texas and founded in 1884, is named for the famous Comanche Chief, Quanah Parker, who maintained a close friendship with the early settlers. The Medicine Mounds, in the southeast part of the county, were the site of early Indian gatherings. The Comanches believed these hills to be the dwelling place of a powerful and benevolent spirit.

For leisure time, Quanah offers a modern country club with nine hole golf course and swimming pool, an olympic size public pool, city park with play ground and picnic areas, youth center, little league baseball and summer athletic program for children, a drive-in theatre. Game birds and water fowl are plentiful in season while Lake Pauline, 5 miles east of Quanah, offers fishing, boating, swimming, camping and picnicking. Quanah's cultural and civic organizations provide for the special interests of her citizens.

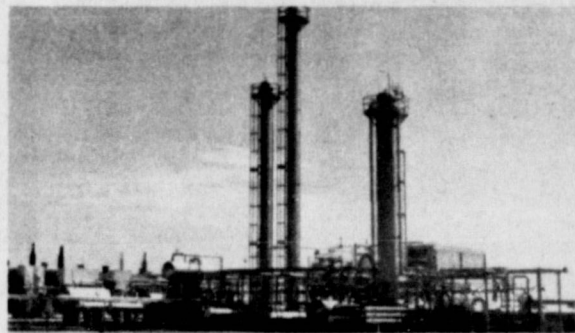

## A PLEASANT PLACE TO WORK

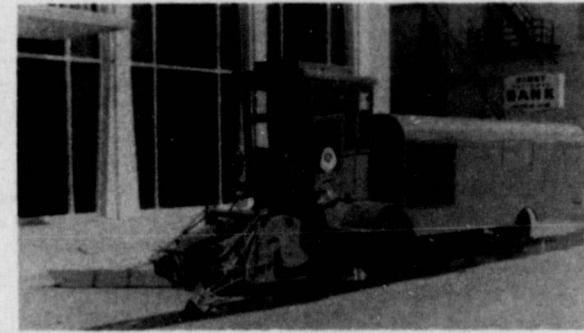

GEORGIA - PACIFIC, Bestwall Division, which supplies the great Southwest with famous Bestwall wallboard and other gypsum products, is Quanah's largest employer.

MAKING SLEEPWEAR at Quanah Manufacturing Co., new garment manufacturing company.

SHELL OIL COMPANY'S Conley Gasoline Plant near Quanah produces gasoline, butane and propane and has a capacity of processing up to 15 million cubic feet of gas per day.

DELITTER CORP., which manufactures the "Can Gobbler", a machine designed to clean highway right-of-ways, calls Quanah home.

## A COMFORTABLE PLACE TO LIVE

THE BEAUTIFUL Church of Christ is representative of the 14 churches serving 10 denominations.

COMPLETELY NEW, completely modern 50 bed county hospital and adjoining private clinic provide medical services for the area.

## A WONDERFUL PLACE TO VISIT

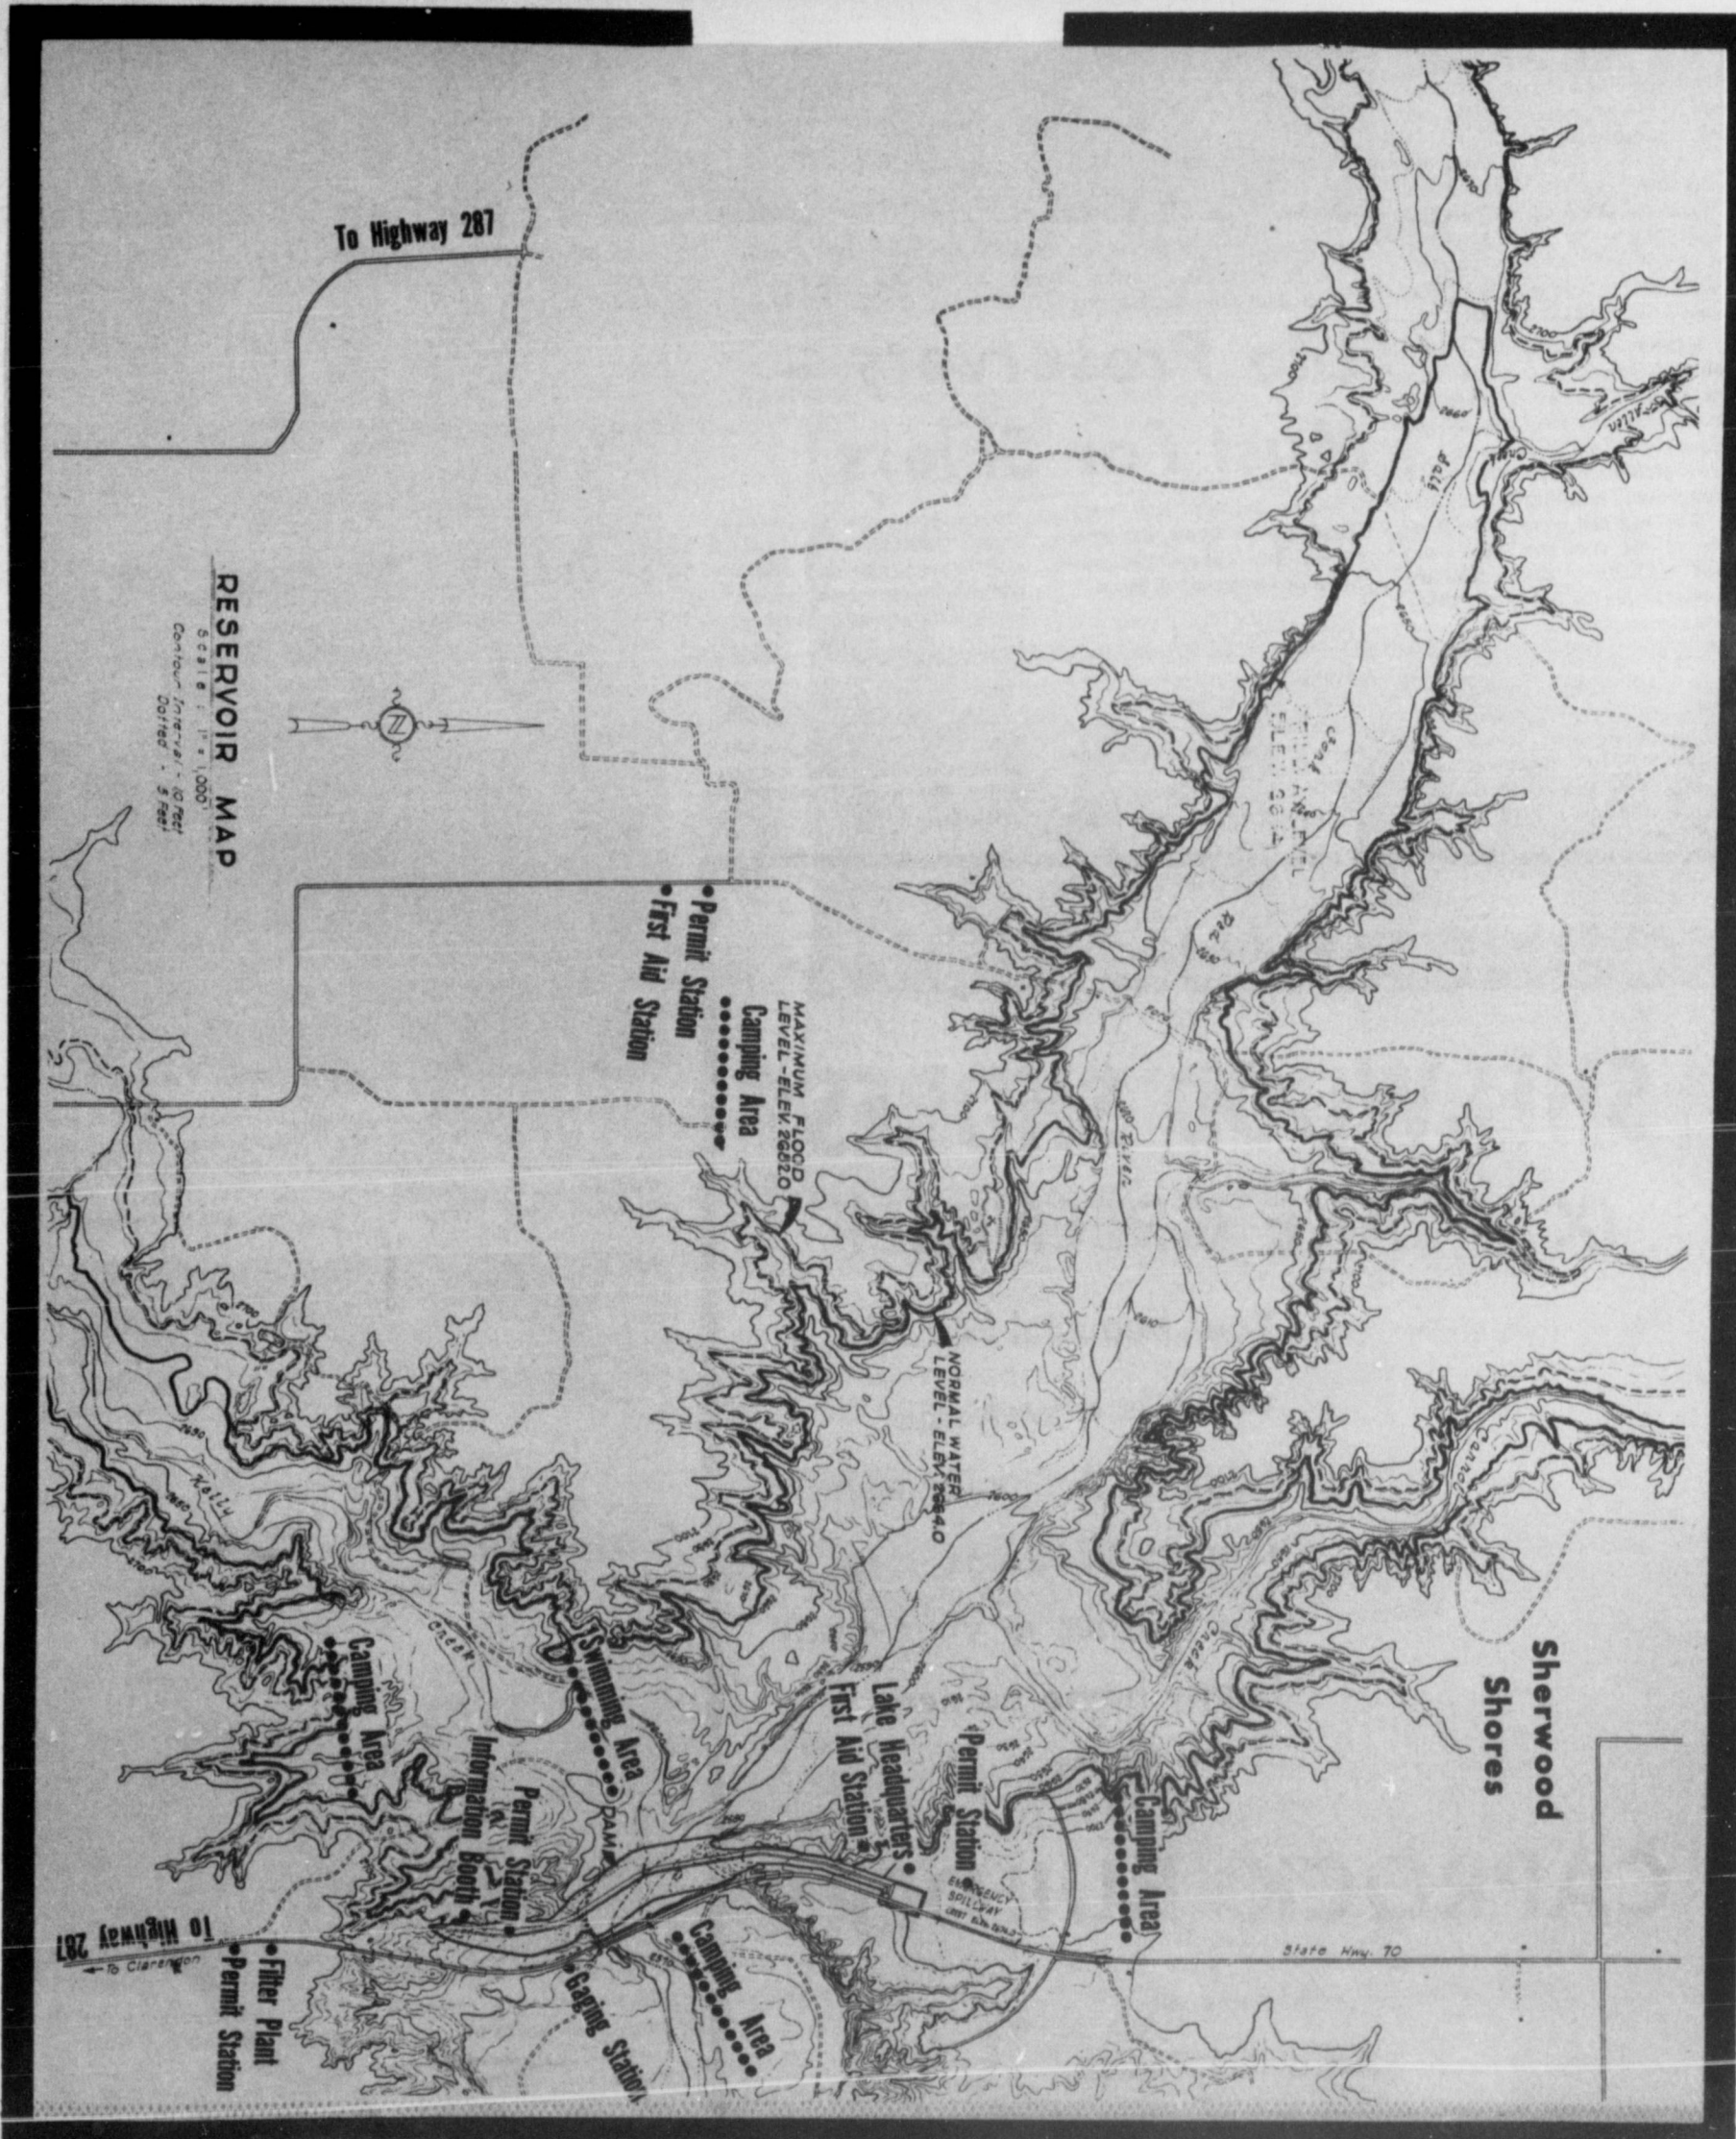

QUANAH MUNICIPAL AIRPORT offers a lighted hard surface runway 2400 feet long with airport two-way radio facilities. The largest free air show in Northwest Texas is held there each fall.

QUANAH COMBINES the advantages of small town living and the traditional friendliness of West Texas people. A good place to rear a family, with easily accessible schools, shopping area, churches, etc.

# Welcome To LAKE GREENBELT

Save This Souvenir Map

# Lake Well Stocked With Game Fish

Greenbelt Lake is well stocked with a variety of game fish.

On April 5, 1967, 150,000 northern pike fry and 240,000 large mouth black bass fry were dumped into the lake.

The pike have grown to more than 20 inches and weigh up to 4 pounds.

"There's no way of knowing just how large they will get in Greenbelt Lake since we haven't had the experience with them here we've had other places," Carl Carter, game management officer, said. "They might eventually get up to 10 pounds or they might stay right where they are now. We just don't know. The record pike weighed more than 46 pounds, and was caught in New York, I believe".

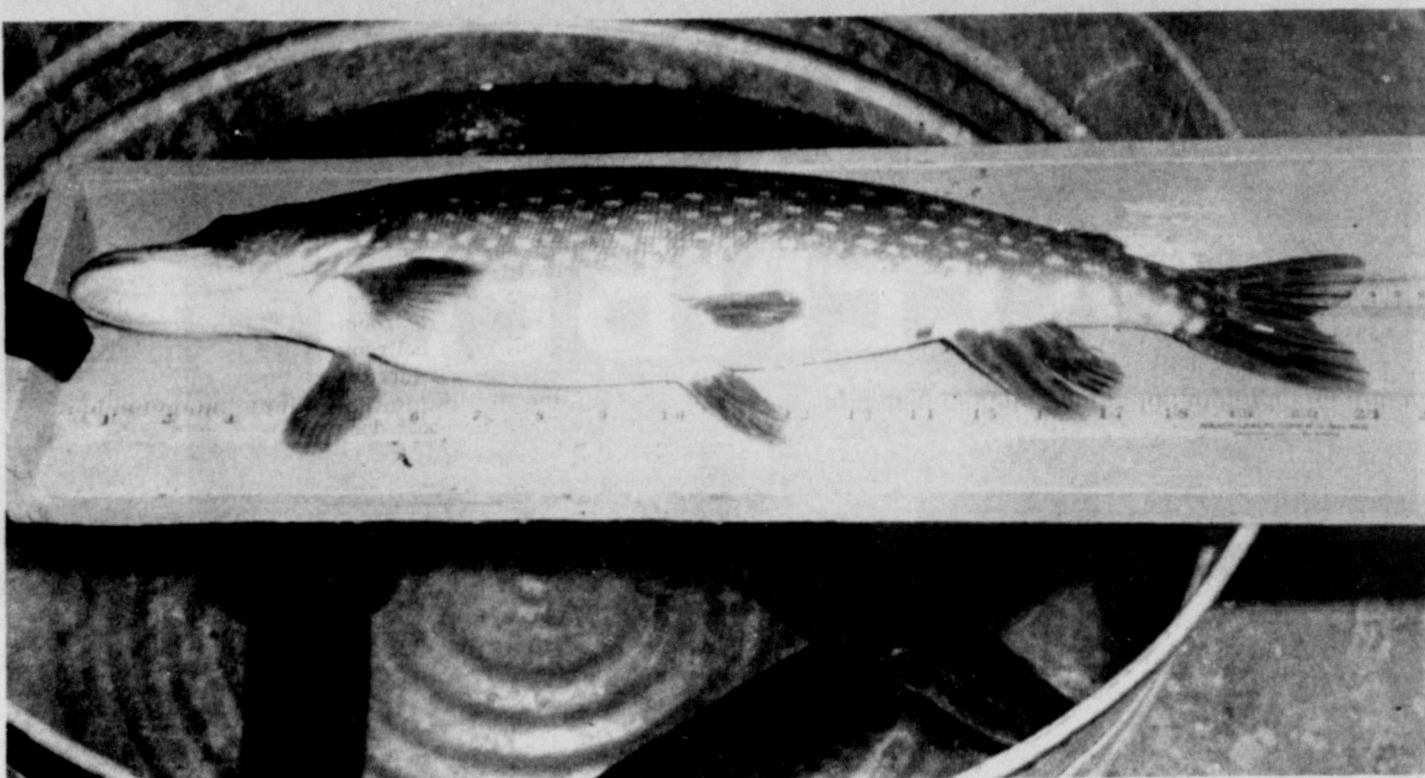

Along with the pike and bass, 9,600 five-inch blue cat and 30,000 three - inch channel cat were put into the lake.

Recently a dozen channel cat weighing from 3-6 pounds were dumped in along with 50 pairs of adult white crappie weighing nearly 2 pounds. Fifty pair of adult white crappie had been placed in the lake a year ago.

Carter said that 20,000 hybrid sunfish were put into the lake in 1967. "They're a cross between the red ear sunfish and green sunfish, and can get up to 3 pounds in size. They don't reproduce, however".

The bag and possession limits of all fish and the means and methods of taking fish are governed by the Parks and Wildlife Commission.

"It is against the law to use any rough fish, including goldfish, and any bait or bait mixture commonly known as 'stinkbait' or 'bloodbait' for fishing in Greenbelt Lake," Carter added.

GREENBELT PIKE--This 21-inch northern pike, a newcomer to Texas, was caught earlier this year in Lake Greenbelt in a fish survey taken by Texas Parks and

Wildlife officials. Greenbelt is the only public lake in Texas stocked with the big, husky pike. The season opened May 29.

## Life Preservers Must For Skiers

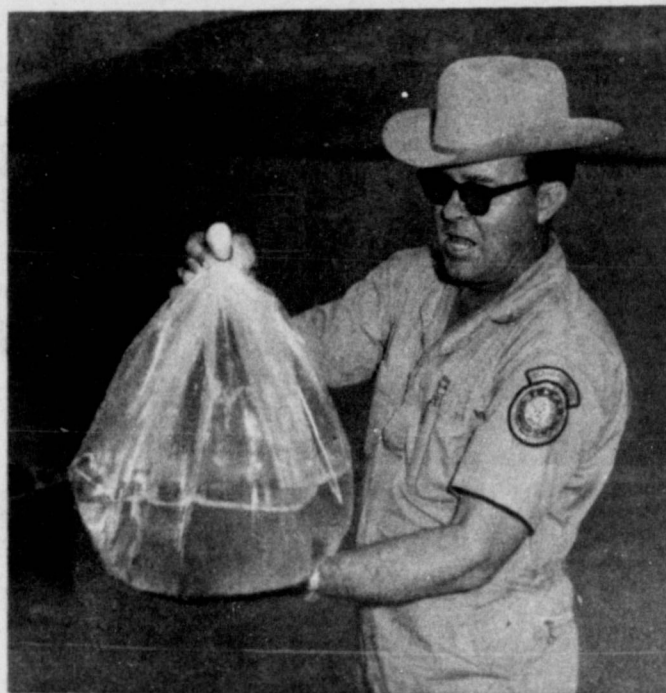

Water skiers must wear a United States Coast Guard approved life preserver when skiing on Greenbelt Lake.

According to the lake's rules and regulations, operators of boats towing skiers or aquaplanes will follow a counter-clockwise traffic pattern in areas designated for such water sports.

Water skiing, aquaplaning or

similar activity is limited from an hour after sunrise to an hour after sunset, except during water ski tournaments, competitions, exhibitions or trials providing the water area is well lighted.

"We're interested in safety," General Manager James L. Kuhn said. "All boats towing skiers will be operated prudently and away from others on the lake."

YOUNG FINGERLINGS are being released into Lake Greenbelt in this photo taken during the early stages of the lake by the Donley County Leader. The Texas Park and Wildlife Service stocked Greenbelt with northern pike, bigmouth bass, crappie, channelcat and hybrid perch.

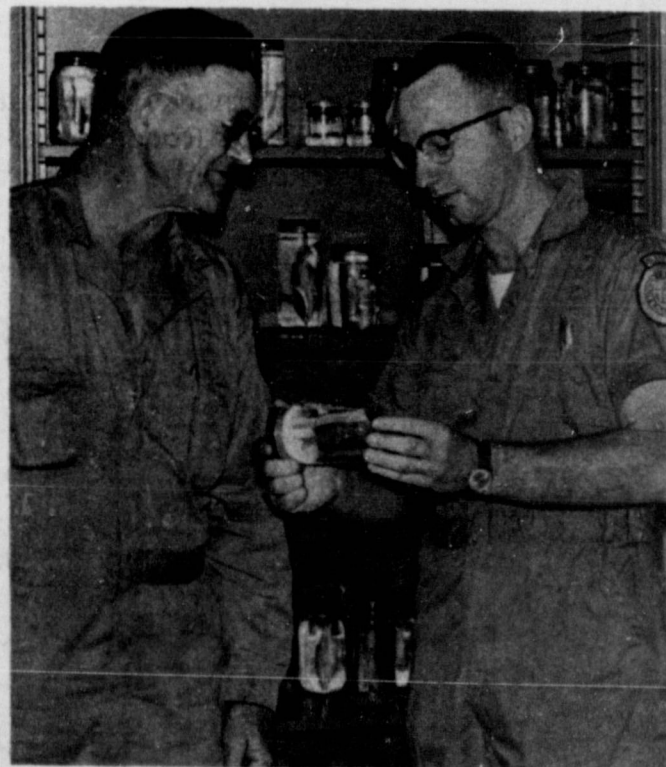

# CONGRATULATIONS SHERWOOD SHORES IX ---LAKE GREENBELT

Your beautiful lakeside resort is a welcome addition to our Panhandle Country Welcome and best wishes to your many happy home owners of the future.

## CAPROCK BUILDERS

NORTHERN PIKE FINGERLINGS for Lake Greenbelt were only a few weeks old when this picture was made of Wesley Barfield (left) and Jack Crabtree, employees of the Texas Parks and Wildlife Service. The pike are now over 24 inches long and waiting for some lucky angler. The season opened officially May 29.

## Clarendon Country Club Has New Home At Lake Greenbelt ★★★★★★★★★★

A PGA championship, 18-hole golf course will be built on 180 acres on the north side of Greenbelt Lake by the Clarendon Country Club.

"We have \$200,000 for the project," Dr. Keith (Buddy) Hudson, country club president, said. "The membership has \$50,000, and we have a loan of \$150,000 from the Federal Housing Administration."

Final specifications are being completed now, and work on the only championship golf course in the Texas Panhandle

will begin within a few weeks.

"We leased the land from the Greenbelt Municipal and Industrial Water Authority for \$1 a year, and the country club, swimming pool, tennis courts, pro shop will be on property being acquired from Sherwood Shores," Dr. Hudson said.

The buildings, pool and tennis courts will be located on about 6 1/2 acres across a water peninsula from the golf course proper.

"No. 1 tee will be near the

pro shop and you'll have to shoot over the water. No. 18 hole will be nearby and you'll have to shoot back over the water from the main course to finish. This is going to be a real tough course," Dr. Hudson added.

The \$50,000 club house will be split level and will have a kitchen, lounge, restrooms and, eventually, a ballroom. The architecture and furniture will be Spanish.

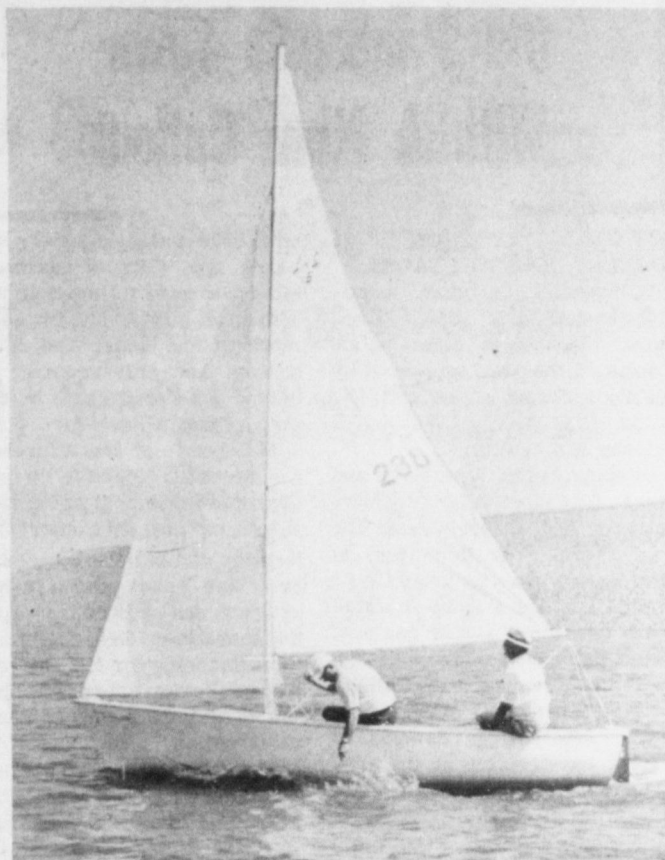

"There will be boat docks for the membership, a sandy beach for swimming in the lake, and we plan trap and skeet ranges later. We might put in an archery range if interest warrants it," the country club president said.

The Clarendon Country Club membership now stands at 287. Membership fee is \$150 up through the 300th member, then the fee, starting with the 301st member, will be \$300. When the facilities open, there will be a monthly dues of \$10.

Cantrell & Co., Amarillo, is the architect.

W.C. Schutts, a retired architect and president of the Amarillo Country Club, is engineering the golf course and general layout of the entire facility.

Dr. George Smith of Clarendon is chairman of the planning and building committee. Mrs. Ray Palmer is secretary of the Clarendon Country Club. Club directors include Bill

SAILING LAKE GREENBELT--This scene is expected to be repeated quite often in the future as Lake Greenbelt attracts sportsmen from a wide area of the Panhandle. The protected waters of Lake Greenbelt are ideally suited for sailing, boating, skiing, fishing and swimming. Annual permits are available from lake officials.

EVERYBODY LOVES LAKE GREENBELT, the young and old alike. Here Forrest Sawyer of Clarendon shows his grandsons, sons of the Ed Sayers also of Clarendon, some of the sights of the new lake, located four miles north of their home town.

# CLARENDON

## Old Panhandle Town With A New Outlook

BY GEORGE ESTLACK  
DONLEY COUNTY LEADER

Clarendon, a quiet, peaceful church and school town, was like most other small towns of the area supported by cattle and row crops, until the Lake Greenbelt project came closer to a reality.

People began to wake up and take more interest in what they already had and prospects for the future. The first item on the agenda was to make Clarendon College a stable institution and build a new campus. This big job was accomplished with the extension of the College District boundary and a complete new college campus is under construction at the present time, scheduled for completion this fall.

A new \$225,000 First Baptist Church is now under construction on a site adjoining the new campus and is also slated for completion this fall. Following the completion of

new City Hall quarters two years ago, City of Clarendon aldermen have followed up with additional city paving, improvement of the water and sewer system and only recently received a federal grant for new airport facilities.

Members of the Clarendon Country Club joined in the progressive movement and decided to sell the present Country Club location and build a completely new club house and 18-hole grass green golf course along the shoreline of Greenbelt Lake. FFA financing for the new project has been approved and plans are progressing toward actual construction.

Clarendon in general has been receiving a general face-lifting with numerous improvements and expansion of business establishments and this has been brought about mainly through the completion of the Greenbelt Municipal and Industrial Water Authority project.

W. CARROLL KNORPP, Vice-president of the Greenbelt, Municipal and Industrial Water Authority, has been with the authority since the early planning stages to nail down prior rights to water on the Greenbelt watershed in the 1940's. Knorpp was born in Clarendon in 1908 and has been a life-long resident since that time, for the exception of attending schools in California and the University of Texas. He joined the staff of the Donley County State Bank in 1931 and became the bank's president in 1960. He has been an active worker with various civic projects throughout the years and is a past president of the Clarendon Lions Club. In 1967, Knorpp was named Chamber of Commerce "Man of the Year" in recognition of his untiring efforts throughout the years on the Greenbelt project.

## It Was A Long Ways To Water

History tells us that organized societies as far back as 6,000 years ago reached a high degree of civilization when they developed and managed their water resources, but passed out of existence if they failed to conserve their soil and water.

Dr. Shell H. Townsend, president of the Greenbelt Municipal and Industrial Water Authority, said quite bluntly that "with out water Quanah and Childress couldn't have existed long."

The advent of pure, sweet water has changed the future of the Greenbelt cities from one of possible extinction to one of optimism for an expanding economy.

"The dam at Clarendon means more than a place to fish and boat. It means life to the Greenbelt cities. Industry can be contacted now and promised more than land and a labor force. Most industry needs a good water supply, and with the Greenbelt Lake, we can give it to them."

Dr. Townsend, a Childress surgeon, pointed out that city's search for water was pretty typical of the others in the Authority.

"It used to be 'haul it or dig it' in the early days. That's the first thing a settler did around here--hunt for water, and when the towns developed they had the same problem. A good well was worth its weight in diamonds."

Childress was good cattle country and the land was suited for cotton, but the lack of an adequate water supply prevented any large influx of settlers.

When families moved in they dug wells and built cisterns. Rain was as precious a commodity as food itself. And if they couldn't find water near their own homesteads, they hauled it in from nearby areas.

"There are still a lot of small

communities in Hardeman, Foard and Childress counties that have to haul their water in. A lot of cisterns are still evident around. The Greenbelt Lake and the availability of a steady supply of water will mean that for the first time many families in this area will have inside bathrooms, and water piped into their homes. It's unbelievable in this modern age that some areas still have a privy and a path."

About 1880, cattlemen, driving herds through Childress, built a dam north of Scott Lake. The railroad began shipping cattle from Childress in 1887, and the lake became a watering place. Residents then had to haul their water in from Clarendon.

About 1906 another lake was formed, Lake Keeler, located west of Childress. It was used mostly for recreation. Then the city developed Laundry Lake (now Fair Park Lake) and its source of water was a spring about 22 feet east of the present dam.

The search for water never ended. Lake Childress was developed in 1908, but drouth in 1918 dried up all sources, and townspeople had to buy their water from existing wells on private land.

And so it went. Wells finally were drilled. Today there are 15 wells feeding water to Childress, but only six of these are adequate.

"The Greenbelt Lake has given us the kind of water we've hunted for for years," Dr. Townsend said, "and every Greenbelt city can be thankful for the men who worked over the years to provide it for them. There were many of them--H.C. Preslar, J.R. Porter, Cap Morris, Sen. Andy Rogers, Dr. Roy Barr, Carroll Knorpp, Clifford L. Johnson, Wendall Harrison, Sam Breedlove to name a few."

## WE'RE HAPPY TO BE OF SERVICE TO YOU LAKE GREENBELT...

Peoples Natural Gas is happy to bring about the rural gasification of the Rolling Plains now serving 400 irrigation wells in the Clarendon - Greenbelt area.

Peoples is fast becoming a community leader in many areas of the Texas and Oklahoma Panhandles, bringing Well-Side Natural Gas and Peoples exclusive Agri-Engines to irrigation farmers everywhere.

Irrigation wells, rural houses, feed yards, gins and power plants are all being served by Peoples in the Clarendon-Greenbelt area.

A BEAUTIFUL COMBINATION will be Sherwood Shores IX and the new Clarendon Country Club which are being developed on the north shores of Lake Greenbelt. The Country Club will have an 18-hole golf course, swimming pool and handsome club house. Memberships are open to residents of the Greenbelt cities as well as others in the Lake Greenbelt area.

READY FOR THE WATER--This boat dock, built on the Sherwood Shores IX estates on the north side of Lake Greenbelt, stands high and dry but will soon be handling boats on the rapidly rising Lake Greenbelt. The lake will be some three and a half miles wide and seven miles long when it reaches capacity.

# SHERWOOD SHORES IX

## Greenbelt Has Lakeside Resort

Sherwood Shores IX is one of nine similar housing developments established by George DeArmond of Denison.

Located on 700 acres on the north side of Greenbelt Lake, Sherwood Shores IX eventually will include more than 3,000 residences, according to Walter Ligon, general manager.

DeArmond, a certified public accountant, has been in the land development business for 10 years, and has housing projects at Lake LBJ, Still House Hollow in Bell County between Belton and Killeen, Lake Texhoma, Delta, Utah.

There are three developmental Control Committee of Sherwood Shores IX," Ligon said.

Septic tanks of a minimum of 500 gallons capacity with a minimum of 150 feet of lateral system must be installed. On shoreline lots septic tanks and lateral systems must be at least 100 horizontal feet from the 2,664 feet sea level elevation of the shore line at the nearest point to the shore line.

An assessment of \$15 per lot per year must be paid for the maintenance lien on each lot.

No dock facility, jetty, mooring device, pier, bait, fish or

boat house may be attached to or be adjacent to any shore line lot which extends more than 20 feet from the lot line, Ligon said.

Lots in Sherwood Shores IX cost from \$795 up, with 6 per cent simple interest. Lots near Lake Texhoma, Glen Eden, Simmons Shores and Cambridge Shores.

Sherwood Shores IX is one land that once belonged to the late J. R. Porter.

Ligon said that all construction at Sherwood Shores IX is to be of new material, and each residence must have a minimum floor area of 750 square feet exclusive of porches, stoops, carports, patios or garages. Homes built on waterfront lots, fronting on government property, must have a minimum of 900 square feet.

"All construction plans must be approved by the Architect-

## Teenage Celebration Saturday

The teenagers will have their own way of celebrating the opening of Greenbelt Lake.

The Vicounts, a swinging group known throughout Texas, Oklahoma, Nebraska and points north, will bring the "best and most surprising sound in soul music" to the Electric Theater in Clarendon June 1.

Martin Hendrix, owner of the Electric Theater, said the group began their career at West Texas State University under the Vicount name, and they have "become outstanding and more popular in the northern and eastern states under their new name, the Blues Exhibit."

Doors open at 9 p.m., dance-time begins at 9:30 p.m. and ends at 1 a.m.

Closing the teenage Greenbelt celebration Saturday, June 2, will be the Coachmen, back together again under their new name, the Chanters.

"Their presentations of soul music and showmanship qualities are wonderful, great, unbelievable and fun to listen to," Hendrix said.

Dancing begins at 8:30 p.m. and ends at midnight.

Hendrix added that the adults haven't been left out.

On May 31, from 9 p.m. to 1 a.m., Mrs. Melvin Howard will entertain.

"She has entertained large groups all over Texas and Oklahoma with her fine organ playing," Hendrix said. "She's fabulous."

Add Dr. Townsend story

Recently Dr. Townsend received another honor when he was elected an honorary member of the Texas Medical Association.

# BETTER WATER

## CONGRATULATIONS GREENBELT AUTHORITY

As the contractor for the construction of the reservoir I would like to add my best wishes to the Greenbelt cities on the formal opening and dedication of Lake Greenbelt. The abundant supply of water assured by the Lake Greenbelt project will assure this area of Texas a bright future in attracting new industry and developing your cities. Much success in this new venture into the future.

# R. N. ADAMS

## CONSTRUCTION COMPANY

KAUFMAN, TEXAS

## BY A DAM SITE

THE NEW LAKE GREENBELT--Boat enthusiasts have already discovered Lake Greenbelt and making the most of it. Recent spring rains have added about a half mile more

of shoreline to bring the lake nearer to capacity. The water is unusually clear and blue and the lake well stocked with game fish, including the big northern pike.

## Rules For Lake Outlined By Greenbelt

Recreation and boat permits will be needed by picnickers and boat enthusiasts at Greenbelt Lake.

The fee for each permit is \$1 per person for a daily permit, \$1 per person per day for a multiple daily permit, \$20 for an annual boat permit and

\$10 per person for an annual recreation permit.

James L. Kuhn, general manager of the Greenbelt Municipal and Industrial Water Authority, said the daily permits will be valid until midnight of the date issued.

"The fee for an annual re-

creation permit for a family is \$20, and the permit is valid through Dec. 31," Kuhn said.

In the Rules and Regulations for Greenbelt Lake, a family is defined as a "man and wife and their children, step-children or wards 14 years of age or younger living in the same

household, or the head of a household having children, step-children or wards 14 years or younger living in the same household."

Kuhn added that when a child reaches 15, a separate permit will be required.

Three other permits will be

required at the lake -- one for docks, piers, wharves, jetties or other similar structures, a permit for installation of sewage disposal systems and a permit for installation or construction of any other structure or facility not covered by the two just mentioned.

# DR. TOWNSEND-MR. GREENBELT

Dr. Shell H. Townsend, named in 1963 as Childress' Outstanding Man of the Year, is known to residents from Clarendon to Crowell as "Mr. Greenbelt."

He has been president of the Greenbelt Municipal and Industrial Water Authority since 1956, but his interest in good water for the area goes far beyond that.

Dr. Townsend was one of the early dreamers and planners along with C. B. (Cap) Morris of Clarendon, H. C. Preslar of

Childress and J. R. Porter of Clarendon.

A surgeon, Dr. Townsend was born Nov. 12, 1900, in Mangum, Okla., and was reared on the Salt Fork of the Red River. He finished high school there, leaving in 1918 to enter the University of Oklahoma for pre-medical studies.

He then went to Northwestern University at Evanston, Ill., completing his work in 1924, and upon graduation he interned for 2 years at Charity Hospital in New Orleans, La.

From there he went to St. Petersburg, Fla., where he remained 2 1/2 years in private practice. On Oct. 28, 1926, he married the former Miss Enid Robson of New Orleans.

In the fall of 1928, he and his wife moved to Childress where he and the late Dr. Perry R. Jeter built the Jeter-Townsend Hospital, opening the doors on March 17, 1929. The hospital was sold to the county in 1942, and the present Jeter-Townsend Clinic was built in 1948.

"The Childress Index," in

its Sunday, July 11, 1965, issue said of Dr. Townsend:

"Despite his modesty concerning the many, many hours devoted to his city and county concerning the Authority and betterment efforts, it is difficult to imagine that the gruff-spoken man is not genuinely touched by honest praise for his civic accomplishments. Man of the Year is perhaps the highest honor that can be bestowed upon an individual, who is past president of Rotary Club and a member of the five - county medical society.

"A new patient may be momentarily rocked during a first visit by his blunt honesty -- and perhaps some rather 'salty' advice -- but behind the facade of a no nonsense attitude lies a sense of gentleness and understanding toward the ill that inspires and cements lasting confidence in the man as a physician.

"Since 1956 -- the beginning of his being 'submerged' in the

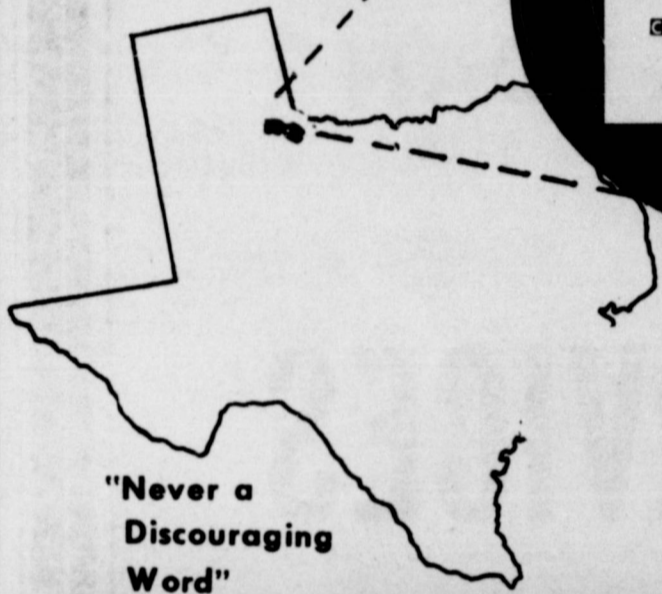

Authority -- his good-natured wife has accumulated enough 'how to live with such a man' material to provide a situation comedy writer with a television series to run well into the 1990s. A weakening sense of humor has sustained her and their children, but she doesn't hesitate to sound-off on their woes. It is not inconceivable that she rightly deserves some sort of medal of honor for bravery herself."

Dr. Townsend said the towns have their water now. About 3 million gallons a day are used by the six member cities.

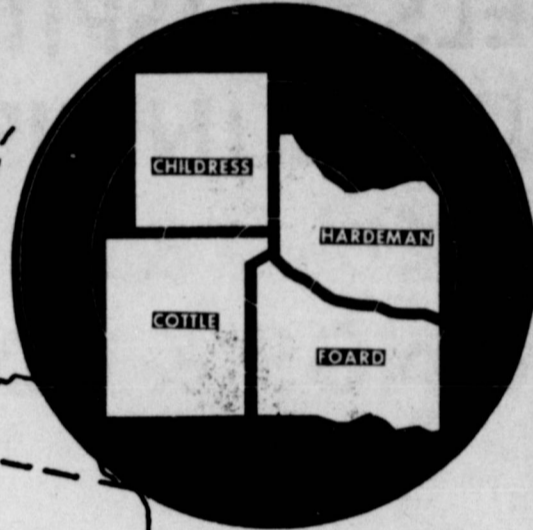

"It's going to be up to the cities now to induce industry to come in. We'll have about 4 million gallons a day available for industry after the towns get theirs, and that will be plenty for most businesses," he observed.

"There is no limit to what can happen in the Greenbelt cities now that we have good water and plenty of it."

## WELCOME INDUSTRY

"Never a Discouraging Word"

To the Land Of the **FOUR WINDS**

### Bring Your Problems To The Wide Open Spaces

You'll want to consider the Four Winds area of the Texas Panhandle next time you face problems with your plant operation. No water or air pollution problems here, adequate supply of industrial water from nearby Lake Greenbelt, skilled labor supply from a 25,000 population area, industrial park sites available and a well organized, highly skilled industrial group to deal with. Rail connections to the west Coast and also major metropolitan areas in the mid-west available. Investigate this land of blue skies, good water and wide open spaces. All inquiries will be handled in strict confidence.

## LOOK TO THE GREENBELT

You can look to the Greenbelt as one of the fastest growing areas of Texas now that a good supply of water has been guaranteed with the completion of Lake Greenbelt AMCO Electric Co. of Lubbock is proud to have had a part in this new water project in installing the supervisory panneling, metering and other instruments in the filtration plant. Our best wishes go to the board of directors of the Greenbelt Municipal and Industrial Water Authority and to the citizens of the Greenbelt cities.

# 120-MILE PIPELINE SERVES GREENBELT

The 120-mile long pipeline, beginning at the bottom of the 110 foot high Greenbelt Dam north of Clarendon and ending at the water tower in Crowell, passes through five counties, Donley, Hall, Childress, Hardeman and Foard.

There are six major cities which make up the Greenbelt Municipal and Industrial Water Authority, Clarendon, Hedley, Memphis, Childress, Quanah and Crowell.

These counties and cities, located on the eastern and southeastern edge of the Texas Panhandle, are dependent primarily for their income from agriculture. There is some industry, but on the whole, farming and ranching are the main sources of revenue.

Named for Stockton P. Donley, Confederate soldier and member of the Texas Supreme Court, Donley County was organized in 1882. It has a ranching - cotton - grain sorghum economy, and in 1966 beef cattle revenue was estimated at \$3.7 million; cotton \$1.5 million; sorghums \$600,000. About 18,000 acres of the county's 909 square miles is under irrigation.

Clarendon, with an estimated population of 2,158, is the county seat, and is the county's principal market and supply center. There are two banks in Clarendon, with total deposits of approximately \$10 million.

Clarendon Junior College, with an enrollment of about 250 students, is building new facilities, expected to be ready for occupancy by September 1968.

Effective tax rate per \$100 current value \$1.5809.

## HALL COUNTY

Created in 1876 from Bexar and Young Districts, Hall County was organized in 1890 and named for W.D.C. Hall, Republic of Texas adjutant general and Secretary of War.

Three fourths of the farm income is from cotton, sorghums, wheat and other grains. Approximately 14,000 acres of the county's 896 square miles are irrigated. There are about 534 farms in the county (1964 census) and beef cattle are the only significant livestock produced.

Memphis, population 3,352, is the county seat and principal market and supply center for farmers and ranchers. Two other communities of any size are Turkey in the southwest and Estelline in the east.

The Hall County Hospital was opened in 1964, and a new \$325,000 motel was built. Major industries include Burlington Industries which employs 180 persons. There are nine other industrial plants in Memphis, employing another 100 persons. Significant among them is the Memphis Cotton Compress, which employs 62 people.

The Industrial Foundation has two industrial sites, totaling 27 acres, available for development and \$50,000 to assist qualified industry.

The effective tax rate per \$100 current value in the city limits is \$1.7950.

## CHILDRRESS COUNTY

Located in the southwestern corner of the Texas Panhandle, Childress County, organized in 1887, was created from Young and Bexar Districts in 1876. The county was named for George C. Childress, author of the Texas Declaration of Independence.

The county has 701 square miles and three fourths of its income is from 450 farms raising cotton, wheat, grain sorghums and ranches raising cattle, sheep and hogs. About 11,500 acres are irrigated.

Childress, population 6,550, is the county seat, and the district office of the Texas Highway Department and shops of the Fort Worth and Denver Railway are located there.

The Fort Worth and Denver employs approximately 194 men and the highway department 100 in Childress. The Childress Manufacturing Co., a subsidiary of Spartans Industries Inc. of Sparta, Tenn., started operation in Childress in June, 1966. The company manufactures women's and girl's dusters and employs approximately 200 persons.

Residents approved a \$900,000 bond issue in 1966 for construction of a new high school, and the school is being built now.

A new 75-bed hospital will be built on 20 acres shortly. The people of Childress approving matching funds for the building of the hospital.

Total effective rate per \$100 current value \$1.6610.

## HARDEMAN COUNTY

Bordering Oklahoma on the Red River, Hardeman County was created in 1858 from Fannin County and re-created in 1876. It was organized in 1884 and was named for brothers active in the Texas Republic, Bailey and Thomas Jones Hardeman.

The county's economy is primarily agriculture, with oil production increasing. Eighty per cent of the farm income is from grains and cotton, and 10,000 acres of the county's 685 square miles are irrigated. Beef cattle add to the economy.

Quanah, population 4,570, is the county seat, and major industry includes the Quanah Manufacturing Co., with 100 employees and the Quanah Cotton Oil Co., with 110 employees. The former company makes wearing apparel and the latter, cotton seed products.

The Georgia-Pacific, Best-Wall Division, at nearby Acme employs 176 persons and makes gypsum products. Georgia-Pacific is expanding its operation as a result of the water provided by Greenbelt Lake.

Shell Oil Company's Conley Gasoline Plant near Quanah produces gasoline, butane and propane and has a capacity of processing up to 15 million cubic feet of gas per day. Some 1.2 million barrels of oil and gas are produced annually in Hardeman County.

The city tax rate is \$1.20 per \$100 assessed at 60 per cent actual value; 96 cents per \$100 assessed at 20 per cent actual value for the county, and \$1.20 per \$100 assessed at 30 per cent actual value for schools.

## FOARD COUNTY

Foard County, named for Robert L. Foard, lawyer and Confederate officer, was created in 1891 from Cottle, Hardeman, King and Knox counties, and was organized that same year.

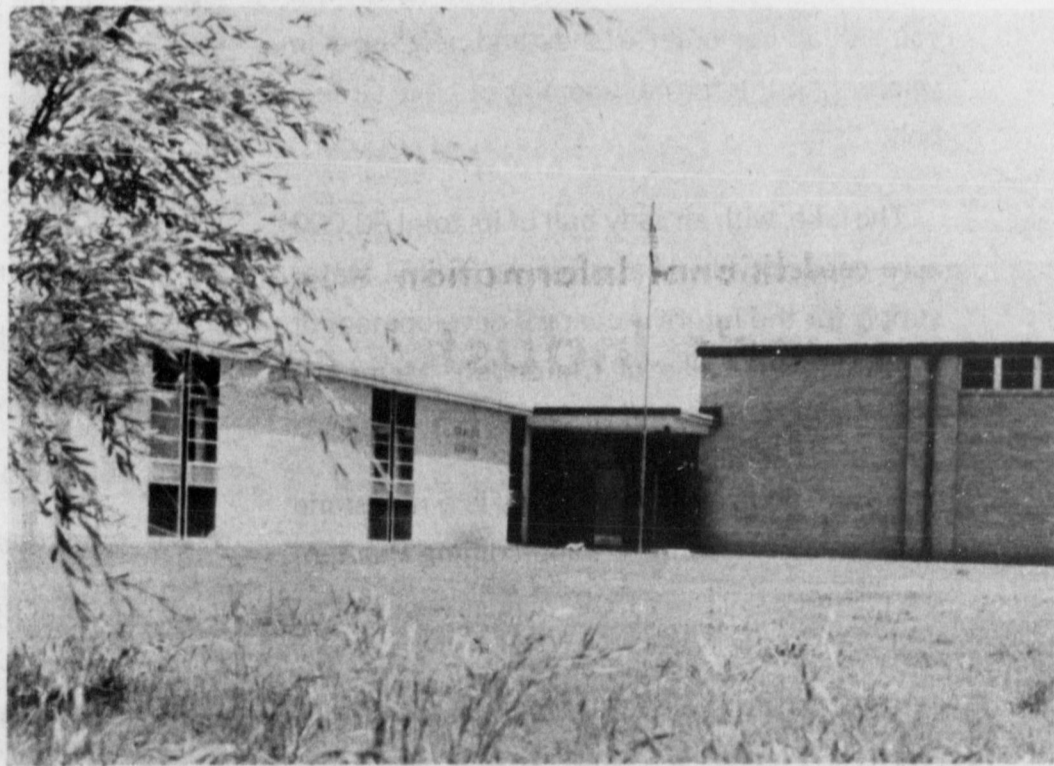

It is the site of the Pease River Battle with the Indians and was where Cynthia Ann Parker, wife of the Comanche Chief Quanah Parker, was released from captivity.

ONE OF THE NEW INDUSTRIES in the Greenbelt area is the Postex Mills--Hall Plant of Burlington Industries in operation for several years in Memphis. Memphis also boasts other industries including the Golden Spread Irrigation Co., Memphis Compress Co., and Patrick Chemical Co.

THE NEW HIGHWAY DEPARTMENT district headquarters at Childress completed in recent months is indicative of the importance placed on highway growth in the Greenbelt area. Construction is currently underway on a complete four-lane divided highway along U.S. Highway 287 connecting Quanah, Childress, Memphis, Hedley and Clarendon with both coasts of this nation as well as Mexico and Canada.

HEDLEY SCHOOL--This handsome building is the new school at Hedley, Texas. The smallest town served by the Greenbelt Lake project, Hedley is an agricultural community located on U. S. Highway 287 between Memphis and Clarendon. The new water supply is expected to give a boost to Hedley's economy.

It has an oil-farming economy and there were 318 farms in the county. Grain crops, beef cattle, cotton, alfalfa and guar are produced. Crowell, population 1,715, is the county seat and major supply and marketing center for farmers and ranchers. There are 2,754 people in the county.

# Ah! Sweet Water For The Greenbelt

"Ummm, how sweet it is!" Any TV buff will recognize the words of a well known, chubby TV comedian, words that evoke gales of laughter and applause from an appreciative audience.

They express exactly the feelings of residents in Childress and Quanah.

"The first sip was the sweetest." That's the way Dr. Shell Townsend, president of the Greenbelt Municipal and Industrial Water Authority, recalled his first glass of Greenbelt Lake water in 1965.

Anyone who has ever stopped in Childress and Quanah will remember the, uh, "tasty" water prior to then. It was like drinking rotten eggs mixed with rocks, and only the hardy, or unsuspecting, drank it.

At 9:10 a.m., Saturday, July 10, 1965, water from Greenbelt Lake, a lake fed by the sweet springs of Carroll Creek and 288 miles of unpolluted watershed, gushed into Childress' mains.

Mayor C. J. Lyons was the first to drink. He handed the glass to Dr. Townsend and State Senator Andy Rogers.

"We urged people to do a lot of watering that day," Dr. Townsend said. "The more water we used, the quicker the entire city'd have Greenbelt water running from its faucets."

He remembered the day gladly.

"The water prior to that was so bad in Childress and Quanah people were leaving their motels at night and not staying over. We didn't have the quantity nor the quality of water necessary to make them stay," Dr. Townsend added.

GROUND BREAKING FOR THE NEW LAKE--It was a cold April afternoon in 1966 when this group gathered at the site of the new Lake Greenbelt north of Clarendon for official ground breaking ceremonies. Shown here left to right are Senator Andy Rogers, Clifford Johnson, Greenbelt directors; Howard B. Boswell, Austin, and Marvin Shubert, Petersburg, of the Texas Water Development Board; William E. Berger, Texas Water Rights Commission; Dr. S.H. Townsend, president of the Green-

belt; Wendell Harrison, director; W. Carroll Knorpp, vice-president of Greenbelt; James R. Nichols of Freese, Nichols and Endress, Engineers; W.J. Lowe, Greenbelt attorney and secretary; and State Representative J.M. (Red) Simpson. Cap Morris, one of the first promoters of the Greenbelt Water Authority, was to have been honored at the ground-breaking Saturday but died a few days previously.

Childress had searched 75 years to find decent water. Quanah's search was as long

if not longer. Both have it now, and so do the other cities being fed by Greenbelt Lake, Claren-

don, Hedley, Memphis and Crownell.

the problem Childress and Quanah had, however."

"The other four didn't have

## PROGRESS FOR THE CITIES WE SERVE

Fort Worth and Denver Railway joins with you and all our other friends and neighbors in celebrating the formal opening of Lake Greenbelt.

The lake, with already half of its total 60,000 acre capacity filled, assures an ample water supply for the future industrial development of the Greenbelt cities of Clarendon, Memphis, Childress, Quanah and Crowell.

Formal dedication of the lake is a milestone in the progress of this up-and-coming Panhandle territory.

In the development of any area, transportation of raw materials and manufactured products goes hand-in-hand with an ample water supply. Fort Worth and Denver Railway has had a part in the growth and progress of the Greenbelt area for the past 81 years. Forward-looking improvements in the Railway's operation will be important factors in attracting new industries to the area and in the expansion of present industries.

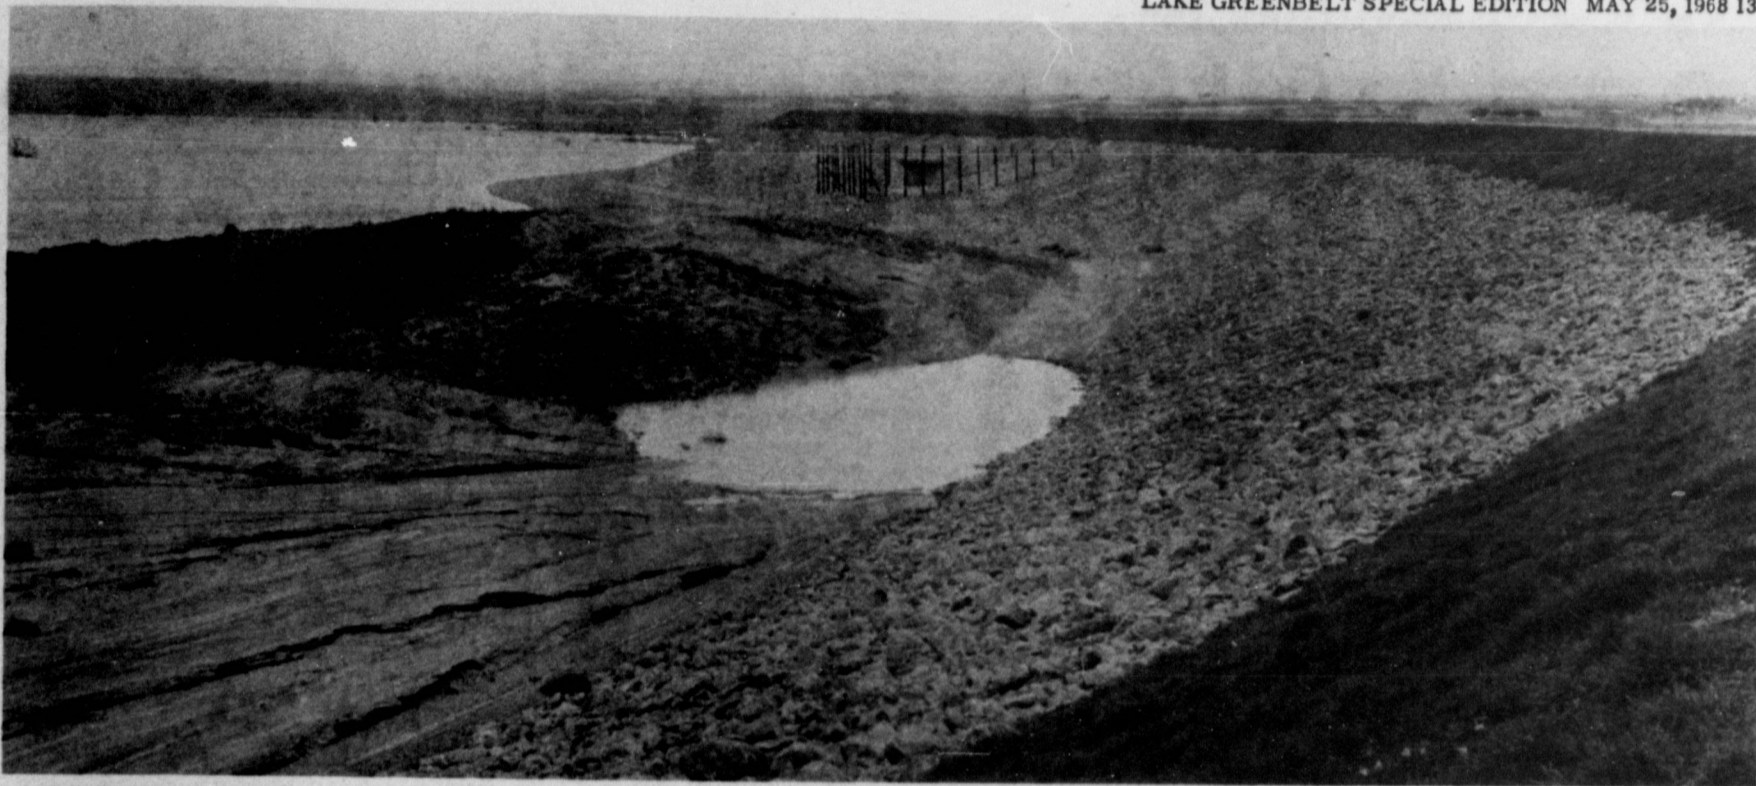

## BURLINGTON LINES

CHICAGO, BURLINGTON & QUINCY RAILROAD

COLORADO AND SOUTHERN RAILWAY

FORT WORTH AND DENVER RAILWAY

ALREADY MORE THAN HALF FULL, the Lake Greenbelt moved its shoreline closer to the top of the dam during recent spring rains. One of the deepest lakes in Texas, Lake Greenbelt will be some 85 feet

deep at the dam when it reaches the maximum lake level. The blue waters receive much of its water from springs.

## Greenbelt Dam 110 Feet From River Bed

It took 3,600,409 cubic yards of dirt to build the Greenbelt Reservoir dam to a height of 110 feet and length of 5,350 feet, according to James Kuhn, general manager of the Greenbelt Municipal and Industrial Water Authority.

"The dam at its widest point is 680 feet and it's 24 feet wide at the top," he added.

There is nothing inside the dam itself, but there is a 7-foot square conduit more than 600 feet long at the bottom of the dam for the spillway. The

conduit runs under the highway east of the dam and opens into the river.

"Running alongside the conduit is a 36-inch service outlet which extends from the dam to the pumping station, then reduces to a 27-inch concrete pipe from the pumping station to the filter plant. The entire pipe length from dam to plant is about 10,000 feet," Kuhn said.

When full, the reservoir will be 87 feet deep at the dam,

and the Greenbelt Lake will extend 4 1/2-5 miles from the dam.

"The river bed goes up 25 feet to the mile from the dam, and that will give you some idea of how deep the water will be generally," Kuhn said. "That's a pretty steep slope, so the lake will get shallow pretty quick."

In comparison, the slope of the Canadian River at Lake Meredith is about 5-feet per mile.

# Greenbelt Seeks Concessions Proposals

"We're ready to begin receiving proposals from those interested in marinas, restaurants and other commercial facilities around Greenbelt Lake," General Manager James Kuhn said.

The Texas Highway Department already has \$30,000 set aside for boat launching ramps on the north and south sides of the 5,350-foot long dam.

"These are double boat ramps, and in addition to them, there will be paved parking and paved access roads to the ramps from the highway. Landscaping also will be done by the highway department," Kuhn said.

The sites are picked, but no construction date has been scheduled.

"We're rather apologetic for not having recreation facilities ready around the lake," Kuhn said, "but things have moved so quickly we haven't had a chance to complete our Master Recreation Plan yet."

The dam, pipeline, filtering plant and other facilities were finished nearly a year ahead of schedule.

"We can only go one step at a time, and up to now it has taken all our time to get to where we are," he added.

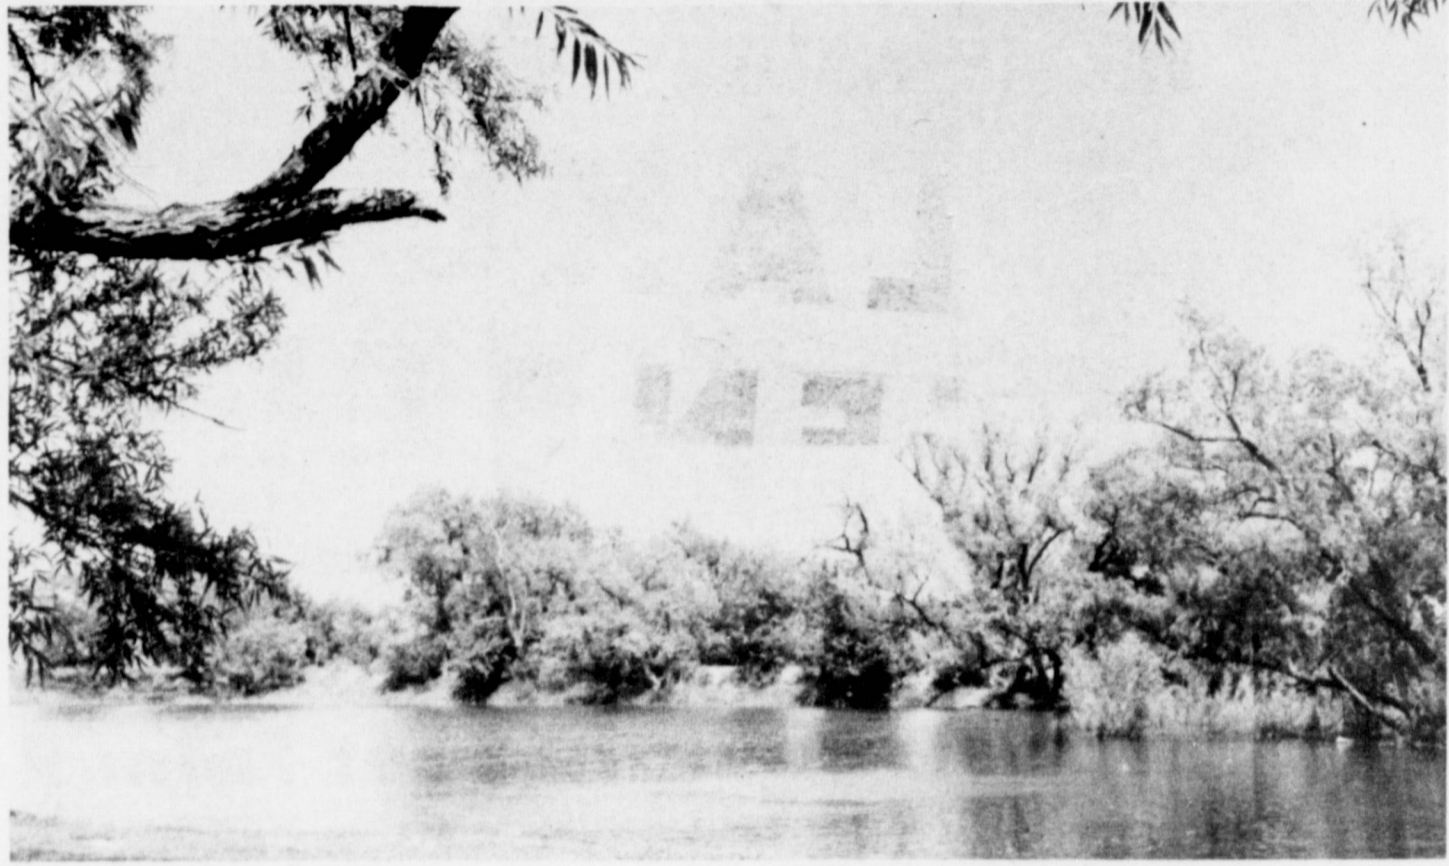

Eventually there will be 1-2 areas where large family shelters will be built for gatherings and family reunions. There will be several individual shelters and eating places set up.

"We are finishing a survey now showing where the waterline eventually will be, and when this is completed, we'll start on the shelters," he said.

There will be an area set aside for overnight camping, and water and restroom facilities will be built. There is a possibility showers will be installed for overnight campers, also.

"We have a total gross of about 3,500 acres, which includes the acreage inundated by the lake and that for development," Kuhn said.

The Greenbelt Municipal and

THESE PLACID WATERS of Lake Greenbelt have backed into Carroll Creek to form this beautiful scene. The creek forms part of the border for Sherwood Shores IX, the lovely Greenbelt Lake resort being developed on

the north side of the lake. George DeArmond, developer of the estates, said some of the most beautiful home sites will be along Carroll Creek.

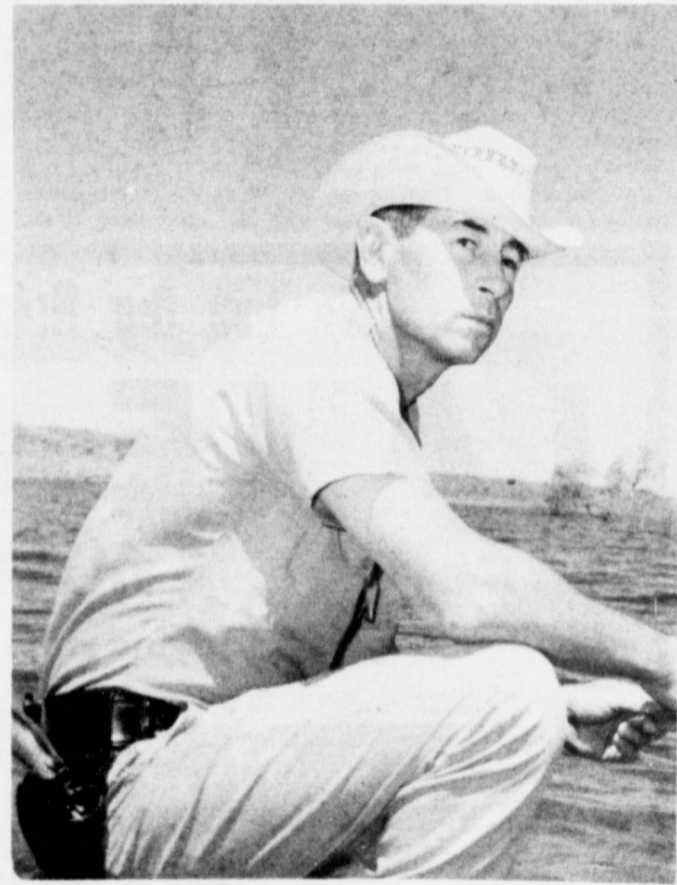

Industrial Water Authority and the Texas Water Development Board are working on a master plan now to development recreation facilities. The official wording of the recreation development section of the authority's by-laws reads:

"Section 6.01. DEVELOPMENT. Authority shall institute and administer a commensurate by the construction of the Reservoir. Authority shall undertake a specific study of the potential for recreational development of the Reservoir area and shall, after consultation with interested and affected agencies of the State in accordance with the laws of the State now in existence and as may be hereafter en-

acted, establish policies and procedures for effectuating an active program of recreational development for and on behalf of the State of Texas, giving comprehensive plan of recreational development and supervision of facilities and potential made due regard to the financial resources available and the feasibility and desirability of such recreational developments."

Marvin Springer & Associates of Dallas, the same firm used by Amarillo in developing its municipal complex, is working on the master recreation plan.

"Developing facilities is a long and tough job. We don't want to be haphazard about it.

GREENBELT OFFICIAL--Carl Carter, shown here by Lake Greenbelt, is the lake's game management officer and will be supervising fishing and water sports at the lake.

## Congratulations GREENBELT MUNICIPAL & INDUSTRIAL WATER AUTHORITY

On The Formal Dedication  
Of Lake Greenbelt

Sunday, June 2

### Freese, Nichols & Endress

Consulting Engineers

Fort Worth And Austin

We want them to be very, very good, and up to now we just haven't had the time to dedicate ourselves to a comprehensive program for recreation," Kuhn added.

An 18-hole championship golf course is being built by the Clarendon Country Club on the north side of the lake. The course is staked out, and construction should begin in the near future.

The club has \$50,000 of its own plus a \$150,000 FHA loan to build its clubhouse, pro shop; swimming pool, boat docks and course.

"We're hoping we can get the top pros to play here. It won't be an easy course when we're finished," Dr. Keith Hudson, Clarendon Country Club president, said.

Every Memorial Day weekend will see Greenbelt Speed Boat Races, sanctioned by the National Outboard Association,

according to Mike McCully, Clarendon Post Master and president of the Greenbelt Woods and Water Club.

He said the chamber of commerce voted to sponsor the races annually, and have a traveling trophy to award the high point driver. "He has to win it three times in succession to keep it."

There also will be a Hell Divers Trophy, given to the first driver "who hits the water."

In addition, there will be an annual Greenbelt queen contest, with contestants from the Authority towns only.

"A trophy fishing tournament will be held every year. This is a heavy stringer contest with a combination of northern pike and bass determining the winner," McCully said.

Lake fishing opens May 29 and the tournament will begin May 30 each year.
