HOW TO PROFIT MOST WITH YOUR FARMING PLANS

Two of the most popular methods of carrying out units under the Soil Conservation Program for 1938 in order to receive money for the soil building practices will be contouring and terracing and strip cropping. Soil conserving acres for 1938 will be paid at the rate of 50 cents an acre. Terracing is rated at 200 linear feet for one unit. Every four acres of strip-cropping land on the farm will count as one unit and every eight acres of contoured land will count as one unit. At this season of the year, a black miller with bright vari-colored spots appear. This is the source of the fuzzy caterpillar that destroys grape and ivy vines and other plant life by eating the leaves. This miller, known as the "Seven Spotted Forester," has seven spots on its wing spread. One killed now means thousands less later.
