

Where States Will Exhibit at New York World's Fair

NEW YORK—Nearly every state in the union and at least two territories will have an exhibit in the above Court of the State Buildings at the New York World's Fair 1939. The area will be divided into the cultural divisions of the continent during George Washington's time with the Spanish buildings shown in the lower left corner, the French structures in the upper right and English or Georgian architecture completing the arrangement. Choice of location is up to the states.

The strength of bone is twice that of oak.

There are generally around 1,400 sailors on a battleship.

Letters From The People

Clarendon, Texas, August 30, 1938
Mr. S. M. Braswell, Editor, The Clarendon News, Clarendon, Texas.

Dear Mr. Braswell:
The object of this letter is explained as follows:

Since the date of repeal of our prohibition law, I have noted with regret, the constant and gradual encroachment of liquor and beer advertisements in our smaller publications. Perhaps I am not familiar with all the weekly publications in this section as I should be, and I do not wish to accuse any one wrongfully but I only know of a few such papers who do not accept beer advertisements.

I wish to commend you for the stand you have taken in this matter. I fear the public generally is not aware of the approaching danger, not only in our country, but in the whole of Northwest Texas as regards the liquor question. Your business may suffer a few dollars in not accepting such advertising but I feel that eventually you will win.

Personally, I would look with favor upon some other method by which the Old Age Assistance might be paid. I dislike the indirect method of encouraging the sale and consumption of alcoholic beverages in order to support certain worthy causes. Having been placed where I thought I could see some of these dangers has caused me to desire to commend you and any other publication whose convictions in this matter are same as yours.

Very Respectfully,
S. W. LOWE

Wednesday with Mr. and Mrs. Loyd Moreland.

Betty John Goldston spent the week-end with Juanita Bingham. Miss Virginia Williams spent Sunday with Mr. and Mrs. J. A. Meaders. Mrs. Meaders and Miss Katie took her to Ashtola in the afternoon where she is teaching.

Rev. and Mrs. White of Panhandle visited Mrs. F. K. Stone Sunday. Mrs. Lewis, who has been visiting here for some time returned home with them.

Mr. and Mrs. Milt Allen and Mrs. Brooks visited Mr. and Mrs. Grady Posey at Plainview Wednesday night. Mrs. Brooks spent the summer with her parents, Mr. and Mrs. Allen.

Mr. and Mrs. Curtis Pelton, Mr. and Mrs. Hubert Johnson and children, Gladys and Roy Lee, Mr. and Mrs. J. C. Longan, J. H. Green, Dempsey Robinson, Joe Frank Heathington, all were supper guests in the Pat Longan home Sunday evening.

Mr. and Mrs. Milt Allen visited his brother and family at Lubbock last week.

Mrs. A. J. Garland, who was quite sick spent all last week with her mother, Mrs. Reed at Ashtola. She was able to come home Sunday.

Mrs. W. A. Fronabarger of Buchanan, N. M., and Mrs. Ben Andis and little Joe Pat Wickline spent Wednesday in the Pat Longan home.

Mr. and Mrs. Pickering and son, Leslie, are vacationing in Colorado.

Mrs. A. C. Arnold, who has been visiting Mr. and Mrs. Arthur Arnold at Silverton, came home Saturday. Mr. and Mrs. Arnold announce the arrival of a son on Wednesday, name Walter Lewis.

MARTIN
(By Billie Ruth Bulman)

It seems that Sunday school is picking up considerably. We want to see a still larger crowd present next Sunday.

There is to be a chicken barbecue at the Martin school building Friday night, Sept. 9. We want to see a very big crowd out to have a big time. Each person is expected to bring one-half chicken each.

Mr. and Mrs. Jack Edding spent

I'M KEEN FOR YOU!

Together Again

YOU AND ME

The stars who thrilled movie-goers in "Pick Up," Sylvia Sidney, George Raft, are together again in Paramount's thrilling drama of love on parole, "You and Me," coming Wednesday, Thursday and Friday at the Pastime Theatre.

Sunday with Mr. and Mrs. U. G. Pittman.

Mr. and Mrs. George Bulman spent Sunday with Mr. and Mrs. W. L. Jordan.

Juanita Wilkerson and Velma Collier spent Sunday with Doris Bailey.

Mr. George Kavanaugh, Mrs. Walter Morrow and Mrs. U. G. Pittman spent the week-end fishing near Bowie, Texas.

We are very sorry to report that Mrs. Jess Sutton's children have been very sick the last week.

Mr. and Mrs. Lewis Marshall spent Sunday with Mr. and Mrs. Lee Marshall of Ashtola.

Mr. and Mrs. Richard Cannon, Mrs. J. A. Pool, Mrs. W. H. Morrow and Billie Bulman spent Sun-

day with Mr. and Mrs. Rufus Pool.

Mrs. Fred Easterling spent Friday with Mrs. George Bulman.

Mr. Harry Hartzog entertained the high school students from this school that attend Clarendon high school with a party last Friday night. Everyone enjoyed themselves very much.

Well, school days are here again. There were 2 high school students from here that started to Clarendon Monday morning.

The term "southpaw" describing a left handed pitcher, originated in the fact that baseball diamonds are laid out in such a way that the pitcher's left side is toward the south.

ARROWHEAD HUNTING HOBBY BEGAN AS SEARCH FOR COLORED ROCK IS MADE

In years past numbers of men have begun hobbies in most unique ways, but it remains for Chas. M. Lowry, manager of the Clarendon West Texas Utilities Co., office, to begin a hobby in a most unusual manner known to Clarendon people.

Approximately six months ago, Lowry in digging around in various Donley county rocky sections looking for colored rock with which to use some day as veneer for a home found several Indian arrowheads. At first it was a novelty; then as he found more arrowheads in his search for rock he became more interested in his new found hobby, and has found several hundred arrowheads since.

Besides arrowheads, Lowry has found hundreds of Indian scrapers, used in scraping fat from hides, as well as other interesting specimens of Indian art. Indian metates and pieces of pottery have been found by him.

Mounting 20 arrowheads of various sizes, mostly small ones, and shapes has probably been the highlight of Lowry's hobby to date. The heads are glued on black crepe paper and held behind glass in a large picture frame. Several beautiful and perfectly shaped specimens are in this collection.

Now, Lowry goes on expeditions (mostly in Donley county) to hunt arrowheads, and looks for colored rock on the side!

The average depth of the ocean below sea level is 12,450 feet.

Crankcase oil will prevent rust on metal parts of farm machinery if sprayed or brushed on before the equipment is placed in the tool shed.

GENERAL PLANS FOR 1939 AAA SAME AS THIS YEAR

General plans for 1939 Governmental agricultural adjustment program are the same as those now in effect.

This information was welcomed by more than 100 farmer-state committeemen, state AAA officials, and agricultural workers who met in Washington, D. C., recently to discuss 1939 plans.

Texas representatives at the meeting were Geo. Slaughter, Wharton, chairman of the Texas Agricultural Conservation Committee, and G. E. Gates, Laredo, a member of the committee; E. N. Holmgren, administrative officer in charge of the state AAA office; and Jack Shelton, vice-director and state agent of the Texas A. and M. College Extension Service.

Secretary of Agriculture Wallace told the group that no new agricultural legislation, with the exception of possible amendments, is expected for 1939. With machinery and procedure already set up to handle the provisions of the farm act of 1938, AAA workers will be enabled to bring the 1939 program to farmers without the delay experienced this year, when the legislation was enacted by congress in middle February.

Soil depleting allotments for wheat, cotton, and rice are to be set up in Texas while peanuts may not be given a special allotment but will likely be considered in the list of general crops, Slaughter said.

Consideration is being given to the proposal that special provision be made for commercial vegetable crops.

DAIRY COWS

FEED AND CARE BEFORE AND AFTER CALVING

A dairy cow will produce considerably more milk annually if dried off six weeks before freshening, than if milked continuously. A cow that is in thin flesh should be dry eight weeks. Experienced dairymen always provide this rest period so that their cows will be in good body condition for the hard work of the next lactation.

During the peak of lactation high producers frequently secrete in their milk considerably more nutrients than they can assimilate from the feed they are able to eat. Therefore, if they have stored a reserve supply of fat and other nutrients in their bodies before freshening, they can maintain a materially higher level of production during the time they are "milking off" this store. During the dry period cows fed good rations can replenish the stores of calcium and phosphorus in the skeleton that has been drawn upon during the flush of milk production. For this reason alone, it is undoubtedly important that cows have a dry period of reasonable length.

Put the cow in a dry lot and give her nothing but carbonaceous hay, such as sorghum hay, Johnson grass hay, Bermuda grass hay, etc. Do not give the cow any water for 24 hours. Then give the cow two gallons of water at a time two hours apart until she has consumed six gallons, then give her all the water she wants. However, continue giving her nothing but carbonaceous hay to eat for four or five days. The cow should be dry at the end of this time. The cow should then be put back on good pasture or silage and fed two to four pounds of grain mixture such as equal parts of ground corn, ground oats and wheat bran. The amount of feed will depend upon the size of the cow and the condition of the cow. The cow should have access to a mixture of three parts of steamed bone meal and one part salt. To the mixture of ground corn, ground oats and wheat bran should be added one percent oyster shell flour.

This same grain mixture should be fed the cow for the first ten days after calving. At the end of the ten-day period cottonseed meal may be added to the mixture. The amount of cottonseed meal to add to the mixture will depend upon the kind of pasture or silage. If the pasture has no clovers in it, use equal parts ground oats, corn wheat bran and cottonseed meal. If it does contain clovers use only 50 pounds of cottonseed meal. If the cow is getting grain sorghum silage and little or no pasture, use 50 pounds of cottonseed meal.—E. R. Sudaly, Extension Dairyman, A. & M. College.

By a new process ice cream is made in ten seconds.

HOME GARDEN PLOTS ARE IN SOIL DEPLETING PLAN

COLLEGE STATION — "The provision is of great importance to Texas and to the whole South," Miss Jennie Camp, home production planning specialist of the Texas A. & M. College Extension Service, said in commenting on the announcement that land used for home gardens may be excluded in calculating soil depleting crop acreage under the 1939 AAA program.

"Farmers, farm wives, and home demonstration club members have been puzzled over rulings of the past that counted vegetables for home use as soil depleting crops. They knew that their vegetables did not compete on the markets and that, from the soil conservation standpoint, their gardens were usually best cared for, most fertile plots on the farm.

"The new provision is evidence that not only the actual cash income, but the physical welfare and the diet of farm families is being considered."

Miss Camp quoted figures from the annual report of the Extension Service which indicated that more than 13 million pints of vegetables and fruits were canned in 1937 under the supervision and leadership of Texas county home demonstration agents.

"At the same time, there is much evidence that the diet of many Texas farm and ranch families is dangerously inadequate," she said. "According to the 1935 agricultural census, 215,317 farm families had no gardens, while 83.5 per cent reported no orchards. The average gross income on all Texas farms and ranches in 1937 was around \$233 per capita. When all operating expenses are deducted from this amount, it leaves little for the purchase of food.

"In Texas, it has been estimated that 450,000 farm people have fourth rate, or very poor diets, nearly 100,000 have third rate diets, 345,000 second rate diets, and 570,000, or only a little more than one-third, have very good diets.

She pointed out that if all families could enjoy really good diets, the results would be of national import. "It is our hope that with the emphasis of the new AAA ruling, 1939 will mark a new high in home food production," Miss Samp said.

Highway Engineer Van London Presented With Fine Watch Gift of Panhandle Friends At Pampa Dinner In His Honor

—Courtesy Pampa Board of City Development. As token of appreciation for eight years' outstanding service as Texas Highway Department Divisional Engineer, W. D. Van London is presented with a watch suitably engraved "From Panhandle Friends," by Sam M. Braswell, Clarendon, at Pampa, Monday evening, Aug. 29th.

The Tale of the Cow

Christopher Columbus mixed in a bull and several cows among his crew and supplies when he set sail on his second trip to open a new deal in a new country. According to statistics there are now 24,902,00 cows in the United States. In the lifetime of a cow she produces five or ten—or maybe twenty—quarts of milk daily, except when she takes time off to have a calf; and after she's all worn out her owners trade her in to the butcher, and use the allowance to buy electric milkers and perfect sanitary conditions in the farm.

Each cow in time of production furnishes enough milk for five persons—comparing figures of population of people and cows. So, don't attempt to discount the size and importance of bossy's job until you read the figures on monthly farm income, issued by the United States Department of Agriculture.

In the official statement the farmers were shown to have received 765 million dollars from January to the last day of June this year for milk, which was the only major farm commodity that returned farmers more cash income during the first six months of this year than for the same period last year. Grains, fruits, vegetables, cotton, meat animals, poultry and eggs, and other farm businesses showed a decrease in income as compared with the 1937 period.

There is magic in the story of milk. If you know it happens to be in the bag of a cow in the first place then you have a start on the fellow writing this article (but I've milked cows in my time). But Thomas H. McInerney tells me that milk is the most perishable staple food consumed today—and he knows because he is president of the great National Dairy Products Corporation. "Each piece of equipment which milk touches must be thoroughly washed and cleaned before the next day's supply arrives, which means practically dismantling a milk plant and putting it together again each day," he says. Illuminating facts for which we are indebted to Mr. McInerney are: The foods industry with all its branches sells more goods than any other in the nation. On the average, 34 basic foods netted the farmer less than 40 per cent of their retail price. The return from other basic foods netted producers from 40 to 65 per cent of their retail price, with milk near the top of 48 per cent.

In Mr. McInerney's company labor takes about half of what is left after National Dairy pays its farm milk bill, and most of what then remains after the farmers and labor are paid goes for gasoline, hay, feed and horses, bottles, crates, cartons, repairs, taxes, power, light and heat, and a myriad of other costs. As for profit, the corporation earned less than 75 cents on the average individual's entire milk and dairy product purchases during the last calendar year.

Indians in America were familiar with rubber before Columbus discovered the continent.

Pampa Boosters Here Friday

Pampa Boosters, advertising the American Legion Labor day Picnic held near Miami Monday, stopped in Clarendon Friday and invited Clarendon citizens to attend.

The Pampa High School Band was with the delegation and gave several numbers. Homer Mulkey responded to the invitation with a short talk. Trinity County was named for the river of that name.

The Low Down FROM HICKORY GROVE

Anybody who does not think the women know what they are doing, they are barking up the wrong tree. And just because you see one woman painting up like a Cherokee, it is no sign they are all Cherokees.

And what I got in mind about the women it is this here organization they got down there in Suffern, N. Y., state—the Women's Rebellion.

And any politician who thinks he has been fooling the women, and thinks the women do not know who is paying him his nice salary, he is none too smart. He is like a pale boy coming in from behind the barn, and whistling, and with a notion his mother does not know he has been smokin'.

Women, they just want decent Govt., and do not pay too much attention to windy politicians. They are used to wind around home. But when they start house-cleaning, they do not just dust things here and there. They clean house.

And boy, if I was in politics and the women got after me I would fold up my tent and take to the tall timber.

Yours, with the low down,
JO SERRA

Bone, the most solid bodily substance is twenty-seven per cent water.

Unpaid doctor's bills in the United States amount to \$350,000,000.

THE AWFUL PRICE YOU PAY FOR BEING NERVOUS

Quivering nerves can make you old and haggard looking, cranky and hard to live with—can keep you awake nights and rob you of good health, good times and jobs.

What you may need is a particularly good women's tonic—and could you ask for anything whose benefits are better proved than famous Lydia E. Pinkham's Vegetable Compound? Let its wholesome herbs and roots help Nature build up more physical resistance and thus help calm your shrieking nerves, give more energy and make life worth living again. More than a million women have reported benefit—why not let Pinkham's Compound help YOU, too, to go "smiling thru" trying times like it has other grateful women for the past 3 generations? IT MUST BE GOOD!

WHAT WILL HE DO NEXT?

Howard Hughes "Unpredictable" Says Uncle Rupert

THE man who flew around the world in three days, nineteen hours, and seventeen minutes saw very little of it.

Howard Hughes was in the air only seventy-odd flying hours but he has said that over two hundred thousand hours were spent in preparing for it.

In the October issue of Cosmopolitan Magazine, Rupert Hughes, famous novelist, tells the story of his brilliant nephew.

"It was a pitiful thing that neither his father nor his mother lived long enough even to dream of his career as an aviator," Mr. Hughes writes.

"I am asked what Howard is going to do next. Even if he were disposed to tell me his secrets, it is difficult to take into one's confidence an ignoramus who doesn't even speak the same language.

Howard Hughes and his round-the-world ship.

"So I will not divulge his schemes for the future. Perhaps he is not quite sure of them himself. There is an infinity of problems to be solved, of improvements to be made, mechanisms to perfect, that will render flying safer, cheaper, more nearly fool-proof and nature-proof.

"When asked if he would fly around the world again, he is reported to have said, 'Not on your life.' He probably meant, 'Not on my life.'

"Howard's round the world flight has found our military forces cooperating to the utmost. The story was published that the personal cost of the flight to Howard was \$300,000. He denied this, saying that the Wright Company had given him the two eleven-hundred horse-power motors and that his Lockheed ship had cost him only sixty-thousand dollars, and the trip no more than five thousand.

"But with that contribution to his country's preparedness for defense went the consecration of years of labor and those four great days and nights of courage and self-sacrifice when his life was in pawn. So he has earned the floods of fame and glory that come to few men until after they have flown out beyond their reach."

Aren't Men Crude?

BURLINGTON LINES ASK AID IN REDUCING INJURIES AMONG CHILDREN

With the opening of another school year, the Burlington Railroad is again presenting to school authorities, the press, parents of children and civic organizations, the problem of trespass upon railroad property.

Mr. J. W. Mose, superintendent of the Burlington, said his railroad is determined to leave nothing undone to end needless personal injury and death to persons because of trespassing upon its property. The Burlington is entering upon the second year of a very intensive campaign to reduce such casualties.

Last year there was a reduction of 169 trespasses on the American railroads but the total number exceeded by thirty the annual average for the past ten years, according to the figures of the Interstate Commerce Commission.

Mr. Mose pointed out that the National Safety Council has shown that 3,670 fewer persons met death in automobile accidents the first six months of this year than during the same period a year ago.

By appealing to school authorities, parents and the children themselves, the Burlington Railroad is hopeful that its intensive campaign to prevent trespasser casualties will bear fruit to such an extent that incidents such as these will soon be a thing of the past.

Grade crossing accidents can be stopped entirely if people, when approaching crossings, will only take heed of crossing warning signs and approach the crossings cautiously. Motorists should have their cars under control before crossing track—look first to the right and then to the left, crossing then only when the way is clear.

Going back to the trespass problem, Mr. Mose said that school authorities and the press have been extremely helpful to the Burlington in its campaign. He stressed the importance of teachers and parents warning children not to play on or take short cuts across railroad property.

The following casualties have occurred to children on Burlington property in recent months, according to Mr. Mose. A little girl, only five years of age, in company with some other tots, was playing near a roundhouse.

WALKER LANE Clerk, District Court, Donley County, Texas.

Travel TEXAS

Heroes of the Alamo such a tiny band to block the invading thousand! Have your youngsters seen the spot where Bowie lay, where Travis drew the gallant line, the spot that marked the funeral pyre?

playing tag with some other children ran across a railroad track, stumbled over a rail and suffered very painful body bruises.

A 12 year old boy failed to give heed to his whereabouts and was struck by a train. His recovery from the injuries sustained was little short of miraculous.

By appealing to school authorities, parents and the children themselves, the Burlington Railroad is hopeful that its intensive campaign to prevent trespasser casualties will bear fruit to such an extent that incidents such as these will soon be a thing of the past.

FSA Supervisor Offers Help To Planning Mothers

School bells will be ringing and youngsters will leave behind another vacation time as they tread the path leading to education and greater usefulness.

Just now mothers are busy preparing clothes so that Johnnie and Mary and Will and Sue will be comfortable and neatly dressed. Shoes which are still wearable are being repaired. Gay prints, dresses are being made. Shirts, underwear and hose are being sorted, mended and neatly folded as mothers make sure each child has sufficient clothing to meet all needs.

In many homes however, money is scarce and mothers find it necessary to make over old clothing and do the very best with what they have. It is in such homes as these that the Farm Security Administration is seeking to help, according to Miss Lois Waggoner, home management supervisor, with offices in the Goldston building.

Another important factor in the lives of school children is that of adequate and balanced meals. It will be necessary for many boys and girls to carry lunches to school. Mothers are especially interested in preparing appetizing and nourishing foods to provide the needed energy for healthy, growing children.

Miss Waggoner says she has many helpful suggestions for preparing school lunches, such as homemade cheese, uses for home canned foods, tasty breads and attractive sandwiches which will insure a variety as days run into weeks and weeks move into months.

The Farm Security Administration is anxious to assist parents in making it possible for them to give their children every advantage of the country's public school system. Persons desiring detailed information should contact their nearest rural rehabilitation office, a part of the U. S. Department of Agriculture.

Watch Your Kidneys!

Help Them Cleanse the Blood of Harmful Body Waste Your kidneys are constantly filtering waste matter from the blood stream. But kidneys sometimes lag in their work—do not act as Nature intended—fail to remove impurities that, if retained, may poison the system and upset the whole body machinery.

There should be no doubt that prompt treatment is wiser than neglect. Use Doan's Pills. Doan's have been winning new friends for more than forty years. They have a nation-wide reputation. Are recommended by gratified people the country over. Ask your neighbor!
