WHERE GOOD AIM COUNTS

NINETEEN LOCAL MEN CALLED FOR PHYSICAL EXAMINATION

According to a report from the Texas Selective Service Board No. 52 at Pampa, nineteen local men have received their call to report for physical examinations this coming week.

The list of boys or registrants that will take their Physical Armed Forces Examination are: Riley Adamson, John W. Hermsmeider, L. M. Putman, John Molesworth, Hubert Leo Moffett, Robert E. Harrison, Louis Rihbert Ivey, Coy L. Brogdon, Charles K. Swinney, Herbert W. Davis, Billy J. McFall, Billy R. Mayo, Jimmy R. Bullock, Carl L. Evans, Samuel Jackson May, Walter M. Warner, M. B. Bolden, Billy E. Chilton and Ralph J. Hill.

This is the first information that the Leader has been able to receive in regard to those being called or sent for induction from this county. We have been informed that this information will be sent to us regularly in the future.

The following article was received at the same time of the above list of names and gives some idea of what is being done over the state.

Austin, Jan. 5 — Induction of 4,145 men for March was received by state Selective Service headquarters today, Brigadier General Paul L. Wakefield, director of Selective Service for Texas, announced.

The call, Texas' part of a national quota of 80,000, compares with a state quota of 4,137 for February and 4,142 for January. The March call brings the number of men called for since the beginning of the conflict in Korea to 22,912.

Calls by month have been as follows: September—2,513; October—2,514; November—3,453; December—2,008; January—4,142

February—4,137; and March—4,145. There is no indication yet as to size of the April call.

Local board quotas for the March call will not be made up until the latter part of January or the early part of February, the state Selective Service director said. Quotas and calls section of state headquarters must figure local board quotas, giving credit for enlistments from each area.

The men called up for the March quota will be furnished for the Army, as well as those for January and February. All those called up in 1950 were furnished for the Army. So far only the Army has requested manpower under the Selective Service Act.

Calls are made by the Secretary of Defense on the director of Selective Service in Washington, who allots quotas to the states on the basis of federal draft law regulations, giving credits for enlistments of men from the states.

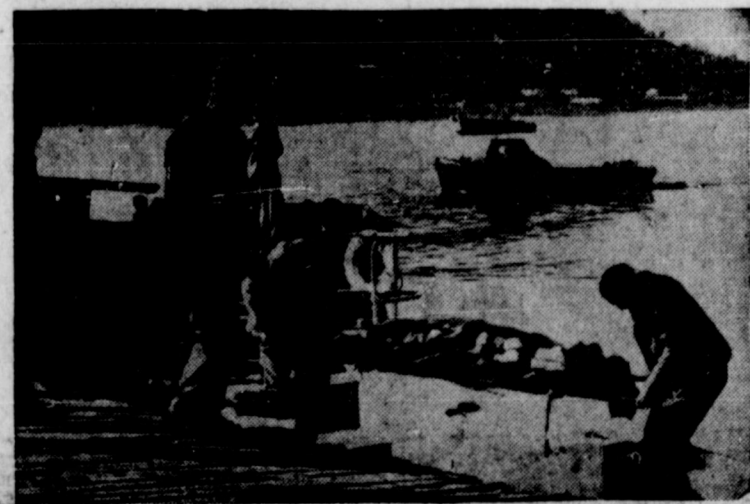

The state draft directors under these same regulations assign quotas to their respective local boards.

General Wakefield expressed confidence that "Texas will be able to fill the March quota. So far we haven't failed the country," he said.

Ray J. Noblitt, who suffered a heart attack at Altus, Okla. Christmas morning, was brought home Monday of this week. He is reported some improved although he suffered another slight attack last Friday. His physician stated that he would have to stay in another week or so before returning to his business.

Mr. and Mrs. J. I. Spurgeon and Mrs. A. J. Hicks and Pamela were Amarillo visitors Friday.

Local Banks Show Increase in Deposits

The three Clarendon Banks show a substantial increase in total deposits at the end of December in comparison with their statements on October 4, 1950. On December 30, 1950 there was a total of \$5,630,439.24 compared with \$4,842,275.51 in October. This is an increase of \$788,163.73.

In the loan departments of the three banks there was a decrease in loans over the same period of time. The total loans in October was \$1,835,828.19 compared with \$1,638,898.24 in December. This is a decrease of \$196,929.95.

This is a very good showing for this locality considering the crops that were gathered the past fall.

Miss Evelyn Wood spent the week end with her brother Winston Wood and wife in Lubbock.

Polio Poster Lad Coming To Texas

The farm lad whose cheery face graces 1951 March of Dimes campaign posters is coming to Texas. The boy, twelve year old Larry McKenzie, will visit Houston the first week in January to take part in the buildup for the 1951 March of Dimes in Texas' largest city.

Larry, Kuckville, N. Y., 4-H club boy, has told his Houston hosts that he would like to get away from big city activities during his Houston trip to get out into the country to visit with some typical Texas farm boys and girls.

Improvement of the young fellow, who was stricken with the bulbar type polio in August, 1949, has been remarkable, according to physicians.

For weeks Larry was desperately ill. His arms, legs, throat, chest, and even his eyes were affected. But thanks to the care financed by contributors to the March of Dimes he has rallied so well that he has already been able to dispense with his left-arm splint. He confidently expects to be back doing his share of the farm chores.

Young McKenzie's infectious good nature so impressed members of the Orleans County (N. Y.) Chapter of the National Foundation for Infantile Paralysis that he was successfully sponsored as the 1951 MOD poster boy. Now with both arms outstretched, his good left extended more than his splinted right, Larry's grateful, confident face presents a smiling symbol of the thousands who look to the March of Dimes for aid when polio strikes!

Larry's visit is counted on to remind Texans of the countless benefits from supporting the 1951 March of Dimes, January 15-31, especially since Texas has felt the full impact of polio the last three years and thus has incurred a large financial deficit. His pending trip also prompts the reminder that a little Texas girl, Wanda Wiley, of Austin, was the 1950 March of Dimes poster subject.

URGENT REQUEST

The American Legion is requesting that any person who has any property of the Legion borrowed — rifles, hospital beds, wheel chairs, or crutches, to check in such property if not in use and if still in use, please notify the Legion as to who has the property. The reason for this request is so that the Legion can get its records up to date. Not all of the Legion's property can be accounted for and therefore if you are not using this equipment, please check it in as it is very urgently needed. You may turn in the property to H. C. McMahan at the Fire Station or if you are still using the equipment, see Jack E. Gray, 207 Goldston Building and sign a receipt.

Mr. and Mrs. Geo. L. Green left Tuesday night for Ferris, Texas to attend the funeral of Mr. Green's mother, who passed away at the home of her daughter, Tuesday evening at Ferris, Texas. Mrs. Green at one time made her home here with her son and spent the past summer here with him.

Miss Evelyn Wood spent the week end with her brother Winston Wood and wife in Lubbock.

R-G Ranch Wildcat Now Tight Hole

All information in regard to the Lewis W. Welch R-G Ranch wildcat well has been shut off and the well is now considered a tight hole which means that there will be no further information or all information will be delayed until the owner wishes to release same. The last unofficial information we received gave the presumed depth at around 6850. The report last Wednesday gave the depth at 6,755 and at that time they were making around 50 feet every 24 hours. The last formation reported was granite wash. Tight hole orders were released by Mr. Welch Wednesday morning.

DONLEY COUNTY JERSEY HERD TOPS STATE IN PRODUCTION, 1949-50

According to word received this week from D. T. Simons, Secretary of the Texas Jersey Cattle Club and fieldman for the American Jersey Cattle Club, the J. R. Gillham registered Jersey herd made the highest average production average of any registered Jersey herd in Texas on official test. The Gillham herd produced an average of 550 pounds of butterfat and 10,652 pounds of milk in one year between November 1, 1949 and October 31, 1950. Gillham received a certificate from the Texas Jersey Cattle Club this week.

Hallmark Royal Design, 432667, the senior herd sire of the Gillham herd, is the second highest proven Jersey bull in the state of Texas. He was bred by the famous Hallmark Jersey Farm of Kansas City, Mo. His junior herd sire is Tulip's Design Bob, bred by Yearwood Farm of Fayetteville, Tenn., and sired by Tulip's Noble Jim, the Jersey bull that has sired more winners at the National Jersey Show than any bull in recent years.

Gillham has entered a number of his Jerseys in the Dairy Division of the Fort Worth Fat Stock Show and Exposition to be held at Fort Worth, where many of the winners of the 1950 National Jersey Show will compete the latter part of this month.

THE MARCH OF DIMES

"Lend Me A Hand."

That is the slogan of the 1951 March of Dimes which will open here and throughout the nation on January 15. The four words are expressed eloquently by the poster-portrait of a bright-faced American boy whose arms have been crippled by polio. He is Larry McKenzie, 12 years old, one of some 54,000 men, women and children to whom a helping hand was extended by the March of Dimes last year.

In three successive years, polio has struck more than 100,000 people in the United States. In that time it has cost the National Foundation for Infantile Paralysis \$58,000,000 to help them, as well as earlier victims still needing care. Since 1938, the patient-care outlay alone has been \$94,000,000 in March of Dimes funds. But these are only inanimate figures—the real story of the March of Dimes is people. That story is unfolded in hospitals, rehabilitation centers and clinics throughout the country where real people—not "cases"—are fighting their way back to useful lives. It is told in homes, factories and offices by men and women who have made comebacks over great odds and at great cost.

The knowledge that the individual battle can be and often is won should stimulate everyone to back the fight against polio. Tragically enough, the ranks of polio sufferers will be increased this year. We cannot control that —yet. But we can all lend a hand through the 1951 March of Dimes, January 15-31.

Two Local Buildings Change Hands

Two business buildings on main street changed hands the past two weeks. One was the purchase of the building owned by Bert Smith and now occupied by Hudson & Taylor, by S. S. DeGaihs, and the other was the purchase by Hudson & Taylor of the building first door north of Townsend Drug from R. W. Moore.

Mr. DeGaihs, associated with S. D. Saied of Sweetwater, plans to remodel the flitty foot building and open a first class department store around March 1st. It will be operated under the firm name of the Leader Store, it was reported.

Hudson & Taylor are now remodeling the building they purchased and plan to move in by February 1st. First plans called for the complete remodeling of the front of the store but some of the material needed is not available at this time and this will be done later. "Our new place of business will be remodeled throughout and will be modern in every respect," Mr. Taylor stated.

NEW CLOSING HOUR ADOPTED BY COURT HOUSE

It was announced this week that every office in the Donley County Court House would close at 12 noon each Saturday until further notice. Exceptions will be made on special occasions and during rush seasons for some offices but the general practice will be to close each Saturday at noon. If you have business to transact at the court house it will save you time and trouble to keep this new closing time in mind.

Game Management Program Expanded For State of Texas

The Executive Secretary of the Game, Fish and Oyster Commission announced plans for intensified game management studies on four widely separated areas recently purchased by the Commission. Areas were selected in various parts of the state because game management practices suitable in one type of habitat are not always adaptable to another.

Seventy-five percent of the funds used to acquire these areas was made available to the state by the Federal Government from excise taxes on sporting arms and ammunition. The remaining twenty-five percent of the cost came from the Texas Commission's special game fund.

TANKS BATTLE REDS

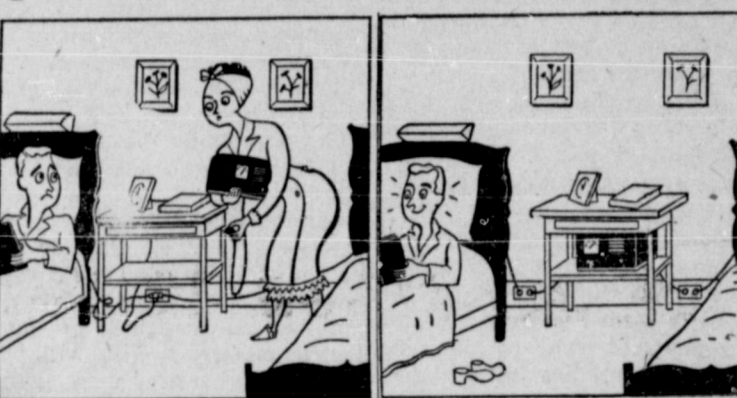

KOREA—Mighty tanks of UN forces, jammed with GI's, halt for a rest in the hard-fought withdrawal from northeast Korea. The men face new battles at Hungnam beach-head.

These areas have been urgently needed by the Commission as field laboratories or wildlife experiment stations, the Executive Secretary said. In the past all wildlife studies had to be conducted on privately operated land. Changes in the agricultural practices and frequent changes in ownership often destroyed the work of game technicians before the problems under study could be completed.
A major objective of these areas will be to determine how maximum numbers of game ani-

mals can be worked into present day land use without reducing the economic returns from the land. Practical methods of game habitat improvement which can be applied to similar ranges under private management will be developed. According to the Executive Secretary these areas will also provide refuges to insure the preservation of certain game species.

Restoration and maintenance of soil fertility for the best production of agricultural products as well as wildlife will be an important part of the program.

Trained game men will live on the areas and will maintain close cooperation with the Soil Conservation Service, the United States Department of Agriculture, the Forest Service and other land use agencies as well as schools and colleges.

This coordination will give the Commission the benefit of specialized knowledge. In return it will enable the cooperators to

study at first hand the progress of the program.

Another important function of these management preserves will be to spread game into adjoining ranges. According to the Executive Secretary some game species will be trapped and moved to suitable ranges where in time they may provide better hunting for sportsmen. Some of these areas may also be developed to provide important resting sites for migratory waterfowl.

The Executive Secretary further stated that landowners and sportsmen would be invited to visit the areas and see at first hand what is being done through management to increase our game supplies. Thus, they may learn practical game management methods which may be applied on their own properties or on areas where they hunt.

Mrs. Geo. Heckman visited her daughter, Mrs. C. V. Gilmore in Amarillo Sunday and Monday.

332 Foreign Students Enrolled This Year At University of Texas

AUSTIN — The University of Texas this fall has a record-breaking 332 foreign students. That's more than ever before, and, surprisingly, the far-away Middle Eastern country of Iraq has the most representatives—36—most of them sponsored by their government and studying engineering.

There are also 36 registered from China but not all of them are Chinese residents. Mexico, which led until this year, has 33 representatives, but only 19 are Mexican citizens and residents. Seven are Mexican citizens and

U. S. residents. The other seven reverse the two-nation status. Turkey, with 21 students, is fourth; and Colombia, with 15, ranks fifth. Some half-hundred countries, as well as Alaska, the Canal Zone, Hawaii and Puerto Rico are represented on the campus. More than one-third of the University's foreign students are from Latin-America.

Blowin' Out the Corners
by Uncle Zeb

As we listen to the news of the namby-pamby way that we have conducted ourselves as a nation the last few months; as we read the newspapers and see how the stumbling half-hearted and confused leadership has led us to a most embarrassing position. Not only embarrassing to face the rest of the world, but embarrassing to face the boys in Korea. Regardless of the right or wrong of the thing we have failed from either standard. If it is right that we should be in there fighting at all, then we have sent far too little and too late; we have made no sacrifices at home and should be ashamed to face these frozen kids that were so helplessly outnum-

bered. If we belonged in Korea then we have put far too little into the fight. On the other hand if we did not belong in there we have spilled too much, away too much of our blood already. This is not a case of our country making a mistake; we were never asked whether we wanted to go into Korea or not. What do you think?

This action in Korea ranks fourth in casualties of all our wars, and it is not supposed to be a war; just a police action called out by one or two men. Forty thousand have fallen one way or the other and many say we have not heard it all and yet we are at peace with the enemy. As late as ten days ago we were still selling them supplies. Forty eight out of every hundred of the troops in Korea are our own; forty four out of every hundred belong to South Korea; eight out of that same hundred belong to all of our friends in the United Nations. We must be about out of friends.

We hate to write so much this week about this one subject, but from the depths of my heart I believe that all we hold dear in this nation is in the balance. Our leaders need to be convinced what to do or we need some changes. People are speaking up and maybe we will help them know what to do. Mr. Izzard published a list of the people for you

to write if you wanted to help in this great try at bringing ourselves into a more united attitude. No people on earth can outfight our people, but they have brains, they want to know what we are fighting for. No people will give more to any cause than our people but we are business men, we want to know what the score is.

Maybe Mr. Acheson is wrong. Maybe Mr. Truman is, and of course I am; but the people are not wrong. They never have been, and if they are it will be the people that will suffer and they ought to have the final say. And this brings me to my main point. Let's get busy with letters and telegrams and tell the editors of the papers, the members of Congress and everyone that we think might be of help, what we think. Perhaps you have never written a letter to your congressman, but that is all the more rea-

son that he will listen to you. Great decisions will be made in the next two weeks in congress. Will they be what you want? Will they be what is right?

I still wish that my idea for a Department of Truth could have been given a try. But folks would ask me how would we get the honest men in the department, and how could we keep them honest. And how would we? But as a young man goes off to camp; as a father or a mother follows their boy to the train; what, oh what, would we give to know the Truth. Somehow we must find a thread of truth soon that we can unite upon or suffer endlessly for our mistake. If you have an idea pass it along to your congressman; it might be the solution to our problem.

Why do we give such good advice to others and never follow ourselves?

From where I sit... by Joe Marsh

Friendship—Four Thousand Miles Apart

Never quite got the hang of how to play chess myself, but I'll say this for the game—it started one of the strongest friendships I know of: between Dad Wilson in our town and a fellow in Sudbury, England.

The two of them have never met or seen each other—but for eight or nine years they've been playing chess by mail together. Dad puzzles over the Englishman's latest letter, takes a couple of days to think it over, and then airmails a chart of his next move.

Dad always thinks best with a mellow glass of beer beside his chessboard. And the fellow in England writes that he does the same. "Almost as if we were in the same room," says Dad contentedly.

From where I sit, you can talk about diplomacy and foreign policy, but it's often little friendly things—like a game of chess or a glass of beer—that can make for tolerance and understanding... between people of different nations, between folks here at home!

Dimes Fund Covers Gonzales Treatment

AUSTIN — The cost of polio patient care at Gonzales Warm Springs Foundation is borne by Texas chapters of the National Foundation for Infantile Paralysis, Ed S. Stewart of Abilene, chairman of the 1951 Texas March of Dimes, pointed out today.

NFIP chapters in Texas have spent \$187,000 in March of Dimes revenue at the Texas Warm Springs institution through September of this year, Stewart said. Gonzales Foundation officials reported to Stewart that the total of NFIP patient days as listed by months was as follows: January, 2,895; February, 2,349; March, 2,028; April 1,805; May, 1,937; June, 1,664; July, 1,927; August, 2,206; and September, 1,976.

The per diem rate paid by National Foundation chapters for treatment at Gonzales is \$10, exclusive of payments for braces and appliances.

"Gonzales is one of the leading Texas facilities for the treatment of polio convalescents," said Stewart. "The cost of this care at Gonzales, as at other hospitals, is met by county chapters of the National Foundation for Infantile

Paralysis through funds received from the March of Dimes.

"The average monthly bill at Gonzales for National Foundation for Infantile Paralysis patients has been \$20,874 for the first nine months of 1950.

"Under an agreement between the Gonzales Foundation and the National Foundation for Infantile Paralysis, the former does not raise money to pay the per diem cost of treating polio patients at Gonzales, since the March of Dimes organization, through its Texas chapters, assumes responsibility for the cost of whatever care is needed by the polio patient.

"The National Foundation for Infantile Paralysis works with Gonzales Warm Springs Foundation as well as with other hospital facilities to extend treatment to Texas polio patients, and NFIP compensates Gonzales and other agencies for such care.

"Exhaustion of March of Dimes funds raised by Texas Chapters has meant that all hospitals are extending credit to the National Foundation for Infantile Paralysis until after the 1951 March of Dimes, January 15-31."

Houston Fat Stock Show Date Set For Jan. 31 - Feb. 11

HOUSTON — Livestock show exhibitors, county agents and vocational agriculture teachers throughout the State of Texas are receiving premium lists for the 1951 Houston Fat Stock Show and Livestock Exposition.

This was announced by President W. A. Lee, who said the 19th annual show would be held January 31 through February 11 in downtown Houston's Sam Houston Coliseum.

At the same time, Mr. Lee said that more than \$102,000 in premiums and cash awards would be offered for the 1951 show—a new high—and that a record number of exhibitors were expected. December 15 will be the deadline for cattle, sheep and hog entries, Mr. Lee said, with poultry, turkey and horse entries accepted through January 15.

The best in rodeo entertainment has already been contracted for 19 performances of the World Championship Rodeo. Starring will be William Boyd, nationally known as Hopalong Cassidy in Western motion pictures and on television. Eddie Arnold and his

Oklahoma Wranglers have also been signed.

These two acts will be coupled with other action-packed rodeo events, Mr. Lee said, all adding up to a full two hours of entertainment.

We suppose the adman's child starts its prayer with "Give us this day our daily Honeycrust, Even - Baked, Whole - Wheat Bread."

It would seem a little bit ridiculous to have the air in your automobile tires checked several times a day. In the natural gas business, though, pressures are reported hourly on thousands of miles of pipe lines. Our employees work around the clock to maintain the pressures required to assure dependable supplies of natural gas to some 400 communities and over 2,000 industries in the Gulf South. Many of those industries are producing the material which will help to safeguard our own and other free nations. We believe it is our No. 1 job to keep them supplied with fuel, to the end that a lasting peace may be won for the world.

Can You Find Your Pulse?

Have you ever felt around at random on your wrist and tried to find that pulse your doctor frequently referred to? And failed? Along with many others, it may help you to know that the pulse is frequently easier for the

unprofessional to find there along each side of your neck, sort of towards the front.

You may even pick up a watch with a second hand and count the number of thumps you feel in that pulse in a minute. The average adult pulse rate is around 72 beats per minute but averages also run all the way from 50 to 90 beats, depending upon the age, circumstances, exercise, digestion, emotional disturbances and even excitement such as taking your own pulse.

When the heart contracts, you feel the reaction in the arteries such as the pulse there in the neck, in the temple, in the wrists or any other blood vessel that lies close enough to the surface for you to feel. There's a lot more feeling the pulse than the mere count, however. When your doctor feels your wrist he's also checking on the nature of the pulsation, the feel of the artery, the rhythm of the beat. Sometimes you might think you feel two

beats when only one long drawn-out beat was really there.

With that pulsation in your wrist, maybe your doctor at the same time listens to the sounds of your heart. He's expecting to get a lubb-dubb, lubb-dubb, lubb-dubb, sort of thing, over and over in the same rhythm, the same tone, the same slightly louder lub than the higher pitched dubb.

Your heart is two pumps, working simultaneously. The left side of the heart pumps oxygen-laden blood into the big artery that takes it to all the organs of the body. The right side of the heart receives the blood that has been to all those organs and comes back impure. The blood goes into the top of the right side of the heart, called the right auricle, through a valve into the bottom of the right side of the heart, called the right ventricle. When the right ventricle gets enough blood to be full, it closes that valve from the auricle above so no more blood can come in. This is when you get

the lubb sound.

Then the right ventricle empties the blood into the pulmonary artery, the blood vessel to the lung, and after the blood has left the ventricle it closes the bottom valve; this is when you get the dubb sound.

The blood goes through the lungs, leaving the carbon dioxide there and picking up oxygen. Then it goes over to the top of the left side of the heart, the left auricle, and enters the left ventricle from there. When the left ventricle is full of blood, it closes that valve from the left auricle, at the same time that the right ventricle is closing its valve. If those two valves don't close at the same time, your doctor hears an extra sound in his stethoscope, a sound that can best be described as T-lubb - - dubb.

From the left ventricle the blood goes down into the great artery that leads it to the circuit of the body and as the left ventricle is emptied, you feel the reaction in your pulse, that bottom valve goes down and you have

the same dubb sound, simultaneous with the right ventricle dubb sound. If those valves don't close at the same time, your doctor would hear something like lubb - - dubb-T.

Those valves are supposed to keep the blood from seeping back into the part of the heart they just left. Sometimes they don't do it and sometimes they don't open as wide as they're supposed to, forming an obstruction for the free flow of the blood. When the blood seeps back into the auricle or ventricle, it usually adds a "grrr" sound to the lubb-dubb in the stethoscope. A valve that doesn't open wide enough will end up as a "Eff" or blowing sound.

So you can see there are all kinds of different versions of melodies that your heart can beat out. Some of the variations from the basic beat can mean trouble and some don't mean much of anything. They all call for a more thorough check of the heart, of course.

checking the heart is the taking of the blood pressure. Your doctor pumps air into that cuff around your arm until he hears no sound from the stethoscope he's applied just below that cuff. Then he starts letting the air out. When the air goes out, the column of that mercury in the box by your arm starts going down. At the moment that the doctor hears a slight click in the stethoscope he notices what the reading is on the mercury column. That is, roughly speaking, the highest pressure at which blood flows through your vessels.

Your doctor keeps listening until there is no more noise in the stethoscope and notices at what point the mercury column stands when the sound dies out. The number makes the lowest point at which the blood flows and usually stands around 80 after adolescence.

The high point, called systole pressure, will normally run 110 to 140, going up about 20 points higher in elderly people.

"Through blizzard after blizzard my car performed better!"

"I was one of those selected to test new Conoco Super Motor Oil in my own car before it was put on the market. Through blizzard after blizzard, I travelled in Northern Colorado and Wyoming. BUT THOSE WERE THE TWO BEST WINTERS I EVER HAD ON THE ROAD! New Conoco Super improved the operation of my car. And at the end of the test, with proper drains and regular care, gasoline mileage was virtually as good as at the beginning." After a total of 386,422 miles, logged by Mr. Hubbard and other winter test drivers, Conoco engineers found no wear of any consequence! Analysis of crankcase drains showed that this great new oil actually stopped the dangerous accumulation of free water and acids, chief causes of winter wear. This test proved that new Conoco Super Motor Oil, with Oil-PLATING, fights off rust, corrosion and sludge. So, change to winter-grade Conoco Super Motor Oil.

AERIAL SURVEY: BASIC CHART DRAWN FROM PHOTO—Here is the Urique River with its deep Copper Canyon in a mountainous area of northern Mexico, depicted as it would appear on a preliminary base chart. Such a chart, when completed, would show not only the figures which, as seen here, warn aviators of hazardous heights, but also other data, such as trails. Information obtained from aerial photographs, made by the U. S. Air Force, often is used in making such charts. The next step in the process is the production of aeronautical charts which are in color and show the various kinds of data necessary to flying modern aircraft.

German Students Air Views On U. S. Customs

LUBBOCK—"Americans marry so young! In Germany you do not get married until you are about 30."

That is how Christine Sauer-mann expressed one difference in American and German customs. Christine is one of nine German girls taking Home Economics at Texas Technological College.

They are taking a year of training as part of the general re-organization and reorientation

program of German education. The students now studying at Texas Tech under the supervision of Dr. Mina Lamb are the only group in the United States at this time doing Home Economics work under the plan.

Speaking of the state fair at Dallas, the girls said, "The people were always so polite, even when there was a large crowd. Seeing the air view of the campus at the Tech exhibit made us feel like we were home again."

They expressed surprise that so many phases were covered in one fair, since in Germany each ex-position deals with one subject,

such as automobiles or home ap- pliances.

The girls also attended "South Pacific" and compared it favor- ably with the modern German operetta.

Casualness and friendliness at Tech also impresses them, since they are accustomed to social de- velopment through participation in professional and regional clubs.

They remarked that the dormi- tories here are less restricted in the U. S. and that dorms at the German universities are merely rooming houses.

The girls' average age is 24. They all have served two years apprenticeship on an approved farm, which trains from 40 to 120 students a year.

Most of them have had a year of teacher training and two years of technical training in home economics. All the girls except one plan to go into some phase of home economics teaching when they return.

Annelie Scheffler, an attractive brunette, has worked four years as an interpreter for the U. S. government. She plans to enter publicity work.

The girls are sports-minded

and consider physical education one of their most entertaining courses.

Their plan of study at Tech in- cludes home economics research and extension, nutrition, child development, farm housing and county home demonstration. Some of the girls also are enroll- ed in science courses.

Ruth Bathow, 22, is the "baby" of the group. She is from the Russian zone and plans to enter rural Home Economics when she returns.

become an economic adviser.

Four-H Club work will be the specialty of Anna Simon, 25.

Rosemarie Witting, 26, wants to teach home economics.

Miss Portia Hay and Tommy Vandiver of Amarillo visited her parents, Mr. and Mrs. R. A. Hay Sunday.

Mr. Jimmy Jenkins of Ama- rillo visited homefolks the week end. Mr. Jenkins has returned to his school work at Denton.

FLOOR FINISH AND HEATER ADDED TO GYM

While school was turned out for the holidays a new finish was put on the gym floor. It helps the looks of it very much and it will help the players immensely. The school also acquired a new circulating heater which will add to the comfort of the players and fans alike. The large fan will blow the warm air and keep the gym at a more even temperature.

Our Annual Letter

Well, Boys and Girls, it is now Income Tax Paying time. Time to stand up with your little noses in the corners while Uncle Whiskers gently picks your hip pockets and counts the nickels, asks where the others are that you have spent, and reminds you again that all is not well up in the Nation's Capitol, with all those billions of deficit dollars we owe, and more to come.

So go to your bank and try to borrow enough money to donate your portion, which I believe is about \$1850.00 per person (today) and still rising, with no hope of a stoppage. Of course this will not all be paid with your 1950 income tax, but Uncle hopes to get enough to pay a small part of the interest.

There is no escaping this ordeal, young or old, if during 1950, you earned as much as \$600.00, regardless of expenses or number of dependents you claim, some of which are not.

Remember, most everyone, except those past 100 years of age, or under two, perhaps must file. Don't run any risk. Seek out your favorite Income Tax Expert, and tell him your woes and he will probably get you to feeling worse than you do at present.

a Happy New Year.
Best wishes from your old friends,
